It shall be cured in accordance with standard commercial practice. The cured weight shall not exceed the green weight by more than 5 percent. The smoked or cooked weight shall not exceed 67 percent of the cured weight. Peppers and/or spices shall be applied in accordance with standard commercial practice.

2. Section 16 (a) (3) (iii) is amended to read as follows:

(vii) "Shoulder clod pastrami" means shoulder clod derived from commercial, good or choice grade regular chuck which has been cured and smoked according to standard commercial practice. The clod shall be separated from the chuck in the manner described in § 1364.452 (p) (7) (viii) of Revised Maximum Price Regulation No. 169. All outside fat shall be removed to within ½ inch of the lean.

The upper end of the clod shall be rounded in a smooth curve with all ragged pieces trimmed off. The cured weight shall not exceed the green weight by more than 5 percent. The smoked and cooked weight shall not exceed 65 percent of the cured weight. Peppers and/or spices shall be applied in accordance with standard commercial practice.

(viii) "Chuck roll pastrami" means that portion of lean meat derived from commercial, good or choice grade regular chuck described in § 1364.452 (p) (7) (xiv) of Revised Maximum Price Regulation No. 169. PART 1395—NONFERROUS FOUNDRY PRODUCTS

[RMPR 125,[1] Amdt. 10]

NONFERROUS CASTINGS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Maximum Price Regulation No. 125 is amended in the following respects:

1. Section 1395.1 (b) is amended to read as follows:

(b) Nothing in this regulation or in the General Maximum Price Regulation shall apply to any sale, contract to sell, or delivery of nonferrous castings by any person whose total sales of nonferrous castings, other than nonferrous castings which are exempted from this regulation by § 1395.1 (c), were less than $12,500 for the preceding three months period ending on the last day of December, March, June or September, as the case may be (here called "calendar quarter").

In figuring total sales for a calendar quarter, a seller who supplies casting under a toll or conversion agreement shall include his toll charge and the current maximum price of the metal supplied by his customer.

2. Section 1395.1 (c) is amended by the addition of the following note at the end thereof:

NOTE: For the purposes of subparagraphs (4), (5) and (6), the cost of machining and the cost of the casting shall be figured on a current basis, i. e. by the seller's most recent cost determination of wage rates, burden rates and material costs.

3. Section 1395.15 (a) (4) is amended to read as follows:

(4) "Castings of the same class" means nonferrous castings which possess a cer-

tain similarity. Only castings of the same type are considered to possess this similarity. (The following are examples of what is meant by castings of the same type: Two bushings, two cylinder heads, two pistons, two elbows, two propellers or two valves.) However, any two castings of the same type shall be considered to be sufficiently similar to be castings of the same class unless:

(i) They are made from different base alloys or metal of different alloy groups within any one of the base alloys (for listing of alloys groups see § 1395.3 (c)); or

(ii) They differ by more than 20% (figured on the lighter casting) in shipping weight or estimated shipping weight, except that difference in weight due to differences in machining shall not be considered; or

(iii) They differ in design or specification, including quantity, because of the direction of the customer or the order of a governmental agency and such change in design or specification results in (*a*) differences in size, weight, intricacy, tolerances, inspection requirements, or process of production and (*b*) likewise involves a difference in total cost of manufacture of 5% or more per pound (figured on the basis provided in § 1395.4).

A group of castings sold at a flat price may be considered as of the same class as another group of castings. The tests to be applied in determining whether groups of castings are of the same class are the weight and cost tests used for individual castings, except that average weights and costs shall be used. In addition the distribution as to types of castings within the group being compared should be substantially the same.

NOTE: A maximum price for a "group of castings" should not be confused with frozen flat prices which have been set with reference to only one or two bases such as alloy, weight, customer, or the like.

If castings are identical except that they are made from different alloys within the same alloy group, they are considered as castings of the same class but the maximum price is to be adjusted as provided in § 1395.3 (c).

This amendment shall become effective September 24, 1945.

Issued this 19th day of September 1945.

Administrator.

4. Section 4 (d) is amended to read as follows:

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to paragraph (a) (16) of Order A–2 under § 1499.159b of Maximum Price Regulation No. 188; *it is ordered:*

(a) *Manufacturer's maximum prices.* Johnson Manufacturing Company, 6601 San Leandro Avenue, Oakland, California, may add the following additional adjustment charges to its maximum prices for sales and deliveries to retailers of the articles listed below which it manufactures, resulting in the following adjusted maximum prices:

Article	Model No.	Maximum price	Adjustment permitted by par. (d) of Order No. 1052	Additional adjustment permitted by this order	Total adjusted maximum prices
Chest..	0336	$3.85	$0.19	$0.16	$4.20
	0436	5.10	.26	.12	5.48
	0536	6.00	.30	.17	5.47

The adjustment charges listed above may be made and collected only if each is separately stated on each invoice. The adjusted maximum prices are subject to the manufacturer's customary terms, discounts, allowances and other price differentials in effect during March 1942.

(b) *Maximum prices of purchasers for resale.* A person who hereafter buys an article covered by this order and resells

it in substantially the same form, may collect from his customer, in addition to his properly established maximum price in effect immediately before this order was issued, an adjustment charge in the same amount as the additional adjustment charge herein authorized for and which he pays to his supplier. If he did not have a maximum price in effect for the article at the time this order was issued, he may add the same adjustment charge to the maximum price which he hereafter establishes for his sales under the applicable regulation. If the applicable regulation requires the maximum resale price to be computed on the basis of cost, the reseller must find his maximum resale price, (not including the permitted adjustment charge), by using as cost his invoice cost less any adjustment charge stated on the invoice as a separate amount.

On all sales other than sales to the ultimate consumer this additional adjustment charge may be made and collected only if it is separately stated on each invoice. The adjusted price is subject to each seller's customary terms, discounts, and allowances on sales of the same or similar articles. The adjustment charge authorized in this paragraph (b) is in addition to any adjustment charge permitted for wholesalers by Order No. 1052 under Maximum Price Regulation No. 188.

(c) *Notification.* At the time of or prior to the first invoice to a purchaser for resale on and after the effective date of this order, showing a price adjusted in accordance with this order, the seller shall notify the purchaser in writing of the method established by paragraph (b) of this order for determining maximum adjusted prices for resales of the article. This notice may be given in any convenient form.

(d) All requests not specifically granted by this order are hereby denied.

(e) This order may be revoked or amended by the Price Administrator at any time.

This order shall become effective on the 19th day of September 1945.

Issued this 18th day of September 1945.

Administrator.

The Commonwealth & Southern Corporation (Commonwealth), a registered holding company, having filed a declaration pursuant to the Public Utility Holding Company Act of 1935, particularly section 12 (c) thereof and Rule U-46 thereunder, regarding the proposed payment of a dividend of $1.25 per share (payable on the 28th day after approval by this Commission to stockholders of record at the close of business on the 14th day thereafter) on its 1,482,000 shares of preferred stock outstanding, the aggregate amount of such dividend payment being $1,852,500; and

Commonwealth having stated in the declaration that "The Board . . . recognizes that the restatement of the carrying value of Commonwealth's investments, which restatement it is proposed in the Amended Plan will be made upon consummation thereof, will result in a decrease in such carrying value in an amount not less than the sum of (a) the amount shown as 'Earned Surplus' in the balance sheet as at July 31, 1945 and (b) the amount of net income to be received subsequent to July 31, 1945 and prior to the date of such restatement, provided such restatement is completed within some reasonable period, say by March 31, 1946, and, accordingly, the 'Earned Surplus' account is so qualified that, under the rules and practice of the Commission, payment of said dividend is subject to the requirements of Commission authorization under the provi-

The Commission deeming it appropriate in the public interest and in the interest of investors and consumers to permit said declaration to become effective; and

Commonwealth having requested that the effective date of the declaration be accelerated to facilitate the prompt payment of the proposed dividend to the preferred stockholders and the Commission deeming it appropriate that such request for acceleration be granted;

1945 SOYBEAN LOAN AND PURCHASE PROGRAM BULLETIN

The Commodity Credit Corporation (hereinafter called "Commodity") has authorized the making of loans on farm-stored soybeans and the purchase of soybeans stored in approved warehouses or delivered to designated delivery points, pursuant to these instructions. It is contemplated, however, that producers will dispose of most of their soybeans through regular trade channels rather than through this loan and purchase program. Where regular trade facilities are not available or adequate and it becomes necessary for Commodity to purchase soybeans, all such purchases for Commodity will be made by county agricultural conservation committees.

AUTHORITY: §§ 257.42 to 257.78, inclusive, issued under section 302 of the Agricultural Adjustment Act of 1938, as amended (52 Stat. 44; 7 U.S.C. 1302).

GENERAL INSTRUCTIONS

§ 257.42 *County agricultural conservation committees.* County committees will supervise the loan and purchase program. All purchase and loan documents must be signed by a member of the county committee—purchase documents by a committeeman of the county in which the soybeans were produced, and loan documents by a committeeman of the county in which the agricultural conservation program records are kept. State and county committees shall determine or cause to be determined the quantity and grade of the soybeans to be placed under loan or purchased by the committee, and the amount of the loan or purchase. All loan and purchase documents shall be completed and approved by the county committee, which shall retain copies of all documents, *Provided, however,* That the county committee may formally designate certain employees of the county association to execute such forms on behalf of the committee. County agricultural conservation associations shall collect a service fee of 1 cent per bushel for each loan to meet the expenses incurred in the operation of the program. No service fee shall be collected from the producer in the case of purchases.

§ 257.43 *Eligible producer.* An eligible producer shall be any person, partnership, association, or corporation, producing soybeans in 1945 as landowner, landlord, or tenant.

§ 257.44 *Liens.* The soybeans placed under loan or purchased must be free and clear of all liens, or if liens exist on the soybeans, proper waivers must be obtained for each lienholder. The names of the holders of all existing liens on the soybeans, such as landlords, laborers, threshers, or mortgagees, must be listed in the space provided therefor in the chattel mortgage (C. C. C. Grain Form AA, Revised, or C. C. C. Commodity Form AA) for loans, and in the Offer of Sale (C. C. C. Soybeans Purchase Form B) for purchases. The Waiver on the Offer of Sale, or the waiver and consent to mortgage the soybeans and the payment of the proceeds of the loan and the proceeds of the sale of the soybeans solely to the producer, as contained in the mortgage, must be signed personally by all lienholders listed or by their duly authorized agents; or, if a corporation, by an officer authorized to execute such instruments. Waivers of lienholders may be executed on separate instruments if complete identification of the commodity and producer is shown. The proceeds of the loan or purchase may be made payable to the producer and/or such other person or concern as the producer may direct in the space provided on the producer's note (C. C. C. Grain Form A, Revised, or C. C. C. Commodity Form A) for loans, and on the Offer of Sale for purchases. Producers should be sure to determine whether soybeans offered for sale or as collateral for loans are covered by previous mortgages or other liens.

§ 257.45 *Regional office of Commodity Credit Corporation.* The soybean loan and purchase program will be administered by the Regional Director, Commodity Credit Corporation, 208 South La Salle Street, Chicago 4, Illinois.

LOANS

§ 257.51 *Eligible soybeans for loans.* Soybeans eligible for loans must be stored on farms and shall be of any class grading No. 4 or better with respect to factors other than moisture and having a moisture content not in excess of 14 percent, which were produced in 1945, the beneficial interest in which is in the producer and has always been in him or in a former producer whom he succeeded before the soybeans were harvested. Soybeans grading weevily, or which are musty, sour, heating, or have any objectionable foreign odor shall not be eligible for loan. Loans will be made to eligible producers on soybeans stored on the farm in approved storage facilities, in the States of Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin, and such other States, except those listed immediately below, as may be approved by Commodity.

Commodity will not make loans on soybeans in the following States: Alabama, Arkansas, Connecticut, Florida, Georgia, Louisiana, Maine, Massachusetts, Mississippi, New Hampshire, Oklahoma, Rhode Island, South Carolina, Texas, and Vermont.

§ 257.52 *Basic loan rates.* The basic loan rates per bushel for Class I (Yellow) and Class II (Green) soybeans containing 14 percent moisture and grading No. 2 or better, except for green damage, in accordance with U. S. Grain Standards, shall be $2.04 per bushel.

The basic loan rate per bushel for Class III (Brown), Class IV (Black), and Class V (Mixed) soybeans, containing 14 percent moisture and grading No. 2 or better, except for green damage, in accordance with such Standards, shall be $1.84 per bushel.

Mixtures of Classes I and II eligible soybeans which contain 5 percent (actual) or less of Classes III and IV soybeans and bicolored soybeans, either singly or in combination, shall take the applicable loan rate for Classes I and II soybeans. If more than 5 percent of Classes III and IV and bicolored soybeans, either singly or in combination, are contained in a mixture of eligible soybeans which otherwise would take the loan rate for Classes I and II soybeans, the mixture shall take the applicable loan rate for Classes III, IV, and V soybeans. Mixtures of green soybeans in Class I and yellow soybeans in Class II shall be disregarded for purposes of determining applicable loan values.

§ 257.53 *Premiums and discounts—*(a) *Premiums.* Premiums shall be added to the basic loan rates for eligible soybeans which have a moisture content of 13½ percent rounded or less. The premium schedule follows:

MOISTURE

Percent	*Premium per bushel*
13.3–13.7 both inclusive	$0.01
12.8–13.2 both inclusive	.02
12.3–12.7 both inclusive	.03
11.8–12.2 both inclusive	.04
11.3–11.7 both inclusive	.05
Below 11.0–11.2 both inclusive	.06

(b) *Discounts.* Discounts from the basic loan rates shall be assessed in accordance with the attached schedule.

(c) *Foreign material and dockage.* Dockage and foreign material other than dockage, which, singly or in combination, total 2 percent or less, shall not be deducted from the gross weight of the soybeans. If the total weight of foreign material and dockage combined is in excess of 2 percent, the excess shall be deducted from the total gross weight of soybeans in the determination of the net number of bushels of soybeans. For the

purpose of this determination, dockage shall be computed in whole percents. Less than 1.0 percent actual dockage shall be disregarded and fractional percentages in excess of 1 percent shall be rounded to the next lower whole percent. Foreign material percentages shall be stated in tenths.

§ 257.54 *Date of maturity and interest rate.* Loans on eligible soybeans shall be available through January 31, 1946, and shall mature on demand but not later than April 30, 1946. All loans shall bear interest at the rate of 3 percent per annum.

§ 257.55 *Storage allowance.* In addition to the amount of the loan disbursed to the borrower a storage allowance of 7 cents per bushel for each (net) bushel of soybeans (see § 257.53 (c) above) placed under loan shall be advanced to the borrower at the time the loan is made. This storage advance shall be earned by the producer for each net bushel of soybeans, and shall not be repayable to Commodity (1) if the soybeans are delivered to Commodity on or after April 30, 1946, or (2) if, pursuant to demand by Commodity for repayment of the loan, the soybeans are delivered to Commodity prior to April 30, 1946, provided such demand for repayment was not due to any fraudulent representation on the part of the producer or to the fact that the soybeans, or any part thereof, were converted, damaged, threatened with damage, abandoned, or otherwise impaired. If, pursuant to a demand by Commodity for the repayment of the loan, or with the consent and approval of Commodity, the soybeans are delivered to Commodity prior to April 30, 1946, and the producer has not earned the 7 cents per bushel storage allowance, a storage allowance computed at the following rates shall be earned, provided the producer has not made a fraudulent representation in the chattel mortgage or in connection with the loan:

6 cents per bushel if delivered during the month of April 1946.
5 cents per bushel if delivered during the month of March 1946.
4 cents per bushel if delivered during the month of February 1946.
3 cents per bushel if delivered during the month of January 1946.
2 cents per bushel if delivered during the month of December 1945.

No storage payment shall be earned if the soybeans are delivered prior to December 1945.

A storage payment cannot be earned on a greater number of bushels than is specified in the chattel mortgage. On delivery of the collateral, any deficiencies due Commodity shall be deducted from any credits which may be due the producer from Commodity. The producer shall pay to Commodity any deficiency due Commodity. If the soybeans are redeemed, the producer is required to repay the storage advance plus accrued interest.

§ 257.56 *Storage.* Eligible storage shall consist of farm bins and granaries which are of such substantial and permanent construction, as determined by the county agricultural conservation committee, as to afford safe storage for the soybeans for a period of 1 year and afford protection against insects, rodents, other animals, thieves, and weather. Soybeans must have been stored in the granary for a reasonable period, as determined by the county agricultural conservation committee, prior to inspection for measurement, sampling, and sealing. County agricultural conservation committees shall inspect and approve storage facilities and shall arrange for measuring, sampling, grading, and sealing the soybeans collateral in approved structures. Chattel mortgages covering soybeans stored on the farm under loan must be executed and filed in accordance with the applicable State law. Where the borrower is a tenant, the expiration date of the lease shall be given in section 1 (e) of the chattel mortgage. If the expiration date of the lease is prior to July 1, 1946, the borrower must obtain, from the owner and other interested parties, consent that the collateral may remain in the described storage structures until June 30, 1946, without any charge to Commodity other than that agreed to be paid to the borrower for storing the collateral. The consent agreement is set forth in the chattel mortgage. Each producer must designate in section 1 (b) of the chattel mortgage a shipping point reasonably convenient for the delivery of the soybeans, as determined by the county committee. A separate note and chattel mortgage must be submitted for soybeans stored on each quarter section of land.

Commodity shall accept delivery of all the producer's soybeans in the bin or bins in which all or a portion of the soybeans therein are under loan. Each delivery shall be limited to the number of bushels that was in the bin at the time the loan was made, less any amount that has been removed since the loan was made. The producer shall be given credit for the number of bushels delivered at the loan rate applicable to the grade and class of soybeans delivered. If the soybeans delivered are not of an eligible loan grade the actual market value shall be furnished by the regional director of Commodity.

§ 257.57 *Determination of quantity of soybeans.* Loans shall be made at values expressed in cents per bushel. A bushel shall be 60 pounds of soybeans free of dockage and foreign material in excess of 2 percent when determined by weight, or 1.25 cubic feet of soybeans testing 60 pounds per bushel when determined by measurement. In determining the quantity of soybeans by measurement the following adjustment shall be made, fractional pounds of the test weight being disregarded:

	Percent
For soybeans testing 60 pounds or over	100
For soybeans testing 59 pounds or over but less than 60	98
For soybeans testing 58 pounds or over but less than 59	97
For soybeans testing 57 pounds or over but less than 58	95
For soybeans testing 56 pounds or over but less than 57	93
For soybeans testing 55 pounds or over but less than 56	92
For soybeans testing 54 pounds or over but less than 55	90
For soybeans testing 53 pounds or over but less than 54	88
For soybeans testing 52 pounds or over but less than 53	87
For soybeans testing 51 pounds or over but less than 52	85
For soybeans testing 50 pounds or over but less than 51	83
For soybeans testing 49 pounds or over but less than 50	82

§ 257.58 *Lending agency and source of loans.* A lending agency shall be any bank, cooperative marketing association, corporation, partnership, or person making loans in accordance with this bulletin, which has executed the Contract to Purchase on 1940 C. C. C. Form E. Producers may obtain loans through approved lending agencies or direct from Commodity.

§ 257.59 *Purchase of loans.* Commodity will purchase, without recourse, eligible paper held by approved lending agencies with whom Commodity has entered into a Contract to Purchase. Notes held by lending agencies must be tendered to Commodity for immediate or deferred purchase within 10 days of written request, or at least 10 days prior to maturity in the absence of written demand. Notes must be dated prior to February 1, 1946, and must be executed in accordance with these instructions, with State documentary revenue stamps affixed thereto where required by law. Notes executed by an administrator, executor, or trustee shall be accepted only where legally valid. The purchase price to be paid by Commodity for notes accepted shall be the outstanding principal due on such notes, plus accrued interest at the rate of 1½ percent per annum from the date of disbursement by the lending agency to the date of payment. Under the terms of the Contract to Purchase lending agencies are required to report weekly, on C. C. C. Form F, all repayments or collections on producers' notes held by them and to remit with such report, to the office of the regional director of Commodity Credit Corporation at Chicago, Illinois, an amount equivalent to 1½ percent per annum on the principal amount collected from the date of the note to the date of repayment.

§ 257.60 *Release of collateral.* A producer may obtain release of the collateral by paying to the lending agency or Commodity, whichever holds the note, the principal amount due thereon (including the storage advance) plus accrued interest. If the note is held by an out-of-town agency or by Commodity, the producer may request that the note be forwarded to a local bank for collection. In such case, the local bank will be instructed to return the note to the sender if payment is not effected within 15 days. All charges in connection with the collection of the note shall be paid by the producer. Upon repayment of a loan, the county agricultural conservation committee shall be requested to release the mortgage by filing an instrument of release or by a marginal release on the county recorder's records.

§ 257.61 *Release of part of collateral.* A producer may obtain release of all or part of the collateral in a bin by paying to the holder of the note the loan value, plus storage advanced and accrued interest, for the soybeans released. Form Commodity Loan 29 must be prepared and distributed, in accordance with instructions issued by the Agricultural Adjustment Agency, for each partial redemption.

§ 257.62 *Insurance of farm-stored soybeans.* Commodity Credit Corporation will not require producers to insure their 1945 farm-stored soybeans placed under loan. In case of a total loss of the soybeans resulting from an external cause, the producer will not, except as stated below, be held personally liable on the note, and Commodity Credit Corporation will allow the producer to retain the full storage payment of 7 cents per bushel. In case of a partial loss of the soybeans, resulting from an external cause, the producer will not, except as stated below, be held personally liable for that part of the indebtedness secured by the soybeans lost, and the producer's loan will be credited with the full storage payment of 7 cents per bushel on the soybeans lost. No loss will be assumed by the Corporation, however, if it is determined that the loss was caused by conversion by the producer, or his negligence, or caused by vermin, or there has been a fraudulent representation on the part of the producer in connection with the loan.

PURCHASES

§ 257.68 *Soybeans eligible for purchase.* Soybeans eligible for purchase shall be soybeans of all classes and grades, which were produced in 1945, the beneficial interest in which is in the producer and has always been in him, or has been in him and a former producer whom he succeeded before the soybeans were harvested, except that soybeans which grade weevily, sour (other than because of green damage), musty, heating, or which have a "commercially objectionable foreign odor" shall not be eligible for purchase by Commodity, except as provided in § 257.73. Soybeans which grade sample or would grade sample because of having an odor due solely to green damage or being sour due solely to green damage shall be eligible for purchase by Commodity.

Purchases will be made in all States through June 30, 1946.

§ 257.69 *Basic purchase prices and specifications.* The basic purchase price per net bushel (see § 257.74 below) of eligible Class I (Yellow) and Class II (Green) soybeans, containing 14 percent moisture and grading No. 2 or better except for green damage, in accordance with U. S. Grain Standards, sold and delivered to normal delivery points, shall be $2.04 per bushel.

The basic purchase price of Class III (Brown), Class IV (Black) and Class V (Mixed) soybeans, containing 14 percent moisture and grading No. 2 or better, except for green damage, in accordance with such Standards, shall be $1.84 per bushel.

Mixtures of Classes I and II eligible soybeans which contain 5 percent (actual) or less of Classes III and IV and bicolored soybeans, either singly or in combination, shall take the applicable loan rate for Classes I and II soybeans. If more than 5 percent of Classes III and IV and bicolored soybeans, either singly or in combination, is contained in a mixture of eligible soybeans which otherwise would take the loan rate for Classes I and II soybeans, the mixture shall take the applicable loan rate for Classes III, IV, and V soybeans. Mixtures of green soybeans in Class I and yellow soybeans in Class II shall be disregarded for purposes of determining applicable loan values.

§ 257.70 *Premiums.* Premiums shall be paid above the basic purchase price for eligible soybeans which have a moisture content of 13½ percent rounded or less. The premium schedule follows:

MOISTURE

Percent	*Premium per bushel*
13.3–13.7 both inclusive	$0.01
12.8–13.2 both inclusive	.02
12.3–12.7 both inclusive	.03
11.8–12.2 both inclusive	.04
11.3–11.7 both inclusive	.05
Below 11.0–11.2 both inclusive	.06

§ 257.71 *Discounts.* Discounts for soybeans, from the basic purchase price, shall be assessed in accordance with the attached schedule.

§ 257.72 *Green damage odor.* Soybeans grading sample because of having an odor due to green damage or being sour due to green damage shall be purchased at rates for such soybeans had such odors not been present.

§ 257.73 *Out-of-condition soybeans.* Soybeans which are weevily, grade sour (other than because of green damage), musty, heating, or which have a "commercially objectionable foreign odor" shall be subject to such discounts as may be agreed upon at the time of purchase.

§ 257.74 *Foreign material and dockage.* Dockage and foreign material other than dockage, which, singly or in combination, total 2 percent or less, shall not be deducted from the gross weight of the soybeans. Therefore, a net bushel shall be considered to be 60 pounds of soybeans containing not in excess of 2 percent dockage and foreign material. If the total weight of foreign material and dockage combined is in excess of 2 percent, the excess shall be deducted from the total gross weight of soybeans in the determination of the net number of bushels of soybeans. For the purpose of this determination, dockage shall be computed in whole percents. Less than 1.0 percent actual dockage and fractional percentages shall be disregarded. Foreign material percentages shall be stated in tenths.

§257.75 *Method of receiving soybeans.* (a) Country warehousemen may receive soybeans for immediate shipment to processors, terminal warehousemen having contracts with Commodity, or for storage in the elevator or Commodity bins. In order to receive soybeans for Commodity, a country warehouseman must have executed Uniform Grain Storage Agreement (C. C. C. Form H) and supplements thereto. Approval by the county committee must be obtained before any soybeans are placed in Commodity bins.

(b) County agricultural conservation committees may receive soybeans for storage in bins owned by Commodity, storage in other facilities, or for shipment. No car shall be loaded without prior approval from the regional director.

§ 257.76 *Soybeans received by country warehouses approved under the Uniform Grain Storage Agreement.* The country warehouseman shall receive soybeans delivered by wagon or truck from the producer, grade the soybeans and store them in his warehouse, or in Commodity bins, upon prior approval of, and under supervision of, the county committee; or shall receive and grade the soybeans for sale to processors or to terminal warehousemen who have contracts with Commodity. Producers shall file an Offer of Sale memorandum (C. C. C. Purchase Form B) with the county committee listing all lienholders and containing lien waivers, and shall designate to whom the proceeds of the soybeans sold shall be paid in the case of soybeans sold to Commodity.

(a) *Storage in warehouse for Commodity.* The warehouseman shall issue separate warehouse receipts for each lot of soybeans stored for Commodity showing the weight, moisture, class and grade, and all other information necessary to determine the premiums and discounts specified in §§ 257.70, 257.71, and 257.74. The warehouseman shall deliver to the producer said warehouse receipt and inspection certificates or, upon request of the producer, the warehouseman shall deliver such warehouse receipt and inspection certificates to the county office of the Agricultural Adjustment Agency. The county committee of the Agricultural Adjustment Agency shall issue the producer a non-interest-bearing sight draft for each purchase. The information on the warehouse receipt or inspection certificate shall be transferred to the sight draft. The sight draft shall be prepared in triplicate, the original given to the producer, one copy retained by the county committee of the Agricultural Adjustment Agency, and one copy mailed, on the date of issuance, to the regional office of Commodity. The sight draft and attachments may be presented to a local bank or direct to Commodity for payment. Charges shall accrue against the warehouse receipts in accordance with the Uniform Grain Storage Agreement, except that the charge for handling the soybeans in and out of the warehouse shall be 5 cents per bushel. The warehouseman shall be responsible for weights and grades to Commodity.

(b) *Storage in bins owned by Commodity.* Eligible soybeans containing not more than 14 percent moisture, and eligible soybeans grading sample (due to green damage only) and containing not more than 14 percent moisture and reasonably free from dockage and foreign material, may be stored in bins owned by Commodity upon prior approval by the county committee. All soybeans stored in Commodity bins must be placed in the bins under the direct supervision of the committee. Soybeans to be stored in steel or wooden bins for Commodity should be segregated according to color, except that soybeans of Classes I and II

which contain a total of less than 5 percent of Classes III and IV may be considered as the same color. If necessary, soybeans of the same color but different grades may be mixed. The warehouseman shall issue scale tickets and inspection certificates showing moisture, class, and grade for soybeans grading other than sample (due to green damage only). For eligible soybeans grading sample, the warehouseman shall issue scale tickets or inspection certificates showing moisture, class, grade, and percent of damage, and deliver such tickets and inspection certificates to the producer or, upon request from the producer deliver such scale tickets and inspection certificates to the county office of the Agricultural Adjustment Agency. The county committee shall issue the producer a non-interest-bearing sight draft for each purchase in an amount due the producer for the quantity, quality, class, and grade of soybeans delivered. The information on the scale tickets or inspection certificates shall be transferred to the sight draft.

§ 257.77 *Soybeans received by county committees.* In areas where there are no approved warehousemen, country warehousemen, or warehousemen's agents available at usual shipping points, or, where warehousemen do not cooperate in the purchase program, the county committee, or an agent designated by the county committee, will receive soybeans and make immediate shipment or store in Commodity bins.

Soybeans containing in excess of 14 percent moisture shall not be stored in bins owned by Commodity. However, producers may, by filing C. C. C. Purchase Form B with the county committee, deliver their soybeans for purchase to a point designated by the county committee, without first obtaining a grade determination, provided the soybeans do not have a moisture content in excess of 14 percent in the opinion of the producer and the county committee.

In the event the producer is requested by the county committee to deliver his soybeans to a point more distant than his usual delivery point for the purpose of assembling in carload lots, Commodity will allow not more than 5 cents per ton per mile haul for the additional distance necessary to make such delivery. In no event shall the county committee approve payments for an additional haul in excess of 4 cents per bushel without prior approval of the regional director of Commodity. The approval of payment for additional mileage shall be submitted on C. C. C. Grain Form J (Revised) by the county committee, which shall be mailed to the Chicago office of Commodity for payment. The amount claimed for additional mileage shall not be included in the amount of the sight draft.

County committees will weigh and load soybeans into bins owned by Commodity and will obtain a representative sample which shall be forwarded to the State office of the Agricultural Adjustment Agency or to an inspector licensed to grade soybeans. Upon receipt of the grade analysis, which shall include an entry for all grade factors needed to determine purchase price, the county committee shall draw a non-interest-bearing sight draft on Commodity in favor of the producer, for the total purchase price of the beans delivered in the same manner, and follow the same instructions as when the soybeans are placed in bins by the warehouseman.

§ 257.78 *Grade analysis.* Where requested by the producer, the warehouseman shall furnish the producer a complete grade analysis which shall include class, grade, test weight, moisture, percentage of splits, percentage of total damage, percentage of green damage, percentage of foreign material other than dockage, percentage of brown and/or black soybeans in case green or yellow soybeans are being offered for sale, and percent of dockage.

If the warehouse is not equipped to furnish all grade factors, a representative sample of the soybeans delivered shall be taken by the warehouseman and producer and sent to the State Agricultural Conservation Office Laboratory, or to an inspector licensed to grade soybeans, for grade determination before any payment is made to the producer.

All settlements with the producer by the county committee of the Agricultural Adjustment Agency shall be based upon an agreement between the warehouseman and producer of grade factors determined.

The producer may call for another grade if, in his opinion, any grade factors furnished by the warehouseman are incorrect. In such cases, a representative sample taken by the warehouseman and producer shall be forwarded to a qualified licensed inspector for analysis, and settlement shall then be made on the basis of such analysis. The individual requesting the second grade shall pay the cost of obtaining grade determination.

WINE AND PROOF GALLON CONTENTS

Pursuant to the provisions of sections 2808 and 3176, Internal Revenue Code, the Gauging Manual, approved November 21, 1938, (26 CFR, Part 186), is hereby amended as follows:

Section 186.13 (a) is amended to read as follows:

§ 186.13 *Wine and proof gallon contents.* (a) The proof of alcohol in receiving cisterns of industrial alcohol plants and the proof of spirits in cisterns of distilleries shall be adjusted to a whole or complete degree of proof before being removed therefrom: *Provided*, That the proof of alcohol transferred by pipe line from receiving cisterns of industrial alcohol plants to industrial alcohol bonded warehouses or denaturing plants, and the proof of spirits transferred by pipe line from cistern rooms of fruit distilleries to fortifying rooms of bonded wineries need not be so adjusted. The proof of alcohol or other spirits at industrial alcohol bonded warehouses, bottling-in-bond departments of internal revenue bonded warehouses, rectifying plants, and tax-paid bottling houses shall be adjusted to a whole degree of proof preparatory to filling containers such as tank cars, barrels, drums, or bottles. Adjusting the proof to tenths of a degree, either above or below the whole or complete degree, will not be permitted: *Provided*, That when tax-paid spirits at rectifying plants and tax-paid bottling houses and untax-paid spirits for bottling in bond for export at bottling-in-bond departments of internal revenue bonded warehouses are being prepared for bottling and are to be bottled and labeled in tenths of a degree of proof, such as 86.6, the proof of the spirits shall be adjusted to such tenths of a degree of proof. The restoration to the original proof and volume of rectified spirits upon which the rectification tax has been paid, by the addition of water, preparatory to bottling, shall not be deemed to reduction in proof or an increase in volume within the meaning of section 2801 (b) of the Internal Revenue Code.

PART 944—REGULATIONS APPLICABLE TO THE OPERATION OF THE PRIORITIES SYSTEM

[Priorities Reg. 32, as Amended Sept. 17, 1945]

INVENTORIES

(a) What this regulation does.

General Restrictions

(b) Restriction on delivery.
(c) Restrictions on receipts.
(d) Restriction on ordering more than needed.
(e) Adjusting outstanding orders when requirements change.
(f) Restriction on processing.

Exceptions

(g) In general.
(h) Receipts permitted after contract cancellations or cut-backs.

Miscellaneous Provisions

(i) Previous inventory authorizations.
(j) Separate inventories.
(k) Redistribution of excess inventories.
(l) Violations.
(m) Revisions of tables.
(n) Appeals, letters and questions.

§ 944.53 *Priorities Regulation 32—(a) What this regulation does.* This regulation contains the inventory rules formerly in § 944.14 of Priorities Regulation 1 and in CMP Regulation 2. Its purpose is to prevent excessive inventories by restricting ordering, deliveries, receipts and processing of materials in short supply. All kinds of materials are covered including raw or semi-fabricated materials, commodities, equipment, accessories, parts, assemblies or products of any kind, whether or not acquired with priorities assistance.

The general rule on receipts is in paragraph (c) (1), and this is controlling unless a more specific limitation or exception is indicated in Table 1 or 2 or a direction to this regulation, or unless Table 3 (formerly Order M-161) exempts the material entirely. Other exceptions to the inventory limitations are stated in paragraphs (g) and (h) and in directions to this regulation.

General Restrictions

(b) *Restriction on delivery.* No person may deliver any material if he knows or has reason to believe that acceptance of the delivery would be in violation of this regulation.

NOTE: For rule on making or delivering material earlier than required by customers, see Interpretation 8.

(c) *Restrictions on receipts—(1) General rule.* A person may not accept delivery of any material if his inventory of that material is, or will be, more than a practicable minimum working inventory reasonably necessary to meet his own deliveries on the basis of his current or scheduled method and rate of operation.

NOTE: For rule on when material is considered to be in inventory, see Interpretation 4; for rule as to seasonal industries, see Interpretation 1.

(2) *Special rules in Tables 1 and 2.* If Table 1 at the end of this regulation shows a special inventory limit on a particular material or product (either specifically or by reference to another WPB order or regulation), that limitation governs and the restrictions of paragraph (c) (1) above may be disregarded unless the applicable order or regulation (or a note in Table 1) also states that a practicable minimum working inventory may not be exceeded. The same is true with respect to particular classes of persons shown on Table 2. Where a specific period of time is shown on Table 1 or 2, no person affected may accept delivery of any material specified if his inventory of it is, or will be, more than he needs during the immediate period specified on the basis of his current or scheduled method and rate of operation. Even if an order or regulation is not listed on Table 1 or 2, any specific inventory limits imposed by it must be complied with. If an order or regulation listed on Table 1 or 2 is revoked or a listing removed from the tables all provisions of this regulation, including paragraph (c) (1), are automatically applicable.

(3) *Special rules on steel and copper in controlled material form.* The former inventory rules in CMP Regulation 2 on steel and copper in controlled material form (as defined in CMP Regulation 1) are now in Table 1 of this regulation, and the following special rules are applicable to deliveries to users of such steel and copper: (i) Where steel and copper are involved, the provisions of this regulation apply separately to each "item" in any class listed in Table 1 which is different from all other items in that class by reason of one or more of its specifications, such as length, width, thickness, temper, alloy, finish, method of manufacture, etc. (ii) If any producer of steel or copper exercises his privilege under CMP Regulation 1 of making delivery before the delivery date specified by his customer, the delivery may be accepted and the limits of this paragraph (c) exceeded to the extent that the excess results from the early delivery. (iii) The limits in Table 1 on receipts of steel and copper in terms of specific days' requirements apply only within the 48 States and the District of Columbia. Other special rules on steel and copper are explained in Table 1.

(d) *Restriction on ordering more than needed.* (1) A person may not place any order, whether rated or unrated, for delivery of any material on earlier dates or in larger amounts than he would be permitted to receive under this regulation. Orders aggregating more than he is allowed to receive may not be placed with different suppliers even though he intends to cancel one or more of them before delivery. However, this restriction does not apply to materials listed on Table 3 of this regulation nor to purchases by ultimate consumers for personal or household use. The restriction does not forbid the placing of orders for delivery under the conditions explained in Interpretation 11 to Priorities Regulation 1, but such orders may not be scheduled for production as long as this restriction is effective.

(2) This restriction does not require adjustment of orders placed before August 28, 1945. However, in view of its policy to prevent hoarding and speculative buying of materials in short supply, the WPB may direct adjustments or cancellations in individual cases where orders are in excess of reasonably anticipated needs especially where failure to do so might result in unbalanced distribution and curtail total production.

(3) If the inventory limits applying to any material are made more restrictive, whether by a change in Table 1 or otherwise, any person affected must immediately cancel, reduce or defer any order for the material to the extent that the scheduled delivery would result in an inventory greater than permitted by the new restriction and other applicable provisions of this regulation.

(e) *Adjusting outstanding orders when requirements change.* If because of a change in operations, slowing or stoppage of production, delayed delivery by a supplier, or any other change in requirements, a person who has ordered material for future delivery would, if he accepted delivery on the date specified, exceed the limits prescribed by this regulation, he must promptly adjust his outstanding orders, and, if necessary, postpone or cancel them. Paragraph (h) below describes what further deliveries may be accepted.

(f) *Restriction on processing.* No person may process, fabricate, alloy or otherwise alter the shape or form of any material if his inventory of the material in its processed, fabricated, alloyed or otherwise altered shape or form is, or will be, more than a practicable minimum working inventory. However, this does not restrict a person from altering the form of surplus materials by scrapping or reprocessing them, unless a WPB order specifically says otherwise.

Exceptions

(g) *In general.* This paragraph, paragraph (h) below, and certain directions to this regulation state general exceptions to the restrictions on acceptance of delivery described in paragraph (c) above, and to all other inventory restrictions on delivery and acceptance of delivery in WPB orders and regulations unless they contain specific provisions to the contrary. None of these or any other exceptions to WPB inventory restrictions on receipts permit a supplier to disregard any applicable WPB order or regulation which restricts production or delivery.

(1) *Exemption of Table 3 materials.* Materials listed on Table 3 at the end of this regulation may be delivered and accepted without regard to WPB inventory restrictions.

(2) *Materials bought under PR-13.* Priorities Regulation 13 provides a limited exemption from inventory restrictions in the case of items bought on special sales.

(3) *Imported materials.* A person may import any material without regard to WPB inventory restrictions, but if his inventory of it thereby becomes in excess of the amount permitted by this regulation, he may not receive further deliveries of it from domestic sources until his inventory is reduced to permitted levels. The inventory restrictions of this regulation do apply to any deliveries of the imported material he makes, and to the amount of it that any person accepting delivery from him may receive.

(4) *Advance stockpiling for civilian production.* A person may receive in anticipation of starting or resuming civilian production the minimum amount of material he would need during the first 30 days of such production, provided no priorities assistance is used to get the material. Records of such receipts and the basis on which they were computed must be preserved as required by § 944.15 of Priorities Regulation 1. This 30-day amount is a ceiling as far as advance stockpiling is concerned, and may not be considered as a "bonus" to be added to the amount of any material which a producer expects to have available for making his civilian product. Changes in this 30-day amount may be indicated for a particular material by a note in Table 1.

(5) *Minimum sale quantities.* Minimum sale quantities and production runs may be accepted to the extent permitted by Interpretation 2 to this Regulation. However, where Column 3 of Table 1 shows a specific amount of a particular material, that is considered to be the minimum sale quantity of it. Thus, if a person would be permitted under paragraph (c) to accept less than the amount shown, he may accept delivery of the full amount. In any event, after receiving a minimum sale quantity of any material, a person may not accept delivery of any additional quantities until his inventory of it is within applicable limits.

(6) *Small inventory exemption for particular materials.* If a note in Table 1 or 2 shows a specific amount of a particular material as a small inventory exemption, a person may accept delivery of any quantities of it as long as his total inventory of it after acceptance is no more than the specified amount.

(h) *Receipts permitted after contract cancellations or cut backs.* Where a person has promptly cancelled or cut back a contract with his supplier as required by paragraph (e) and the supplier is not otherwise prohibited from producing or delivering any material involved, delivery of it may be accepted and the inventory restrictions of paragraph (c) exceeded to the following extent only:

(1) Delivery may be accepted if the supplier has shipped the material or loaded it for shipment before the receipt of the instruction to cancel or cut back; or

(2) Delivery may be accepted of any special item which the supplier actually has in stock or in production or special components or special materials which he has acquired for the purpose of filling that contract. A special item, as used above, means one that the supplier does not usually make, stock, or sell, and which cannot readily be disposed of to others; or

(3) Even if the material is not a special item, delivery may be accepted from a producer if it has already been produced or is in production before receipt of the instruction to cancel or cut back, and it cannot be used to fill other orders on the producer's books.

NOTE: For special rules on continuing receipts of special items after contract cut backs, see Direction 3 to this regulation; and as to transfers of idle materials after cancellations or cut backs, see Direction 1. For effect of reduction in consumption rate on permitted inventories, see Interpretation 5.

Miscellaneous Provisions

(i) *Previous inventory authorizations.* Any specific authorizations, exceptions, or grants of appeals issued under § 944.14 of Priorities Regulation 1 or CMP Regulation 2 remain in effect according to their terms unless individually modified or revoked.

(j) *Separate inventories.* (1) In figuring his inventory, a person must include all material in his possession and all material held for his account by another person, but not material held by him for the account of another person.

(2) In the case of a person who on August 28, 1945, has more than one operating unit and keeps separate inventory records for them, this regulation applies to each such operating unit or division independently. A person may not make any further separation or consolidation of such operating units without special written approval of the War Production Board, unless it is purely incidental to a separation or consolidation which is made primarily for other than inventory purposes.

(k) *Redistribution of excess inventories.* Excess inventories of materials and products, including inventories of materials which are in such form as to be unusable by the holder, are subject to redistribution to other persons by voluntary action pursuant to Priorities Regulation 13, or if necessary for national defense, through requisitioning by the War Production Board.

(l) *Violations.* Any person who wilfully violates any provision of this regulation, or who, in connection with this regulation, wilfully conceals a material fact, or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(m) *Revisions of tables.* Tables 1, 2 and 3, attached to this regulation will be revised from time to time. As materials and products become in more ample supply, it is expected that they will be listed on Table 3. In special cases, particular materials or products may also be removed from Table 3 or added to Table 1. It is, therefore, important to be familiar with the latest revision of the tables.

(n) *Appeals, letters and questions.* Any appeal or other question regarding any provision of this regulation should be sent by letter in duplicate to the Office of Inventory Control and Surplus Utilization, War Production Board, Washington 25, D. C., Ref.: PR 32, unless Table 1 or 2 attached to this regulation indicates otherwise with respect to particular materials or classes of persons.

Issued this 17th day of September 1945.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

TABLE 1—MATERIALS AND PRODUCTS SUBJECT TO SPECIFIC INVENTORY PROVISIONS

NOTE: Table 1 amended Sept. 17, 1945.

Explanation. Materials or products listed in Column 1 are subject to the specific inventory provisions shown, as explained in paragraph (c) (2) of the regulation, except to the extent that different rules may apply as to certain classes of persons under Table 2.

Column 2 shows either the WPB order or regulation which controls inventories of the material, or if no order is specified, there is shown a period of time representing the maximum inventory permitted as explained in paragraph (c) (2). An asterisk (*) indicates that the practicable minimum working inventory limit of paragraph (c) (1) also applies, that is, if it would be less than the specific limit indicated.

A figure in Column 3 shows the minimum sale quantity, that is, the amount of the particular material which a person may receive under the conditions stated in paragraph (g) (5), even if it is more than allowed under Column 2. If no figure is shown, the rule in Interpretation 2 must be followed.

Column 4 tells the Division or Office in the War Production Board to which should be sent any appeals or questions regarding the limitations described. However, if the applicable order says appeals are to be filed somewhere else, such as the nearest WPB field office, that provision controls.

Column 5 (Remarks) gives explanations, exemptions or other special rules applicable to the particular material or limitation.

(2): The restrictions in this table 1 on receipts of controlled materials apply only to users of controlled materials, i. e., any person including a Government operating consuming establishment, who uses any item of controlled material for production, construction, operating supplies, or maintenance or repair. TABLE 2—CLASSES OF PERSONS SUBJECT TO SPECIFIC INVENTORY PROVISIONS

NOTE: Table 2 amended Sept. 17, 1945.

Explanation. The classes of persons listed in Column 1 are subject to the specific inventory provisions shown, as explained in paragraph (c) (2) of the regulation.

Column 2 shows either the WPB order or regulation which controls the inventories of the particular class of persons, or if no order is specified, there is shown a period of time representing the maximum inventory permitted as explained in paragraph (c) (2). An asterisk (*) indicates that the practicable minimum working inventory limit of paragraph (c) (1) also applies, that is, if it would be less than the specific limit indicated.

Column 3 tells the Division or Office in the War Production Board to which should be sent any appeals or questions regarding the limitations described. However, if the applicable order says appeals are to be filed somewhere else, such as the nearest WPB field office, that provision controls.

Column 4 (Remarks) gives explanations, exemptions or other special rules applicable to the particular class of persons or limitation. Where this column specifies certain materials, the limitation or exemption for the particular class of person applies only to the materials specified.

INTERPRETATION 1

INVENTORIES IN SEASONAL INDUSTRIES

Paragraph (c) (1) of Priorities Regulation 32 prohibits any person from accepting a delivery which will give him "more than a practicable minimum working inventory reasonably necessary to meet his own deliveries on the basis of his current or scheduled method and rate of operation". This does not prevent a person engaged in a seasonal industry who normally stocks up inventory in advance of the season from accepting delivery of his requirements of the inventory in question, provided (a) that he is not guilty of hoarding, and (b) that the deliveries accepted are no greater and no further in advance than those which he would normally accept in the ordinary course of his business to meet reasonably anticipated requirements. (Issued Aug. 28, 1945.)

INTERPRETATION 2

MINIMUM SALE QUANTITIES AND PRODUCTION RUNS

(a) *Applicable provisions of the regulations.* Priorities Regulation 32 forbids the making or acceptance of a delivery which will give the customer more than the "practicable minimum working inventory reasonably necessary" for him to make his own deliveries. A similar provision in paragraph (c) (2) of Priorities Regulation No. 3 says that a customer who is applying a rating for which no specific quantities have been authorized may use it only to get the "minimum amount needed."

(b) *Factors to be considered in determining how much can be ordered and delivered.* In determining a customer's minimum inventory "reasonably necessary" under Priorities Regulation 32 or his "minimum amount needed" under Priorities Regulation No. 3, it is proper in some cases to consider not only the immediate needs of the customer's plant but also whether the amount which he orders will be a minimum production run for his supplier. The customer may order and receive (and the supplier may deliver) the customer's requirements for a longer period in advance than he actually needs at the time of delivery if, but only if, it is not practicable for him to get the item from any supplier in the smaller quantities which he presently needs. The supplier may reject his customer's order if it is less than the minimum which he regularly sells or less than his minimum production run of a product which is mass produced under the conditions explained in Interpretation 3 of Priorities Regulation 1.

(c) *Relief in exceptional cases.* If the conditions stated in paragraph (b) above cannot be satisfied but the customer wants to order or accept delivery of more than his actual needs at the time of delivery, he should apply to the War Production Board for permission, stating the facts and why it is not practicable to satisfy the condition of paragraph (b).

(d) *Special provisions for controlled materials and Class A products.* This interpretation does not apply to deliveries of controlled materials under the Controlled Materials Plan. Rules regarding deliveries of controlled materials are given in Tables 1 and 3 of Priorities Regulation 32, and additional rules for Class A products are explained in Interpretation 9 to CMP Regulation No. 1.

(e) *Specific limits on ratings may not be exceeded.* This interpretation does not apply to the use of a rating where a specific quantity is stated in the instrument assigning the rating. If a person is assigned a rating for a specific amount of material, he may not use it to get more. If he finds that he can only get the material in larger quantities, he should apply for a modification of the rating.

(f) *No effect on contractual rights.* The times and amounts in which deliveries are to be made are to be determined by agreement between the supplier and the customer. Nothing in this interpretation relieves a supplier from fulfilling a contract to make deliveries at specified times in specified amounts. For example, if a customer has agreed to buy and a supplier has agreed to furnish 100 units a month for six months, this interpretation does not obligate the buyer to accept 600 units delivered during the first month, although it permits him to do so under the conditions described in paragraph (b). (Issued Aug. 28, 1945)

INTERPRETATION 3

MAKING OR DELIVERING MATERIAL EARLIER THAN REQUIRED BY CUSTOMERS

(a) Paragraph (b) of Priorities Regulation 32 prohibits a person from knowingly making a delivery which will give his customer more than the latter is permitted to receive under the regulation. Paragraph (f) of that regulation prohibits a person from processing or fabricating material if his inventory of the material in its processed or fabricated form will be more than a practicable minimum working inventory. These two restrictions should be borne in mind by any supplier who wants to make or deliver any material to his customer earlier or in greater quantities than required by the customer.

(b) For example: A supplier has accepted his customer's order of a product to be delivered at the rate of 100 a month for six months. The supplier would like to ship 200 a month for three months, or perhaps the entire 600 in the first month. Since the customer's requirements of 100 a month are presumably all he could accept within the inventory limitations of paragraph (c) of the regulation, the requirement that the supplier may not knowingly ship more than this would prevent him from delivering earlier than required by his customer, unless he received notice from his customer that the receipt of the larger amount would not cause him to have an excess inventory.

(c) Thus, before delivering a material or product substantially earlier or in greater quantities than is called for by his customer's order, a supplier is required to satisfy himself that the receipt by the customer of the changed quantities will be within the permissible inventory limitations applicable to the customer. The supplier may rely on any statement or notice to this effect from his customer, unless he knows or has reason to know that it is false.

(d) Similarly, assuming his customer would not be permitted to receive the larger quantities, the supplier should take this into account in his plans for processing the material or product so that he himself will not have an inventory greater than permitted by paragraph (f) of the regulation.

(e) This interpretation, of course, does not change the rule on delivery or acceptance of minimum sale quantities or production runs to the extent described in Interpretation 2 to this regulation, nor does it prevent earlier delivery of controlled materials under the conditions explained in paragraph (t) (4) of CMP Regulation 1 and Interpretation 33 to that regulation. Also, if any WPB order or regulation permits increased deliveries to the extent necessary to avoid shipping partly filled containers (such as paragraph (y) (4) of Order M-300), the rule in this interpretation does not prevent such deliveries. (Issued Aug. 28, 1945)

INTERPRETATION 4

INVENTORY MATERIAL

(a) Paragraph (c) of Priorities Regulation 32 prohibits a person from accepting delivery of material if his inventory of it is, or will be, greater than the maximum prescribed. For the purpose of this regulation, material is considered to be inventory until it is actually put into process or is actually installed or assembled. Putting into process does not include minor initial operations, such as painting, and does not include any shearing, cutting, trimming or other operation unless such initial operations are part of a continuous fabricating or assembling operation. Nor does it include operations such as inspection, testing and ageing nor segregation or earmarking for a specific job or operation.

(b) For example, if a manufacturer who uses wire or rod cuts a sufficient quantity of it to length at one time to maintain his operations for a considerable period of time, the cut pieces remain as inventory until processed into another form or until assembled or installed.

(c) If a manufacturer purchases and stores steel castings in the form purchased, the steel castings are not put into process when the castings are painted and stored. Consequently, the inventory of castings includes those painted and stored.

(d) If a manufacturer shears steel sheet and stocks in sheared form, such stock is still part of his inventory, if the material does not continue in production. (Issued Aug. 28, 1945)

INTERPRETATION 5

EFFECT OF REDUCTION IN CONSUMPTION RATE ON PERMITTED INVENTORIES

(a) Paragraph (c) of Priorities Regulation 32 prohibits the acceptance of delivery of material if a person's inventory of it is, or will be, more than the amount permitted by the regulation. If material is acquired within these restrictions, the regulation does not prohibit the mere possession of an inventory if a change in circumstances makes it greater than the amount permitted. For instance, if based upon current rate of production a manufacturer's permitted inventory of one item of steel is 100 tons and he has in inventory 60 tons, he may receive a further delivery of 40 tons. If after receiving the delivery of 40 tons his rate of consumption, because of contract cancellation or the like, is reduced drastically, the mere fact that he has an inventory of 100 tons, although his permitted inventory may be only 10 tons, is not a violation of the regulation. He may not, of course, accept any further deliveries of that item of steel until his inventory has been reduced below 10 tons (except as provided in paragraph (h) of Priorities Regulation 32 and Direction 3 to that regulation, relating to material already shipped, special items, etc.)

(b) Similarly, the regulation does not affect the liability of a customer for material in inventory when the customer cancels his contract. Such liability is controlled by the provisions of the contract between the customer and his supplier and by contract law. (Issued Aug. 28, 1945)

PART 1010—SUSPENSION ORDERS

[Suspension Order S-773, Reinstatement and Amdt.]

R. L. FAUBION CO.

R. L. Faubion, doing business as R. L. Faubion Company, at 2519 Southwest Boulevard, Kansas City, Missouri, engaged in the manufacture or repair of steel tanks, compressors, automotive lubricating equipment, gasoline pumps and similar items was suspended on May 10, 1945, by Suspension Order No. S-773. He appealed from the suspension order and, pending determination of the appeal, the suspension order was stayed by the Chief Compliance Commissioner on May 12, 1945. The appeal has been considered by Deputy Chief Compliance Commissioner Flood who has dismissed the appeal and directed that the stay be terminated and the suspension order reinstated.

In view of the foregoing, it is hereby ordered, that: § 1010.773 *Suspension Order No. S-773* issued April 30, 1945, and effective May 10, 1945, be and hereby is reinstated effective September 20, 1945, to expire January 18, 1946, the stay of execution directed by the Chief Compliance Commissioner on May 12, 1945, be and hereby is revoked effective September 19, 1945; and that the suspension order be modified by deleting paragraph (a) therefrom.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-902]

C. O. AUSTIN

C. O. Austin operates a saw mill at Gig Harbor, Washington. Between January 5, 1945 and June 23, 1945, he produced in his saw mill and sold 249,486 board feet of lumber, consisting principally of Douglas fir and of small quantities of Western hemlock, Western pine and cedar. All such lumber produced was graded No. 2, or better. 193,536 board feet of this lumber was sold by C. O. Austin on uncertified, unrated and unauthorized orders in violation of Limitation Order L-335. From August 1, 1944 to June 23, 1945, C. O. Austin failed to keep and preserve accurate and complete records of his production, inventory and sale of lumber, in violation of Priorities Regulation No. 1, C. O. Austin was familiar with Limitation Order L-335 and Priorities Regulation No. 1 and his actions consituted grossly negligent violations thereof.

These violations have diverted critical materials to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.902 *Suspension Order No. S-902.* (a) C. O. Austin, his successors or assigns, shall not sell or deliver any lumber to customers unless and until he establishes and keeps his business records in conformity with § 944.15 of Priorities Regulation No. 1, as amended.

(b) Nothing contained in this order shall be deemed to relieve C. O. Austin, his successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same way be inconsistent with the provisions hereof.

(c) This order shall take effect on September 20, 1945, and shall expire December 1, 1945.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-903]

COPELAND LUMBER CO. AND I. C. BRAITHWAITE

The Copeland Lumber Company is a corporation engaged in the retail lumber business in the states of Washington, Oregon and California. It has seven branch lumber yards in the state of Washington, of which one is located at Olympia, and is managed by I. C. Braithwaite. During the period from April 4, to November 24, 1944 the Olympia yard of Copeland Lumber Company supplied new lumber and building materials of the value of $1603.54 for the construction of a residence which it knew or should have known was being carried on without authorization from the War Production Board and in violation of Conservation Order L-41. The furnishing of these building materials without ascertaining whether or not the construction was authorized by the War Production Board constituted a wilful violation of Conservation Order L-41.

Such violation has diverted critical materials to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.903 *Suspension Order No. S-903.* (a) Neither the Olympia yard of the Copeland Lumber Company nor I. C. Braithwaite shall for four months from the effective date of this order apply or extend any preference ratings or use any CMP allotment symbols, regardless of the delivery date named in any purchase order to which such ratings may be applied or extended or on which CMP allotment symbols are used.

(b) Nothing contained in this order shall be deemed to relieve the Olympia yard of the Copeland Lumber Company and I. C. Braithwaite from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

(c) The restrictions and prohibitions contained herein shall apply to the Olympia yard of the Copeland Lumber Company and I. C. Braithwaite, their successors and assigns, or persons acting on their behalf. Prohibitions against the taking of any action include the taking directly as well as indirectly of any such action.

(d) This order shall take effect on September 20, 1945.

Issued this 10th day of September 1945.

Each line of women's and growing girls' shoes	50
Each line of house slippers	50
Each line of athletic shoes	50
Each line of wome's safety shoes	50

With respect to (i) infants' footwear and (ii) misses' and children's footwear, no manufacturer may exceed 100% of his aggregate civilian line quotas for all lines of infants' footwear, and no manufacturer may exceed 100% of his aggregate civilian line quotas for all lines of misses' and children's footwear, but his production within each of these two types of footwear may be distributed among his established lines in any manner desired, except that the production in any line consisting of less than 50 pairs or 2% of the total production of that type of footwear (whichever is greater) during the base period may not be increased by more than 25%:

Provided, however, That to the extent that a manufacturer's production of military footwear shows a decrease below that during his six months' base period, his production within any line of civilian footwear may exceed the civilian line quota for such line by its proportionate part of such decrease; and to the extent that such manufacturer's production of military footwear shows an increase over that during the six months' base period, each civilian line quota of such manufacturer shall be diminished by its proportionate part of such increase.

(2) No person shall manufacture any line of footwear (except military footwear) not manufactured by him in his six months' base period.

(3) *Exceptions to paragraphs (f) (1) and (f) (2).* (i) A lower priced line of the same type of civilian footwear may be substituted in whole or in part for a higher priced line.

(ii) The unused quota of any higher priced line may be added to the quota of a lower priced line of the same type of civilian footwear.

Any person may add 100% of the unused portion of his civilian line quota or quotas of men's dress and women's and growing girls' shoes to his quotas of the types shown below:

Type:
Men's work shoes
Youths' and boys' shoes
Misses' and children's shoes
Infants' shoes

In no event shall any unused quota be added to a higher priced line.

(iii) A person may exceed his civilian line quota for any line of women's safety shoes if a pairage equal to such excess is deducted from some other line or lines of footwear.

(iv) During the four month period beginning September 1, 1945, or in any subsequent four month period a manufacturer whose total production for the period will be less than $200,000 (based on wholesale value) is not subject to paragraph (f) (1), provided that no new higher priced lines are added and provided the manufacturer does not exceed his aggregate production in pairs during his six months' base period by more than 40%. The exemption in this paragraph shall not apply to a manufacturer affiliated, as a subsidiary or otherwise with another or others. This paragraph shall not authorize any manufacturer to increase his production by more than 40% in any line consisting of less than 50 pairs or 2% of his total production of that type of footwear (whichever is greater) during the base period.

(v) Paragraphs (f) (1) and (f) (2) shall not apply to footwear for the physically maimed or deformed on a custom-made basis and not for stock, to wood sole clogs utilizing no leather, to shearling or fur house slippers utilizing no other leather (except for outsoles), or to footwear shown on the following schedule if manufactured for sale at or below the net wholesale prices shown opposite the respective types:

Type:	*Maximum net wholesale price per pair*
Misses' and children's	$1.75
Youths' and boys' (without leather)	1.90
Youths' and boys' (utilizing leather)	2.50
Women's and growing girls' (including safety) (without leather)	1.90
Women's and growing girls' (including safety) (utilizing leather)	2.50
Men's work, dress and safety (without leather)	1.90
Men's work, dress and safety (utilizing leather)	3.00
House slippers (with or without leather)	1.60
Infants', sizes 0–4 (utilizing leather)	.90
Infants', sizes 0–4 (made without leather)	.75
Infants', sizes 4½ to 8 (with or without leather)	1.35

NOTE: For the purposes of this schedule, footwear utilizing no leather except for heel top lifts shall be considered as having been made without leather.

However, any person who wishes to produce shoes under the foregoing exemption must so notify the War Production Board by letter, stating the types of shoes to be made, the materials to be used, the price ranges and his estimated four months' production. A person who has not previously produced shoes in such price ranges must obtain specific price approval from the Office of Price Administration. In no case, may a person commence the production of shoes under this exemption until he has received acknowledgment from the War Production Board of the receipt of the letter of intention to produce and, where pertinent, of evidence of price approval from the Office of Price Administration.

(vi) The War Production Board may authorize transfers of quotas of footwear from one line or type to any other line or type and new or additional production in each line or type. It will in general be the policy of the War Production Board to authorize new or additional production in lines which will not require materials, components, facilities or labor needed for war purposes, and will not otherwise adversely affect or interfere with production for war or essential civilian purposes. Authorization will not be dependent upon the applicant's having been engaged in the production of shoes during the base period.

Application for such authorization shall be made by letter, describing fully the footwear manufactured or proposed to be manufactured, listing in detail all the materials to be used, and stating the pairs desired to be made in each price range, the source of the manpower that will be required, whether production will be reduced in any other line or lines, and all other facts pertaining to the application. Authorization of production of new lines under this paragraph will be made only with the condition that production may not begin until evidence is furnished of conformity with applicable Office of Price Administration regulations.

The War Production Board will issue footwear manufacturers' quota numbers for quotas authorized by the War Production Board or established because of base period production.

Production in new price lines, or increased production in established lines, may be granted by the War Production Board to cover production of civilian footwear purchased by or on behalf of United Nations Relief and Rehabilitation Administration or any other agency for foreign relief purposes.

(vii) Manufacturers qualifying for an increase in price on footwear with non-marking synthetic rubber soles, or soles and heels, under Order No. 13 under § 1499.3 (e) (3) of General Maximum Price Regulations, issued by the Office of Price Administration, may disregard such increase for the purposes of this paragraph (f). However, where the increase results in production of shoes in a higher price line, the number of pairs so produced shall be reported separately on the manufacturer's production report at the actual price, as indicated in the revised directions to said form.

(viii) Where a manufacturer produced in his base period a line of misses' and children's footwear of less than 50 pair or 2% of his total production of that type, he may increase his production of this line in any four month period to not more than six times his lawful production of the line in January, 1945, *Provided*, That, he deducts the production in excess of 100% of his base period production in this line from his other lines of misses' and children's shoes.

(ix) Any person with an established quota or quotas for the production of women's and growing girls' shoes may produce up to 10% of his aggregate quota or quotas in women's all-over genuine reptile (including frog) shoes in any line or lines at a net wholesale price of $4.50 per pair or less, provided that the number of pairs of shoes produced under this paragraph (f) (3) (ix) is counted as production against the quota for that line or those lines, if any. In the event that there is no quota in a line in which such shoes are being produced, or that the number of pairs in the quota for that line does not equal the number of all-over genuine reptile (including frog) shoes produced, the number of such shoes produced must be counted as production against the quota for that line, if any, and for the next lower lines in descending order as to price as far as is necessary, and exhausting the quota of each line before proceeding to the next lower line. Records must be kept of the number of all-over genuine reptile shoes produced in each line.

(x) Subject to the rules stated in this paragraph (f) (3) (x), any person who has no quota for the production of footwear, may produce for the four month period beginning September 1, 1945, and for each subsequent four month period, 24,000 pairs in any line or lines; any person whose civilian line quotas total less than 24,000 may increase his quota to 24,000 pairs in any line or lines for the same four month period; and any person whose aggregate quotas total more than 24,000 pair may transfer up to 24,000 pairs to any line or lines.

A person who has no quota, and a person whose production under this paragraph (f) (3) (x) will result in the manufacture of a type for which he has no quota or in a price range higher than his highest established price range for the same type of footwear, must obtain evidence of specific approval of his prices from the Office of Price Administration and submit it by registered mail to the War Production Board, Textile, Clothing and Leather Bureau, Washington 25, D. C., Ref: M–217, together with a letter stating the number of pairs he intends to produce in each new price range and new type, and the kinds of materials he intends to use.

(4) The period selected by any person as his six months' base period shall apply to all lines and may not be subsequently changed. After July 11, 1944, lines manufactured by any person in his six months' base period as previously filed with the War Production Board may not be revised, except to bring them into conformity with this order.

(g) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate referring to the particular provision appealed from and stating fully the grounds of the appeal.

(h) *Records.* All persons affected by this order shall keep and preserve records concerning their operations in accordance with § 944.15 of Priorities Regulation 1.

(i) *Reports.* All persons affected by this order shall file such reports and questionnaires as may be requested by the War Production Board subject to the approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(j) *Communications.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Textile, Clothing and Leather Bureau, Washington 25, D. C., Ref.: M–217.

(k) *Violations.* Any person who wilfully violates any provision of this order or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

[RMPR 136, Amdt. 11]

MACHINES, PARTS, AND INDUSTRIAL EQUIPMENT

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Maximum Price Regulation 136 is amended in the following respects:

1. Section 19 is amended by adding the following paragraphs (f), (g) and (h):

(f) *Drop forgings, metal stampings and screw machine products.* The maximum prices for sales by a manufacturer to any purchaser of any new drop forgings, metal stampings or screw machine products for which the manufacturer had a published list price or an established price in effect on the base date shall be the prices established under section 7 or computed under section 8, increased by 8%. For the purposes of this section, the term "drop forgings" is confined to such of these forgings as are subject to Revised Maximum Price Regulation 136 as machines, or parts or subassemblies of machines, listed in Appendix A.

(g) *Radio tubes*—(1) *Definition.* For the purposes of this section the term "radio tubes" means radio receiving tubes, prices of which were filed with the Office of Price Administration in accordance with the requirements of Revised Price Schedule 84 or Maximum Price Regulation 136, as amended, or may hereafter be filed in accordance with section 25 (a) of this regulation, and which were in actual use for radio receiver purposes in March, 1942. The term does not mean special purpose and transmitting tubes or any tubes not made in March, 1942, or tubes for which list prices were not established on March 31, 1942.

(2) For the purposes of the increased prices provided by this paragraph, the phrase "base date prices" shall mean the maximum prices in effect on March 31, 1942, as established by Revised Price Schedule 84.

(3) The maximum prices for sales by manufacturers of new radio tubes, except sales of new radio tubes to resellers or sales for replacement purposes, shall be the higher of the following prices:

(i) For unmodified tubes, the maximum prices established by section 7 or the base date prices increased by 10.4%.

(ii) For modified tubes, the maximum prices computed under section 8 or the maximum prices computed under section 8 using the base date prices increased by 10.4% as the "established price in effect on the base date."

(h) *Radio parts*—(1) *Definition.* For the purposes of this section the term "radio parts" means all parts and appliances designed for incorporation in radio receivers, electrical phonographs, and radio phonograph combinations (except radio tubes, metal stampings and screw machine products) prices of which were filed with the Office of Price Administration in accordance with the requirements of Revised Price Schedule 84 or Maximum Price Regulation 136, as amended, or may hereafter be filed in accordance with section 25 (a) of this regulation, and which were in actual use for radio receiver, electric phonograph, and radio phonograph combination purposes in March, 1942.

(2) For the purposes of the increased prices provided by this paragraph, the phrase "base date prices" shall mean the maximum prices in effect on March 31, 1942, as established by Revised Price Schedule 84.

(3) The maximum prices for sales by manufacturers of any new radio parts for the purpose of installation in radio receivers, electric phonographs, or radio phonograph combinations, except sales of new radio parts to resellers or sales for replacement purposes, shall be the higher of the following:

(i) For unmodified radio parts, the prices established under section 7 or the base date prices increased by the following percentages:

	Percent
Coils for radio equipment, radio transformers and chokes	11
Variable capacitors, speakers and speaker parts	9
Fixed capacitors and parts for electric phonographs or electric phonographs combined with radios	7
All other radio parts	5

(ii) For modified radio parts, the prices computed under section 8 or the prices computed under section 8 using the base date prices increased by the percentages listed in the preceding subparagraph as the "established price in effect on the base date".

2. Appendix A: Products Covered by the Regulation, is amended by adding the following products and base date:

Electric phonographs and electric radio phonograph combination parts when sold by the manufacturer of the part or when sold to industrial, commercial or governmental users.	March 31, 1942.

This amendment shall become effective September 19, 1945.

Issued this 19th day of September 1945.

PART 1390—MACHINERY AND TRANSPORTATION EQUIPMENT

[MPR 351, Amdt. 6]

FERROUS FORGINGS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Maximum Price Regulation 351 is amended in the following respects:

1. Section 1390.204 (b) is amended to read as follows:

(b) *Maximum prices.* For any ferrous forging for which the manufacturer had a list price in effect on October 1, 1941, the maximum price to any purchaser shall be such list price increased by 8% and adjusted for all extra charges, discounts, or allowances in use by the manufacturer on October 1, 1941, for a purchaser of the same class.

2. Section 1390.205 is amended to read as follows:

§ 1390.205 *Maximum prices; forgings without list prices*—(a) *General rule.* If the manufacturer had no list price in effect on October 1, 1941, the first applicable of the following prices shall be used:

(1) For any ferrous forgings which the manufacturer contracted to sell during the period April 1 to October 1, 1941, and at least once at any time prior to the last sale in that period, the maximum price shall be the net price at which the manufacturer last agreed to sell the forging during that period increased by 8%;

(2) For any forgings which the manufacturer contracted to sell at least twice prior to October 1, 1941, the maximum price shall be either (i) the net price at which the manufacturer last agreed to sell the forging increased by 8%, or (ii) the price computed under the provisions of § 1390.207.

There follows certain modifications of these rules.

(b) *Purchases of different classes.* If the price is established in any manner under paragraph (a) except by computation under § 1390.207 and the net price for the last sale prior to October 1, 1941 was applicable to purchasers of a particular class only, maximum prices to purchasers of other classes shall be determined by the use of the differentials in the price between different classes of purchasers which the manufacturer had in effect on October 1, 1941.

(c) *Quantity differentials.* If the price is established in any manner under paragraph (a) except by computations under § 1390.207 and the net price for the last sale prior to October 1, 1941 was applicable only to an order of a particular quantity, the maximum price applicable to an order of a smaller quantity may be adjusted, and for a larger quantity shall be adjusted, to reflect the difference in unit cost of producing the smaller or larger quantity: *Provided*, That the manufacturer customarily applied equivalent quantity differentials of the same nature, that is, based on differences in unit cost, on October 1, 1941. The difference in unit cost of producing the smaller or larger quantity shall be calculated on the basis of the price determining method and cost-estimating methods which the manufacturer used on October 1, 1941, in accordance with the applicable provisions of § 1390.207.

(d) *Comparable forgings.* For any ferrous forging for which the manufacturer had no list price in effect on October 1, 1941, and which is not priced under paragraph (a) except by computations under § 1390.207, but which is closely comparable to a forging the manufacturer agreed or offered to sell and which is priced under paragraph (a), except by computations under § 1390.207, the maximum price shall be the price for the most comparable forging established under paragraph (a) plus or minus the difference in total unit cost resulting from the change in specifications: However, this pricing method may be used only if it was the practice of the manufacturer on July 22, 1942, to calculate prices of forgings on the basis of prices previously charged for comparable forgings. For the purposes of this paragraph, total unit costs shall be calculated on the basis of the price-determining method and cost estimating methods which the manufacturer used on October 1, 1941, in accordance with the applicable provisions of § 1390.207. Changes in materials used, in tolerances, and in tests required may all be regarded as specification changes.

This amendment shall become effective September 19, 1945.

Issued this 19th day of September 1945.

CHESTER BOWLES,
Administrator.

§ 1388.1342 *Necessity.* The necessity for stabilization or reduction of rents for defense-area housing accommodations in the defense-rental areas designated in § 1388.1341 is as follows:

The designations of defense-rental areas hereby and heretofore made, in-

clude the entire United States. The problem of inflation is nation-wide, and effective prevention of inflation requires nation-wide action affecting substantially all elements of the national economy. War conditions have caused widespread increases in rents, and threaten further general price and rent rises. Any increases in housing rentals, an important factor in the cost of living, have serious inflationary effects. Additional rental increases are threatened not only by increased migrations from one part of the country to another in connection with war production and new or expanding military establishments, but also by general factors affecting the economy including the greatly increased purchasing power of the people of the nation in relation to a relatively stable and limited supply of housing. In each of the designated defense-rental areas, defense activities have resulted or threaten to result in an increase in rents for housing accommodations inconsistent with the purposes of the Emergency Price Control Act of 1942.

§ 1388.1343 *Recommendations.* It is the judgment of the Price Administrator that by April 1, 1941, defense activities had not yet resulted in increases in rents for housing accommodations within any of the defense-rental areas designated in § 1388.1341 inconsistent with the purposes of the act. Accordingly, the Price Administrator has ascertained and given due consideration to the rents prevailing for housing accommodations within each of the designated areas on or about March 1, 1942. The Price Administrator has considered, so far as practicable, relevant factors deemed by him to be of general applicability, including fluctuations in property taxes and other costs. It is the judgment of the Price Administrator that the recommendations hereinafter set forth are generally fair and equitable and will effectuate the purposes of the act.

Recommendations with reference to the stabilization or reduction of rents for housing accommodations within each of the designated defense-rental areas are as follows:

(a) The maximum rent for housing accommodations rented on March 1, 1942 should be the rent for such accommodations on that date. Appropriate provision consistent with such maximum rent date should be made for the maximum rent for housing accommodations not rented on March 1, 1942. In appropriate cases, including those relating to new construction or substantial changes of housing accommodations, provision consistent with the Emergency Price Control Act of 1942 should be made for the determination, adjustment, and modification of maximum rents of housing accommodations, but in principle such rents should not be greater than the rents generally prevailing for comparable accommodations in the particular area on March 1, 1942.

(b) Appropriate provision should be made with respect to the restraint of evictions and other actions relating to the recovery of possession.

(c) Appropriate provision should be made to prevent the circumvention or evasion of maximum rents by any method whatever.

§ 1388.1344 *Maximum rent regulation.* If within sixty days after the issuance of this designation and rent declaration, rents for housing accommodations within any defense-rental area designated in § 1388.1341 have not in the judgment of the Price Administrator been stabilized or reduced by State or local regulation, or otherwise, in accordance with the foregoing recommendations, the Price Administrator may by regulation or order establish such maximum rent or maximum rents for such accommodations as in his judgment will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942.

§ 1388.1345 *Effective date.* This designation and rent declaration (§§ 1388.1341 to 1388.1345, inclusive) shall become effective October 5, 1942. [Designation and Rent Declaration 31 originally issued October 5, 1942]

§ 3.202 *Areas of the United States.* For the purpose of allocation the United States is divided into two areas. The first area, Area I, includes southern New Hampshire; all of Massachusetts, Rhode Island, and Connecticut; southeastern New York as far north as Albany-Troy-Schenectady; all of New Jersey, Delaware, and the District of Columbia; Maryland as far west as Hagerstown; and eastern Pennsylvania as far west as Harrisburg.[1] The second area, Area II, comprehends the remainder of the United States not included in Area I.

[1] In some of the territory contiguous to Area I, the demand for frequencies may in the future exceed the supply and when it does this region will be added to Area I. Until then, this region will not be included in Area I but applications from this region will be given careful study and consideration to insure an equitable distribution of facilities throughout the region. This region includes the remainder of Maryland, Pennsylvania and New York (except the northeastern corner) not included in Area I, the northern half of West Virginia; all of Ohio and Indiana; southern Michigan as far north as Saginaw; eastern Illinois as far west as Rockford-Decatur; and southeastern Wisconsin as far north as Sheboygan.

§ 3.203 *Community stations.* (a) Community stations are limited to a maximum effective radiated power of 250 watts and a maximum antenna height of 250 feet over the average height of the terrain 10 miles from the transmitter. Upon proper showing that an antenna height in excess of 250 feet is necessary, authorization will be issued for such higher antenna but the Commission may in such cases require a reduction in radiated power. A minimum separation of 50 miles will be provided in the case of Community stations on the same channel and a minimum of 35 miles on adjacent channels.

(b) In Area I, 20 channels beginning with 104.1 megacycles and ending with 107.9 megacycles (Channels 81 through 100) are allocated for Community stations. All of these 20 channels are available in any community which is not the principal city of a metropolitan district. Ten of these channels are also available for assignment in principal cities of metropolitan districts which have fewer than 6 Metropolitan stations.[2]

(c) In Area II, 10 channels beginning with 104.1 megacycles and ending with 105.9 megacycles (Channels 81 through 90) are available for Community stations and may be used in any community which is not the principal city of a metropolitan district.[3]

(d) The main studio of a Community station shall be located in the city served and the transmitter shall be located as near the center of the city as practicable.

§ 3.204 *Metropolitan stations.* (a) In Area I, Metropolitan stations are limited to a maximum of 20 kilowats effective radiated power with a non-directional antenna having a height of 500 feet, as determined by the methods prescribed in the Standards of Good Engineering Practice concerning FM broadcast stations. Where higher antenna heights are available, they should be used but in such cases the Commission will authorize less than 20 kilowatts effective radiated power so that the coverage (within the 1000 uv/m contour) shall be substantially similar to that which would be provided by 20 kilowatts effective radiated power and a 500 foot antenna. Where the only antenna height available is less than 500 feet, the Commission may authorize its use but will not permit an increase in radiated power in excess of 20 kilowatts. In Area I, the service area of Metropolitan stations will not be protected beyond the 1000 uv/m contour and such stations will be located in such a manner as to insure, insofar as possible, a maximum of FM service to all listeners, whether urban or rural.

(b) Metropolitan stations in Area II are designed primarily to render service to a single metropolitan district or a principal city, and to rural areas surrounding such metropolitan district or principal city. The Commission will designate service areas for Metropolitan stations in Area II and will authorize appropriate power and antenna height to cover the designated area in accordance with the Standards of Good Engineering Practice concerning FM broadcast stations; upon proper showing changes will be made in these service areas.[4] Metropolitan stations will not be required to serve the entire service area designated by the Commission but no application will be granted for a Metropolitan station unless it is proposed to serve an area substantially greater than could be served by a Community station.

(c) Sixty frequencies are available for Metropolitan stations in Areas I and II. These frequencies begin at 92.1 megacycles and end at 103.9 megacycles (Channels 21 through 80).

(d) The main studio of a Metropolitan station shall be located within its 5000 uv/m contour. However, upon a special showing of need, the Commission may authorize the main studio to be located beyond the 5000 uv/m contour but not beyond the 1000 uv/m contour. The transmitter shall be so located as to provide maximum service both to the city where the main studio is located and to the surrounding rural area.

§ 3.205 *Rural stations.* (a) Rural stations are designed primarily to furnish service to rural listeners. The service area of Rural stations may include the service areas designated by the Commission for Metropolitan stations upon a showing to the Commission that the additional area which the Rural station will serve is predominantly rural in character. As a guide, the Commission will consider that the additional area beyond the service area of a Metropolitan station which is proposed to be served, is predominantly rural in character if at least 50 percent of the population proposed to be added within the 50 uv/m contour live in rural areas or in communities smaller than 10,000.[5] Exceptions to this rule will be permitted where a showing is made to the Commission that due to conditions of terrain or local factors, more extended service to unserved rural areas is possible by licensing Rural stations to serve an area which does not meet the above requirements than would otherwise be possible.

(b) Rural stations will not be licensed in Area I as presently defined. If in the future it becomes necessary to extend Area I by including part or all of the region set forth in footnote 1 of section 3.202, consideration will be given at that time to the question whether Rural stations should be licensed in this region.

(c) The 60 channels available for Metropolitan stations are also available for Rural stations.

(d) The main studio of a Rural station shall be located within its 1000 uv/m contour. However, upon a special showing of need, the Commission may authorize the main studio to be located beyond the 1000 uv/m contour but not beyond the 50 uv/m contour.

RULES GOVERNING ADMINISTRATIVE PROCEDURE

§ 3.211 *Application for FM stations.* Each applicant for a construction permit for a new FM broadcast station, change in facilities of any existing FM broadcast station, or FM station license or modification of license shall file with the Commission in Washington, D. C., three copies of applications on the appropriate form designated by the Commission and a like number of exhibits and other papers incorporated therein and made a part thereof. Only the original copy need be sworn to. If the application is for a construction permit for a new FM station, Form FCC No. 319 should be filed; for an FM license, Form FCC No. 320 should be filed; and for modification of an FM license or for change in facilities of an existing FM station, Form FCC No. 322 should be filed.

§ 3.212 *Full disclosures.* Each application shall contain full and complete disclosures with regard to the real party or parties in interest, and their legal, technical, financial, and other qualifications, and as to all matters and things required to be disclosed by the application forms.

§ 3.213 *Installation or removal of apparatus.* Applications for construction permit or modification thereof, involving removal of existing transmitting apparatus and/or installation of new transmitting apparatus, shall be filed at least 60 days prior to the contemplated removal and/or installation.

§ 3.214 *Period of construction.* Each construction permit will specify a maximum of 60 days from the date of granting thereof as the time within which construction of the station shall begin, and a maximum of six months thereafter as the time within which construction shall be completed and the station ready for operation, unless otherwise determined by the Commission upon proper showing in any particular case.

§ 3.215 *Forfeiture of construction permits: extension of time.* (a) A construction permit shall be automatically

[2] For the time being, until more FM stations are authorized, the Commission will not authorize Community stations in principal cities of metropolitan districts in Area I having 4 or more AM stations.

[3] The 10 frequencies from 106.1 to 107.9 megacycles which are available for Community stations in Area I but not in Area II will be assigned in Area II in the future in accordance with the needs of the area as shown by future developments. In the meantime they will be available for facsimile.

[4] In determining service areas for particular communities, the Commission will give consideration to population distribution, terrain, trade areas, economics and other pertinent factors, and applicants for Metropolitan stations in Area II should include in their applications a showing as to the service area the Commission should designate for the city in question. There are several current and recognized authorities on retail trading areas or consumer trading areas from which the applicant may prepare its showing and to which the Commission will give consideration in making its determination. Among these recognized authorities are the following: J. Walter Thompson (Retail Shopping Areas), Hearst Magazines, Inc. (Consumer Trading Areas), Rand McNally Map Co. (Trading Areas), and Hagastrom Map Co.'s Four Color Retail Trading Area Map.

[5] In making this computation, cities with populations in excess of 10,000 should be excluded if the signal in such cities is less than 500 uv m.

forfeited if the station is not ready for operation within the time specified therein or within such further time as the Commission may have allowed for completion, and a notation of the forfeiture of any construction permit under this provision will be placed in the records of the Commission as of the expiration date.

(b) Any application[1] for extension of time within which to construct a station shall be filed at least thirty days prior to the expiration date of such permit if the facts supporting such application for extension are known to the applicant in time to permit such filing. In other cases such applications will be accepted upon a showing satisfactory to the Commission of sufficient reasons for filing within less than thirty days prior to the expiration date. Such applications will be granted upon a specific and detailed showing that the failure to complete was due to causes not under the control of the grantee, or upon a specific and detailed showing of other matters sufficient to justify the extension.

§ 3.216 *Equipment tests.* (a) Upon completion of construction of an FM station in exact accordance with the terms of the construction permit, the technical provisions of the application therefor and the rules and regulations and Standards of Good Engineering Practice governing FM stations and prior to filing of application for license, the permittee is authorized to test the equipment for a period not to exceed 90 days: *Provided*, That the inspector in charge of the district in which the station is located and the Commission are notified 2 days in advance of the beginning of tests.

(b) The Commission may notify the permittee to conduct no tests or may cancel, suspend, or change the date of beginning for the period of such tests as and when such action may appear to be in the public interest, convenience, and necessity.

(c) Within the 90-day period prescribed by this section for equipment tests, field intensity measurements in accordance with the methods prescribed in the Standards of Good Engineering Practice Concerning FM Broadcasting shall be submitted to the Commission. The Commission may grant extensions of time upon showing of reasonable need therefor.[2] The proof of performance specified in this subsection shall be made by Metropolitan and Rural stations only and need not be made by Community stations.

§ 3.217 *Program tests.* (a) When construction and equipment tests are completed in exact accordance with the terms of the construction permit, the technical provisions of the application therefor, and the rules and regulations and Standards of Good Engineering Practice governing FM stations, and after an application for station license has been filed with the Commission showing the transmitter to be in satisfactory operating condition, the permittee is authorized to conduct program tests in exact accordance with the terms of the construction permit for a period not to exceed 30 days: *Provided*, That the inspector in charge of the district in which the station is located and the Commission are notified 2 days in advance of the beginning of such tests.

(b) The Commission reserves the right to cancel such tests or suspend, or change the date of beginning for the period of such tests as and when such action may appear to be in the public interest, convenience, and necessity by notifying the permittee.

(c) The authorization for tests embodied in this section or § 3.216 shall not be construed as constituting a license to operate but as a necessary part of the construction.

§ 3.218 *Normal license period.* All FM broadcast station licenses will be issued so as to expire at the hour of 3 a. m., e. s. t. and will be issued for a normal license period of one year.

§ 3.219 *License, simultaneous modification and renewal.* When an application is granted by the Commission necessitating the issuance of a modified license less than 60 days prior to the expiration date of the license sought to be modified, and an application for renewal of said license is granted subsequent or prior thereto (but within 30 days of expiration of the present license) the modified license as well as the renewal license shall be issued to conform to the combined action of the Commission.

§ 3.220 *Renewal of license.* (a) Unless otherwise directed by the Commission, each application for renewal of an FM license shall be filed at least 60 days prior to the expiration date of the license sought to be renewed (Form FCC No. 311). No application for renewal of license of an FM broadcast station will be considered unless there is on file with the Commission, the information currently required by §§ 1.301–1.304, reference to which by date and file number shall be included in the application.

(b) Whenever the Commission regards an application for a renewal of an FM license as essential to the proper conduct of a hearing or investigation, and specifically directs that it be filed by a date certain, such application shall be filed within the time thus specified. If the licensee fails to file such application within the prescribed time, the hearing or investigation shall proceed as if such renewal application had been received.

§ 3.221 *Temporary extension of station licenses.* Where there is pending before the Commission any application, investigation, or proceeding which, after hearing, might lead to or make necessary the modification of, revocation of, or the refusal to renew an existing FM license, the Commission may, in its discretion, grant a temporary extension of such license: *Provided, however*, That no such temporary extension shall be construed as a finding by the Commission that the operation of any radio station thereunder will serve public interest, convenience, and necessity beyond the express terms of such temporary extension of license: *And provided further*, That such temporary extension of license will in no wise affect or limit the action of the Commission with respect to any pending application or proceeding.

§ 3.222 *Repetitious applications.* (a) Where an applicant has been afforded an opportunity to be heard with respect to a particular application for a new FM broadcast station, or for change of existing service or facilities, and the Commission has, after hearing or default, denied the application or dismissed it with prejudice, the Commission will not consider another application for a station of the same class to serve in whole or in part the same area, by the same applicant or by his successor or assignee, or on behalf of or for the benefit of the original parties in interest, until after the lapse of 12 months from the effective date of the Commission's order.

(b) Where an appeal has been taken from the action of the Commission in denying a particular application, another application for the same class of broadcast station and for the same area, in whole or in part, filed by the same applicant or by his successor or assignee, or on behalf or for the benefit of the original parties in interest, will not be considered until the final disposition of such appeal.

§ 3.223 *Assignment or transfer of control.* (a) *Voluntary.* Application for consent to voluntary assignment of an FM construction permit or license or for consent to voluntary transfer of control of a corporation holding an FM construction permit or license shall be filed with the Commission on Form FCC No. 314 (assignment of license) and Form FCC No. 315 (transfer of control) at least 60 days prior to the contemplated effective date of assignment or transfer of control.

(b) *Involuntary.* In the event of the death or legal disability of a permittee or licensee, or a member of a partnership, or a person directly or indirectly in control of a corporation, which is a permittee or licensee:

(1) The Commission shall be notified in writing promptly of the occurrence of such death or legal disability, and

(2) Within thirty days after the occurrence of such death or legal disability, application on Form FCC No. 314 or 315 shall be filed for consent to involuntary assignment of such FM permit or license or for involuntary transfer of control of such corporation to a person or entity legally qualified to succeed to the foregoing interests under the laws of the place having jurisdiction over the estate involved.

RULES RELATING TO LICENSING POLICIES

§ 3.231 *Exclusive affiliation of station.* No license shall be granted to an FM broadcast station having any contract, arrangement, or understanding, express or implied with a network organization[3] under which the station is prevented or hindered from, or penalized for, broadcasting the programs of any other network organization.

§ 3.232 *Territorial exclusivity.* No license shall be granted to an FM broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which prevents or hinders another broadcast station serving substantially the same area from broadcasting the network's programs not taken by the former station, or which prevents or hinders another broadcast station serving a substantially different area from broadcasting any program of the network organization. This subpart shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its primary service area upon the programs of the network organization.

§ 3.233 *Term of affiliation.* No license shall be granted to an FM broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which provides, by original terms, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than two years: *Provided*, That a contract, arrangement, or understanding for a period up to two years, may be entered into within six months prior to the commencement of such period.

§ 3.234 *Option time.* No license shall be granted to an FM broadcast station which options[4] for network programs any time subject to call on less than 56 days' notice, or more time than a total of three hours[5] within each of four segments of the broadcast day, as herein described. The broadcast day is divided into 4 segments, as follows: 8:00 a. m. to 1:00 p. m.; 1:00 p. m. to 6:00 p. m.; 6:00 p. m. to 11:00 p. m.; 11:00 p. m. to 8:00 a. m.[6] Such options may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations.

§ 3.235 *Right to reject programs.* No license shall be granted to an FM broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which (a), with respect to programs offered pursuant to an affiliation contract, prevents or hinders the station from rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable; or which (b), with respect to network programs so offered or already contracted for, prevents the station from rejecting or refusing any program which, in its opinion, is contrary to the public interest, or from substituting a program of outstanding local or national importance.

§ 3.236 *Network ownership of stations.* No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control[7] of a network organization, for an FM broadcast station in any locality where the existing FM broadcast stations are so few or of such unequal desirability (in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing.

§ 3.237 *Dual network operation.* No license shall be issued to an FM broadcast station affiliated with a network organization which maintains more than one network of FM broadcast stations: *Provided*, That this regulation shall not be applicable if such networks are not operated simultaneously, or if there is no substantial overlap in the territory served by the group of stations comprising each such network.

§ 3.238 *Control by networks of station rates.* No license shall be granted to an FM broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, fixing or altering its rates for the sale of broadcast time for other than the network's programs.

§ 3.239 *Use of common antenna site.* No FM license or renewal of an FM license will be granted to any person who owns, leases, or controls a particular site which is peculiarly suitable for FM broadcasting in a particular area and (a) which is not available for use by other FM licensees; and (b) no other comparable site is available in the area; and (c) where the exclusive use of such site by the applicant or licensee would unduly limit the number of FM stations that can be authorized in a particular area or would unduly restrict competition among FM stations.

§ 3.240 *Multiple ownership.* (a) No person (including all persons under common control)[8] shall, directly or indirectly, own, operate or control more than one FM broadcast station that would serve substantially the same service area as another FM broadcast station owned, operated, or controlled by such person.

(b) No person (including all persons under common control) shall, directly or indirectly, own, operate, or control more than one FM broadcast station, except upon a showing (1) that such ownership, operation, or control would foster competition among FM broadcast stations or provide an FM broadcasting service distinct and separate from existing services, and (2) that such ownership, operation, or control would not result in the concentration of control of FM broadcasting facilities in a manner inconsistent with public interest, convenience, or necessity; *Provided, however*, That the Commission will consider the ownership, operation, or control of more than six FM broadcast stations to constitute the concentration of control of FM broadcasting facilities in a manner inconsistent with public interest, convenience, or necessity.

RULES RELATING TO EQUIPMENT

§ 3.251 *Transmitter power.* The rated power and operating power range of transmitters shall be in accordance with the Standards of Good Engineering Practice concerning FM Broadcast Stations.

§ 3.252 *Frequency monitor.* The licensee of each FM broadcast station shall have in operation at the transmitter an approved frequency monitor independent of the frequency control of the transmitter. For detailed requirements thereof see Standards of Good Engineering Practice concerning FM Broadcast Stations.

§ 3.253 *Modulation monitor.* The licensee of each FM broadcast station shall have in operation at the transmitter an approved modulation monitor. For detailed requirements thereof see Standards of Good Engineering Practice concerning FM Broadcast Stations.

§ 3.254 *Required transmitter performance.* The construction, installation, operation, and performance of the FM broadcast transmitter system shall be in accordance with the Standards of Good Engineering Practice concerning FM Broadcast Stations.

§ 3.255 *Auxiliary transmitter.* Upon showing that a need exists for the use of an auxiliary transmitter in addition to the regular transmitter of a broadcast station, a license therefor may be issued, *Provided*, That:

(a) An auxiliary transmitter may be installed either at the same location as

[1] Form FCC No. 701.

[2] Until further notice, the Commission will grant FM licenses before proof of performance is submitted. In such cases, proof of performance shall be submitted within one year after the license has been issued or within such extension of time as the Commission may for good cause grant.

[3] The term "network organization" as used herein includes national and regional network organizations. See Chapter VII, J, of Report on Chain Broadcasting.

[4] As used in this section, an option is any contract, arrangement, or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time.

[5] All time options permitted under this section must be specified clock hours, expressed in terms of any time system set forth in the contract agreed upon by the station and network organization. Shifts from daylight saving to standard time or vice versa may or may not shift the specified hours correspondingly as agreed by the station and network organization.

[6] These segments are to be determined for each station in terms of local time at the location of the station but may remain constant throughout the year regardless of shifts from standard to daylight saving time or vice versa.

[7] The word "control" as used herein, is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.

[8] The word "control" as used herein is not limited to majority stock ownership, but includes actual working control in whatever manner exercised.

the main transmitter or at another location.

(b) A licensed operator shall be in control whenever an auxiliary transmitter is placed in operation.

(c) The auxiliary transmitter shall be maintained so that it may be put into immediate operation at any time for the following purposes:

(1) The transmission of the regular programs upon the failure of the main transmitter.

(2) The transmission of regular programs during maintenance or modification[1] work on the main transmitter, necessitating discontinuance of its operation for a period not to exceed five days.

(3) Upon request by a duly authorized representative of the Commission.

(d) The auxiliary transmitter shall be tested at least once each week to determine that it is in proper operating condition and that it is adjusted to the proper frequency, except that in case of operation in accordance with paragraph (c) of this section during any week, the test in that week may be omitted provided the operation under paragraph (c) is satisfactory. A record shall be kept of the time and result of each test operating under paragraph (c). Tests shall be conducted only between midnight and 6 a. m., local standard time.

(e) The auxiliary transmitter shall be equipped with satisfactory control equipment which will enable the maintenance of the frequency emitted by the station within the limits prescribed by these regulations.

(f) The operating power of an auxiliary transmitter may be less than the authorized power of the main transmitter, but in no event shall it be greater than such power.

§ 3.256 *Alternate main transmitters.* The licensee of an FM broadcast station may be licensed for alternate main transmitters provided that a technical need[2] for such alternate transmitters is shown and that the following conditions are met:

(a) Both transmitters are located at the same place.

(b) Both transmitters shall have the same power rating.

(c) Both transmitters shall meet the construction, installation, operation, and performance requirements of the Standards of Good Engineering Practice concerning FM Broadcast Stations.

§ 3.257 *Changes in equipment and antenna system.* Licensees of FM broadcast stations shall observe the following provisions with regard to changes in equipment and antenna system:

(a) No changes in equipment shall be made:

(1) That would result in the emission of signals outside of the authorized channel.

(2) That would result in the external performance of the transmitter being in disagreement with that prescribed in the Standards of Good Engineering Practice concerning FM Broadcast Stations.

(b) Specific authority, upon filing formal application (Form FCC No. 322) therefor, is required for a change in service area or for any of the following changes:

(1) Changes involving an increase or decrease in the power rating of the transmitter.

(2) A replacement of the transmitter as a whole.

(3) Change in the location of the transmitting antenna.

(4) Change in antenna system, including transmission line.

(5) Change in location of main studio, if it is proposed to move the main studio to a different city from that specified in the license.

(6) Change in the power delivered to the antenna.

(7) Change in frequency control and/or modulation system.

(c) Specific authority, upon filing informal request therefor, is required for a change in the indicating instruments installed to measure transmitter power output, except by instruments of the same maximum scale reading and accuracy.

(d) Other changes, except as above provided for in this section or in Standards of Good Engineering Practice concerning FM Broadcast Stations prescribed by the Commission may be made at any time without the authority of the Commission, *Provided*, That the Commission shall be promptly notified thereof and such changes shall be shown in the next application for renewal of license.

RULES RELATING TO TECHNICAL OPERATION

§ 3.261 *Time of operation.* All FM broadcast stations will be licensed for unlimited time operation. Until further notice a minimum of 6 hours per day of operation will be required, which shall consist of 3 hours during the period 6 a. m., to 6 p. m., local standard time, and 3 hours during the period 6 p. m. to midnight, local standard time. In an emergency, however, when due to causes beyond the control of a licensee, it becomes impossible to continue operation, the station may cease operation for a period not to exceed 10 days: *Provided*, That the Commission and the inspector in charge of the radio district in which the station is located shall be notified in writing immediately after the emergency develops.

§ 3.262 *Experimental operation.* The period between 12:00 midnight, and 6 a. m., local standard time, may be used for experimental purposes in testing and maintaining apparatus by the licensee of any FM broadcast station on its assigned frequency and not in excess of its authorized power, without specific authorization from the Commission.

§ 3.263 *Station inspection.* The licensee of any FM radio station shall make the station available for inspection by representatives of the Commission at any reasonable hour.

§ 3.264 *Station license, posting of.* The original of each station license shall be posted in the transmitter room.

§ 3.265 *Operator requirements.* One or more licensed radiotelephone first class operators shall be on duty at the place where the transmitting apparatus of each station is located and in actual charge thereof whenever it is being operated. The original license (Form FCC No. 759) of each station operator shall be posted at the place where he is on duty. The licensed operator on duty and in charge of an FM broadcast transmitter may, at the discretion of the licensee, be employed for other duties or for the operation of another station or stations in accordance with the class of operator's license which he holds and by the rules and regulations governing such stations. However, such duties shall in nowise interfere with the operation of the broadcast transmitter.

§ 3.266 *Facsimile broadcasting and Multiplex transmission.* Transmission of simplex facsimile on FM channels in accordance with the Commission's Standards of Good Engineering Practice on facsimile may be permitted, upon application to the Commission, during hours not required to be devoted to FM aural broadcasting. The Commission may grant experimental authority to an FM station for the multiplex transmission of facsimile or other signals and aural broadcast programs, provided that the transmission of facsimile or other signals is incidental to the aural broadcast, does not reduce the quality of the aural program, and that a filter or other additional equipment is not required for receivers not equipped to receive facsimile or other signals.

§ 3.267 *Operating power: how determined.* The operating power, and the requirements for maintenance thereof, of each FM broadcast station shall be determined by the methods prescribed in the Standards of Good Engineering Practice covering FM broadcast stations.

§ 3.268 *Modulation.* The percentage of modulation of all stations shall be maintained as high as possible consistent with good quality of transmission and good broadcast practice and in no case less than 85 percent nor more than 100 percent on peaks of frequent recurrence during any selection which normally is transmitted at the highest level of the program under consideration.

§ 3.269 *Frequency tolerance.* The center frequency of each FM broadcast station shall be maintained within 2,000 cycles of the assigned center of frequency.

§ 3.270 *Inspection of tower lights and associated control equipment.* The license of any FM station which has an antenna or antenna supporting structure(s) required to be illuminated pursuant to the provisions of section 303 (q) of the Communications Act of 1934, as amended:

(a) Shall make a visual observation of the tower lights at least once each 24 hours to insure that all such lights are functioning properly as required.

(b) Shall report immediately by telephone or telegraph to the nearest Airways Communication Station or office of the Civil Aeronautics Administration any observed failure of the tower lights, not corrected within 30 minutes, regardless of the cause of such failure. Further notification by telephone or telegraph shall be given immediately upon resumption of the required illumination.

(c) Shall inspect at intervals of at least once each 3 months all flashing or rotating beacons and automatic lighting control devices to insure that such apparatus is functioning properly as required.

OTHER RULES RELATING TO OPERATION

§ 3.281 *Logs.* The licensee of each FM station shall maintain program and operating logs and shall require entries to be made as follows:

(a) In the program log:

(1) An entry of the time each station identification announcement (call letters and location) is made.

(2) An entry briefly describing each program broadcast, such as "music," "drama," "speech," etc., together with the name or title thereof and the sponsor's name, with the time of the beginning and ending of the complete program. If a mechanical record is used, the entry shall show the exact nature thereof, such as "record," "transcription," etc., and the time it is announced as a mechanical reproduction. If a speech is made by a political candidate the name and political affiliations of such speaker shall be entered.

(3) An entry showing that each sponsored program broadcast has been announced as sponsored, paid for, or furnished by the sponsor.

(4) An entry showing, for each program of network origin, the name of the network originating the program.

(b) In the operating log:

(1) An entry of the time the station begins to supply power to the antenna, and the time it stops.

(2) An entry of the time the program begins and ends.

(3) An entry of each interruption to the carrier wave, its cause, and duration.

(4) An entry of the following each 30 minutes:

(i) Operating constants of last radio stage (total plate current and plate voltage).

(ii) Transmission line current or voltage.

(iii) Frequency monitor reading.

(5) Log of experimental operation during experimental period. (If regular operation is maintained during this period, the above logs shall be kept.)

(i) A log must be kept of all operation during the experimental period. If the entries required above are not applicable thereto, then the entries shall be made so as to fully describe the operation.

(c) Where an antenna or antenna supporting structure(s) is required to be illuminated, the licensee shall make entries in the radio station log appropriate to the requirements of section 3.240 as follows:

(1) The time the tower lights are turned on and off if manually controlled.

(2) The time the daily visual observation of the tower lights was made.

(3) In the event of any observed failure of a tower light.

(i) Nature of such failure.

(ii) Time the failure was observed.

(iii) Time and nature of the adjustments, repairs or replacements made.

(iv) Airways Communication Station (C. A. A.) notified of the failure of any tower light not corrected within thirty minutes and the time such notice was given.

(v) Time notice was given to the Airways Communication Station (C. A. A.) that the required illumination was resumed.

(4) Upon completion of the periodic inspection required at least once each three months.

(i) The date of the inspection and the condition of all tower lights and associated tower lighting control devices.

(ii) Any adjustments, replacements or repairs made to insure compliance with the lighting requirements.

§ 3.282 *Logs, retention of.* Logs of FM stations shall be retained by the licensee for a period of 2 years. However, logs incident to or involved in any claim or complaint of which the licensee has notice shall be retained by the licensee until such claim or complaint has been fully satisfied or until the same has been barred by statute limiting the time for the filing of suits upon such claims.

§ 3.283 *Logs, by whom kept.* Each log shall be kept by the person or persons competent to do so, having actual knowledge of the facts required, who shall sign the log when starting duty and again when going off duty. The logs shall be made available upon request by an authorized representative of the Commission.

§ 3.284 *Log form.* The log shall be kept in an orderly manner, in suitable form, and in such detail that the data required for the particular class of station concerned are readily available. Key letters or abbreviations may be used if proper meaning or explanation is contained elsewhere in the log.

§ 3.285 *Correction of logs.* No log or portion thereof shall be erased, obliterated, or willfully destroyed within the period of retention provided by the rules. Any necessary correction may be made only by the person originating the entry who shall strike out the erroneous portion, initial the correction made, and indicate the date of correction.

§ 3.286 *Rough logs.* Rough logs may be transcribed into condensed form, but in such case the original log or memoranda and all portions thereof shall be preserved and made a part of the complete log.

§ 3.287 *Station identification.* (a) A licensee of an FM broadcast station shall make station identification announcement (call letters and location) at the beginning and ending of each time of operation and during operation (1) on the hour and (2) either on the half hour or at the quarter hour following the hour and at the quarter hour preceding the next hour: *Provided:*

(b) Such identification announcement need not be made on the hour when to make such announcement would interrupt a single consecutive speech, play, religious service, symphony concert, or operatic production of longer duration than 30 minutes. In such cases the identification announcement shall be made at the beginning of the program, at the first interruption of the entertainment continuity, and at the conclusion of the program.

(c) Such identification announcement need not be made on the half hour or quarter hours when to make such announcement would interrupt a single consecutive speech, play, religious service, symphony concert, or operatic production. In such cases an identification announcement shall be made at the first interruption of the entertainment continuity and at the conclusion of the program, *Provided*, That an announcement within 5 minutes of the times specified in subparagraph (2) of paragraph (a) of this section will satisfy the requirements of identification announcements.

(d) In the case of variety show programs, baseball game programs, or similar programs of longer duration than 30 minutes, the identification announcement shall be made within 5 minutes of the hour and of the times specified in subparagraph (2) of paragraph (a) of this section.

(e) In the case of all other programs, the identification announcement shall be made within 2 minutes of the hour and of the times specified in subparagraph (2) of paragraph (a) of this section.

(f) In making the identification announcement, the call letters shall be given only on the channel of the station identified thereby.

§ 3.288 *Mechanical records.* Each program broadcast which consists in whole or in part of one or more mechanical reproductions shall be announced in the manner and to the extent set out below.

(a) Each such program of longer duration than 30 minutes, consisting in whole or in part of one or more mechanical reproductions, shall be identified by appropriate announcement at the beginning of the program, at each 30-minute interval and at the conclusion of the program; *Provided, however,* That the identifying announcement at each 30-minute interval is not required in case of a mechanical reproduction consisting of a continuous uninterrupted speech, play, religious service, symphony concert or operatic production of longer than 30 minutes.

(b) Each such program of a longer duration than 5 minutes and not in excess of 30 minutes, consisting in whole or in part of one or more mechanical reproductions, shall be identified by an appropriate announcement at the beginning and end of the program.

[1] Such as licenses maintatining 24-hour which may be made without authority as set forth elsewhere in the rules and regulations and the Standards of Good Engineering Practice or as authorized by the Commission by letter or by construction permit. Where such operation is required for periods in excess of 5 days, request therefor shall be in accordance with § 1.365.

[2] Such as licensees maintaining 24-hour schedule and needing alternate operation for maintenance, or where developmental work requires alternate operation.

(c) Each such program of five minutes or less, consisting in whole or in part of mechanical reproductions, shall be identified by appropriate announcement immediately preceding the use thereof.

(d) In case a mechanical reproduction is used for background music, sound effects, station identification, program identification (theme music of short duration) or identification of the sponsorship of the program proper, no announcement of the mechanical reproduction is required.

(e) The exact form of identifying announcement is not prescribed, but the language shall be clear and in terms commonly used and understood. A licensee shall not attempt affirmatively to create the impression that any program being broadcast by mechanical reproduction consists of live talent.

§ 3.289 *Sponsored programs, announcement of.* (a) In the case of each program for the broadcasting of which money, services, or other valuable consideration is either directly or indirectly paid or promised to, or charged or received by, any radio broadcast station, the station broadcasting such program shall make, or cause to be made, an appropriate announcement that the program is sponsored, paid for, or furnished either in whole or in part.

(b) In the case of any political program or any program involving the discussion of public controversial issues for which any records, transcriptions, talent, scripts, or other material or services of any kind are furnished, either directly or indirectly, to a station as an inducement to the broadcasting of such program, an announcement shall be made both at the beginning and conclusion of such program on which such material or services are used that such records, transcriptions, talent, scripts, or other material or services have been furnished to such station in connection with the broadcasting of such program: *Provided, however*, That only one such announcement need be made in the case of any such program of five minutes' duration or less, which announcement may be made either at the beginning or conclusion of the program.

(c) The announcement required by this section shall fully and fairly disclose the true identity of the person or persons by whom or in whose behalf such payment is made or promised, or from whom or in whose behalf such services or other valuable consideration is received, or by whom the material or services referred to in paragraph (b) hereof are furnished. Where an agent or other person contracts or otherwise makes arrangements with a station on behalf of another, and such fact is known to the station, the announcement shall disclose the identity of the person or persons in whose behalf such agent is acting instead of the name of such agent.

(d) In the case of any program, other than a program advertising commercial products or services, which is sponsored, paid for or furnished, either in whole or in part, or for which material or services referred to in paragraph (b) hereof are furnished, by a corporation, committee, association or other unincorporated group, the announcement required by this section, shall disclose the name of such corporation, committee, association or other unincorporated group. In each such case the station shall require that a list of the chief executive officers or members of the executive committee or of the board of directors of the corporation, committee, association or other unincorporated group shall be made available for public inspection at one of the radio stations carrying the program.

(e) In the case of programs advertising commercial products or services, an announcement stating the sponsor's corporate or trade name or the name of the sponsor's product, shall be deemed sufficient for the purposes of this section and only one such announcement need be made at any time during the course of the program.

§ 3.290 *Broadcasts by candidates for public office*—(a) *Definitions.* A "legally qualified candidate" means any person who has publicly announced that he is a candidate for nomination by a convention of a political party or for nomination or election in a primary, special, or general election, municipal, county, state or national, and who meets the qualifications prescribed by the applicable laws to hold the office for which he is a candidate, so that he may be voted for by the electorate directly or by means of delegates or electors, and who:

(1) Has qualified for a place on the ballot or

(2) Is eligible under the applicable law to be voted for by sticker, by writing in his name on the ballot, or other method, and (i) has been duly nominated by a political party which is commonly known and regarded as such, or (ii) makes a substantial showing that he is a bona fide candidate for nomination or office, as the case may be.

(b) *General requirements.* No station licensee is required to permit the use of its facilities by any legally qualified candidate for public office, but if any licensee shall permit any such candidate to use its facilities, it shall afford equal opportunities to all other such candidates for that office to use such facilities; *Provided*, That such licensee shall have no power of censorship over the material broadcast by any such candidate.

(c) *Rates and practices.* The rates, if any, charged all such candidates for the same office shall be uniform and shall not be rebated by any means, directly or indirectly; no licensee shall make any discrimination in charges, practices, regulations, facilities, or services for or in connection with the service rendered pursuant to these rules, or make or give any preference to any candidate for public office or subject any such candidate to any prejudice or disadvantage; nor shall any licensee make any contract or other agreement which shall have the effect of permitting any legally qualified candidate for any public office to broadcast to the exclusion of other legally qualified candidates for the same public office.

(d) *Inspection of records.* Every licensee shall keep and permit public inspection of a complete record of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the licensee of such requests, and the charges made, if any, if request is granted.

§ 3.291 *Rebroadcast.* (a) The term "rebroadcast" means reception by radio of the program [1] of a radio station, and the simultaneous or subsequent retransmission of such program by a broadcast station.[2]

(b) The licensee of an FM broadcast station may, without further authority of the Commission, rebroadcast the program of a United States standard, FM or noncommercial educational broadcast station, provided the Commission is notified of the call letters of each station rebroadcast and the licensee certifies that express authority has been received from the licensee of the station originating the program.[3]

(c) (1) The licensee of an FM broadcast station located within a state or the District of Columbia may, without further authority of the Commission, rebroadcast on a noncommercial basis a noncommercial program of a United States international broadcast station.

(2) The licensee of an FM broadcast station located in any territory or insular possession of the United States may, without further authority of the Commission, rebroadcast any program of a United States international broadcast station.

(3) In the case of any rebroadcast under the provisions of this paragraph (c), the Commission shall be notified of the call letters of each station whose program is rebroadcast and the licensee shall certify that express authority has been received from the licensee of the station originating the program.

(d) No licensee of an FM broadcast station shall rebroadcast the program of any United States radio station not designated in (b) or (c) above without written authority having first been obtained from the Commission upon application (informal) accompanied by written consent or certification of consent of the licensee of the station originating the program.[4]

NOTE: By Order No. 82, dated and effective June 24, 1941, until further order of the Commission, § 3.291 (d) is suspended only insofar as it requires prior written authority of the Commission for the rebroadcasting of programs originated for that express purpose by United States Government radio stations.

[1] As used in this section, program includes any complete program or part thereof.

[2] In case a program is transmitted from its point of origin to a broadcast station entirely by telephone facilities in which a section of such transmission is by radio, the broadcasting of this program is not considered a rebroadcast.

[3] The notice and certification of consent shall be given within three (3) days of any single rebroadcast, but in case of the regular practice of rebroadcasting certain programs of a standard or FM broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for renewal of license, or at the beginning of such rebroadcast practice if begun during a license period.

[4] The broadcasting of a program relayed by a relay broadcast station or studio transmitter link is not considered a rebroadcast.

MILK IN WASHINGTON, D. C., MARKETING AREA

NOTICE OF REPORT AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS

Notice of report and opportunity to file written exceptions with respect to a proposal which was not reported on in the report with respect to a proposed amended order, regulating the handling of milk in the Washington, D. C., marketing area filed June 30, 1945.

Pursuant to the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders (7 CFR Cum. Supp. 900.1 et seq.), notice is hereby given of the filing of this report of the Assistant Administrator, Production and Marketing Administration, with respect to a proposed amendment to the tentatively approved marketing agreement, as

amended, and order, as amended, regulating the handling of milk in the Washington, D. C., marketing area, to be made effective under the Agricultural Marketing Agreement Act of 1937 (7 U.S.C. 601 et seq.) which amendment would increase the price to be paid producers for milk disposed of for fluid consumption.

Interested parties may file exceptions to the report with the Hearing Clerk, Room 1331 South Building, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the 8th day after publication of this notice in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

This proceeding was initiated by the Office of Marketing Services, War Food Administration now Production and Marketing Administration through the issuance and publication in the FEDERAL REGISTER, on March 31, 1945, of a notice of hearing. Pursuant to such notice the hearing was convened in Washington, D. C., on April 16, 1945.

A report filed June 30, 1945, and published in the FEDERAL REGISTER July 3, 1945, stated conclusions reached with respect to other issues developed at the hearing. A small increase in the price of milk for Class I milk was recommended in that report, to compensate producers for the decrease recommended in the price for milk used in cream and cottage cheese. A separate proposal to increase the price of Class I milk by 49 cents per hundredweight was also made at the hearing and testimony with respect to this proposal was presented.

With respect to the proposal to increase the Class I price 49 cents per hundredweight it is concluded that this additional increase in the Class I price should not be made at this time since:

1. Prices received by producers in this area for all milk, exclusive of dairy production payments, are greater in purchasing power without this additional increase than those received during the base period (August 1924–July 1929).

2. Prices received by producers in this area, without this additional increase but including the dairy production payments, are not unreasonable in view of prices of feeds, feed supplies, and other economic conditions affecting market supply and demand for milk and its products in the marketing area.

The weighted average prices received by Washington producers for all milk exceeded by 8 cents per hundredweight in February 1945 the level necessary to give milk a purchasing power equal to that in the base period. During each month of 1944 prices received exceeded this measure of parity, ranging from 5 to 16 cents higher. Including dairy production payments, returns to producers for all milk exceeded parity by 68 cents in the year 1944.

One of the most significant factors affecting the relationship between the supply of milk produced locally and the demand for milk in the marketing area has been the tremendous increase in population. The population of the metropolitan Washington area has increased approximately 50 percent since 1940. The rapid influx of persons into the area, together with their increased buying power, has given rise to a sharp increase in the demand for milk. Fluid milk sales apparently increased by about 71 percent between 1940 and 1944. The location of several camps of the armed services within a relatively short distance of the city of Washington contributed to a great extent to this higher demand for milk.

Market receipts of milk from regularly inspected local producers apparently increased by about 24 percent between 1940 and 1944.

While on an annual basis market receipts were in excess of fluid milk and milk drink sales in the market in 1944, seasonal variations in receipts made it necessary in 1944 to supplement local supplies with outside receipts during half the year to supply local sales of milk and milk drinks, alone. This has been true since 1942. The local health departments have approved, on temporary permits, the receipt in the area of milk and cream from plants designated as emergency milk plants. These plants are temporarily approved as sources of milk and cream without the health department regularly inspecting the farms supplying such plants and without requiring that such farms hold farm inspection permits. Purchases of milk from these emergency milk plants amounted to approximately 73 million pounds of milk in 1944 in addition to more than 1 million pounds of emergency approved cream.

The trend of milk production in the United States and in the states and areas adjacent to the Washington milkshed indicate that in the future more milk will be available at these emergency milk plants than has been true heretofore. Milk production trends are upward in most of these areas as well as in other nearby cities which have also been drawing upon these plants as sources of emergency milk.

It was maintained at the hearing by the proponents of the 49-cent price increase that such an increase is necessary in order to bring the local inspected supply of milk more nearly in line with the demand for milk in the area. Evidence was presented in the hearing to show that the price of feeds and the cost of farm labor have increased substantially since January 1941. There have also been during part of this intervening period local shortages of feed supplies, particularly hay. The record also shows, however, that since January 1941 the price received by Washington producers has advanced from $2.79 per hundredweight of 4 percent milk to $3.97 per hundredweight, exclusive of dairy production payments. Direct dairy production payments to farmers in the Washington milkshed have been made since October 1943 and during the year 1945 will average slightly more than 60 cents per hundredweight. In addition, most of the producers in the Washington milkshed were given special payments on hay during the winter of 1943–1944, and they received a supplemental payment of 10 cents per hundredweight to help offset the effects of short hay supplies during the winter of 1944–1945.

These payments have been made to all dairy farmers in this region on all milk sold by them. The payments are designed to compensate dairy farmers for increased costs of feed and labor not reflected in the prices they receive from milk. Evidence with respect to such increases in this region was considered in connection with the determination of the dairy production payment rates. The hearing record does not indicate that producers in the Washington market have experienced greater increases in costs of feed and labor than those encountered by other dairy farmers in this particular area.

With respect to production trends, receipts of milk from local inspected producers increased by approximately 21 percent between 1940 and 1944. This increase was achieved by an increase of 9 percent in the number of producers supplying the market and 12.3 percent in average deliveries per day per dairy. During the same period, total production of milk on farms in the United States increased 10.4 percent. During the 6 months ending with February 1945, receipts of milk from local inspected producers for the Washington market were 4.6 percent higher than during the same 6 months a year earlier. For the United States as a whole, the increase in milk production on farms for the same 6 months was 2.9 percent higher than during the same 6 months a year earlier. Monthly figures introduced into the hearing record show that market receipts from local inspected producers exceeded those during the same month a year earlier in 9 of the 10 months ending with Februray 1945. Sales of fluid milk and milk drinks in the marketing area also exceeded sales during the same month a year earlier in 8 of the 10 months ending with February 1945. The increases in market receipts from local inspected producers, however, were generally in excess of the increases in sales of fluid milk and milk drinks, in the marketing area. The result was that in 8 of the 10 months ending with February 1945, the excess of market receipts over sales of fluid milk and milk drinks in the area was greater, or the deficit was smaller, than in the corresponding month a year earlier. In the 12 months ending February 1945, the deficit of producers' milk was greater in relation to sales in the market of milk, milk drinks, cottage cheese, and cream in the winter months, and the deficit was less in the summer months than in the previous year.

These data and analyses indicate that under the present prices and with dairy production payments which are being made, there is being achieved a balance of receipts from local producers and the local sales of fluid milk and milk drinks in the area. Although the margin between demand for those products which usually are made from locally inspected milk and the local supply is still widening, the current deficit is principally due to sales of cream and cottage cheese. To advance the Class I price of milk at this time in an effort to hasten the achievement of a complete supply of locally inspected milk is not found to be in the public interest.

This report filed at Washington, D. C., this 19th day of September, 1945.

FEDERAL POWER COMMISSION.

[Docket No. G–659]

KENTUCKY NATURAL GAS CORP.

NOTICE OF APPLICATION

SEPTEMBER 17, 1945.

Notice is hereby given that on September 4, 1945, Kentucky Natural Gas Corporation (Applicant) a Delaware Corporation having its principal place of business at Owensboro, Kentucky, filed with the Federal Power Commission an application for a temporary certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, as amended authorizing it to (1) operate an existing connection between the transmission pipelines of Tennessee Gas and Transmission Company (Tennessee Company) and Applicant located in Barren County, Kentucky, from December 1, 1945, until April 1, 1946, and (2) install heavy weight gate valves in place of the present light weight gate valves on Applicant's 6-inch connecting pipeline.

The application recites that the estimated peak day requirement for the winter 1945–1946 will be 27,500 mcf compared with a peak day requirement on Applicant's system during the winter of 1944–1945 of 26,491 mcf.

On December 16, 1944, (in Docket No. G–558), this Commission granted Applicant temporary authorization to operate the pipeline connection referred to above until April 1, 1945. On the peak day of the winter of 1944–1945, Applicant obtained from Tennessee Company 2,470 mcf through such connection.

Applicant now seeks authorization to operate the connection with the Tennessee Company's pipeline in order to receive from the latter 5,250 mcf of natural gas, either by allocation or by contract, in order to meet the 1945–1946 winter peak day demand. It is asserted that the heavier valves must be installed because with the present fittings it is not practicable for Applicant to receive through its 6-inch line gas at the rate of 5,250 mcf per day.

According to the application, the additional gas is required by reason of the depletion of Applicant's wells which are expected to produce only 4,250 mcf on the peak day of the winter 1945–1946. This quantity of gas added to 15,000 mcf to be received from Panhandle Eastern Pipe Line Company and 3,000 mcf of storage gas leaves a deficit of 5,250 mcf needed in order to satisfy the peak demand of 27,500 mcf.

Any person desiring to be heard or to make any protest with reference to said application should, on or before the 2d day of October 1945, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's provisional rules of practice and regulations under the Natural Gas Act.

Secretary.

FLUID MILK IN ATLANTA REGION

For the reasons set forth in an opinion issued simultaneously herewith and under the authority vested in the Regional Administrator, Region IV of the Office of Price Administration by § 1499.75 (a) (9) (ii) (c) of the General Maximum Price Regulation, § 1351.807 (b) (3) of Maximum Price Regulation 280, and § 1351.408 (g) of Maximum Price Regulation 329, it is hereby ordered that the above enumerated orders be amended in the following respects:

1. Section 1 is amended by adding a new paragraph (c), to read as follows:

On and after September 18, 1945 all quantity limitations on the sale of special fluid milk at a premium price set forth in any order issued under the General Maximum Price Regulation, Supplementary Regulation 14, Supplementary Regulation 14A, or any individual order issued pursuant to this order since April 15, 1945, are revoked.

2. Section 3 (g) is amended to read as follows:

"Special fluid whole milk" means a particular seller's Grade A fluid milk which in addition conforms to at least one of the following standards: (1) "Breed" milk which complies with the published production and distribution standards and requirements of any national dairy breed association such as the American Jersey Cattle Club and the American Guernsey Cattle Club; (2) "Certified" milk which complies with the published production and distribution standards and requirements of the American Medical Milk Commission or its duly authorized agents; (3) "High butterfat" milk which contains more than ¾% of butterfat in excess of the minimum butterfat standards established by any federal, state or local government agency for "approved fluid whole milk"; and (4) "Special processed" milk which has been subjected to additional processing other than by cooling, weighing, testing, reconstituting, bottling, standardizing or separating, for example, homogenization and/or "fortification" with Vitamin D.

3. Section 7 is amended to read as follows:

SEC. 7. (a) Each seller named in section 16 or in any special order issued between April 15, 1945, and September 18, 1945, pursuant to this section is authorized to sell special fluid whole milk of the type there specified at the maximum prices set forth opposite his name or in such special order. These maximum prices have been established by filings under Supplementary Regulation 14A, by orders issued by the Atlanta Regional Office pursuant to Supplementary Regulation 14A, and under this order. All quantity limitations contained in any special order issued pursuant to this section are deleted from such special order, effective September 18, 1945.

(b) Except as otherwise authorized in section 16 or by special order issued pursuant to this section, no person shall sell a "special fluid whole milk" at a premium price except in accordance with the following provisions:

(1) Any seller of a "breed" milk as defined in section 3 (g) may add 1¢ per quart and ½¢ per smaller container to the maximum price set forth in the applicable table in section 14 for the same quantity of "approved fluid whole milk";

(2) Any seller of a "certified" milk as defined in section 3 (g) may add 2¢ per quart and 1¢ per smaller container to the maximum price set forth in the applicable table in section 14 for the same quantity of "approved fluid whole milk";

(3) Any seller of a "high butterfat" milk may add a premium only in accordance with the following provisions:

(i) Any seller of a "high butterfat" milk named in section 16 or by special order pursuant to this section since April 15, 1945, may sell such milk at the premium price set forth opposite his name or in such special order.

(ii) Any seller unable to establish a maximum price under the foregoing provision may not sell a "high butterfat" milk at a premium price until he applies in writing to the Atlanta Regional Office, Candler Building, Atlanta 3, Georgia, for permission to sell such "high butterfat" milk at a premium price and is granted such permission by written order from that office.

The application shall be in duplicate and shall contain a statement setting forth the following:

(*a*) The maximum price charged by the applicant for such "high butterfat" milk during March, 1942;

(*b*) The prevailing price of standard approved milk in the same market area during March, 1942; and

(*c*) The name of all communities in which the applicant sold "high butterfat" milk at a premium price over standard whole milk during March, 1942, and April, 1945.

If the applicant did not sell a "high butterfat" milk in a particular market during March, 1942, and/or April, 1945, he must present evidence that another seller has on or before April 30, 1945, established a premium price for a "high butterfat" milk in such market.

(4) A seller of "special processed" milk may not sell such milk in excess of the maximum price for standard fluid whole milk unless he has applied to the Atlanta Regional Office and received permission to sell such special milk at a premium price and is granted such permission by a written order from that office. The applicant must show, unless otherwise provided below, that he had an established premium price during or prior to April, 1945, or that another seller in such market had established a premium price for the particular type of "special processed" milk in such market on or before April 30, 1945;

Except, that a seller of such "special processed" milk which has been subjected to a processing consisting of both homogenization and "fortification" may charge a premium of 1¢ per quart and ½¢ per smaller container over the maximum price for standard fluid whole milk provided by the applicable table in section 14.

(5) Any seller of a "breed" milk or "certified" milk who desires a higher maximum premium price than that provided by section 7 (b) (1) or (2) of this order may apply in writing to the Atlanta Regional Office for permission to sell such special milk at a premium price higher than that provided by such general provisions.

The application shall indicate specific reasons why the general provisions in section 7 (b) (1) or (2) are unsatisfactory.

The application must present evidence that the applicant or another seller in the particular market area had the same established premium price differential for the same type of milk prior to April 30, 1945, as that requested in the application.

(c) Except for the named special buttermilks authorized to the specific sellers named in section 16 or in a special order issued pursuant to this section subsequent to April 15, 1945, no person shall sell a "special" buttermilk at a premium price on or after September 18, 1945, unless he applies in writing to the Atlanta Regional Office, Candler Building, Atlanta, Georgia, for permission to sell such special buttermilk at a premium price and is granted such permission by written order from that office. The application shall show:

(1) Each type of special buttermilk sold at a premium price during the months of March, 1942 and April, 1945;

(2) The established price for each size and container type sold by the applicant during such time and the prevailing price of plain buttermilk during March, 1942, in the particular market; and

(3) The names of all communities where the applicant sold special buttermilk at a premium price over plain buttermilk in March, 1942 and April, 1945.

Unless the applicant is able to present evidence that he had an established premium price during March, 1942 or that another seller has established a premium price for a "special" buttermilk in the same particular market, the Atlanta Regional Office shall not grant the applicant permission to sell "special" buttermilk at a premium price.

(d) The Atlanta Regional Office may correct or revise any maximum prices established for any type of special milk, having due regard to the differentials prevailing in adjoining areas.

(e) No authorized seller may charge a premium price for a "special" whole milk or a "special" buttermilk unless each container is marked or otherwise designated in such a manner as to clearly differentiate it from the standard whole milk and/or plain buttermilk on which the seller has established a maximum price under the applicable table of section 14. Sales of any "special" milk in a container which is not so differentiated shall be at prices no higher than the maximum prices established for the particular container type of standard whole milk and the class of sale established by this order.

(f) No seller who on or before April 30, 1945, offered a standard and special whole fluid milk and/or a plain and special buttermilk shall discontinue offering standard fluid whole milk and/or plain buttermilk. If the purchaser from such a seller cannot obtain standard whole fluid milk or plain buttermilk when ordered and the seller elects to deliver special whole milk or special buttermilk, as the case may be, the maximum price for such special fluid milk may not exceed the maximum prices established by the applicable table of section 14 for standard fluid whole milk or plain fluid whole buttermilk, as the case may be. A seller who discontinues the sale of standard whole milk or plain buttermilk and continues to sell special whole milk and/or special buttermilk may not charge for such special milk a price in excess of the maximum prices established by the applicable table of section 14 for standard whole milk and/or plain buttermilk.

(g) A retail store which purchases special milk at wholesale from a seller entitled by this order or by a special order issued by the Atlanta Regional Office to charge a premium wholesale price on such special milk may add a markup not exceeding 2¢ per quart or 1¢ per smaller container to his supplier's wholesale selling price, but in no case to a cost higher than the supplier's wholesale ceiling price established pursuant to this order.

This amendment shall become effective September 18, 1945.

ALEXANDER HARRIS,
Regional Administrator.

Approved: September 14, 1945.

CLINTON P. ANDERSON,
Secretary of Agriculture.

1. Public Service proposes to issue and sell at competitive bidding, pursuant to the requirements of Rule U-50, $22,500,000 principal amount of First Mortgage Bonds, Series A, to mature July 1, 1975, and 98,500 shares of Cumulative Preferred Stock of the par value of $100 per share. The interest rate on the bonds and the dividend rate on the preferred stock, as well as the prices to Public Service for these securities, are to be determined by competitive bidding.

2. Public Service proposes to use the proceeds from the sale of the bonds and preferred stock, together with other cash as required, for the redemption of its outstanding bonds and preferred stock;

3. The offering of preferred stock is subject to an exchange offer whereby the holders of the outstanding 5% preferred stock of Public Service may exchange the same for the new stock on a share for share basis with a cash adjustment for the difference between the redemption price of the 5% preferred stock and the public offering price of the new preferred stock.

Public Service having proposed to solicit proxies in connection with a special meeting of the stockholders of the company to be held on or about October 22, 1945, to vote upon the proposed bond issue and matters related thereto; and having filed copies of the proxy, the proposed notice of the special meeting of the stockholders and proxy statement; and

Public Service having requested that the declaration with respect to the proxy solicitation material be considered and disposed of independently of the principal transactions and that the Commission enter its separate order permitting said declaration as to all such proxy solicitation material to become effective; and

It appearing that the solicitation of authorizations of stockholders, as proposed to be conducted, does not make it necessary or appropriate in the public interest or for the protection of investors or consumers or to prevent the circumvention of the provisions of the act or the rules and regulations thereunder that the Commission issue any order with respect thereto other than an order permitting the declaration as to such solicitation to become effective;

It is therefore ordered, That, without passing upon the merits of the applications or declarations filed pursuant to sections 6, 7 and 12, the declaration as to solicitation of authorizations be and it is hereby permitted to become effective forthwith.

By the Commission.

JOURNAL-NEWS CORPORATION

CONSENT ORDER

Journal-News Corporation is a newspaper publisher with offices at 77-79 Bowery, New York City, publishing Jewish Journal and Daily News and The Jewish American Family Magazine and Gazette in New York City and Philadelphia Jewish Morning Journal and Daily News in Philadelphia, Pennsylvania. During the years 1943 and 1944 and the first quarter of the year 1945, Journal-News Corporation used newsprint in excess of the quota which it was permitted to use during the said period, under the provisions of Limitation Order L-240, and in violation thereof. This excessive use of newsprint has diverted a scarce and critical material to a use not authorized by the War Production Board. Journal-News Corporation admits the violation as charged and has consented to the issuance of this order.

Wherefore, upon the agreement and consent of Journal-News Corporation, the Regional Compliance Manager and the Regional Attorney, and upon the approval of the Compliance Commissioner; *It is hereby ordered*, That:

(a) Journal-News Corporation, its successors or assigns, shall reduce its use of newsprint in the printing and publishing of newspapers under its quota as established pursuant to Limitation Order L-240, by 40 tons of newsprint during the third and fourth quarters of the year 1945.

(b) Nothing contained in this order shall be deemed to relieve Journal-News Corporation, its successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board except insofar as the same may be inconsistent with the provisions hereof.

Issued this 20th day of September 1945.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

PART 3—DOCUMENTATION OF VESSELS

REGISTRATION OF HOUSE FLAG AND FUNNEL MARK OF AMERICAN MAIL LINE, LTD.

House flag and funnel mark of American Mail Line, Ltd., registered in accordance with section 3.81 (a), Customs Regulations of 1943.

The Commissioner of Customs, by virtue of the authority vested in him by section 7 of the act of May 28, 1908 (U. S. C. title 46, sec. 49), as modified by Executive Order No. 9083 (7 F.R. 1609), and in accordance with § 3.81 (a) of the Customs Regulations of 1943 (19 C. F. R. 3.81 (a)), has registered the house flag and funnel mark of American Mail Line, Ltd., described below.

(a) *House flag.* The house flag is rectangular in shape. The hoist is 5 feet; the fly is 8 feet. The field consists of five horizontal stripes, each 12 inches wide; the two outer stripes are dark blue; the next two are white; and the single center stripe is red. Superimposed upon the red stripe are 8-inch block initials "A M L" in dark blue equally spaced along the stripe.

(b) *Funnel mark.* The funnel mark is to appear on a funnel of a solid buff color with a five-foot black collar around the top. The mark is to be centered on the port and starboard sides of the funnel in a fore and aft direction 12½ feet below the top of the funnel. The device consists of a circle 11 feet in diameter, at the outer edge of which is a 1-inch black stripe followed by a 24-inch white band with the words "American Mail" in the upper portion of the band and "Line" in the lower portion. The words are composed of 14-inch black letters in block type spaced evenly in the center of the band. A 1-inch black stripe follows the inner edge of the white band and the remainder of the circle is white. Superimposed on the white circle and extending a short distance beyond is an American Mail Line house flag, similar in design to that described above but without the letters "A M L" on the red stripe, which is flown from a bluff-colored staff slanting forward at an angle of about 20 degrees with the vertical. The upper part of the staff is projected onto the inner black stripe and the white band and the lower portion of the staff crosses under the white band and inner and outer black stripes, extending 3 feet beyond the outer diameter of the circle.

Colored scale replica drawings of the house flag and of the funnel mark described above are on file with the Division of the Federal Register.

Corson, Lucien Paradis, their successors or assigns nor any other person, shall do any construction on the premises at 85 Winter Street, Rochester, New Hampshire, including putting up, altering, or finishing the structure, unless hereafter specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve Ralph P. Corson, Lucien Paradis, their successors or assigns, from any restrictions, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

SECTION 1. *Explanation of the relation of this supplement to Food Products Regulation No. 2.* Not all of the provisions affecting maximum prices for sales of processed grains are stated in this supplement. Those which are not specifically set forth here are stated in Food Products Regulation No. 2, and they are just as much a part of this supplement as if they were printed here.

The particular sections of Food Products Regulation No. 2 which are applicable to this supplement are listed at appropriate places in the provisions which follow. When any applicable section of the regulation is amended, the amendment is also applicable to this supplement.

SEC. 2. *Applicability.* (a) Except for those sales exempted by paragraph (b) of this section, this supplement shall apply to all sales and deliveries within the United States of "processed grains" as herein defined, whether immediate or future.

(b) *Exempt sales*—(1) *Export sales.* The maximum price for export sales shall be determined in accordance with the provisions of the Second Revised Maximum Export Price Regulation, as amended.

(2) *Emergency purchases.* Section 1.2 (a) of Food Products Regulation No. 2, dealing with the exemption of emergency purchases, is applicable to this supplement.

(3) *Retail packages.* This supplement shall not apply to sales of processed grains which have been packaged for sale at retail in containers holding five pounds or less.

(4) *Registered feeds.* This supplement shall not apply to the sale of any mixture of more than one grain, partially or wholly processed, for which a guaranteed analysis has been filed pursuant to the provisions of section 3.4 of Maximum Price Regulation 585 or which is registered as a branded feed in the state in which it is sold.

(5) *Processed grains for human consumption.* This supplement shall not apply to processed grains manufactured for human consumption or for any purpose other than for feeding to animals or poultry or for mixing for that purpose.

(6) *Products manufactured from other than whole grains or from grains previously processed.* This supplement shall not apply to products that have been manufactured from other than whole grains or from grains that have been previously processed: *Provided*, That cleaning and grading shall not be considered as processing.

SEC. 3. *Sales at other than maximum prices.* (a) Regardless of any contract or obligation, no person shall sell or deliver, and no person shall in the course of trade or business, buy or receive, any processed grain covered by this supplement at a price above the maximum price established by this supplement nor shall any person agree, solicit, offer or attempt to do any of the foregoing: *Provided, however*, That certain agreements to increase prices are permissible, as provided for in paragraph (b) of this section.

(b) *Adjustable pricing.* Section 1.2 (b) of Food Products Regulation No. 2, dealing with adjustable pricing, is applicable to this supplement.

(c) Prices lower than the maximum prices established by this supplement may, of course, be charged or paid.

SEC. 4. *Evasion.* The price limitations set forth in this supplement shall not be evaded whether by direct or indirect methods, in connection with any offer, solicitation, agreement, sale, delivery, purchase, or receipt of, or relating to processed grain, alone or in conjunction with any other commodity, or by way of commission, service, transportation or other charge, or discount, premium or other privilege or by tying agreement, or other trade understanding, or by any other means.

(3) Protests and petitions for amendment: Section 1.2 (f).

(b) In addition, various other provisions of Food Products Regulation No. 2 are applicable to and made a part of this supplement. References to such provisions are made at appropriate points throughout this supplement.

SEC. 7. *Documents, records and reports.* (1) Every seller and every purchaser in the course of trade or business, shall keep for inspection by the Office of Price Administration for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, a record of his maximum prices and records of all sales and purchases of 2,000 pounds or more of processed grains covered by this supplement, including the date thereof, the name of the seller and purchaser, the kind of commodity, the grade and quality upon which the maximum price was based, the price paid or received at buyer's receiving point, and the quantity sold. Every seller shall post his current maximum prices for processed grains in his place of business so as to be readily accessible to his customers.

(2) Every seller shall for so long as the Emergency Price Control Act of 1942, as amended, remains in effect, keep a record of all processed grains manufactured by him showing (1) their names, (2) all base prices of the whole grains processed and the computations by which they were determined, and (3) all processing margins and the computations by which they were determined.

(3) Upon demand every such person shall submit such records to examination by a duly authorized representative of the Office of Price Administration.

SEC. 8. *Base prices for processed grains.* (a) Base prices are not maximum prices for sales under this supplement. They are the prices to which you may add the markups and other additions provided by this supplement in determining the appropriate maximum price for the sale of processed grains. You determine the appropriate base price for any sale under this supplement by ascertaining your base price for the kind of grain or grains being processed at the time of your receipt of the buyer's order for the processed grains, in accordance with the methods set out in paragraph (b) of this section. If the lot for which you are determining a maximum price is processed from more than one grain or is a combination of one or more whole grains and one or more processed grains, you determine your base price for such lot by (1) multiplying the weight of the different grains in the combination by their base prices, (2) adding the figures resulting, and (3) dividing the sum of them by the total weight of the lot.

(b) You determine your base price for any grain under the provisions of the supplement or regulation applicable to the particular kind of grain by one of the following methods:

(1) You may take as your base price the base ingredient price for such grain which you are permitted to use under the provisions of Maximum Price Regulation 585.

(2) You may take as your base price the withdrawal price for the whole grain determined in accordance with the provisions of section 2.3 of Food Products Regulation No. 2, relating to withdrawals from a place of business.

(3) You may take as your base price the maximum price your supplier could have lawfully charged you for the sale of the particular lot of grain delivered to the point at which you process it.

(4) You may calculate a base price for the different grains for which you use this method, once each week. You select a day for calculation and recalculate on that day each week thereafter (except that when that day falls on a legal holiday, you recalculate on the next business day). Your base price is a weighted average of the maximum prices you could have paid your suppliers for your more recent purchases of such grain. You compute that average as follows:

(i) Whenever you begin to use this method, you determine as to your last receipt of the grain and as to all of your receipts of the grain for the twenty-eight days preceding such last receipt, your supplier's maximum price on the sale to you delivered to your plant for each such sale.

(*a*) If all such receipts were delivered to you bulk, you then multiply each sum of the price by the number of tons purchased, add the results, and divide by the total number of tons in these receipts.

(*b*) If your receipts which you use in figuring a base price were delivered to you, some bulk and some sacked, before taking an average of the maximum prices, you must adjust your supplier's maximum price to you so that all such prices will reflect a bulk price. You do this by subtracting from the maximum price the amount included in such price

for the sacks, if you know the amount, or, if you do not, the reasonable market value of the sacks at the time of the sale. You then proceed as indicated in (a) above to determine your weighted average price.

(c) The weighted average per ton price thus determined is your base price, bulk, for the first week for all your sales of such grain.

(d) Upon the next and all succeeding calculation days, you refigure your base price for one week in the same manner, referring, however, only to your last receipt and all receipts of such grain during the fourteen day period preceding such last receipt.

(ii) If you wish to discontinue using this weekly price method, you may do so only if on the next recalculation day, you take an inventory of such grain. You may then treat the amount in inventory as a receipt on which your supplier's maximum price on the sale to you is the base price you would compute for the succeeding week.

(5) You may take as your base price the base price of the particular kind of grain at the point at which you process it.

(6) If the whole grain is not subject to price control, you may take as your base price the reasonable market value of such grain at the point at which you process it.

SEC. 9. *Processing markups for processed grains.* The markup per ton for processing which you may add to the appropriate base price to determine your maximum price on the sale of any commodity subject to this supplement is as follows:

(a) *For coarse ground processed grains.* (1) For coarse ground processed grains or a combination of coarse ground processed grains, $2.50 per ton.

(2) For a combination of whole grain and coarse ground processed grains, you determine your markup per ton by multiplying $2.50 by the percentage of coarse ground processed grain in the mixture.

(b) *For processed grains other than coarse ground processed grains.* For any other processed grain, you determine your markup per ton as follows:

(1) *If you made sales during the base period and have records of such sales.* If you made sales of the processed grain being priced during January 1943 and you have records of such sales, your markup per ton shall be $2.50, plus the amount of a differential determined as follows: For every day during January 1943 on which you made sales of the product being priced and you also made sales of your lowest priced processed grain produced from the kind of grain or grains used in the commodity being priced, determine the differential between your selling price for the product being priced and your selling price for your lowest priced processed grain as described above, to the same class of purchaser and in similar quantities. If you made no sales on any such day, you may use a bona fide offer which you made to sell such product on that day. You may take either the simple or the weighted average of such differentials as the differential that you shall use in determining your markup under this subparagraph.

If you made no sales or bona fide offers to sell during January 1943 you shall substitute for January 1943 the most recent month prior to January 1943 in which you made any sales or bona fide offers to sell.

If you determine a markup under this subparagraph you must within ten days of the time when you first use it report such markup to the district office of the Office of Price Administration for the district in which the processing plant is located. Such report shall give the following information:

(i) Your name.

(ii) The address to which communications are to be sent.

(iii) The location of the processing plant.

(iv) Your proposed markup and the method used in computing the same.

(v) A description of the processed grain or grains for which a markup is reported, and a description of the lowest priced processed grain or grains sold by you.

If you have determined your markup in good faith pursuant to the provisions of this subparagraph, you may after reporting it continue to use such markup subject to disapproval by the Office of Price Administration at any time.

(2) *If you did not make sales during base period or do not have appropriate records.* If you did not sell the product prior to or during January 1943 or if you do not have the appropriate records with respect to sales required by subparagraph (1) above, you must before making any sales file an application with the district office of the Office of Price Administration for the district in which your processing plant is located for the establishment of a markup on your sales of such products. Such application shall give the following information:

(i) Your name.

(ii) The address to which communications are to be sent.

(iii) The location of the processing plant.

(iv) Your proposed markup and the method used in computing the same.

(v) A description of the processed grain or grains for which a markup is requested and a description of the lowest priced processed grain or grains sold by you.

Pending the approval of a maximum markup, you may sell such processed grains at a maximum markup of $2.50 per ton.

(3) If your proposed markup under subparagraphs (1) or (2) is disapproved, you may by petition in writing request that this determination be reviewed in which case the file shall be transmitted to the appropriate regional office for review (if the petition was denied by a district office) and to the national office (if the petition was denied by a regional office) and the regional office or the national office, as the case may be, shall review and by order notify the processor of its determination.

(4) The administrator, any regional administrator or any district director, authorized by the appropriate regional administrator, may approve markups determined and filed in accordance with the provisions of this supplement, and may disapprove markups upon finding that they have not been correctly determined or that they a : in excess of the markups of other sellers for the same or similar products and may in such cases establish the markups that shall thereafter be used.

SEC. 10. *Maximum prices for sales by processors.* This section sets out the maximum prices that you may charge on all sales that you make as a processor. Before determining your maximum price for any sale you should first refer to the definitions in paragraph (f) of this section in order to determine whether such sale is being made from a processing plant, a warehouse or a store. For all sales by you as a processor your maximum price shall be the sum of the following:

(a) The appropriate base price per ton determined in accordance with the provisions of section 8; plus

(b) Your transportation cost, if you deliver the processed grain to your customer at a point other than the processing plant; plus

(c) The appropriate markup for sacks or containers determined in accordance with the provisions of section 15, if you furnish sacks or containers; plus

(d) The appropriate processing markup determined in accordance with the provisions of section 9; plus

(e) The applicable one of the following merchandising markups:

(i) For sales from the processing plant;

$3.00 per ton if sold to a feeder in carload quantities;
$4.00 per ton if sold to a feeder in less than a carload quantity;
$1.50 per ton if sold to any person other than a feeder in carload quantities.
$2.50 per ton if sold to any person other than a feeder in less than a carload quantity; or

(ii) For sales from a warehouse, not located at your processing plant, into which you have unloaded the lot after transporting it from your processing plant:

$3.00 per ton if sold to a feeder in carload quantities;
$5.50 per ton if sold to a feeder in less than a carload quantity;
$1.50 per ton if sold to any person other than a feeder in carload quantities.
$4.00 per ton if sold to any person other than a feeder in less than a carload quantity; or

(iii) For sales from a store into which you have unloaded the lot after transporting it from your warehouse not located at your processing plant:

$3.00 per ton if sold to a feeder in carload quantities;
$8.00 per ton if sold to a feeder in less than a carload quantity;
$1.50 per ton if sold to any person other than a feeder in carload quantities.
$4.00 per ton if sold to any person other than a feeder in less than a carload quantity.

(f) As used in this section the following terms shall have the following meanings:

(1) "Processing plant" means all the facilities operated as a unit at one location at which processed grains are produced.

(2) "Warehouse" means all the facilities operated as a unit at a location, other than the processing plant, at which processed grains are first stored after shipment from the processing plant and from which processed grains may or may not be sold.

(3) "Store" means a place of business not located at or operated as a unit with a processing plant or warehouse.

(4) For the purposes of this paragraph (f) a place shall be deemed to be operated as a unit at one location if it is operated either;

(i) In one building, or

(ii) In two or more adjoining buildings, or

(iii) In two or more buildings, although not adjoining, if such buildings are located on the same or adjoining parcels of land owned, leased or otherwise controlled by the seller. Such parcels of land shall be deemed to be adjoining even if they are separated by an intervening street, alley, highway, lane or railroad right-of-way.

SEC. 11. *Maximum prices for sales by persons other than processors.* The maximum price for any sales of processed grains by you as a jobber, wholesaler or retailer shall be your supplier's maximum price on the sale and delivery to you, plus your transportation costs, if any, and the appropriate one of the following merchandising markups:

(a) If you are a jobber, $0.75 per ton.

(b) If you are a wholesaler, $2.50 per ton, except that on a lot which you have transported from your warehouse and unloaded into a store not located at your warehouse, you are acting as a retailer and you may add $6.50 per ton on sales to feeders.

(c) If you are a retailer,

(i) $2.50 per ton for sales in a carload quantity;

(ii) $2.50 per ton for sales in less than a carload quantity when not unloaded into your warehouse or store prior to such sale; or

(iii) $4.00 per ton for sales in less than a carload quantity if unloaded into your warehouse or store prior to such sale.

SEC. 12. *Maximum prices for sales by importers.* When you sell processed grains as an importer, you will be either a wholesaler, jobber or retailer according to the manner in which you sell such processed grains.

(a) *Maximum prices for purchases by importers.* If you are an importer, the maximum price at which you can purchase any lot of imported processed grains shall be the sum of the base price of the standard grade of grain or grains which were processed, determined under the applicable supplement or regulation, at the point of entry at the time of the sale of the processed grain, plus the sum of $2.50 per ton.

(b) *Maximum prices for sales by importers.* If you are an importer, your maximum price for the sale of any lot of processed grains shall be determined under Section 11 or Section 13 of this supplement by substituting your maximum purchase price as computed in this section for "your supplier's maximum price".

SEC. 13. *Maximum prices for sales by all other sellers.* If you are a seller not specifically provided for under any preceding section of this regulation, your maximum price for the sale of processed grains shall be your supplier's maximum price on the sale and delivery to you, plus the transportation charges actually incurred in moving the processed grains from your store or place of business to your buyer's receiving point.

SEC. 14. *Limitations on total markups of merchandisers to be included in a maximum price.* In order to prevent undue accumulation of markups for distributive services, the maximum price of any lot of processed grain shall never include more than one permitted markup of a jobber, wholesaler and retailer, irrespective of the number of said persons of each class who may have handled the lot in question; *Provided, however,* That the markups taken by a processor under section 10 (e) (ii) or section 10 (e) (iii) shall be considered as a markup taken as a wholesaler or retailer, as the case may be.

SEC. 15. *Increases for sacks or other containers.* If you furnish the sacks or other containers in connection with the sale and delivery of any sacked quantity of processed grains you shall use one of the following methods of computing your maximum markup for such sacks:

(a) A markup of $3.25 per ton for textile sacks; or

(b) A markup for sacks or other containers not exceeding the lawful maximum price thereof at the time of sale; or

(c) If not subject to price control the reasonable value thereof at the time of sale.

This revised supplement shall become effective September 26, 1945.

SURPLUS PEARS, 1945 SUBSIDY PAYMENTS

The Secretary of Agriculture having submitted certain information and recommendations to me on September 6, 1945, with reference to a program for the payment of subsidies on surplus pears produced in 1945, I hereby find and determine that the purposes of the hold-the-line order, specifically, the policy established by Executive Orders 9250, 9328 and 9599 (10 F.R. 10155) will be effectuated by the payment of a subsidy to equalize, to the extent necessary, the excess cost incurred by canners through the shipment of pears from areas of surplus production to areas in which unused canning facilities exist.

Accordingly, the Secretary of Agriculture is hereby authorized and directed to absorb, by the use of Commodity Credit Corporation funds, the aforesaid excess cost incurred by canners through the shipment of pears from areas of surplus production to areas in which unused canning facilities exist.

PART 4003—SUPPORT PRICES; SUBSIDIES

PRUNE PROGRAM, 1945-1946 MARKETING SEASON

The Secretary of Agriculture in a letter dated July 20, 1945, and the Price Administrator in a letter dated July 27, 1945, submitted certain information and their recommendations to me relative to grower prices for natural condition dried prunes, fresh prunes for canning, freezing, and preserving, and prunes for fresh use, to be used in constructing ceiling prices applicable to the 1945 packs of these commodities. In approving grower prices for fresh and dried prunes, I find it necessary to issue this directive to effectuate the purposes of the Emergency Price Control Act of 1942, as amended, the Stabilization Act of 1942, as amended, and Executive Orders 9250, 9328, and 9599.

A. I hereby find that:

(1) The following grower prices for prunes are above the legal minimum required to be reflected in maximum prices for fresh and processed agricultural commodities by section 3 of the Stabilization Act of 1942, as amended, and are necessary to insure the maximum necessary production of prunes in 1945 to meet essential requirements:

(a) Natural condition dried prunes at processors' customary receiving points:

(i) $0.095 per pound basis for California Three-District dried prunes;

(ii) $0.0925 per pound basis for California Outside-District dried prunes; and

(iii) For Washington and Oregon dried prunes, the same prices as those for California Outside-District dried prunes of comparable size.

(b) Fresh prunes for canning, freezing, and preserving at processors' customary receiving points; $55.00 per ton.

(c) Fresh prunes for fresh use: $76.43 per ton "mixed sales" basis.

(2) Maximum prices on sales of natural condition dried prunes are not now necessary to effectuate the purposes of the Stabilization Act of 1942, as amended, and Executive Orders 9250, 9328, and 9599.

(3) The maintenance, through use of funds of Commodity Credit Corporation, of approximately the present average level of maximum prices on sales of processed dried prunes to purchasers other than government procurement agencies and other than for shipment to destinations or ports outside of the Continental United States will effectuate the purposes of the hold-the-line policy; and

(4) The establishment of maximum prices on sales of processed dried prunes by processors for shipment to destinations or ports within the Territories and Possessions of the United States at the same level as that applicable to the sales specified in A (3) hereof, through use of funds of Commodity Credit Corporation, will remove gross inequities.

B. The Office of Price Administration is authorized and directed to:

(1) Revoke present maximum prices governing sales of natural condition dried prunes;

(2) Revise present maximum prices governing processors' sales of processed dried prunes to:

(a) Government procurement agencies and to purchasers for export to destinations or ports outside Territories and Possessions of the United States on the basis of the cost and profit study, which was made by the Office of Price Administration relative to processors' margins, so as to reflect the grower prices specified in paragraph A (1) hereof; and

(b) Purchasers other than government procurement agencies and other than for export to destinations or ports outside Territories and Possessions of the United States on the basis of appropriate compensation for any increase in the legal minimum grower prices for 1945 above the respective legal minimum prices for 1944 and subject to such adjustments which the aforesaid cost and study, made by the Office of Price Administration relative to processors' margins, may indicate.

(3) Furnish to the Secretary of Agriculture the maximum prices established pursuant to paragraph B (2) hereof for the use of the Secretary of Agriculture in determining the appropriate rate of subsidy payment.

C. The Secretary of Agriculture is authorized and directed, through use of funds of Commodity Credit Corporation, to subsidize processors' sales of processed dried prunes to purchasers other than government procurement agencies and other than for export to destinations or ports outside Territories and Possessions of the United States, so as to enable such processors to pay the grower prices specified in paragraph A (1) hereof and to sell such processed dried prunes at the applicable maximum prices to be established by the Office of Price Administration pursuant to paragraph B (2) hereof. The appropriate rate of subsidy shall be determined by the Secretary of Agriculture after such applicable maximum prices shall have been established by the Office of Price Administration.

Chapter XXIII—Surplus Property Board

[Special Order 21]

EXTENSION OF MACHINE TOOL PRICING POLICY GOVERNING SALES BY RECONSTRUCTION FINANCE CORPORATION

The purpose of this special order is to extend the scope of the machine tool price policy contained in Regulation No. 3 of the Surplus War Property Administration (9 F.R. 9870), which governs sales made by the Reconstruction Finance Corporation as a disposal agency. That regulation now applies only to sales of used standard general-purpose machine tools listed in the Standard Commodity Classification, Volume I, Major Group 34, Code No. 34 11000 to 34 19900 inclusive, except for a limited class of such machine tools expressly excepted by that regulation. In Surplus Property Board Regulation No. 6 (10 F.R. 6309, 6981, 8665, 10398) which governs certain sales by owning agencies of machine tools and machines in contractor inventory, the Board prescribed that the price policy set forth in SWPA Regulation No. 3 should be used to determine prices for the standard general-purpose machine tools described above and also for certain additional categories of standard machines. The Board has determined that these additional categories should also be brought within the SWPA price policy in the case of sales by Reconstruction Finance Corporation as a disposal agency.

Pursuant to the authority of the Surplus Property Act of 1944 (58 Stat. 765, 50 U. S. C. App. 1611); *It is hereby ordered*, That:

All sales by Reconstruction Finance Corporation, as a disposal agency, of used standard machines included in the following listed classifications in the Standard Commodity Classification (exclusive of special machines) shall be made at prices determined in accordance with Surplus War Property Administration Regulation No. 3 and Surplus Property Board Special Order No. 2 (9 F.R. 4191):

Major Group 34, Code 34:
40,000 to, but not including, 47,000.
49,000 to, but not including, 70,000.
74,000 to, but not including, 74,900.
Major Group 33, Code 33:
6300 through 6620, inclusive
6800
6910
6920
7210
7220

This order shall become effective September 18, 1945.

Chairman.

S. J. CAMPBELL CO.

ADJUSTMENT OF MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to paragraph (g) of Order No. 1052, under § 1499.159b of Maximum Price Regulation No. 188, it is ordered:

(a) *Manufacturer's maximum prices.* S. J. Campbell Co., 1335 Altgeld Street, Chicago 14, Illinois, may add an additional adjustment charge to its maximum prices for sales and deliveries to all classes of purchasers of the articles of wood household furniture which it manufactures and for which it had established maximum prices in effect prior to the effective date of this order. That additional adjustment charge shall be an amount equal to 3% of the previously established maximum prices as adjusted by paragraph (d) of Order 1052 under Maximum Price Regulation No. 188.

This additional adjustment charge may be made and collected on all sales and deliveries on and after August 13, 1945, but only if it is separately stated on each invoice. The adjusted maximum prices are subject to the manufacturer's customary terms, discounts, allowances and other price differentials in effect during March 1942 to each class of purchaser.

(b) *Maximum prices of purchasers for resale.* A person who buys an article covered by this order and resells it in substantially the same form, may collect from his customer, in addition to his properly established maximum price in effect prior to the issuance of this order, an adjustment charge in the same amount as the additional adjustment charge herein authorized for and which he pays to his supplier. If he did not establish a maximum price for the article before the issuance of this order, he may add the same adjustment charge to the maximum price which he hereafter establishes for his sales under the applicable regulation. If the applicable regulation requires the maximum price to be computed on the basis of cost, the reseller must find his maximum resale price (without the adjustment charge) by using as cost his net invoice cost not including any adjustment charge stated on the invoice as a separate amount.

On all sales other than sales to an ultimate consumer, this additional adjustment charge may be made and collected only if it is separately stated on each invoice. The adjusted prices are subject to each seller's terms, discounts, and allowances on sales of the same or similar articles. The adjustment charge authorized in this paragraph (b) is in addition to any adjustment charge permitted for wholesalers by Order No. 1052 under Maximum Price Regulation No. 188.

(c) *Notification.* At the time of or prior to the first invoice to a purchaser for resale on and after the effective date of this order, showing a price adjusted in accordance with the terms of this order, the seller shall notify the purchaser in writing of the method established by paragraph (b) of this order for determining adjusted maximum prices for resales of the article. This notification may be given in any convenient form.

(d) All requests not specifically granted by this order are hereby denied.

(e) This order may be revoked or amended by the Price Administrator at any time.

(f) This order shall become effective on the 19th day of September 1945.

Issued this 18th day of September 1945.

SURPLUS NONINDUSTRIAL REAL PROPERTY

EXTENSION OF TIME FOR PUBLICATION OF NOTICE OF AVAILABILITY OF AGRICULTURAL REAL PROPERTY

The Department of Agriculture has advised that on account of discrepancies in the description and acreage of the property consisting of more than 5,600 acres, the incomplete proceedings for condemnation of 28 parcels thereof, and the absence of information concerning existing easements for power lines, electric and telephone lines, water mains, sewers and similar rights, which information the owning agency has not been able to supply, it will not be practical to give notice of availability of the Lake Ontario Ordnance Works property located in Niagara County, New York, classified as agricultural, within the 60 days following its declaration as surplus as required by § 8305.12 (c) (2), and has requested that the time for such notice be extended for 60 days. *It is therefore ordered,* That:

The time within which the notice of availability for disposal of the Lake Ontario Ordnance Works agricultural property located in Niagara County, New York, may be published is hereby extended for 60 days additional to allow 120 days from the date on which the declaration was received by the disposal agency.

PART 319—FOREIGN QUARANTINE NOTICES

ENTRY OF ORANGES, GRAPEFRUIT, AND MANILA MANGOES FROM MEXICO AUTHORIZED AFTER TREATMENT

It has been determined that shipments of fresh fruits of oranges, grapefruit, and Manila mangoes may now be safely admitted from Mexico in accordance with the regulations of the Fruit and Vegetable Quarantine No. 56 after they have been given the vapor-heat treatment described below, which has been found to be effective in eliminating possible infestation by fruitflies known to occur in Mexico, the insect pests which have been responsible for the exclusion of these fruits. While the results of the experiments so far conducted have been successful, it should be emphasized that inexactness and carelessness in operation may result in injury to fruit. In authorizing the entry of fruit treated in accordance with this requirement, it is understood that the Department does not accept responsibility for fruit injury.

Authorization for the entry from Mexico of oranges, grapefruit, and Manila mangoes, subject to the prescribed treatment, is provided, therefore, in the following administrative instructions.

§ 319.56-2g *Administrative instructions; importation of oranges, grapefruit, and Manila mangoes authorized from Mexico subject to treatment.* Pursuant to the authority conferred upon the Chief of the Bureau of Entomology and Plant Quarantine by paragraph (a) of § 319.56-2 (Regulation 2 of Notice of Quarantine No. 56), on and after October 1, 1945, commercially sound fruit only of orange, grapefruit, and mango of the Manila variety may be imported in accordance with the permit and other requirements of said quarantine after each shipment has been subjected to the vapor-heat treatment described below, carried out at locations and in treatment rooms approved by the Chief of the Bureau of Entomology and Plant Quarantine and performed under the supervision of a plant quarantine inspector of that Bureau.

(a) *Vapor-heat treatment method.* The vapor-heat treatment method consists in the use of a mixture of air, live steam, and water spray, or a mixture of heated air and water spray, or a mixture devised in any other way so as to give saturation and condensation conditions at the temperature used, which conditions must be satisfactory to the supervising inspector of the Bureau of Entomology and Plant Quarantine. The mixture shall be circulated throughout the fruit in a manner and in a volume satisfactory to the supervising inspector. The fruit shall be treated for a period of not less than 14 hours, during which time the temperature at the approximate center of the fruit shall be raised to 110° F. and shall be maintained at or above 110° for the last 6 hours of such treatment.

In the case of treating plants located in the interior of Mexico, those in interest must make advance arrangements for supervision of the treatments and approval of the plant, and give acceptable assurance that they will provide transportation and per diem for the inspectors without cost to the United States Department of Agriculture.

Reg. 1 as amended Dec. 31, 1943, 9 F.R. 64.

PART 944—REGULATIONS APPLICABLE TO THE OPERATIONS OF THE PRIORITIES SYSTEM

[Priorities Reg. 29, Interpretation 1]

EFFECT OF AA RATINGS AFTER SEPTEMBER 30

The following interpretation is issued with respect to Priorities Regulation 29:

(a) Paragraph (c) (1) of Priorities Regulation 29 provides that the AA rating system remains effective as to deliveries until the end of September 1945. After that time, AA ratings will be completely ineffective, and must be disregarded by suppliers. This includes AA ratings on orders which were originally accepted and scheduled for delivery by September 30, but which, due to circumstances beyond the supplier's control are delayed in delivery. These orders are to be treated as unrated.

(b) Similarly, where a supplier receives a purchase order calling for delivery before October 1, but is unable to schedule it for delivery at that time and schedules it for delivery after September 30, he must treat it as an unrated order under paragraph (c) (2) of Priorities Regulation 29.

(c) Suppliers, of course, must follow the requirements of Priorities Regulation 1 in accepting and scheduling AA rated orders for delivery before October 1.

(d) The same rules apply to treatment of authorized controlled material orders under paragraph (d) of Priorities Regulation 29.

(e) However, under paragraph (c) (2) of Priorities Regulation 29, a different rule applies to AA ratings on orders for textiles and related items covered by Schedule A of Order M–328. These AA ratings remain effective until September 30 both on orders for delivery before and after that date. Orders with AA ratings must, until September 30, be accepted and scheduled as in the past, even if they call for delivery after September 30. After that date, the AA ratings are ineffective and orders bearing them must be treated as unrated unless specifically re-rated AAA, MM, or CC.

Issued this 24th day of September 1945.

PART 1010—SUSPENSION ORDERS

[Suspension Order S–696, Amdt. 1]

ALPHA CLUB—ALPHA RESTAURANT

The Alpha Club, Philadelphia, Pennsylvania, did construction work at 1911 Chestnut Street, in violation of Conservation Order L–41, and on or about September 14, 1944, filed two applications for permission to obtain a new gas range, a broiler and a fryer costing $570.00 and one new Universal dishwasher at a cost of $595.00 for use in the building at 1911 Chestnut Street, Philadelphia. These applications were filed under the name of the non-existent Alpha Restaurant and contained false and misleading statements. Suspension Order No. S–696 was issued against the Alpha Club–Alpha Restaurant on January 22, 1945. In view of the fact that Conservation Order L–41, as amended, on September 7, 1945, raises the limitation on this type of construction to $5,000, the Chief Compliance Commissioner has directed that the suspension order be amended to allow additional construction up to but not exceeding $5,000.

In view of the foregoing, it is hereby ordered, that: § 1010.696 *Suspension Order No. S–696*, issued January 22, 1945, be amended by the substitution of the following paragraph (a) for the present paragraph (a):

(a) Neither the Alpha Club, its successors or assigns, nor any other person shall do any construction on the premises at 1911 Chestnut Street, Philadelphia, Pennsylvania, including putting up or altering the structure located on said premises, to exceed $5,000, unless hereafter specifically authorized in writing by the War Production Board.

PART 1010—SUSPENSION ORDERS

[Suspension Order S–822]

VERNA'S TAVERN, MULLIN CONSTRUCTION CO., AND W. G. BRUST

Gaitano and Verna Marra, doing business as Verna's Tavern, Seattle, Washington, acting through W. G. Brust, Republic Building, Seattle, Washington, their architect, applied to the War Production Board in October, 1944, for permission to build a one story restaurant at 10340 E. Marginal Way, Seattle, at an estimated cost of $9400.00, and permission was granted. Thereupon the Marras entered into a contract with J. L. Mullin, doing business as Mullin Construction Company, of 2516 Juneau Street, Seattle, Washington, to construct a two story building to house a tavern at the same address for $17,559.00, exclusive of the heating system, which was to cost $1270.00. Gaitano and Verna Marra and W. G. Brust from the beginning intended to construct a tavern at a cost greatly in excess of $9400.00, and their representations respecting use and estimated cost in the application were wilfully false. J. L. Mullin had actual knowledge of the War Production Board authorization before he contracted to build the building, and knew that his contract was in excess of the authorization. During the course of construction the parties agreed to install two apartments on the second floor, for which no authorization was asked or issued. The foregoing construction was in wilful violation of Conservation Order L–41, and has diverted critical materials to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.822 *Suspension Order No. S–822.* (a) Neither Gaitano Marra, Verna Marra, J. L. Mullin, W. G. Brust, their successors or assigns, nor any other person, shall do any construction on the premises at 10440 E. Marginal Way, Seattle, Washington, including putting up or altering the structure, unless hereafter specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve Gaitano Marra, Verna Marra, J. L. Mullin, W. G. Brust, or any of them, their successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production

Board, except insofar as the same may be inconsistent with the provisions hereof.

THE DAY PUBLISHING CO., INC.

Suspension Order No. S-865 was issued on July 27, 1945 against The Day Publishing Co., Inc., engaged in publishing a newspaper called "The Day." The case has been reviewed by the Chief Compliance Commissioner who has directed that the suspension order be revoked.

In view of the foregoing, it is hereby ordered, that: § 1010.865 *Suspension Order No. S-865*, be revoked.

Chapter XI—Office of Price Administration

PART 1305—ADMINISTRATION

[SO 108,[1] Amdt. 5]

MANUFACTURERS' MAXIMUM AVERAGE PRICES FOR CERTAIN ITEMS OF APPAREL AND APPAREL ACCESSORIES

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Supplementary Order 108 is amended in the following respects:

1. Section 4 (a) is amended to read as follows:

(a) *When you must file a maximum average price chart*—(1) *General filing.* On or before June 20, 1945, if you have base periods under section 2, you must file with your OPA District Office[2] two copies (signed by an owner, officer or principal) of your chart of maximum average prices. (If you made no deliveries prior to December 31, 1944 you need not file a chart. The order issued to you upon application under section 9 will contain your chart.) On and after July 2, 1945 you may not deliver any item covered by this order until you have received acknowledgment from the OPA of the filing of your chart.

(2) *Special filing.* On or before October 20, 1945, if you have base periods under section 2 for any category created by this amendment you must file with your OPA District Office two copies (signed by an owner, officer or principal) of a statement containing for each such category the information required by paragraph (b) of this section.

However, if you cannot supply the information required by paragraph (b) (3) for all of your base periods by October 20, 1945, you must file a statement by October 20, 1945, containing the information required by paragraph (b) for your base periods for the 3rd and 4th quarters and you must file the remainder of the required information on or before November 20, 1945.

On and after October 30, 1945, you may not sell or deliver any items in any category created by this amendment until you have received an acknowledgment from the Office of Price Administration of the receipt of the statement required to be filed by October 20, 1945. On and after January 1, 1946, you may not sell or deliver any item in any category created by this amendment until you have received an acknowledgment from the Office of Price Administration of the receipt of all the information required by paragraph (b) of this section.

2. Section 9 (a) is amended by amending the first two paragraphs thereof to read as follows:

(a) *Persons who are unable to establish base periods under section 2.* Except in the cases of transfers of business as provided in section 10, if you made no deliveries at all in any particular category between January 1, 1943 and December 31, 1944, you may not deliver any items in that category after September 30, 1945 until you have received an order from the Office of Price Administration establishing a maximum average price for that category.

However, if you made your first delivery of any item in that category between December 31, 1944 and April 28, 1945 and if you file your application under this section and receive an acknowledgment from the Office of Price Administration dated on or before September 30, 1945, you may deliver items in that category at ceiling prices established under the appropriate regulation without regard to the requirements of this order, until an order has been issued to you under this section: Except that, until an order is issued, you must not deliver any item in that category at a price higher than the highest maximum price you have already established for any item in that category which you delivered before April 28, 1945. If you have not received an acknowledgment of the receipt of your application dated before October 1, 1945 you may not deliver any items in the category after September 30, 1945 until an order has been issued to you under this section.

3. Section 9 (b) is amended by amending the first two paragraphs thereof to read as follows:

(b) *Other persons who cannot establish maximum average prices for every category.* If you cannot prepare a maximum average price chart and determine your maximum average price for a particular category because you do not have sufficient records or for any other reason, you may not deliver any items in that category after September 30, 1945 until you have received an order from the Office of Price Administration establishing a maximum average price for the category.

However, if you delivered items in that category before April 28, 1945, and if you file your application under this section and receive an acknowledgment from the Office of Price Administration dated on or before September 30, 1945, you may deliver items in that category at ceiling prices established under the appropriate regulation without regard to the requirements of this order until an order has been issued to you under this section: Except that, until an order is issued, you must not deliver any item in that category at a price higher than the highest maximum price you have already established for any item in that category which you delivered before April 28, 1945. If you have not received an acknowledgment of the receipt of your application dated before October 1, 1945, you may not deliver any items in the category after September 30, 1945 until an order has been issued to you under this section.

4. Section 21 (b) (1) (ii) is amended by adding subdivisions (*a*) and (*b*) to read as follows:

(*a*) "Combed cotton" fabric means a cotton fabric in which all the cotton fibres have been combed.

(*b*) "Carded cotton" fabric means a cotton fabric containing any cotton fibres which have been carded but not combed.

PART 1387—SILVER

[RMPR 198,[1] Amdt. 1]

SILVER

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register..

Revised Maximum Price Regulation No. 198 is amended in the following respects:

1. Section 3 is revised to read as follows:

SEC. 3. *Maximum prices for standard commercial bars*—(a) *Definitions.* (1) "Seller's most favorable basing point" means the basing point to which the cost of transportation from the point of shipment is lowest.

(2) "Point of shipment" means the point at which the silver is first loaded on a conveyance for shipment directly to the buyer, except that, in the case of imports, it means the port of entry, or the station of the common carrier nearest to the point on the international boundary at which the shipment first enters the continental United States.

(b) *Base prices.* The maximum price for standard commercial bars, delivered, free of all charges, to the seller's most favorable basing point, shall be:

71.111 cents per fine troy ounce.

(c) *Basing points.* The following basing points, or free delivery points, are established for standard commercial bars:

New York, N. Y.; San Francisco, California; Philadelphia, Pa.; Denver, Colorado.

(d) *Delivered price.* If delivery is made to the buyer at any point other than the seller's most favorable basing point, the maximum delivered price shall be the applicable one of the prices set out in paragraph (b) of this section, plus the cost of transportation from the point of shipment to the destination, minus the cost of transportation from the point of shipment to the seller's most favorable basing point.

(e) *Price f. o. b. point of shipment.* Standard commercial bars may be sold f. o. b. point of shipment. The maximum price f. o. b. point of shipment is the maximum delivered price at the seller's most favorable basing point, minus the cost of transportation from the point of shipment to the seller's most favorable basing point.

(f) *Distributors' differentials.* A seller other than a refiner may sell or deliver standard commercial bars in lots of less than 200,000 ounces at the base price set out in paragraph (b), plus the differentials established by this paragraph. Moreover such sales or deliveries at the prices provided in this paragraph may be f. o. b. the seller's shipping point rather than on the basis of the seller's most favorable basing point, and if the seller makes delivery to the buyer's place of business, he may add an amount not in excess of express charges.

[1] 7 F.R. 6083, 6939, 8848; 9 F.R. 5990.

Quantity differentials for sellers other than refiners are as follows:

	Cents
100,000 ounces up to but not including 200,000 ounces	.25

2,000 ounces up to but not including 5,000 ounces	1.25
Under 2,000 ounces	2.00

(g) *Refiners' differentials.* A refiner may add the following quantity differentials to his maximum prices for delivery of standard commercial bars in lots of less than 25,000 ounces at his most favorable basing point:

	Cents
10,000 ounces up to but not including 25,000 ounces	.50
5,000 ounces up to but not including 10,000 ounces	.75
2,000 ounces up to but not including 5,000 ounces	1.25
Under 2,000 ounces	2.00

(h) *Credit charges.* A seller of standard commercial bars may add his customary charges for the extension of credit beyond 10 days from date of invoice. However, no charge may be added for credit of shorter duration.

2. Section 4 (a) is revised to read as follows:

(a) *Maximum prices.* Maximum prices for semifabricated articles shall be determined by taking as a base the highest price charged by the seller during March, 1942 for the same commodity containing foreign silver and adding to this base price 36.125 cents per fine troy ounce of silver contained in the article to be priced.

3. Section 4 (c) is revised to read as follows:

(c) *Additions to base price.* To find the maximum price, take the base price, figured according to the rules in paragraph (b) of this section, and add 36.125 cents per fine troy ounce of silver contained in the article sold.

4. Section 5 (a) (1) is amended by the deletion of the last sentence thereof.

5. Section 7 is revised to read as follows:

SEC. 7. *Maximum prices for silver scrap.* The maximum price for silver scrap shall be 70.875¢ per fine troy ounce of silver contained, delivered free of all charges to the buyer's receiving point.

8. Section 18 (a) is amended by the deletion of subparagraph (6) thereof.

PART 1315—RUBBER AND PRODUCTS AND MATERIALS OF WHICH RUBBER IS A COMPONENT

[MPR 220, Amdt. 21]

CERTAIN RUBBER COMMODITIES

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Maximum Price Regulation 220 is amended in the following respects:

1. A new section designated § 1315.1557f is added to read as follows:

§ 1315.1557f *Maximum wholesalers' prices for industrial rubberized fabric gloves*—(a) *Applicability.* This section establishes maximum prices for all sales by wholesalers of industrial rubberized fabric gloves.

(b) *Maximum wholesalers' prices for sales of industrial rubberized fabric gloves*—(1) *How the wholesaler determines the maximum price for such gloves.* The maximum price for a sale by wholesalers of industrial rubberized fabric gloves shall be determined by multiplying the wholesaler's purchase price (computed in accordance with subparagraph (2) below) of the gloves being priced by the percentage the wholesaler used in computing his March 1942 selling price for a comparable rubberized fabric glove (chosen and computed in accordance with subparagraph (3) below).

(2) *How the wholesaler determines his purchase price.* The purchase price to him of the gloves being priced which the wholesaler must use in computing his maximum price shall be determined as follows:

(i) The wholesaler shall first determine the net invoice cost before cash discounts of the gloves being priced, if available, not to exceed his supplier's maximum price to the wholesaler; or

(ii) If actual cost is not available, the net invoice cost before cash discounts of the gloves being priced, as estimated by the wholesaler's supplier; Provided, that the wholesaler has no reason to believe that the price so estimated exceeds the supplier's maximum price to the wholesaler;

(iii) If the cost determined under subdivisions (i) or (ii) is not on a delivered basis, the wholesaler shall add the actual cost of transportation to his place of business.

(3) *How the wholesaler determines the percentage which must be used in computing his maximum price.* The percentage which the wholesaler must apply to his net purchase price of the gloves being priced to determine their maximum price shall be determined as follows:

(i) The wholesaler shall first determine what rubberized fabric glove he must use in determining the percentage. That glove shall be the first applicable of the following gloves which he delivered or offered for delivery during March 1942.

(*a*) The rubberized fabric glove which is the same as the glove being priced.

(*b*) The rubberized fabric glove which has the same use as the glove being priced. If there is more than one glove which has the same use as the glove being priced, the wholesaler shall use that one of those gloves whose purchase price is nearest to the purchase price of the glove being priced. The purchase price of both gloves shall be determined in accordance with paragraph (b) (2) of this section.

(*c*) The rubberized fabric glove whose purchase price is the nearest to the purchase price of the glove being priced. The purchase price of both gloves shall be determined in accordance with paragraph (b) (2) of this section.

(ii) The wholesaler shall then determine the highest price at which he, during March 1942, delivered, or if no delivery was made, at which he then offered to deliver, the gloves chosen in accordance with subdivision (i) above, to a purchaser of the same class.

(iii) The wholesaler shall then determine the percentage by dividing his March 1942 selling price of the glove chosen as a basis for pricing (under subparagraph (3) (i) above) by the purchase price of that glove that was in effect to him on the date on which he established its March 1942 selling price. The purchase price shall be determined in accordance with paragraph (b) (2) of this section.

(*c*) *Maximum prices for sales by wholesalers of rubberized fabric gloves that cannot be established under paragraph (b).* The maximum price for sales of rubberized fabric gloves by a wholesaler who cannot establish his maximum prices under paragraph (b) above shall be established under § 1315.1558.

2. In § 1315.1567 (a) items numbered (11) and (12) are respectively renumbered (12) and (13) and a new item (11) is added to read as follows:

(11) *Industrial rubberized fabric gloves.*

PART 1436—PLASTIC AND SYNTHETIC RESINS

[MPR 406, Amdt. 9]

SYNTHETIC RESINS AND PLASTIC MATERIALS AND SUBSTITUTE RUBBER

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Maximum Price Regulation No. 406 is amended in the following respects:

1. The listing for section 20 in the table of contents is amended to read "Adjusted prices for synthetic resins containing 50 percent or more of rosin." and the listing for section 21 is deleted.

2. Section 21 is revoked.

3. Section 20 is amended to read as follows:

SEC. 20. *Adjusted prices for synthetic resins containing 50 percent or more of rosin.* (a) *Applicability.* This section applies to any synthetic resin, including ester gum, for which the manufacturer's maximum prices have been established prior to September 29, 1945 and whose composition is such that at least 50 percent by weight of its components is made up of rosin, gum, wood, or both. Where a synthetic resin is sold in solution, the weight of the solvent shall not be included in computing the weight of the components.

(b) *Manufacturer's maximum prices.* (1) The maximum price for a sale by the manufacturer of such a synthetic resin for which the maximum price has been established prior to September 29, 1945 shall be the maximum price established for such a sale on September 28, 1945 plus a dollar-and-cent amount per pound of synthetic resin computed as follows:

(i) For each synthetic resin list to the nearest one thousandth the number of pounds of each grade of each type (wood or gum) of rosin used to make one pound of the synthetic resin.

(ii) Multiply the number of pounds of each grade of each type by the adjustment factor for that grade from (2) below.

(iii) Add the products of step (ii) to find the dollar-and-cent amount of increase per pound of synthetic resin. Round to the nearest hundredth of a cent.

(2) *Adjustment factor.* In the case of wood rosin other than FF, the adjustment factor is the same regardless of the time the manufacturer's maximum price for the synthetic resin in effect on September 28, 1945 was first established. In the case of FF wood rosin and gum rosin, the adjustment factor depends on the time the manufacturer's maximum price in effect on September 28, 1945 for the synthetic resin was first established.

(i) This table of factors for gum rosin applies only to synthetic resins sold or offered for sale in March 1942 and whose maximum price in effect on September 28, 1945 is the same as the March 1942 price. The table for wood rosin (other than FF) applies irrespective of the date the manufacturer's maximum price for the synthetic resin in effect on September 28, 1945 was first established.

Grade	Gum, per pound in cents	Wood, per pound in cents
X	3.67	.75
WW	3.67	.75
WG	3.19	.50
N	3.70	1.65
M	3.79	1.80
K	3.82	1.80
I	3.80	1.77
H	3.80	1.77
G	3.78	1.77
F	3.74	.....
E	3.62	.....
D	3.17	.....
B	3.32	.70

(ii) This table of factors applies to FF wood rosin in synthetic resins:

Date manufacturer's maximum price for synthetic resin in effect on September 28, 1945, first established:	*Per pound FF wood rosin in cents*
Prior to November 20, 1944	1.32
After November 19, 1944, and prior to June 18, 1945	1.00
After June 17, 1945	0.00

(iii) This table is to be used to compute the adjustment factor for gum rosin in synthetic resins not sold or offered for sale in March 1942 or whose maximum price has been increased over the March 1942 price. The adjustment factor per pound of rosin is determined by subtracting from the price per pound of rosin shown in the table, the average market price per pound for the same grade of gum rosin on the Savannah, Georgia, Cotton and Naval Stores Exchange during the calendar month in which the maximum price for the synthetic resin in effect on September 28, 1945 was first established:

Grade:	*Price per pound in cents*
X	7.72
WW	7.72
WG	7.45
N	7.20
M	7.04
K	7.02
I	6.98
H	6.98
G	6.96
F	6.92
E	6.82
D	6.29
B	6.22

(3) *Examples.* (i) Manufacturer's maximum prices for a synthetic resin in effect on September 28, 1945 which uses .750 lbs. K gum rosin per pound resin were first established in July 1944. The average price per pound for K grade on the Savannah Exchange in July 1944 was 5.53¢, the price for K grade in the table in (2) (iii) is 7.02¢. The adjustment factor per pound K rosin is 7.02¢ minus 5.53¢ or 1.49¢ per pound rosin. The dollar-and-cent adjustment per pound resin is .750 x 1.49¢ or 1.12¢.

(ii) Manufacturer's maximum prices for a synthetic resin in effect on September 28, 1945, using .200 lbs. FF wood rosin and .500 lbs. K wood rosin were first established in August 1944. From (2) (ii) the adjustment factor for FF is 1.32¢ per pound, and the dollar-and-cent adjustment per pound resin is .200 x 1.32¢ or .264¢. From (2) (i) the adjustment factor for K wood rosin is 1.80¢, and the dollar-and-cent adjustment per pound resin is .500 x 1.80¢ or .900¢. The total adjustment per pound resin is .264¢ plus .900¢ or 1.16¢.

(iii) A resin sold in March 1942 whose maximum price in effect on September 28, 1945, is the March 1942 price uses .500 lbs. WW gum and .300 lbs. X wood rosin per pound resin. From (2) (i) the adjustment on account of WW gum is .500 x 3.07¢, on account of X wood is .300 x .75¢, or a total adjustment of 1.535¢ plus .225¢ or 1.76¢ per pound synthetic resin.

(c) *Manufacturers' reports.* Prior to the first delivery of a synthetic resin covered by this Sec. 20 at a price higher than the maximum price in effect on September 28, 1945, the manufacturer shall mail to the Rubber, Chemicals and Drugs Price Branch, Office of Price Administration, Washington 25, D. C., a report containing:

(1) A description of the synthetic resin together with the maximum prices in effect for his sales of the synethetic resin on September 28, 1945, and a statement as to how and when these were established.

(2) The adjusted maximum price under this Sec. 20, with an explanation of how the adjusted maximum price was calculated showing the number of pounds of each grade of each type of rosin used to make one pound of synthetic resin, the adjustment factor used for each grade, and the dollar-and-cent adjustment for each grade.

(3) Statement as to the total weight of the components used (excluding solvents where the synthetic resin is sold in solution) to make one pound of synthetic resin.

(d) *Resellers.* A reseller of synthetic resin priced by the manufacturer under this section 20 may add, on and after the effective date of this section 20, to his maximum price per unit as of September 28, 1945, his increased acquisition cost per unit under this section 20. His increased acquisition cost per unit is the increase (in dollars and cents) in the price to him per unit over his supplier's maximum price per unit on September 28, 1945, as determined from the invoice required to be furnished him under paragraph (e) below.

(e) *Invoices.* The manufacturer or reseller of a synthetic resin for which maximum prices are established under this section 20 shall show as separate items on all invoices therefor:

(1) The maximum price in effect for the sale of the synthetic resin on September 28, 1945.

(2) The adjusted selling price (not in excess of the maximum price under this section 20).

(3) A statement that under OPA regulations, a reseller may add to his maximum price as of September 28, 1945, the increase shown by the invoice.

An invoice containing the above required information shall be furnished the buyer prior to payment by him.

This amendment shall become effective September 29, 1945.

NOTE: The reporting requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 24th day of September 1945.

CHESTER BOWLES,
Administrator.

(*a*) For each rosin product list to the nearest one thousandth the number of pounds of each grade of each type (wood or gum) of rosin used to make one pound of the rosin product.

(*b*) Multiply the number of pounds of each grade of each type by the adjustment factor for that grade from (ii) below.

(*c*) Add the products of step (*b*) to find the dollar-and-cent amount of increase per pound of rosin product. Round to the nearest hundredth of a cent.

(ii) *Adjustment factor.* In the case of wood rosin other than FF, the adjustment factor is the same regardless of the time the manufacturer's maximum price for the rosin product in effect on September 28, 1945, was first established. In the case of FF wood rosin and gum rosin, the adjustment factor depends on the time the manufacturer's maximum price for the rosin product in effect on September 28, 1945, was first established.

(*a*) This table of factors for gum rosin applies only to a rosin product sold or offered for sale in March 1942 and whose maximum price in effect on September 28, 1945, is the same as the March 1942 price. The table for wood rosin (other than FF) applies irrespective of the date the manufacturer's maximum price for the rosin product in effect on September 28, 1945, was first established.

Grade	Gum, per pound in cents	Wood, per pound in cents
X	3.07	.75
WW	3.07	.75

(*b*) This table of factors applies to FF wood rosin in rosin products:

Date manufacturer's maximum price for rosin product in effect on September 28, 1945, first established:	*Per pound FF wood rosin in cents*
Prior to November 20, 1944	1.32
After November 19, 1944 and prior to June 18, 1945	1.00
After June 17, 1945	0.00

(*c*) This table is to be used to compute the adjustment factor for gum rosin in a rosin product not sold or offered for sale in March 1942 or whose maximum price has been increased over the March 1942 price. The adjustment factor per pound of rosin is determined by subtracting from the price per pound of rosin shown in the table, the average market price per pound for the same grade of gum rosin on the Savannah, Georgia, Cotton and Naval Store Exchange during the calendar month in which the maximum price for the rosin product in effect on September 28, 1945, was first established.

(iii) *Examples.* (*a*) Manufacturer's maximum prices for a rosin product in effect on September 28, 1945, which uses .750 pounds K gum rosin per pound rosin product were first established in July 1944. The average price per pound for K grade on the Savannah Exchange in July 1944 was 5.53¢, the price for K grade in the table in (ii) (*c*) is 7.02¢. The adjustment factor per pound K rosin is 7.02¢ minus 5.53¢ or 1.49¢ per pound rosin. The dollar-and-cent adjustment per pound rosin product is .750 x 1.49¢ or 1.12¢.

(*b*) Manufacturer's maximum prices for a rosin product in effect on September 28, 1945, using .200 pounds FF wood rosin and .500 pounds K wood rosin were first established in August 1944. From (ii) (*b*) the adjustment factor for FF is 1.32¢ per pound, and the dollar-and-cent adjustment per pound rosin product is .200 x 1.32¢ or .264¢. From (ii) (*a*) the adjustment factor for K wood rosin is 1.80¢, and the dollar-and-cent adjustment per pound rosin product is .500 x 1.80¢ or .900¢. The total adjustment per pound rosin product is .264¢ plus .900¢ or 1.16¢.

(*c*) A rosin product sold in March 1942 whose maximum price in effect on September 28, 1945, is the March 1942 price uses .500 pounds WW gum and .300 pounds X wood rosin per pound rosin product. From (ii) (*a*) the adjustment account of WW gum is .500 x 3.07¢, on account of X wood is .300 x .75¢, or a total adjustment of 1.535¢ plus .225¢ or 1.76¢ per pound rosin product.

(iv) *Manufacturers' reports.* Prior to the first delivery of a rosin product covered by this subparagraph (1) at a price higher than the maximum price in effect on September 28, 1945, the manufacturer shall mail to the Rubber, Chemicals and Drugs Price Branch, Office of Price Administration, Washington 25, D. C., a report containing:

(*a*) A description of the rosin product together with the maximum prices in effect for his sales of the rosin product on September 28, 1945, and a statement as to how and when these were established.

(*b*) The adjusted maximum price under this subparagraph (1), with an explanation of how the adjusted maximum price was calculated showing the number of pounds of each grade of each type of rosin used to make one pound of rosin product, the adjustment factor used for each grade, and the dollar-and-cent adjustment for each grade.

(*c*) Statement as to the total weight of the components used (excluding solvents where the rosin product is sold in solution) to make one pound of rosin product.

(v) *Resellers.* A reseller of a rosin product priced by the manufacturer under this subparagraph (1) may add, on and after the effective date of this section 15, to his maximum price per unit as of September 28, 1945 his increased acquisition cost per unit under this section 15. His increased acquisition cost per unit is the increase (in dollars and cents) in the price to him per unit over his supplier's maximum price per unit on September 28, 1945 as determined from the invoice required to be furnished him under paragraph (d) below.

(*c*) *Rosin products priced after September 28, 1945.* In first determining a maximum price for a rosin product after September 28, 1945, by reference to the same or similar rosin product under § 1499.2 or by reference to a comparable rosin product under § 1499.3, the seller may use the adjusted maximum price determined under this section 15 or section 20 of Maximum Price Regulation No. 406 for the same, similar, or comparable rosin product.

(d) *Invoices.* The manufacturer or reseller of a rosin product for which maximum prices are established under this section 15 shall show as separate items on all invoices therefor:

(1) The maximum price in effect for the sale of the rosin product on September 28, 1945.

(2) The adjusted selling price (not in excess of the maximum price under this section 15).

(3) A statement that under OPA regulations a reseller may add to his maximum price as of September 28, 1945, the increase shown by the invoice.

An invoice containing the above required information shall be furnished the buyer prior to payment by him.

(e) The adjustment provision of § 1499.75 (a) (18) of Supplementary Regulation No. 15 to the General Maximum Price Regulation shall not be applicable to rosin products covered by this section 15.

3. Section 25 is amended to read as follows:

SEC. 25. *Steam distilled turpentine, dipentene and limed rosin*—(a) *Maximum prices.* The maximum prices for sales of steam distilled turpentine, dipentene and limed rosin shall be those established under any other provisions of the General Maximum Price Regulation, or those set forth below, whichever are higher:

(1) *Sales by producers*—(i) *Steam distilled turpentine and dipentene*—(*a*) *Base maximum prices.*

Steam distilled turpentine, $0.98 per gallon in tank cars f. o. b. plant.

Dipentene, $0.49 per gallon in tank cars f. o. b. plant.

(*b*) *Differentials.* Maximum prices for sales in other containers and quantities shall be established by applying to the base prices set forth in (*a*) above, the dollar and cent differentials, discounts and allowances established for such sales under any other provisions of the General Maximum Price Regulation.

(ii) *Limed rosin.* The maximum price per 100 pounds net for a producer's sales of limed rosin to any class of purchasers shall be the producer's maximum price per 100 pounds net for sales to that class of purchasers of the grade of rosin being limed plus an addition determined as follows:

Not more than 2 per cent lime content—20¢.

Lime content more than 2 per cent but less than 3 per cent—20¢ plus 1¢ for each .1 per cent lime content over 2 per cent.

Lime content of 3 per cent or more—30¢.

(2) *Sales by resellers.* A reseller of steam distilled turpentine, dipentene or limed rosin acquired under this section 25 at a cost higher than the supplier's maximum price established under any other provisions of the General Maximum Price Regulation, may add to his maximum price per unit established under any other provisions of the General Maximum Price Regulation for the higher cost product being priced, the increase (in dollars and cents) in the price to him per unit over his supplier's maximum price per unit established under any other provisions of the General Maximum Price Regulation as determined from the invoice required to be furnished him by paragraph (b) below. The resulting figure is the reseller's maximum

price per unit under this subparagraph (2).

(b) *Invoices.* The producer or reseller shall show as separate items on all invoices for steam distilled turpentine, dipentene or limed rosin for which maximum prices are established under paragraph (a) above:

(1) The maximum price established for a sale of such product under any other provisions of the General Maximum Price Regulation.

(2) The adjusted selling price (not in excess of the maximum price under this section 25).

An invoice containing the above required information shall be furnished the buyer prior to payment by him.

This amendment shall become effective September 29, 1945.

NOTE: The reporting requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 24th day of September 1945.

By § 8391.3 (b) (1) and § 8301.6 (a) of this part Reconstruction Finance Corporation is designated as the disposal agency for surplus aircraft and property peculiar to aircraft located within the continental United States, its territories and possessions. By § 8308.3 of Surplus Property Board Revised Regulation 8 (10 F.R. 9540, 10031, 11198) the War and Navy Departments are designated as the disposal agencies for certain surplus property located outside of the continental United States, its territories and possessions, and by Surplus Property Board Regulation 8, Order 1 (10 F.R. 7119) redelegation of their authority as such disposal agencies to the Office of the Army-Navy Liquidation Commissioner was approved. In order to avoid competition between the Reconstruction Finance Corporation and the Army-Navy Liquidation Commissioner in the Latin American market and to make aircraft available to that market, the Reconstruction Finance Corporation desires to delegate through the War and Navy Departments to the Office of the Army-Navy Liquidation Commissioner its authority with respect to the disposal to Latin American governments, organizations or residents, of whatever surplus aircraft may be brought to such Export Sales Center or Centers as may be established for that purpose. Pursuant to section 8 of the Surplus Property Act of 1944 (58 Stat. 765, 50 U. S. C. App. Sup. 1611), *It is hereby ordered*, That:

1. The Surplus Property Board hereby approves of the delegation by Reconstruction Finance Corporation to the War Department and the Navy Department of authority to dispose of any surplus aircraft and property peculiar to aircraft, which is presently or may hereafter be located at any Export Sales Center or Centers established and maintained by the Departments or either of them in the continental United States, to any Latin American Government, organization, or resident for export to and use in Latin America. The Board also hereby approves of the redelegation by the War and Navy Departments of such authority to the Office of the Army-Navy Liquidation Commissioner, and of the redelegation by the Commissioner of such authority to a Government agency or to a person under the complete control either of the Commissioner or of a Government agency; but no redelegation of authority by the Commissioner to any other person shall become effective without prior approval of the Board. For the purposes of this order the term Latin America refers to and includes all of Mexico, the Caribbean area, Central America and South America except the United States territories and possessions.

2. The foregoing approval is granted upon the condition that notice is given to the Surplus Property Board on behalf of the War Department, the Navy Department and the Office of Army-Navy Liquidation Commissioner whenever any Export Sales Center is established, moved or discontinued.

3. Copies of all instruments delegating or redelegating the authority hereby approved shall be filed promptly with the Board.

This order shall become effective September 26, 1945.

Public Service Company of Indiana, Inc. and its subsidiary, Indiana Gas & Water Company, Inc., direct and indirect public utility subsidiaries, respectively, of The Middle West Corporation, a registered holding company, having filed applications and declarations pursuant to sections 6 (a), 6 (b), 7, 9, 10, 12 (c), 12 (e) and 12 (f) of the Public Utility Holding Company Act of 1935, and rules thereunder, with respect, among other proposals, to the issue and sale by Public Service Company of Indiana, Inc. in accordance with the competitive bidding requirements of Rule U-50, of (a) $48,000,000 principal amount of First Mortgage Bonds, Series F, due 1975, at not less than face value plus accrued interest, the interest rate to be determined by competitive bidding and (b) 150,000 shares of $100 par value Cumulative Preferred Stock, at not less than par value plus accrued dividends, the dividend rate to be determined by competitive bidding; and

The Commission having, by order dated September 5, 1945, granted said applications and permitted said declarations to become effective subject to the condition, among others, that said issues and sales of bonds and of preferred stock should not be consummated until the results of competitive bidding pursuant to Rule U-50 had been made a matter of record in this proceeding and a further order entered in the light of the record so completed, jurisdiction having been reserved for this purpose and subject also to the condition that jurisdiction be reserved with respect to the fees and expenses proposed to be paid to the firm of King & Squires for soliciting proxies from the shareholders of Public Service Company of Indiana, Inc., to obtain their consent with respect to certain proposals contained in the applications and declarations; and

Public Service Company of Indiana, Inc., having filed a further amendment to the applications and declarations, in which it is stated that, in accordance with the permission granted by the order of the Commission dated September 5, 1945, Public Service Company of Indiana, Inc., has offered its First Mortgage Bonds for sale pursuant to the competitive bidding requirements of Rule U-50 and has received the following bids on said bonds from two underwriters, or groups of underwriters, as follows:

[1] Plus accrued interest.

The amendment having further stated that Public Service Company of Indiana, Inc., has accepted the bid of Halsey Stuart & Co., Inc., for said First Mortgage Bonds as set out above, and that said bonds will be offered for sale to the public at a price of 102.46% of the principal amount thereof, plus accrued interest, resulting in an underwriter's spread of 0.56% of the principal amount of said bonds; and

Public Service Company of Indiana, Inc. having further amended its applications and declarations to provide that said First Mortgage Bonds, due 1975, will be redeemable at the scale of redemption prices set forth in the amendment; and

Public Service Company of Indiana, Inc. having also included in its amendment a statement that, in accordance with the permission granted by the order of the Commission dated September 5, 1945, it has offered its Cumulative Preferred Stock for sale pursuant to the competitive bidding requirements of Rule U-50 and has received bids of 101.55% and 101.35% of par value, respectively, from Glore, Forgan & Co. and from Harriman, Ripley Co., Incorporated and The First Boston Corporation, both bids having been based on a dividend rate of 4.4%; and

The amendment having further stated that Public Service Company of Indiana, Inc. has rejected both bids for said preferred stock in accordance with the reservation of such right in the invitation for proposals to bid and that such stock will not be issued at this time; and

The Commission having examined said amendment and having considered the record herein, and finding no reason for imposing terms and conditions with respect to the price to be paid for said First Mortgage Bonds, due 1975, the redemption prices therefor, the interest rate thereon, and the underwriter's spread:

It is ordered, That the jurisdiction heretofore reserved over the price to be paid for said First Mortgage Bonds, the redemption prices therefor, the interest rate thereon, and the underwriter's spread, be, and the same hereby is released, and that said applications and declarations, as further amended, be, and the same hereby are, respectively granted and permitted to become effective, subject, however, to the terms and conditions prescribed in Rule U-24 and to the other conditions contained in our order of September 5, 1945; and

NORTH AMERICAN CO.

ORDER AMENDING PRIOR ORDER PERMITTING DECLARATION TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission held at its office in the City of Philadelphia, Pa., on the 21st day of September 1945.

The Commission having on the 21st day of August 1945 issued an order permitting the declaration of The North American Company to become effective with respect to the payment and distribution by it on October 1, 1945, to its holders of common stock of record on September 4, 1945, of a dividend payable in the common stock of Pacific Gas and Electric Company, having a par value of $25 per share, owned by declarant, at the rate of one share of such stock of Pacific Gas and Electric Company on each one hundred shares of the outstanding common stock of The North American Company, and to pay cash, in lieu of certificates for fractions of shares of stock of Pacific Gas and Electric Company, at the rate of 41 cents for each 1/100th of a share of such stock of Pacific Gas and Electric Company, such cash rate being based on the approximate market price of $41.00 per share as of August 2, 1945, the date the proposed dividend was declared;

The North American Company having represented to the Commission that the distribution and transfer of shares of common stock of Pacific Gas and Electric Company to the common stockholders of declarant will constitute partial compliance with the order of the Commission, dated April 14, 1942, directing declarant to dispose of its interest in Pacific Gas and Electric Company, and that the transactions will serve to effectuate the provisions of section 11 (b) of the Public Utility Holding Company Act of 1935; and

The North American Company having requested that the Order of the Commission permitting the declaration to become effective approve the distribution and transfer of such stock to its common stockholders as necessary or appropriate to effectuate the provisions of section 11 (b) of the act and specify and itemize the securities ordered to be so distributed and transferred;

The Commission finding that the proposed distribution and transfer by declarant to its common stockholders of shares of common stock of Pacific Gas and Electric Company, as payment of a dividend, is a step in compliance with our divestment order of April 14, 1942, and is necessary or appropriate to effectuate the provisions of section 11 (b) of the act; and

It appearing to the Commission that the request of The North American Company is, and was, one proper to be granted, but that inadvertently the requested specification and itemization was omitted from the said order of the Commission entered herein on August 21, 1945, and the Commission finding that said order should be corrected in that respect, as of the date thereof;

It is ordered, That the order of this Commission entered herein on August 21, 1945, be, and the same is hereby, amended, as of the date thereof, as follows:

The North American Company, a registered holding company, has filed a declaration pursuant to the applicable provisions of the Public Utility Holding Company Act of 1935 and the general rules and regulations promulgated thereunder, regarding a proposal to pay on October 1, 1945, a dividend to its holders of common stock of record on September 4, 1945, payable in the common stock of Pacific Gas and Electric Company having a par value of $25 per share, owned by The North American Company at a rate of one share of such stock of Pacific Gas and Electric Company on each one hundred shares of the outstanding common stock of The North American Company. In lieu of certificates for fractions of shares of stock of Pacific Gas and Electric Company, cash will be paid at the rate of 41 cents for each 1/100th of a share of such stock of Pacific Gas and Electric Company, this rate being based on the approximate market price of $41.00 per share as of August 2, 1945, the date the proposed dividend was declared.

Said declaration having been filed on the 3d day of August, 1945, and notice of filing having been duly given in the manner and form prescribed by Rule U-23 under said act and the Commission not having received a request for hearing with respect to said declaration within the period specified in said notice, or otherwise, and not having ordered a hearing thereon; and

The North American Company having requested that the Commission issue its order on or before August 25, 1945; and

The Commission finding that the requirements of section 12 (d) and Rules U-43 and U-44 are satisfied, that no adverse findings are necessary thereunder, and that action upon said declaration should be accelerated, and the Commission deeming it appropriate in the public interest and in the interest of investors and consumers to permit said declaration to become effective;

It is hereby ordered, Pursuant to said Rule U-23 and the applicable provisions of said act and subject to the terms and conditions prescribed in Rule U-24 that said declaration be and the same is hereby permitted to become effective forthwith.

It is further ordered, And the Commission finds, that the distribution and transfer by The North American Company on October 1, 1945, to its common stockholders of record on September 4, 1945, of shares of common stock of Pacific Gas and Electric Company having a par value of $25 per share, represented by Certificate No. NE-251755, in payment as a dividend to such stockholders, at the rate of one share of common stock of Pacific Gas and Electric Company on each one hundred shares of the outstanding common stock of The North American Company are necessary or appropriate to effectuate the provisions of section 11 (b) of the Public Utility Holding Company Act of 1935 and is a step in compliance with our order of April 14 1942.

1. Section 4 is amended to read as follows:

SEC. 4. *Delivered prices*—(a) *Common or contract carrier.* When shipment is by common or contract carrier, the maximum delivered price of hardwood flooring under this regulation shall be an amount which is not greater than the permissible f. o. b. mill maximum price plus either (1) the actual transportation charges paid or owed by the seller to a common or contract carrier for shipment from the seller's mill to the point of delivery required by the purchaser except as stated in paragraph (b) below, or (2) transportation charges based upon estimated weights contained in the table below for shipment from the seller's mill to the point of delivery required by the purchaser except as stated in paragraph (b) below. Transportation charges based upon estimated weights shall be figured by multiplying the rail rate by the estimated weights given in the following table, evened out to the nearest quarter-dollar per 1000 feet board measure:

ESTIMATED WEIGHTS

(b) *Trucking to rail head.* When a truck haul precedes rail shipment, as when a mill located away from the rail head hauls hardwood flooring by truck to the rail head, no addition may be made for the truck haul. However, in the following two cases a mill may apply for special permission to make an addition:

(1) When the mill was located away from rail connection because it specialized in water-borne hardwood flooring and where shortage of shipping has forced it to operate by rail.

(2) When a mill's rail connection has been abandoned since September 5, 1941. (Note: The word "abandoned," means total and permanent abandonment.)

The application should be made by letter to the Lumber Branch, Office of Price Administration, Washington 25, D. C. No additions may be made on quotations or sales for trucking to a rail head until the Office of Price Administration has given the seller permission to make such additions.

This amendment shall become effective October 1, 1945.

PART 1395—NONFERROUS FOUNDRY PRODUCTS

[RMPR 125,[1] Amdt. 11]

NONFERROUS CASTINGS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Maximum Price Regulation No. 125 is amended in the following respects:

1. A new § 1395.3 (d) is added to read as follows:

(d) *Permitted increase in the maximum prices of base period castings*—(1) *Castings to which the increase may be applied.* The increase permitted by this pargaraph (d) is applicable to the following copper and copper base castings:

(i) Castings the same or of the same class as those sold or contracted to be sold during the period October 1 to October 15, 1941, and

(ii) Castings the same or of the same class as those sold, contracted to be sold or delivered during the period May 11, 1942 to January 31, 1943.

(2) *Amount of increase.* The permitted increases set out below may be added to the seller's prices as determined under paragraphs (a), (b) and (c) of this § 1395.3. (Note that the price to which the addition may be made is the price after the reductions required by Amendment 5, issued May 24, 1944.) The amount of the increase varies inversely with the price to which it is to be added.

Price before addition of increase (cents per pound):	Permitted increase (cents per pound)
Less than 25	4.00
25.01 to 30	3.50
30.01 to 35	3.00
35.01 to 40	2.50
More than 40	2.00

(3) *Applicability of increase to adjusted prices.* The increase authorized by this paragraph (d) may not be added to any price which has been increased by an adjustment order issued under § 1395.12 of this regulation. However, a seller may, if he wishes, charge his price as determined under paragraphs (a), (b) and (c) of this section, plus the addition permitted by this paragraph (d), instead of his maximum price established by his adjustment order.

2. A new § 1395.4 (d) is added to read as follows:

(d) *Alternative method of determining maximum prices*—(1) *Castings to which this alternative method is applicable.* This pricing method may, if the seller wishes, be used for any copper or copper base casting which would otherwise be priced under this § 1395.4 if such casting was sold or delivered during either of the following periods:

(i) January 1, 1941 to September 30, 1941, inclusive, or

(ii) October 16, 1941 to May 10, 1942, inclusive.

NOTE: This includes all copper and copper base castings sold or delivered between January 1, 1941 and May 11, 1942, other than castings which were sold and delivered in one of the two base periods set out in § 1395.3 or castings for which maximum prices are established in § 1395.2a

(2) *How maximum price is figured.* The seller may take the most recent net price at which he sold the identical casting to the same seller during the periods January 1, 1941 to September 30, 1941 and October 16, 1941 to May 10, 1942 and he may increase this net price as follows:

Net price before addition of increase (cents per pound):	Permitted increase (cents per pound)
Less than 25	4.00
25.01 to 30	3.50
30.01 to 35	3.00
35.01 to 40	2.50
More than 40	2.00

The price so figured shall then be reduced by the amount set out in § 1395.3 (b) for the particular alloy. These are the reductions set out in Amendment 5.)

If the seller did not sell the identical casting to the same buyer, he shall figure his price as above except that he shall use the most recent net price at which he sold the identical casting to any other buyer of the same class during the period set out above.

This amendment shall become effective October 1, 1945.

Issued this 25th day of September 1945.

Administrator.

MISCELLANEOUS AMENDMENTS

1. Section 1510.31 (d) (Petroleum Directive 59, as amended December 1, 1943, 8 F.R. 15792) is amended by deleting the word "rationed" wherever it appears in such section.

2. Petroleum Directive 59, as amended December 1, 1943, 8 F.R. 15792, is amended by adding § 1510.35 to read as follows:

§ 1510.35 *Termination provisions.* Unless otherwise provided herein, this directive shall terminate in whole or in part as directed by the Petroleum Administration for War upon not less than 10 calendar days' notice thereof to all original suppliers concerned. To effect an orderly conclusion of the Supply and Distribution Program in Petroleum Administration for War District One, the provisions set forth below shall apply, notwithstanding inconsistent provisions in any previous section of this directive.

(a) The provisions of §§ 1510.28, 1510.30, 1510.31 and 1510.34 (a) of this directive shall be inoperative as to any principal petroleum product received in District One (including principal petroleum products manufactured in District One) after September 30, 1945.

(b) Unassigned inventory shall not include any receipts of any principal petroleum product after September 30, 1945.

(c) Any quantity of product assigned to an original supplier which such supplier has failed to accept title to and remove or make other arrangements for by the close of business October 10, 1945, shall be forfeited, and all product which is forfeited by an assignee pursuant to the terms of this provision or of § 1510.31 (c) shall not be returned to Unassigned Inventory as is provided in § 1510.31 (c). If such forfeiture occurs after September 30, 1945, but shall be the absolute property of the original supplier against whom the assignment was issued, and the amount of any product so forfeited shall be deemed as having been received under an assignment by the original supplier in whose favor the assignment was issued.

(d) On and after October 1, 1945, the original suppliers operating in each zone shall make such adjustments among themselves as of September 30, 1945, as may be required by the schedules approved and issued by the Petroleum Administration for War as follows:

(1) The Committee shall as soon as practicable prepare a suggested schedule in collaboration with a staff representative of the Petroleum Administration for War designated for the purpose, showing as of September 30th for each principal petroleum product in each zone the amount by which the net adjusted receipts of such product chargeable to each original supplier under § 1510.31 (c) hereof exceeds or is less than such original supplier's net proportionate share of the total amount of such product available for distribution under § 1510.31 (c) hereof, after making all adjustments required from time to time under §§ 1510.31 (c) and 1510.33 hereof, or provided in any schedule, order, or directive of the Petroleum Administration for War.

(2) Upon approval and issuance of the schedule by the Petroleum Administration for War, the original suppliers within each zone affected thereby shall confer with one another and endeavor to adjust their over and under positions by any means acceptable to them, including a financial adjustment. Within 15 calendar days following the date on which such schedule is issued, each original supplier affected shall notify the Committee of the adjustments, if any, that have been made with other original suppliers. To the extent that the over and under position of any original supplier shall not have been adjusted within such time, the adjustment thereof as directed by the Petroleum Administration for War shall be made on a financial basis at the applicable sum or rate set forth in Method "A" of § 1510.31 (d) hereof, as amended, such direction to be subject to review upon written application to the Petroleum Administrator filed within 5 calendar days from the date of such direction.

(e) No application may be filed under § 1510.34 (h) (1) after September 30, 1945; and no appeals may be filed under § 1510.34 (h) (2) after October 10, 1945.

AUTHORITY: §§ 8302.1 to 8302.12, inclusive, issued under Surplus Property Act of 1944, 58 Stat. 765; 50 U. S. C. App. Sup. 1611.

§ 8302.1 *Definitions*—(a) *Terms defined in act.* Terms not defined in paragraph (b) of this section which are defined in the Surplus Property Act of 1944 shall in this part have the meaning given to them in the act.

(b) *Other terms.* (1) "Government agency" means any executive department, independent establishment, board, bureau, commission, or other agency of the Federal Government, or any corporation wholly owned (either directly or through one or more corporations) by the United States.

(2) "Standard administrative and maintenance property" means all property from time to time listed in stock catalogues issued by the Procurement Division of the Treasury Department. These catalogues normally include, among other items, office supplies, furniture, and equipment, and maintenance operating supplies.

(3) "State and local governments" means any State, territory, or possession of the United States, the District of Columbia, and any political subdivision or instrumentality thereof.

§ 8302.2 *Scope.* This part shall apply only to disposals made by disposal agencies within the United States, its territories or possessions; *Provided*, That § 8302.7 shall apply only within the continental United States. This part shall not apply to any disposals of real property, industrial plants, shipyards and facilities, property designated in classes (1) to (3), inclusive, of section 19 of the Surplus Property Act of 1944, or surplus vessels which the Maritime Commission determines to be merchant vessels or capable of conversion to merchant use.

§ 8302.3 *Applicability of regulations and directives of War Production Board, Office of Price Administration, and Secretary of Agriculture; and disposals which may be exempted from this part.*—(a) *Applicability of regulations and directives of War Production Board, Office of Price Administration, and Secretary of Agriculture.* All disposals hereunder shall be subject to applicable regulations and directives of the War Production Board, the Office of Price Administration, and the Secretary of Agriculture.

(b) *Disposals which may be exempted from this part.* Subject to the provisions of paragraph (a) of this section, disposal agencies may dispose of surplus property without regard for any provisions of this part:

(1) To supply the needs of the armed forces;

(2) When the property is of such nature or in such situation that its immediate disposal is necessary to prevent its deterioration, spoilage, or serious loss or damage, or when its disposal is necessary to relieve critical storage requirements;

(3) When upon application to the Surplus Property Board by a disposal agency, the Board shall find that it is impracticable or uneconomical to require the disposal of designated property according to the provisions of this part;

(4) When the condition of a surplus agricultural commodity or food is such that it is not usable in its present form without reprocessing or reconditioning;

(5) When the cost (estimated if not known) of all substantially similar items of such property in the possession of the disposal agency at any one location at any one time does not exceed $300.

§ 8302.4 *Information about available property*—(a) *Availability of records of surplus property; liaison officers.* Disposal agencies shall establish procedures to insure that designated representatives or procurement officers of Government agencies and State and local governments shall have access to the information on the property records of the disposal agencies, and shall upon request from time to time inform such representatives or procurement officers about surplus property for which declarations have been received or are anticipated. In order to avoid the confusion which would result from making limited copies of records available to an unlimited number of persons, a disposal agency may in its discretion appoint members of its staff to serve as liaison officers at each disposal point who shall secure for Government agencies and State and local governments the information desired from such records. It shall be the responsibility of Government agencies, in order to avoid making purchases through commercial channels, continuously to consult such records and to determine whether their requirements for all items of property, except standard administrative and maintenance property subject to the provisions of § 8302.7, can be satisfied out of surplus property in the hands of the disposal agencies.

(b) *Notice of offering.* Disposal agencies shall adopt procedures which will allow Government agencies and State and local governments to receive notices of what surplus property is available or offered for sale within the area in which the offering is made. Government agencies and State and local governments shall have the right upon request to be put on mailing lists for notices in all cases where such lists are used to offer property for disposal, including mailing lists otherwise reserved to special classes of buyers, unless the disposal agency shall find that the giving of such notices

to Government agencies and State and local governments shall for any particular type of property become impracticable, unduly expensive to the Government, or unreasonably burdensome on the facilities of the disposal agency. When public advertising is used as the method of offering, no other notice need be given to Government agencies and State and local governments.

§ 8302.5 *Reservations of surplus property for Government agencies and State and local governments.* (a) Each disposal agency, based upon experience and demonstrated demand, shall estimate the quantity of each item of surplus property which it is necessary to hold in reserve in order to provide an adequate supply thereof to satisfy the probable needs for such item of Government agencies and State and local governments. Such quantities shall be reviewed and adjusted periodically by the disposal agency in the light of the changing requirements of Government agencies and State and local governments and the areas in which such requirements exist. There need be no earmarking of specific property, but the quantities of surplus property so estimated shall be reserved for exclusive disposal to Government agencies and State and local governments, and any property in excess of such reserved quantities may be promptly disposed of to others.

(b) In order to assist the disposal agencies to reserve quantities of surplus property adequate to satisfy the needs of Government agencies, including the needs of Smaller War Plants Corporation for small business or veterans in accordance with the Surplus Property Act of 1944 and applicable regulations of the Surplus Property Board, Smaller War Plants Corporation shall advise the disposal agencies from time to time of the quantities and kinds of surplus property which it needs or may need for such purposes, and the disposal agency shall thereupon take such steps as may be necessary to reserve an adequate supply with which to fill such needs. To the end of rapidly adjusting the reserve so established, prospective purchasers shall have the right to inspect the property they wish to buy.

§ 8302.6 *Transfers to Government agencies.* (a) Subject to the provisions of § 8302.7, disposal agencies shall transfer to a Government agency on its order surplus property in quantities not smaller than the smallest lots consistent with commercial practice and at the fair value of such property as provided in § 8302.9. Disposal agencies shall make such transfer of surplus property to a Government agency without reimbursement or transfer of funds whenever a transfer on such terms by the owning agency by which such property was declared surplus would be authorized by law to be made to the agency desiring such property. Government agencies may place orders with a disposal agency for surplus property at any time, and such orders shall be filled from property held in reserve as provided in § 8302.5, or, if not so held therein, from any other available surplus property. If no such property is available at the time of receipt of the order, the disposal agency shall promptly notify the Government agency, and thereupon such order shall be deemed to lapse. Property already advertised for public competitive bids or for sale at auction or for immediate purchase at a fixed time and property specifically selected by a prospective purchaser shall not be considered available.

(b) Disposals to Government agencies under this section shall be accorded priority over disposals to State and local governments under § 8302.8. Whenever two or more Government agencies shall claim the same item or items of surplus property, the disposal agency shall fill the orders in the sequence in which they have been received.

§ 8302.7 *Transfers of surplus standard administrative and maintenance property to the Treasury Department, and acquisition of such property by Government agencies.* (a) In order to facilitate the transfer of surplus property from one Government agency to other Government agencies for their use, the Treasury Department may acquire or order earmarked for its future acquisition from the disposal agencies such quantities of surplus standard administrative and maintenance property as the Treasury Department shall estimate may be needed to satisfy the needs and requirements for such property of all Government agencies within the continental United States, other than the War Department and the Navy Department. The periods for which such property may be earmarked shall be established by the disposal agency based upon the estimates of the Treasury Department and the requirements of such Government agencies pursuant to such estimates. Such Government agencies shall cooperate with the Treasury Department in compiling such estimates and shall provide the Treasury Department with such information concerning their requirements as it may need in order to promote the fullest utilization of surplus property.

(b) Disposal agencies shall transfer surplus standard administrative and maintenance property to the Treasury Department in accordance with the provisions of § 8302.6 and at the fair value of the property less an amount which reflects the estimated expenses to be incurred by the Treasury Department in making distribution to Government agencies, and the Treasury Department shall promptly upon such transfer take possession and assume responsibility for the care, handling, and disposition of such property.

(c) It shall be the responsibility of all such Government agencies, in order to avoid making purchases of such property through commercial channels when such property is available from surplus, continuously to consult the stock catalogues issued by the Procurement Division of the Treasury Department.

(d) Except in cases where transfers may be made without reimbursement or transfer of funds, no Government agency other than the War Department and the Navy Department shall within the continental United States acquire by direct transfer from a disposal agency any surplus standard administrative or maintenance property which is offered for disposal by the Treasury Department and immediately available for acquisition by such Government agency: *Provided*, That Smaller War Plants Corporation shall be entitled to acquire any such property from a disposal agency for resale in accordance with the Surplus Property Act of 1944 and applicable regulations of the Surplus Property Board.

§ 8302.8 *Disposals to State and local governments.* (a) Disposal agencies shall dispose of surplus property to State and local governments in quantities not smaller than the smallest lots consistent with commercial practice and at the fair value of such property as provided in § 8302.9. State and local governments may place orders with a disposal agency at any time, and such orders shall be filled from property held in reserve as provided in § 8302.5, or, if not so held therein, from other available surplus property. If no such property is available at the time of receipt of the order the disposal agency shall promptly notify the claimant, and thereupon such order shall be deemed to lapse. Property already advertised for public competitive bids or for sale at auction or for immediate purchase at a fixed time and property specifically selected by a prospective purchaser shall not be considered available.

(b) Disposals to State and local governments shall be subordinate to the priority of Government agencies under § 8302.6. Whenever two or more State and local governments shall claim the same item or items of surplus property, the disposal agency shall fill the orders in the sequence in which they have been received.

(c) At the request of a disposal agency, any State or local government shall submit a certificate made by a responsible officer setting forth that the property is sought for the use of a State or local government as defined in § 8302.1 (b) (3).

§ 8302.9 *Fair value.* Disposal agencies shall fix the fair value at which property disposed of under §§ 8302.5, 8302.6, and 8302.8 shall be acquired by Government agencies and State and local governments. Such fair value shall not be greater than the lowest price which is offered to any trade level at the time of acquisition by the Government agency or State or local government.

§ 8302.10 *Right of Government agencies and State and local governments to acquire property in competition with others.* In addition to acquiring property under §§ 8302.5, 8302.6, and 8302.8, Government agencies and State and local governments shall be entitled to submit offers whenever surplus property is otherwise offered for sale, without regard for the location of the property, but shall not be entitled to priority and shall acquire such property on the same terms and conditions as others.

§ 8302.11 *Regulations by disposal agencies to be reported to the Surplus Property Board.* Each disposal agency shall file with the Surplus Property Board copies of all regulations, orders, and instructions of general applicability which they may issue in furtherance of the provisions, or any of them, of this part.

§ 8302.12 *Amendment or repeal.* This part, and any order issued under it, shall be subject to amendment or repeal by the Board by any regulation, order, or other action of the Board duly published in the Federal Register.

This revision of this part shall become effective on September 21, 1945.

§ 8311.1 *Definitions*—(a) *Terms defined in act.* Terms not defined in paragraph (b) of this section which are defined in the Surplus Property Act of 1944 shall in this part have the meaning given to them in the act.

(b) *Other terms.* (1) "Disposition" means disposal to a person other than a Government agency.

(2) "Government agency" means any executive department, independent establishment, board, bureau, commission or other agency of the Federal Government, or any corporation wholly owned (either directly or through one or more corporations) by the United States.

(3) "Transfer" means disposal to a Government agency.

§ 8311.2 *Scope.* This part shall apply to transfers and dispositions within the continental United States, its territories and possessions unless otherwise expressly indicated. Revised Special Order 13, July 31, 1945, (10 F.R. 9697) and Special Order 16, July 31, 1945, (10 F.R. 9697) are hereby superseded and rescinded as of the effective date of this part.

§ 8311.3 *Proceeds to be covered into Treasury.* All proceeds from transfer or disposition of property under the act (including rents, interest, other proceeds) shall be covered into the Treasury as miscellaneous receipts, except as provided in subsections (b), (c) and (d) of section 30 of the act. Sums deducted from gross proceeds under section 30 (b) of the act, to determine net proceeds shall be covered into the Treasury as miscellaneous receipts. Under no circumstances may an agency retain all or any part of the proceeds from any transfer or disposition under the act as reimbursement for the cost or expense of care, handling, disposition or transfer of surplus property.

§ 8311.4 *Net proceeds.* Unless the Board directs otherwise, no disposal agency shall, pursuant to section 30 (b) of the act, credit to a reimbursable fund or appropriation of any owning agency, or pay to any owning agency, the net proceeds of disposition or transfer of property arising from transactions completed during any quarter except upon the basis of computation of net proceeds determined by the Board at the end of each respective quarter: *Provided, however*, That such credit or payment may be made with regard to transactions completed prior to July 1, 1945, if the basis for computing net proceeds had theretofore been approved by the Board. When net proceeds are to be credited or repaid to an interested agency but because the property is co-mingled with other property it is impracticable or impossible to determine the applicable gross proceeds, disposal agencies may make such payment or credit from the proceeds of the transfers or dispositions of similar property transferred or disposed of directly after the receipt of the surplus declaration.

§ 8311.5 *Refunds to purchasers.* No disposal agency shall withhold from miscellaneous receipts of the Treasury any amount from the proceeds of dispositions for the purpose of making appropriate refunds to purchasers pursuant to section 30 (c) of the act unless such amount is deposited in a special account with the Treasurer of the United States and no such deposit shall be made without authorization from the Board. To receive such authorizations, disposal agencies shall apply to the Board, recommending the amount which the agency deems necessary to deposit in such account in order to permit appropriate refunds to purchasers.

§ 8311.6 *Expenses; certain expenses excepted.* Government agencies shall apply to the Board as provided herein for allocation or reimbursement of funds to meet expenses necessary to enable disposal agencies to carry out the disposal functions vested in them by or pursuant to the act or necessary to render such special advisory services as the Board may designate: *Provided*, That, as long as any applicable appropriation act so requires, no such allocation or reimbursement will be made for expenses incident to the care, handling, transfer or other disposition of surplus property which a disposal agency had under its control as an owning agency when the property was declared surplus, and nothing in this part shall be deemed to refer to such expenses.

§ 8311.7 *Estimate of expenses.* On or before the 15th day of the last month of each quarter, Government agencies shall submit to the Board an estimate of their disposal and advisory expenses for the succeeding quarter, together with appropriate statements explaining the basis upon which the estimate was determined. Such expenses shall be presented by program and by objective class of expenditure and shall be directly related to the disposal or advisory services to be rendered. The Board will expect that in the preparation of estimates of expenses, all agencies will explore all available means to reduce expenditures to a minimum. Each agency in preparing estimates shall absorb indirect administrative or overhead expense to the fullest extent possible within the limits of existing appropriations or enabling statutes. Estimates of fiscal year expenses shall be submitted by Government agencies at such times as necessary to meet regular or special hearings before the Bureau of the Budget and the Congress.

§ 8311.8 *Statement of expenses.* On or before the 15th day of each month, Government agencies shall submit to the Board a statement of their expenditures and obligations for such disposal and advisory expenses made during the preceding month.

§ 8311.9 *Submission prior to commitment.* Wherever substantial expenses are involved, particularly contracts involving commitments in excess of $100,000, Government agencies may request the Board for determination of the propriety of such expenses prior to committing themselves to such expenses.

§ 8311.10 *Allocations and reimbursement.* Within the terms and limits of its appropriations, the Board will, at the beginning of each quarter, allocate funds or authorize expenditures subject to reimbursement, as the case may be, in such amounts determined to be necessary for proper disposal and advisory expenses to cover that quarter. Reimbursement will be made on the basis of vouchers submitted with such supporting detail as the Board may require. Government agencies shall make such reports as the Board may require and will cooperate with the Board in such studies as it may conduct to determine effective and economical use of the funds allocated or authorized for reimbursement.

§ 8311.11 *Regulations by agencies to be reported to the Board.* Each Government agency shall file with the Board copies of all regulations, orders, and instructions of general applicability which it may issue in furtherance of the provisions, or any of them, of this part.

Reports shall be prepared and filed with the Board in such manner as may be specified by order issued under this part, subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1944. FEDERAL POWER COMMISSION.

[Docket No. G-575]

TENNESSEE NATURAL GAS LINES, INC.

NOTICE OF AMENDED AND SUPPLEMENTAL APPLICATION

SEPTEMBER 24, 1945.

Notice is hereby given that on September 18, 1945, Tennessee Natural Gas Lines, Inc. (Applicant), a Delaware corporation, and its successor in interest, Tennessee Natural Gas Lines, Inc., a Tennessee corporation, having their principal place of business at Chattanooga, Tennessee, filed with the Federal Power Commission an amended and supplemental application for a certificate of public convenience and necessity pursuant to Section 7 of the Natural Gas Act, as amended, to authorize the construction and operation of approximately 14 miles of 8⅝-inch O. D. transmission pipeline extending from a point of interconnection with the main 24-inch transmission pipeline of Tennessee Gas and Transmission Company near the village of Westernia, Cheatham County, Tennessee, and thence extending in a southeasterly direction to a city gate interconnection with the facilities of Nashville Gas & Heating Company, near the village of Bordeaux, Davidson County, Tennessee.

On August 30, 1944, Tennessee Natural Gas Lines, Inc. (Delaware corporation), filed an application with the Commission (Docket No. G-575) for a certificate of public convenience and necessity to authorize the construction and operation of approximately 17 miles of 10¾-inch transmission pipeline beginning at a proposed point of connection with the pipeline of Tennessee Gas and Transmission Company near Ashland City, Tennessee, and extending in a southeasterly direction to Nashville, Tennessee. Subsequent to the filing of this latter application, which is amended by the instant application, Applicant has reincorporated under the laws of the State of Tennessee and the assets, rights and privileges transferred to the new corporation.

According to the application, the Nashville Gas & Heating Company (Nashville Company), Applicant's proposed city gate customer, is presently engaged in the production, distribution and sale of artificial or manufactured gas, having a 200 B. t. u. heat content which is enriched with oil to a heat content of about 530 B. t. u. The Nashville Company distributes such gas in Nashville, Tennessee, and proposes to convert its system to the distribution and sale of straight natural gas in Nashville in the spring or summer of 1946 and then use its facilities for the production of manufactured gas to augment the supply of natural gas during an emergency. It is the intention of Applicant to sell approximately 2,000 mcf of gas per day to the Nashville Company for enriching purposes in place of oil until the conversion to straight natural gas occurs. After such conversion, Applicant states that its natural gas consumption will increase and that its total annual sales the fifth year after such conversion will be about 1,605,000 mcf.

The total over-all capital cost of the proposed facilities is estimated at $454,250.00. It is proposed to finance the costs of such construction through the issuance of bonds and preferred and common stock.

The application also recites that the facilities of the Nashville Company are inadequate to render proper service during the coming winter, thus causing economic and physical handicap to persons, firms and industries situated within the area of Nashville, Tennessee.

Any person desiring to be heard or to make any protest with reference to said application should, on or before the 10th day of October, 1945, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's provisional rules of practice and regulations under the Natural Gas Act.

[MPR 188, Rev. Order 43 Under 2d Rev. Order A-3]

COMMERCIAL FURNITURE CO.

ADJUSTMENT OF MAXIMUM PRICES

Order No. 43 under Second Revised Order No. A-3 under § 1499.159b of Maximum Price Regulation No. 188 is revised to read as follows:

For the reasons set forth in an opinion issued simultaneously herewith, and filed with the Division of the Federal Register; and pursuant to Second Revised Order No. A-3 under § 1499.159b of Maximum Price Regulation No. 188, it is ordered:

(a) *Manufacturer's maximum prices.* Commercial Furniture Company, of 2739 West Chicago Avenue, Chicago, Illinois, may sell and deliver the wood office furniture which it manufactures, and which is described in the manufacturer's application dated July 11, 1944, at prices no higher than its maximum prices in effect immediately prior to October 25, 1944 plus an adjustment charge of 17.4 percent of each such maximum price.

On all sales other than sales to ultimate consumers, the adjustment charge provided herein may be made and collected only if stated separately on each invoice.

The maximum prices of the manufacturer, as adjusted, are subject to its customary terms, discounts, allowances and other price differentials in effect during March, 1942 on sales to each class of purchaser.

(b) *Maximum prices of purchasers for resale.* A person who hereafter buys an article covered by this revised order and resells it in substantially the same form, may collect from his customer, in addition to his properly established maximum price in effect immediately before this revised order was issued, an adjustment charge in the same amount as the adjustment charge herein authorized and which he pays to his supplier. If he did not have a maximum price in effect for the article at the time this revised order was issued, he may add the same adjustment charge to the maximum price which he hereafter establishes for his sales under the applicable regulation. If the applicable regulation requires the maximum resale price to be computed on the basis of cost, the reseller must find his maximum resale price (not including the permitted adjustment charge) by using as cost his invoice cost less any adjustment charge stated on the invoice as a separate amount.

On all sales other than sales to the ultimate consumer this adjustment charge may be made and collected only if it is separately stated on each invoice. The adjusted price is subject to each seller's customary terms, discounts, and allowances on sales of the same or similar articles.

(c) *Notification.* At the time of, or prior to, the first invoice to a purchaser for resale, showing a price adjusted in accordance with the terms of this revised order, the manufacturer shall notify the purchaser in writing of the method established in paragraph (b) of this revised order for determining adjusted maximum prices for resale of the articles covered by this revised order. This notice may be given in any convenient form.

(d) *Statements to be submitted to the Office of Price Administration.* After the effective date of this revised order, Commercial Furniture Company shall submit to the Office of Price Administration, Washington, D. C., a detailed quarterly profit and loss statement, within thirty days after the close of each quarter.

(e) This revised order may be revoked or amended by the Price Administrator at any time.

AUTHORIZATION OF MAXIMUM PRICES

Revised Order No. 444 Under Revised Maximum Price Regulation 136. Machines, parts and industrial equipment. General Motors Corporation; Docket No. 6083-136.25a-277.

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to section 21 of Revised Maximum Price Regulation 136, *It is ordered:*

Order No. 444 under Revised Maximum Price Regulation 136, is redesignated Revised Order No. 444, and is revised and amended to read as follows:

(a) *Chevrolet Motor Division.* General Motors Corporation, General Motors Building, Detroit 2, Michigan, is authorized to sell to resellers its Model 3104 CCBX, ½ ton commercial chassis with cab, pickup box, 115" wheelbase, 1942 standard equipment and specifications, and synthetic tires of base tire size instead of natural rubber tires, at a price not to exceed a net wholesale price of $587, (subject to the discounts and allowances in effect on March 31, 1942, to the applicable class of resellers). The manufacturer is authorized to determine maximum prices for sales to resellers of the other truck models within its ½ ton commercial truck line, and of the truck models within its ¾ ton commercial truck line, by adjusting the maximum price in effect on March 31, 1942, of each such model so that the same dollar differential shall exist between that adjusted price and the adjusted price of the Model 3104 commercial chassis as existed between March 31, 1942 prices of such models. The following applicable charges may be added to these adjusted prices.

(1) *Charges.* (i) A charge for extra, special and optional equipment which shall not exceed the list or established price in effect on March 31, 1942 (less the discount in effect on that date) for such equipment when sold as original equipment.

(ii) A charge to include Federal tires-weight and other Federal excise taxes computed in accordance with the seller's method in effect on March 31, 1942.

(iii) A charge for freight based on freight rates from Flint, Michigan, to place of delivery.

(iv) A charge to cover seller's expense for unloading, handling and delivery, gas and oil, not to exceed $5.00, where the model is shipped to a company-owned zone sales location.

(b) *Chevrolet Motor Division.* General Motors Corporation, is authorized to sell to the United States its Model 3104 CCBX, ½ ton commercial chassis with cab, pickup box, 115" wheelbase, 1942 standard equipment and specifications, and synthetic tires of base tire size instead of natural rubber tires, at a price not to exceed the net wholesale price of $575 (subject to the discounts and allowances in effect on March 31, 1942). The Chevrolet Motor Division is

authorized to determine maximum prices for sales to the United States of all other truck models in its ½ ton commercial truck line and of the models in its ¾ ton commercial truck line, by adjusting the maximum price in effect on March 31, 1942, to the United States of each such model so that the same dollar differential shall exist between that adjusted price and the adjusted price of the Model 3104 commercial chassis as existed between the March 31, 1942 prices of such models for sales to the United States. The applicable charges in subparagraph (1) of paragraph (a) may be added to these adjusted prices.

The maximum prices for all other truck chassis models in the Chevrolet ½ ton commercial truck line and truck models in the Chevrolet ¾ ton commercial truck line shall be the respective retail list prices which shall be determined by the Chevrolet Division, General Motors Corporation, in accordance with paragraph (d) below (subject to the discounts and allowances in effect on March 31, 1942, to the applicable class of purchaser). To the retail list prices authorized by this paragraph the following applicable charges may be added:

(ii) A charge for transportation which shall not exceed the charge the General Motors Corporation would make for the transportation of the truck to the place of business of the reseller.

(iii) The reseller's charge for handling and delivery in effect on March 31, 1942, and in addition, the storage charges he has to pay under item (v) of paragraph (a) (1).

(iv) A charge to include Federal, State and local taxes on his purchase, and sale, or delivery, of the applicable truck model, computed in accordance with the reseller's method in effect on March 31, 1942.

(v) The dollar amount of all other charges which the reseller had in effect on March 31, 1942, to the applicable class of purchasers.

(d) The *Chevrolet Motor Division*, General Motors Corporation, shall determine retail list prices for all truck models for which it has maximum prices under paragraph (a). The retail list prices established by the Chevrolet Motor Division shall reflect the same differential between the net wholesale prices authorized in paragraph (a) and the respective retail list prices as existed on March 31, 1942, between the net wholesale prices and the respective suggested retail list prices of the truck models.

(e) The *Chevrolet Motor Division*, General Motors Corporation, shall furnish the Office of Price Administration with a report of each of the retail list prices it determines in accordance with paragraph (d) of this revised order, not later than five days from the date of the first sale of each model.

(f) A reseller that cannot establish a price under paragraph (c) because it was not in business on March 31, 1942, shall determine its maximum price by adding to the retail list price which a reseller is permitted to charge in accordance with paragraph (c) and (d) the following applicable charges:

(1) *Charges.* (i) The original equipment retail charge that Chevrolet Motor Division, General Motors Corporation, suggested on March 31, 1942, be made by resellers for extra, special or optional equipment attached to the truck as original equipment.

(ii) A charge to cover transportation which shall not exceed the charge the General Motors Corporation would make for the transportation of the truck to the place of business of the reseller;

(iii) A charge equal to the charge made to the reseller by the Chevrolet Motor Division, General Motors Corporation, in accordance with its March 31, 1942, method, to cover Federal tires-weight and other Federal excise taxes:

(iv) A charge equal to the reseller's expense for payment of State and local taxes on the purchase, sale or delivery of the truck;

(v) A charge equal to reseller's actual expense for handling and delivery, and in addition, the storage charges he has to pay under item (v) of paragraph (a) (1).

(g) A reseller of Chevrolet trucks in any of the territories or possessions of the United States is authorized to sell each of the trucks referred to in paragraph (c) at a price not to exceed the maximum price established in paragraph (c) or (f), whichever is applicable, to which it may add a sum equal to the expense incurred by or charged to it, for payment of territorial and insular taxes on the purchase, sale or introduction of the truck; export premiums; boxing and crating for export purposes; marine and war risk insurance; and landing, wharfage, and terminal operations.

(h) All requests not granted in this revised order are denied.

(j) This revised order may be amended or revoked by the Administrator at any time.

NOTE: Where the manufacturer has an established price in accordance with section 8 of Revised Maximum Price Regulation 136, which is different than a price permitted under paragraph (a) because of a substantial change in design, specifications or equipment of the truck, the reseller may add to its price under paragraphs (c), (f) or (g) any increase in price to it over the price it would otherwise pay under paragaph (a), plus its customary markup on such a cost increase, but in the case of a decrease in the price under paragraph (a) the reseller must reduce its price under paragaphs (c), (f) or (g) by the amount of the decrease and its customary markup on such an amount.

This revised order shall be effective September 24, 1945.

Issued this 24th day of September 1945.

CHESTER BOWLES,
Administrator.

UNITED LIGHT AND POWER CO. ET AL.

NOTICE OF FILING AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 20th day of September A. D. 1945.

In the matter of The United Light and Power Company, The United Light and Railways Company, American Light & Traction Company, Continental Gas & Electric Corporation, United American Company, and Iowa-Nebraska Light and Power Company, Respondents, File No. 59-17; The United Light and Power Company and its subsidiary companies, respondents, File No. 59-11; The United Light and Power Company, Applicant, File No. 54-25; Application No. 25.

The Commission having previously, by order dated August 5, 1941, under section 11 (b) (1) of the Public Utility Holding Company Act of 1935, ordered, among other things, that The United Light and Railways Company ("Railways"), a registered holding company, shall eliminate from its holding company system all its interest (whether direct or indirect) in the subsidiaries of American Light & Traction Company ("American Light"), also a registered holding company, and a subsidiary of Railways, and that Railways and its subsidiary, Continental Gas & Electric Corporation ("Continental"), also a registered holding company, shall dispose of their direct or indirect interest in Columbus and Southern Ohio Electric Company ("Columbus");

Railways and American Light having heretofore filed a plan, in connection with the liquidation and dissolution of American Light, providing, among other things, for the distribution to its common stockholders of the portfolio securities of American Light remaining after the discharge of the claims of its preferred stock; the Commission having in its Memorandum Opinion issued on June 2, 1945 concluded that the most appropriate plan for accomplishing compliance with its order of August 5, 1941 would require, among other things, that Railways promptly dispose of its proportionate interest in the securities of the subsidiaries of American Light, attended by the application of such securities or the proceeds from the sale thereof to reduce senior securities of the companies in the Railways' system; and the Commission having in said Memorandum Opinion indicated that Railways and Continental should act promptly to dispose of their interest in Columbus as required by the Commission's order of August 5, 1941 and that the proceeds of such disposition must be applied to decrease Continental's outstanding senior securities;

Notice is hereby given that Railways and Continental have filed with this Commission applications and declarations, designated as "Application No. 25," pursuant to sections 11 (b) (1), 11 (b) (2) and 11 (e) of the act and any other applicable sections of the act or rules thereunder with respect to certain transactions the purpose of which, it is stated, is to accomplish (1) the disposition by Railways of the securities it will receive upon the liquidation of American Light, (2) the disposition by Continental of its investment in Columbus and (3) the improvement and simplification of the capital structures of Railways and Continental by means of the discharge of the claims of the outstanding debentures and preferred stock of Railways and the outstanding preferred stock and a portion or all of the outstanding debentures of Continental by the payment to the holders thereof of an amount of cash equivalent to the principal amount or par value of such securities plus accrued interest or dividends but without the payment of any premium.

All interested persons are referred to said document which is on file at the offices of this Commission for a statement of the transactions therein proposed which are summarized as follows:

I. *Introductory.* a. The capitalization of Railways consists of the following securities held by the general public:

Security:	*Amount outstanding*
5½ percent Debentures due 1952	$23,837,000
Prior preferred stock, cumulative, par value $100 per share:	*Shares*
7 per cent series	37,993
6.36 percent series	52,329
6 percent series	99,516
Common stock ($7 par value)	3,173,838

b. Railways' debentures are subject to redemption, in whole or in part, at the option of Railways at any time after 90 days' published notice, at 102% of the principal amount thereof, plus accrued interest to the date of redemption.

c. Railways' prior preferred stock is subject to redemption, in whole or in part, at the option of Railways on 60 days' notice at the par value thereof plus accumulated dividends to the date of redemption, plus a premium of 5% of the par value for the 7% and 6.36% series and a premium of 1% of the par value for the 6% series. The application states that upon any liquidation, whether through insolvency or the termination of corporate existence or otherwise, the prior preferred stockholders are entitled to receive the par value of their stock, plus accumulated dividends, in preference to the common stock.

d. In addition to its outstanding common stock, 99.75% of which is held by Railways, the capitalization of Continental consists of the following securities held by the general public and by Railways:

Security	Amount outstanding	Held by public	Held by railways
5 percent debentures due 1958	$19,199,500	$19,199,500	.....
7 percent cumulative prior preference stock ($100 par value) shares	188,579	111,242	77,317

e. Continental's debentures are subject to redemption, in whole or in part, at the option of Continental on any interest payment date after 60 days' published notice, at 101½% of the principal amount thereof plus accrued interest to the date of redemption.

f. Continental's prior preference stock is subject to redemption on any quarterly dividend payment date, in whole or in part, after 90 days' published notice, at $110 per share, plus accrued dividends to the date of redemption. Continental's Certificate of Incorporation provides that upon any liquidation, dissolution or winding-up of the corporation, the holders of prior preference stock shall be entitled to receive $110 per share, plus accrued dividends and that all remaining assets shall be distributed to the common stockholders.

g. Railways and Continental state that the simplification of the capital structures thereof is necessary to meet the requirements of section 11 (b) (2) of the act and that the payment or other elimination of all or of a very substantial portion of the senior securities of those companies is necessary to effect this simplification.

II. *The plan.* 1. Railways proposes to discharge the claims of its outstanding debentures by the payment in cash of the full principal amount thereof, plus interest accrued and unpaid thereon on the 90th day following the date of published notice of such payment, but without premium, and to discharge the claims of its outstanding preferred stock by the payment in cash of an amount equal to the par value of such preferred stock, namely $100 per share, plus accrued and unpaid dividends thereon on the 60th day following the date the notice of payment is first published. Interest shall cease to accrue on the debentures from and after the 90th day following the date that notice of payment pursuant to the plan is first published and dividends on Railways' prior preferred stock shall cease to accrue on the 60th day following the publication of notice of payment.

2. In order to effect the discharge of the claims of its outstanding debentures and preferred stock, Railways shall deposit in trust with a depositary cash in an amount equal to the principal amount of all outstanding debentures plus accrued and unpaid interest and to the par value of Railways' outstanding prior preferred stock, plus accrued and unpaid dividends. Railways shall also deposit with the depositary in escrow cash in an amount equal to 2% of the principal amount of all Railways' outstanding debentures and shall also deposit in escrow an amount of cash equal to 5% of the par value of all shares of 6.36% and 7% prior preferred stock of Railways and to 1% of all outstanding shares of 6% prior preferred stock of Railways. The cash so deposited in escrow shall be held as a separate trust fund pending determination by the Commission and by the courts as to whether the holders of debentures and of preferred stock of railways are entitled to any amount additional to that proposed to be paid under the plan.

3. Railways, upon the receipt of the shares of common stock of The Detroit Edison Company, Michigan Consolidated Gas Company, Milwaukee Gas Light Company and Madison Gas and Electric Company in connection with the liquidation of American Light, shall sell the common stock of The Detroit Edison Company through the facilities of the New York Stock Exchange and shall sell the remainder of the securities so received to the public through underwriters to be selected by competitive bidding. The net proceeds from the above sale of securities are to be used to pay off Railways' outstanding debentures and prior preferred stock as hereinabove described. (Application No. 25 indicates that the sale of common stock of the above-mentioned companies will be the subject matter of supplemental applications.)

4. Pending receipt by Railways of the common stock of the subsidiaries of American Light and the sale of such securities, Railways proposes to borrow $25,000,000 from commercial banks, the loans to be evidenced by unsecured promissory notes maturing five years after date, bearing interest on the unpaid principal at the rate of 2% per annum and payable in whole or in part at any time without premium out of the proceeds from the sale of securities to be received by Railways from American Light. Railways proposes to use $24,313,740 of funds borrowed to make the deposits of cash required to pay and protect the interests of debenture holders, as described in paragraphs 1 and 2 hereinabove.

5. Continental proposes to discharge the claims of its outstanding preferred stock held by the public by the payment of cash in an amount equal to the par value, $100 per share, plus an amount equal to the dividends which will be accrued and unpaid thereon on the 90th day following the date of the first publication of notice of payment at which time dividends shall cease to accrue on the preferred stock. In addition to the cash which it will deposit with a depositary for the aforesaid payment, Continental will deposit in escrow cash in an amount equal to 10% of the par value of all prior preference stock of Continental outstanding in the hands of the public to be held as a separate trust fund pending determination by the Commis-

sion and by the courts as to whether any amount additional to that proposed to be paid under the plan should be paid to preferred stockholders.

6. In connection with the elimination of Continental's outstanding preferred stock, Continental will issue to Railways approximately 192,328 shares of its authorized but unissued common stock in exchange for 77,317 shares of Continental's prior preference stock held by Railways which, upon transfer to Continental will be cancelled and Continental will also issue to Railways approximately 225,643 shares of additional common stock for $9,025,714 in cash.

7. Continental shall sell its investment in the common stock of Columbus for cash, such sale to be made either to another holding company system or to the public through underwriters to be selected by competitive bidding. (Such sale, it is stated, will be the subject matter of a supplemental application.)

8. Continental shall apply the net proceeds received from the sale of the common stock of Columbus to the pro rata partial payment of its outstanding debentures and, in addition, Continental may request (by amendment or supplemental application) approval to borrow funds in order to provide for the full payment of its outstanding debentures. Each debenture holder will be entitled to receive cash equal to the same percentage of the principal amount of his debenture as the deposit made bears to the total outstanding debentures, plus accrued interest, and a new debenture having a principal amount equal to the difference, if any, between the principal amount of his surrendered debenture and the cash payment received on the principal. The new debentures would have the same interest rate, maturity date, and other terms and conditions as are applicable to the presently outstanding debentures. In addition to the deposit of the net proceeds from the sale of Columbus together with other cash, if any, for the foregoing purpose, there shall be deposited in escrow an amount equal to 1½% of that portion of the debentures which is to be paid in cash. The cash so deposited in escrow shall be held as a separate trust fund pending determination by the Commission and by the courts as to whether the holders of Continental's debentures are entitled to any amount additional to the principal amount of the debentures plus accrued interest as proposed to be paid under the plan.

Railways and Continental request the Commission to enter an order or orders under section 11 (e) of the act, and such other sections as may be applicable, (a) finding the plan necessary to effectuate the provisions of section 11 (b) and fair and equitable to the persons affected by the plan; (b) determining the amounts which the debenture holders and preferred stockholders of Railways and Continental are entitled to receive upon payment of their securities as provided in the plan; (c) approving the plan and authorizing and directing Continental and Railways to consummate the plan and to carry out the various transactions provided for therein or contemplated thereby; (d) exempting the sale by Railways of the shares of common stock of The Detroit Edison Company to be received by it upon the liquidation of American Light from the competitive bidding requirements of Rule U-50 and authorizing the sale of such shares by Railways on or through the facilities of the New York Stock Exchange; and (e) authorizing Railways to borrow $25,000,000 from commercial banks and to issue promissory notes to evidence the funds so borrowed;

Railways and Continental request that the Commission's order or orders conform to the requirements of sections 371 and 1808 of the Internal Revenue Code;

Railways and Continental request the Commission pursuant to section 11 (e) of the act to apply to an appropriate Federal District Court to enforce and carry out the terms and provisions of the plan. If the court shall approve the plan as fair and equitable and as appropriate to effectuate the provisions of section 11 and shall enter an order or decree of enforcement, the day upon which such order or decree is entered shall be the effective date of the plan.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to said plan and that said plan should not be approved except pursuant to further order of the Commission:

It is ordered, That a hearing on Application No. 25 under the applicable provisions of said act and rules of the Commission thereunder be held on October 16, 1945 at 10:30 a. m., e. w. t., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania, in such room as the hearing room clerk in Room 318 will at that time advise. All persons desiring to be heard or otherwise wishing to participate in the proceedings shall notify the Commission in the manner prescribed by its Rules of Practice, Rule XVII, on or before October 15, 1945.

It is further ordered, That Henry C. Lank, or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearing in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the act and to a trial examiner under the Commission's Rules of Practice.

It is further ordered, That without limiting the scope of the issues presented in the proceedings, particular attention will be directed at the hearings to the following matters and questions:

1. Whether the plan, as submitted or as hereafter modified, is necessary to effectuate the provisions of section 11 (b) of the act and is fair and equitable to the persons to be affected thereby;

2. Whether the proposed retirement of publicly held debentures and preferred stock of Railways without payment of premium is fair and equitable to the holders of such debentures and preferred stocks and, if not, what amounts the holders of the debentures and preferred stocks of Railways and Continental are fairly and equitably entitled to receive;

3. Whether the proposed payment of the debentures of Continental partly in cash and partly in new debentures having the same interest rate and maturity date, without the payment of premium, is fair and equitable to the holders of such debentures and to the stockholders of Continental, and if not what the holders of said debentures are fairly and equitably entitled to receive.

4. Whether the notes proposed to be issued and sold by Railways to banks are reasonably adapted to the security structure of Railways and other companies in its holding company system and to the earning power of Railways, and whether the terms and conditions of the issue and sale thereof are detrimental to the public interest or to the interest of investors or consumers.

5. Whether the proposed sale of the common stock of The Detroit Edison Company by Railways through the facilities of the New York Stock Exchange is appropriate and whether an exemption from the competitive bidding requirements of Rule U-50 should be granted.

6. Whether the fees and expenses to be paid in connection with the consummation of the proposed plan and all transactions incidental thereto are for necessary services and are reasonable in amount.

7. Whether the proposed transactions comply with all the requirements of the applicable provisions of the act and the rules promulgated thereunder, and whether any terms and conditions with respect to the transactions should be prescribed in the public interest or for the protection of investors or consumers.

8. Whether, in the event that the Commission shall approve such plan as filed or as modified, the Commission shall approve such plan for purposes of section 11 (d) of the act (as well as section 11 (e)) so as to permit the Commission of its own motion and irrespective of any request therefor on the part of Railways or Continental to apply to a court for the enforcement of such plan pursuant to section 11 (d).

9. Whether in the event that the Commission shall not approve such plan as filed or as modified, a plan proposed by the Commission or by any person having a bona fide interest in the reorganization should be approved by the Commission for purposes of section 11 (d) and, if proposed by the Commission, what the terms and provisions of such plan should be.

10. Generally, whether the proposed transactions are in all respects in the public interest and in the interest of investors and consumers and consistent with all applicable requirements of the Act and Rules promulgated thereunder, and if not, what modification should be required to be made therein and what terms and conditions should be imposed to satisfy the statutory standards.

It is further ordered, That notice of this hearing be given to Railways and Continental and to all other persons; said notice to be given to Railways, Continental and The Cleveland Trust Company by registered mail and to all other persons by general release of this Commission which shall be distributed to the press and mailed to the mailing list for releases issued under the Public Utility Holding Company Act of 1935 and by publication in the FEDERAL REGISTER.

It is further ordered, That at least 20 days prior to the date of said hearing Railways and Continental shall give additional notice thereof by mailing a copy of this notice and order to each record holder of any of their stock and to each known owner of any of their outstanding debentures, addressed to them at their respective addresses shown in the stock and registry books of said companies.

It is further ordered, That jurisdiction be and hereby is reserved to separate, either for hearing, in whole or in part, or for disposition, in whole or in part, any of the issues or questions which may arise in these proceedings, and to take such other action as may appear necessary to the orderly and economical disposition of the issues involved.

By the Commission.

The War Production Board may from time to time allocate the supply of stockpiled burlap and specifically direct the quantities, time, and manner in which deliveries by any authorized government agency shall be made or withheld. It may also direct or prohibit particular uses of burlap. Any direction, prohibition, or allocation issued pursuant to this paragraph, to be valid, must be in writing in the name of the War Production Board.

(d) *Quotas and allocations of burlap for bag manufacturers.* (1) The War Production Board will assign to each bag manufacturer a burlap quota representing the percentage his average annual cut-up (i. e., the lineal yardage of burlap converted by him into bags) during the years 1939 and 1940, bears to the total average annual cut-up during the same years by all bag manufacturers who are assigned quotas.

(2) The War Production Board will, from time to time issue burlap allocation certificates to bag manufacturers based on their assigned burlap quotas. The total amount allocated in each calendar quarter to bag manufacturers on the basis of their assigned burlap quotas as explained in paragraph (d) (1) above will generally be the quarterly average amount of burlap allocated for the first three quarters of 1944. Burlap in excess of this amount may be allocated to bag manufacturers who have quotas and also to new manufacturers. Applications to participate in allotments of burlap from any excess above the average for the first three quarters of 1944, as explained above, may be filed by letter stating the amount of burlap requested. These letters should be filed on or before the first day of the calendar quarter for which the allotment is requested. Each application by a new manufacturer should include a statement of the facilities available to him for the manufacture of textile bags, the maximum yardage of textile bagging material which can be processed on his facilities on the basis of 48 hours operation per week, the minimum yardage of textile bagging material needed for economical operation and any other pertinent information.

Any person disposing of frozen burlap to a bag manufacturer shall immediately notify by letter the War Production Board, Textile, Clothing and Leather Division, Washington 25, D. C., stating the name of the buyer, the quantity of bales, the serial number and sequence number of the burlap allocation certificate authorizing the buyer to accept delivery.

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 2—ADJUDICATION: VETERANS' CLAIMS

PROOF OF RELATIONSHIP AND DEPENDENCY

§ 2.1048 *Secondary evidence of birth or marriage.* The classes of evidence to be requested for the purpose of establishing age or relationship or marriage are indicated in §§ 2.1046 and 2.1050 in the order of preference. Failure to furnish the higher class, however, does not preclude the acceptance of a lower class if the evidence furnished is sufficient to prove the point involved. Photostats of original documents or of certified copies of records may be accepted if the original would be acceptable.

PART 10—INSURANCE

NATIONAL SERVICE LIFE INSURANCE; PREMIUMS

§ 10.3408 *Deduction of insurance premiums from compensation, retirement pay or pension.* The insured under a National Service Life Insurance policy may authorize the monthly deduction of premiums from disability compensation, death compensation, retirement pay, disability pension, or death pension, that may be due and payable to him under any laws administered by the Veterans' Administration in accordance with the following provisions:

No change in (a).

(b) The monthly disability compensation, death compensation, retirement pay, disability pension or death pension so due and payable must be equal to, or in excess of, the amount of the insurance premium figured on a monthly basis.

No change in (c), (d) or (e).

§ 10.3409 *Effective date of authorization for deduction of insurance premiums from compensation, retirement pay, or pension.* When premium deductions are authorized by the insured under National Service Life Insurance in accordance with the provisions of Veterans' Administration regulations, the Veterans' Administration will make monthly deductions from the disability compensation, death compensation, retirement pay, disability pension, or death pension, due and payable to the insured, of an amount sufficient to pay the monthly premium on the insurance. Such deductions shall begin with the month in which the authorization is effective and continue so long as the disability compensation, death compensation, retirement pay, disability pension, or death pension, due and payable to the insured is sufficient to pay the monthly insurance premium, unless the authorization is sooner canceled or otherwise terminated.

§ 10.3410 *Premiums to be deducted from compensation, retirement pay, or pension, treated as paid, for purpose of preventing lapse.* When premium deductions are authorized by the insured under National Service Life Insurance, in accordance with the provisions of Veterans' Administration regulations, the insurance premium will be treated as paid for the purpose of preventing lapse of the insurance, although such deduction is not in fact made, if upon the due date of the premium there is due and payable to the insured an amount of disability compensation, death compensation, retirement pay, disability pension, or death pension sufficient to provide the payment. Any premium authorized to be deducted from disability compensation, death compensation, retirement pay, disability pension, or death pension, due and payable to the insured and not actually paid, shall be deducted from any amount of current disability compensation, death compensation, retirement pay, disability pension, or death pension that may become due and payable to the insured. The amounts so deducted for premiums shall be deposited and covered into the Treasury to the credit of the National Service Life Insurance Fund.

§ 10.3411 *Termination of the authorization to deduct insurance premiums from compensation, retirement pay, or pension.* Deduction of insurance premiums on National Service Life Insurance shall cease and the authorization shall terminate if the disability compensation, death compensation, retirement pay, disability pension, or death pension, becomes insufficient to provide the premium, or if disability compensation, death compensation, retirement pay, disability pension, or death pension, is no longer due and payable to the insured. If authorization was executed by the manager of a Veterans' Administration facility or chief officer of a State hospital or other institution to make deductions from an institutional award, the authorization will cease and terminate at the termination of the institutional award, and if subsequent premiums are to be paid by deduction from monthly benefit payments, another authorization must be executed by the insured or his legal representative or his wife. (See

§ 10.3408 (a).) The insurance shall lapse after the termination or cancelation of the authorization to deduct premiums from disability compensation, death compensation, retirement pay, disability pension, or death pension, unless the premium be otherwise paid within the grace period. The insured will be notified, by letter directed to his last address of record, of the termination of the authorization to deduct premiums; but the failure to give such notice or the failure to receive such notice, shall not prevent lapse of the insurance.

PART 25—MEDICAL

DENTAL SERVICES

§ 25.6129 *Extent of dental treatment.* The type and extent of dental treatment in any individual case will be determined by a dental officer of the Veterans' Administration in accordance with the following principles:

(a) In Class I (see § 25.6123), any dental treatment indicated as reasonably necessary to retain masticatory function may be authorized.

(b) (1) In Class II, any treatment indicated as necessary for the correction of wartime service-connected dental disabilities may be authorized as well as for peacetime service-connected dental disabilities, provided the applicant was discharged under conditions other than dishonorable on account of a disability incurred in line of duty, or is in receipt of pension for a service-incurred disability. When diseased teeth (the disability from which is service-connected) are to be replaced by means of artificial dentures, all other diseased teeth in the same maxilla may be extracted, if necessary, and the dentures may be constructed accordingly. This principle will also apply when extraction is indicated for mechanical reasons. But in constructing bridges for missing teeth, the loss of which has not been attributed to military or naval service, only mechanical necessity will permit consideration of such missing teeth in designing the bridge.

(2) When service connection has been established only for teeth missing from one maxilla, and artificial dentures for both jaws are determined necessary to meet proper treatment indications, extractions of teeth in the opposing maxilla may be made.

(3) Missing third molar teeth, loss of which has been attributed to military or naval service, will not be replaced; nor will such circumstances be held to call for replacement of other missing teeth whose loss is not service-connected.

(c) In Class III, treatment will be rendered, as adjunct or auxiliary measures, only for those dental conditions which, in sound professional judgment, are having a direct and material detrimental effect upon an associated basic disease.

(d) In Class IV, sufficient treatment will be rendered domiciliary members to keep their mouths in hygienic and comfortable condition, with sufficient masticatory surface to maintain health.

(e) In Class V, treatment other than emergency, will consist only of such measures as may be reasonably necessary to prevent the interruption of an authorized course of vocational training.

§ 25.6135 *Replacement of dental prosthesis.* (a) Dental prosthesis (i. e., fillings, bridges and dentures), furnished for treatment of service-connected dental disease or injury, which have been broken or become unserviceable through legitimate wear and deterioration, may be replaced, provided the condition is still shown to be service connected by the final dental rating promulgated under current rating instructions. Usually prosthesis, especially fillings and fixed bridges, should give at least two years' service, and this should be considered in these cases. In average cases in which fillings and fixed bridges inserted by designated dentists fail within two years, due to faulty technique or engineering, the claimant, if practicable, will be referred back to the designated dentist who rendered the treatment, who will be required to adjust the defective prosthesis; if this cannot be done, or if the designated dentist declines to make good the defect, determination will be made by the chief, dental service, as to the advisability of requesting a refund. In considering such cases due consideration will be given to the veteran's physical condition, and any unusual or extenuating conditions which obtain in his mouth.

When the chief, dental service, is of the opinion that a refund is in order he will prepare a brief of the facts in the case, attaching thereto copies of pertinent documents, and submit it to the finance officer with a recommendation that refund in a specified amount be effected, if possible.

(b) Dental prosthesis, such as bridges and dentures, furnished for treatment of a service-connected dental disease or injury, when lost, destroyed, or otherwise disposed of by a veteran, may be replaced upon the authority of the chief medical officer or his designate. The field station concerned will obtain affidavits of the veteran and, if possible, of other persons familiar with the circumstances of the loss, destruction, etc. The chief medical officer or his designate may require any other additional evidence considered necessary to show good faith and lack of carelessness on the part of the veteran, and may deny replacement if circumstances warrant.

(c) Dental prosthesis such as bridges and dentures furnished as adjunct or auxiliary relief, when requiring replacement through legitimate wear or deterioration, will be replaced upon determination as to the present necessity of replacement as adjunct or auxiliary relief.

(1) If the veteran applies for replacement, on an out-patient basis of prosthesis previously furnished as adjunct treatment and cannot produce such prosthesis, the procedure as prescribed in paragraph (b) of this section will govern in determining eligibility thereto.

(2) If the prosthesis is indicated as adjunct or auxiliary treatment on an in-patient basis the chief, dental service, will satisfy himself that the prosthesis previously furnished was not destroyed, lost or otherwise disposed of due to the carelessness or neglect of the beneficiary. If he is of the opinion that the loss was occasioned by the carelessness or neglect of the beneficiary, the decision as to replacement will be made by the chief medical officer or clinical director, as required in paragraph (b) of this section.

(d) Dental prosthesis such as bridges and dentures furnished veterans receiving domiciliary care in a Veterans' Administration facility as Class IV (domiciliary) treatment may be replaced when unserviceable through fair wear and deterioration. If veteran requests replacement of prosthesis previously furnished him by the Veterans' Administration and is unable to produce the prosthesis or presents same in a mutilated condition, the chief, dental service, will secure all evidence available and present it to the chief medical officer or clinical director for a determination as to whether the prosthesis was lost through the carelessness and neglect of the veteran or wilfully mutilated by him. If such determination is made, replacement will be made only upon payment of the cost of the prosthesis by the veteran either in cash, or by labor at the facility for which he will be credited at the rate of fifty cents per day. The cost of the appliance will be computed at twenty-five percent of the fee basis value shown in Veterans' Administration regulations.

(e) Dental prosthesis such as bridges and dentures furnished vocational trainees will be replaced in accordance with the same procedure as prescribed in paragraph (c) of this section and subject to the provisions of § 25.6129 (e).

The War Shipping Administration having indicated that the waiver of load lines, relating to certain vessels engaged in business in the conduct of the war, dated August 26, 1944, has been found to be insufficient to take full advantage of tanker capacity in the movement of the petroleum products to the combat areas in the Pacific;

Now, therefore, upon the request of the War Shipping Administration, I hereby find it to be necessary in the conduct of the war that there be waived compliance with § 43.019 of the load line regulations administered by the United States Coast Guard, to the extent that vessels in the foreign trade which are engaged in the war effort shall be accorded the following relaxations:

Tankers loading at ports situated in the eastern seasonal tropical zone, west of Longitude 55° W. bound for Panama Canal ports, or to ports in the Pacific located in tropical or summer zone, and also tankers loading on the California coast east of Longitude 120° W., and bound for ports in the Pacific between Latitude 25° N. and Latitude 11° S., be permitted to load on departure from their loading port to their tropical fresh water load line during the entire year.

FEDERAL POWER COMMISSION.

[Docket No. G-663]

CINCINNATI GAS TRANSPORTATION CO.

ORDER SUSPENDING SUPPLEMENTAL RATE SCHEDULES

SEPTEMBER 15, 1945.

It appears to the Commission that:

(a) By order of November 2, 1944, the Commission, in Docket No. G-591, suspended Cincinnati Gas Transportation Company [1] Rate Schedule FPC No. 7 providing for changes in its rate schedules then in force, as listed below, for the sale of natural gas to the following companies: [2]

Schedule then in force:	*Vendee*
FPC No. 1	The Cincinnati Gas & Electric Co.
FPC No. 3	The Union Light, Heat & Power Co.
FPC No. 4	Bracken County Gas Co.

Such order required that the rate schedules then in force be continued in effect. On March 13, 1945, prior to the expiration of the period for which Rate Schedule FPC No. 7 was suspended, the Transportation Company filed a waiver of any right it may have under section 4 (e) of the Natural Gas Act to make such proposed rate schedule effective until the Commission enters an order permitting such action.[3]

(b) On August 18, 1945, the Transportation Company filed agreements with The Cincinnati Gas and Electric Company and The Union Light, Heat and Power Company designated as Supplements No. 3 to its aforesaid Rate Schedules FPC Nos. 1 and 3, respectively.[4] Such supplemental rate schedules propose to put into effect, with respect to service to the aforesaid two companies, the provisions of the suspended Rate Schedule FPC No. 7, except as to provisions providing for increased rates. The rates provided in the aforesaid Rate Schedules FPC Nos. 1 and 3 would be continued in effect. The principal changes proposed relate to the periods for which service would be rendered. Twenty-year terms would be provided in lieu of the provisions permitting cancellation upon 6 months' notice by either party to the other. The supplemental rate schedules further provide that the vendees may not terminate the agreements on less than 5 years' notice to the Transportation Company.

(c) By letters of August 9 and August 15, 1945, transmitting the supplemental rate schedules, the Transportation Company explained that the purpose of such schedules was to afford an arrangement with its aforesaid customers for the sale of natural gas on a long-time basis. With respect to the necessity for such an arrangement, it was stated that Columbia Gas & Electric Corporation has agreed with the Securities and Exchange Commission to dispose of its stock ownership in The Cincinnati Gas and Electric Company, and that in order to do the financing necessary to effect such disposition, the latter must be assured a long-term supply of gas.[5] No reasons were assigned for the necessity of having a long-term agreement with The Union Light, Heat and Power Company, nor for the necessity of imposing upon the vendees the restriction preventing them from terminating the agreements in less than 5 years from the date of notice to the Transportation Company of their intention so to do. No effort has been made by the Transportation Company since the suspension of its Rate Schedule FPC No. 7 to put into effect similar provisions covering the sale of natural gas to its single unaffiliated customer, Kentucky Utilities Company.

(d) The provisions of the aforesaid supplemental rate schedules may be inconsistent with the public interest and place an undue burden upon the ultimate consumers of natural gas.[6]

(e) Unless suspended by order of the Commission, Supplements No. 3 to the Transportation Company's Rate Schedules FPC Nos. 1 and 3 will become effective as of September 18, 1945, pursuant to the provisions of the Natural Gas Act and the amended Provisional Rules of Practice and Regulations thereunder.

The Commission finds that: It is necessary, desirable and in the public interest that a public hearing be held concerning the lawfulness of the changes in the Transportation Company's Rate Schedule FPC Nos. 1 and 3 proposed to be made effective by its Supplement No. 3 to each of such rate schedules, and that such supplemental rate schedules be suspended pending the hearing and decision thereon.

The Commission orders that:

(A) A public hearing be held on a date and at a place to be fixed by further order of the Commission concerning the lawfulness of the proposed changes in conditions of service set forth in Supplements No. 3 to the Transportation Company's Rate Schedules FPC Nos. 1 and 3.

(B) Pending such hearing and decision thereon, Supplement No. 3 to the Transportation Company's Rate Schedules FPC Nos. 1 and 3, insofar as such supplemental schedules provide for the sale of natural gas other than for resale for industrial use only, be and they are hereby suspended until February 18, 1946, or until such time thereafter as such supplemental rate schedules shall be made effective in the manner prescribed by the Natural Gas Act.

(C) During the period of such suspension the Transportation Company's Rate Schedules FPC Nos. 1, 3 and 4, and presently effective supplements thereto, shall remain and continue in full force and effect, except insofar as such rate schedules may be for the sale of natural gas for resale for industrial use only.

(D) Interested State commissions may participate in said hearing as provided in § 67.4 of the provisional rules of practice and regulations under the Natural Gas Act.

By the Commission.

[SEAL] LEON M. FUQUAY,
Secretary.

[1] Hereinafter referred to as the "Transportation Company."

[2] Service to Kentucky Utilities Company was also covered by the Transportation Company's Rate Schedule FPC No. 7, and rate schedules of the Transportation Company's affiliates, United Fuel Gas Company and Warfield Natural Gas Company, were suspended by the order of November 2, 1944; however, such matters are not directly involved here.

[3] A hearing was held on the suspended Rate Schedule FPC No. 7 concurrently with the hearing involving the general investigation of the rates of the Transportation Company and its affiliates in Docket No. G-440. Oral argument before the Commission en banc was heard in such matters on September 14, 1945.

[4] Apparently Supplement No. 3 to the Transportation Company's Rate Schedule FPC No. 3 is designed to cover service rendered under its aforesaid Rate Schedule FPC No. 4 to Bracken County Gas Company. Such supplement provides that The Union Light, Heat and Power Company shall take over the service to certain customers now served by Bracken.

[5] The Transportation Company and its aforesaid vendees are all controlled by Columbia Gas & Electric Corporation. See *In the Matter of Columbia Gas & Electric Corp., et al.*, S. E. C. Holding Company Act Release No. 5455, December 1, 1944, and Release No. 6028, September 5, 1945.

[6] See application *In the Matter of Metropolitan Eastern Corporation*, Docket No. G-625, requesting a certificate of public convenience and necessity for authority to construct and operate a natural gas pipeline from the Carthage gas field, Panola County, Texas, to the vicinity of Cincinnati, Ohio. A hearing on this application has been ordered to commence October 15, 1945.

OFFICE OF PRICE ADMINISTRATION.

[MPR 188, Order 51 Under Order 1052]

THE SWEAT-COMINGS CO., INC.

ADJUSTMENT OF MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith and filed with the Division of the Federal Register, and pursuant to paragraph (g) of Order No. 1052 under § 1499.159b of Maximum Price Regulation No. 188, it is ordered:

(a) *Manufacturer's maximum prices.* The Sweat-Comings Company, Inc. Richford, Vermont, may add an additional adjustment charge to its maximum prices for sales and deliveries to all classes of purchasers of the articles of wood household furniture which it manufactures, and for which maximum prices were established prior to the effective date of this order, equal to 3% of its previously established maximum prices as adjusted by paragraph (d) of Order No. 1052 under Maximum Price Regulation No. 188.

This additional adjustment charge may be made and collected only if it is separately stated on each invoice. The adjusted maximum prices are subject to the manufacturer's customary terms, discounts, allowances, and other price differentials in effect during March 1942 on sales to each class of purchasers.

(b) *Maximum prices of purchasers for resale.* A person who hereafter buys an article covered by this order and resells it in substantially the same form, may collect from his customers, in addition to his properly established maximum price in effect immediately before this order was issued, an adjustment charge in the same amount as the additional adjustment charge herein authorized for and which he pays to his supplier. If he did not have a maximum price in effect for the article at the time this order was issued, he may add the same adjustment charge to the maximum price which he hereafter establishes for his sales under the applicable regulation. If the applicable regulation requires the maximum resale price to be computed on the basis of cost, the reseller must find his maximum resale price (not including the permitted adjustment charge) by using as cost his invoice cost less any adjustment charge stated on the invoice as a separate amount.

On all sales other than sales to the ultimate consumer this additional adjustment charge may be made and collected only if it is separately stated on each invoice. The adjusted price is subject to each seller's customary terms, discounts, and allowance on sales of the same or similar articles. The adjustment charge authorized in this paragraph (b) is in addition to any adjustment charge permitted for wholesalers by Order No. 1052 under Maximum Price Regulation No. 188.

(c) *Notification.* At the time of or prior to the first invoice to a purchaser for resale on and after the effective date of this order, showing prices adjusted in accordance with this order, the seller shall notify the purchaser in writing of the method established by paragraph (b) of this order for determining adjusted maximum prices for resales of the article. This notice may be given in any convenient form, and is in addition to any notice required by paragraph (d) of Order No. 1052 under Maximum Price Regulation No. 188.

(d) All requests not specifically granted by this order are hereby denied.

(e) This order may be revoked or amended by the Price Administrator at any time.

This order shall become effective on the 26th day of September 1945.

Issued this 25th day of September 1945.

JAMES G. ROGERS, Jr.,
Acting Administrator.

[Supp. Order 108, Special Order 5]

TOLERANCES OVER 1943 AVERAGE PRICES

An opinion accompanying this Special Order No. 5, under section 17 of Supplementary Order 108 has been issued simultaneously herewith and filed with the Division of the Federal Register.

SECTION 1. *Purpose of this order.* This order provides percentage tolerances for certain categories which may be used during the 3d and 4th quarters of 1945 by those manufacturers whose base periods for those categories were 1943 periods. Section 3 of this order contains a list of categories together with the tolerance specified for each category.

SEC. 2. *Use of the tolerance*—(a) *Who may use the tolerance.* You may use the tolerance provided in this order for any category in the 3d and the 4th quarters of 1945: *Provided*, That your maximum average price for that category in that quarter is based on a 1943 base period.

(b) *How to use the tolerance.* In computing your surcharge for any category, under section 6 of SO 108, you may, during the 3d and 4th quarters of 1945, substitute for your original maximum average price the higher of the following amounts:

(1) Your adjusted maximum average price (found under section 3 of Special Order 3 to SO 108[1]), or

(2) Your original maximum average price increased by the percentage listed for that category in section 3 of this order.

NOTE: In computing your credit for any category under section 6 of SO 108, you may not use the tolerance provided in this order; that is, your credit in any category is found by subtracting your weighted average price from your original maximum average price (or your adjusted maximum average price, whichever is higher) and multiplying that amount by the number of units delivered in that category.

For example: Suppose that your original maximum average price in Category A-10 is $4.10 for the 3rd quarter. Under Special Order 3 you adjusted your maximum average price to $4.37. The tolerance in that category is 10% of your original maximum average price. Your original maximum average price plus your tolerance is $4.51 ($4.10 plus 10% = $4.51). If your weighted average price for the 3rd quarter is more than $4.51 (the higher of the two), you must compute your surcharge for that category. To do this, you subtract $4.51 from your weighted average price and multiply the difference by the number of units delivered in the category.

However, in order to have a credit in that category, your weighted average price must be less than $4.37 (your adjusted maximum average price). To figure the amount of your credit, you subtract your weighted average price from $4.37 and multiply the difference by the number of units delivered in the category.

SEC. 3. *Percentage tolerances.*

In regard to depth of loose material, a fill 1" less than nominal will be recognized as full. (ii) For installations from 76 to 150 miles distant: 2 cents per square foot.

(iii) For installations distant 151 miles or more: 3 cents per square foot.

(d) *Measurements.* It shall be the seller's responsibility to ascertain that all square foot measurements are accurate. Measurements for exterior walls are to be taken overall, with no allowance for openings, except that for walls where window and door areas occupy 40% or more of the total surface, such window and door areas must be deducted. The area of elevator shafts, ventilators, skylights, monitors, and penthouses on flat roofs shall not be included where they are more than 16 square feet in area and extend through the areas to be insulated. Where the exterior walls are of brick and or stone veneer or solid brick, the area of floors or ceilings to be insulated shall be determined by taking gross interior dimensions. For stairwell walls, measurements may be taken as a rectangle from floor to ceilings instead of as a triangle. In determining the total square foot area for each type of insulation ordered by the buyer, a tolerance of five percent will be permitted.

(e) Where a sale for which a maximum price is provided above includes either the special insulation work enumerated in paragraph (i) below, or incidental construction work of the types enumerated in paragraphs (ii) and (iii) below, the maximum price so provided may be increased by the amount of the seller's maximum price for the special insulation work or incidental construction work established in accordance with Revised Maximum Price Regulation No. 251.

(i) Insulating doors and scuttle covers.

(ii) The following accessories; slant roof louvres, gable louvres, roof ventilators, and knee wall ventilators.

(g) *Quoting a "guaranteed price".* The seller may offer to sell an insulation job covered by this Revised Order No. G–4 on the basis of a "guaranteed price" wherein the seller agrees to charge a fixed amount; *Provided, however,* That the "guaranteed price" must not be higher than the maximum price figured in accordance with the pricing methods and requirements of this order. Upon completion of the contract, and before final payment, if required by the purchaser, the seller is required to furnish the purchaser with an itemized statement showing the number of square feet and the thickness and unit price for each category of insulation used which is specified in paragraph (b), and an explanation of the amount for incidental work.

(h) *Notification.* Every person making sales subject to this Revised Order No. G–4 shall state on his sales tag or invoice that the price charged does not exceed the price permitted by this Revised Order No. G–4 under Revised Maximum Price Regulation No. 251.

(i) *Erasion.* Any practice or device which results in a higher price to the purchaser than is permitted by this Revised Order No. G–4 is as much a violation as an outright over-ceiling charge and subjects the seller to the penalties provided by Section 16 of Revised Maximum Price Regulation No. 251.

(j) This order may be revised, amended, or revoked by the Office of Price Administration at any time.

This order shall become effective September 19, 1945.

[Region III Rev. Order G-57 Under 188 (c)]

FIREWOOD IN UPPER PENINSULA OF MICHIGAN

For the reasons set forth in an opinion issued simultaneously herewith and under the authority vested in the Regional Administrator of Region III of the Office of Price Administration by § 1499.18 (c) of the General Maximum Price Regulation, it is hereby ordered:

(a) *What this order does.* This order establishes ceiling prices for various types of sellers of firewood. Section (b) (1) and (b) (2) establish dollars-and-cents ceiling prices. Provision is made for specific deductions and additions determined by the basis of delivery used. Paragraph (b) (2), Schedule B, establishes ceiling prices for sales by producers and wholesalers to retailers, and paragraph (b) (1), Schedule A, maximum prices which may be charged consumers by all persons including producers and retail dealers; such maximum prices, in the main, are based upon current costs plus March 1942 margins. Paragraph (c) provides special methods for pricing specialty woods, including kindling. No person may sell firewood at prices higher than the ceiling prices provided in this Order.

(b) *Ceiling prices for sales by producers of firewood.* The ceiling prices for sales of firewood loaded in freight cars at producer's plant, or delivered within producer's free delivery zone, shall be the prices set forth in paragraphs (b) (1) and (b) (2) of this section. From these amounts shall be deducted, or to these amounts may be added, the deductions or additions applicable to the type of delivery described in sub-paragraph 3.

(1) Ceiling prices for sales by all persons including producers or retailers, to consumers, shall be the prices set forth in Schedule A, attached hereto and made a part hereof as though fully written herein.

(2) Ceiling prices for sales by producers and wholesalers to retail dealers shall be, subject to the delivery allowances and deductions provided in section (b) (3), the prices set forth in Schedule B, attached hereto and made a part hereof as though fully written herein.

(3) *Delivery allowances and deductions.* Where wood is sold on some basis other than loaded on freight cars at the producer's plant, or delivered within the producer's free delivery zone (as that term is defined in section (d) (15) of this order), the following additions may, and the following deductions must, be made:

(i) Where firewood is picked up by the buyer at the producer's place of business, the following deductions from the ceiling prices above established must be made:

Standard cord of 48" or 8' lengths	$1.00
Single cord of 24" lengths	.55
Single cord of 16" lengths	.40
Single cord of 12" lengths	.30

(ii) For deliveries of a minimum load of 128 cubic feet of firewood (measured in pile) beyond the seller's free delivery zone, if delivery is made by seller's own truck, the following delivery charges may be added:

Distance beyond free delivery zone	*Allowance per minimum load of 128 cubic feet*
Not over 5 miles	$0.50
Over 5 miles, but not over 10 miles	1.00
Over 10 miles, but not over 15 miles	1.50
Over 15 miles	1.75

(iii) If deliveries of firewood are made in amounts less than 128 cubic feet (piled) the maximum delivery allowance set forth in the table of sub-paragraph (ii) above shall be reduced in the proportion which the actual load bears to 128 cubic feet.

(iv) If delivery is made by common or contract carrier a seller may add the actual amount paid to such a carrier but in no event an amount exceeding lawful maximum rate for such delivery.

(4) *Test loads.* When a producer sells firewood all of the same size and type by the rail carload, he shall, unless he actually measures the exact number of cords in the carload, weigh one cord of the wood sold and determine the total number of such cords in the carload by dividing the net weight of the carload by the weight of such "test" cord.

(c) *Maximum prices for retail dealers who cannot price under subparagraphs (b) (1) and (b) (2).* Retail dealers who cannot establish a maximum price for any kind, size, or type of firewood under the paragraphs (b) (1) or (b) (2) because they saw or otherwise process firewood in sizes or kinds substantially different from those shown in Schedules A and B of paragraph (b) or for any other reason, shall apply to the Escanaba District Office of the Office of Price Administration for ceiling prices or for a pricing method whereby such ceiling prices may be determined. Such applications shall be filed by any dealer now selling firewood on or prior to December 31, 1945, and by any other retail dealer prior to making any sales. Such applications shall state:

(i) The kind, size and type of firewood to be sold.

(ii) The names and addresses of the two retail dealers located closest to applicant's place of business.

(iii) An analysis of transportation, sawing, handling, loading, unloading and other costs, if any, incidental to the sale of each kind, size and type of firewood.

(iv) The method of pricing and the proposed prices which the applicant desires to use.

(v) Such other information as the Office of Price Administration may request.

Upon such application, the Office of Price Administration will establish ceiling prices or a method for establishing ceiling prices which will be in line with the general level of ceiling prices established under this order. The proposed prices shall be considered approved twenty days after mailing the application (or all additional information which may have been requested), unless, within that time, the Office of Price Administration advises you that your prices have been disapproved.

(d) *Deductions.* As used in this order, (1) "Firewood" means any wood sold for ultimate use in stove or furnaces as fuel, but does not include wood sold for chemical distillation purposes.

(2) "Body or block wood" means those types of firewood cut from trees, logs, or parts of trees and logs, with a diameter before splitting of at least 2 inches.

(3) "Slab wood" means wood cut from the sides of a log or bolt.

(4) "Bundled edgings" means wood cut from the side of a piece of lumber and tied into bundles in accordance with accepted trade practices.

(5) "Hardwood" means firewood at least 95% of which is produced from the commercial species of the genera ash (Fraxinus), beech (Fagus), birch (betula), elm (Ulmus), maple (Acer), oak (Querous), and all other hardwood species except popple, poplar, or aspen (Populus), basswood (Tilia), and soft elm (Ulmus fulva or Americana).

(6) "Mixed wood" means firewood at least 50% of which is produced from the commercial species of the genera of ash (Fraxinus), beech (Fagus), birch (betula), elm (Ulmus), maple (Acer), oak (Querous), and all other hardwood species except aspen, popple, or poplar (Populus), basswood (Tilia), and soft elm (Ulmus fulva or Americana).

(7) "Softwood" means any firewood which does not qualify as hardwood of mixed wood, but which can be used as fuelwood.

(8) A "producer" means a person who produces firewood:

(a) By manufacturing forest products into fuelwood as defined above,

(b) As a result of the operation of a sawmill, veneer mill, or any other type of woodworking plant.

(9) A "retail dealer" means a seller of firewood who produces no firewood but acquires firewood from producers or from other dealers. Cutting firewood into smaller lengths than the lengths in which it was acquired or purchased shall not be considered to be producing firewood.

(10) A "standard cord of 4 foot or 8 foot lengths" means a pile of firewood of 4 foot lengths piled 4 feet high and 8 feet wide, or a pile of firewood of approximately 8 foot lengths piled 4 feet high and 4 feet wide.

(11) A "single tier of 24 inch lengths" means a pile of firewood of 20 inch to 28 inch lengths piled 4 feet high and 8 feet wide.

(12) A "single tier of 16 inch lengths" means a pile of firewood of 14 inch to 20 inch lengths piled 4 feet high and 8 feet wide.

(13) A "single tier of 12 inch lengths" means a pile of firewood of 11 inch to 14 inch lengths piled 4 feet high and 8 feet wide.

(14) "Piled" means piled as tightly as the type of wood will permit and in accordance with established trade practices.

(15) A seller's "Free delivery zone" is the corporate limits of the city or village, if any, within which the seller is located but in no event an area smaller than the area within a radius of five miles of the sellers' place of business.

(16) "Specialty firewood" means kindling, or wood which is produced as a byproduct at a sawmill, veneer mill, flooring mill or other wood-working plant, either in random lengths or uneven shapes and sizes so that it cannot practicably be piled, measured, and sold in cords. Examples of "specialty firewood" are such woods as but not limited to, flooring clippings, defective bowling pin blanks, plywood clippings, short edgings, log ends, etc.

(e) *Invoices and records.* Every person making a sale of firewood for which a maximum price is set by this order shall give the purchaser or his agent at the time of the sale an invoice or other memorandum of sale, which shall show:

(1) The date of sale;

(2) The name and address of the buyer and seller;

(3) The quantity of firewood sold, expressed in terms of standard cords, single tiers, or weight, whichever is the unit of measurement used as the basis of maximum prices established by this Order;

(4) Description of firewood sold in the same manner as it is described in this Order. (This shall include the kind of wood, i. e., hard, soft or mixed, and average length of pieces of wood.)

(5) Place of Sale. (If the price is dependent on place of delivery, then the place of delivery shall be stated in such a manner to indicate the exact amount of delivery charges added.

(6) The price per unit and the total price of the wood. On the invoice or memorandum, a separate statement shall be made of any discounts, and of each service rendered such as delivery, carrying and stacking, and the charge made for each such service.

The seller shall keep an exact copy of such invoice or memorandum for as long as the Emergency Price Control Act of 1942, as amended, remains in effect, and such copy shall be made available for inspection by the Office of Price Administration.

(f) *Geographical applicability.* This order shall apply to all sales by any persons whose places of business are located within the following counties, all within the upper Peninsula of Michigan: Alger, Baraga, Chippewa, Delta, Dickenson, Gogebic, Houghton, Iron, Keweenaw, Luce, Marquette, Marinette, Menominee, Ontonagon, and Schoolcraft.

PART 12—REMOVALS AND REDUCTION

RETENTION PREFERENCE REGULATIONS FOR USE IN REDUCTIONS IN FORCE

By virtue of the authority vested in the Commission by the Veterans' Preference Act of June 27, 1944, the following regulations are promulgated and the regulation approved November 3, 1944 governing reductions in force (9 F.R. 13699) are hereby revised:

Sec.
12.301 Extent of regulations.
12.302 Definitions.
12.303 Retention preference; classification.
12.304 Completion of employee records.
12.305 Determination of competitive area.
12.306 Special rule relating to consolidations and mergers.
12.307 Compilation of retention register.
12.308 Sequence of selection.
12.309 Actions.

12.311 Reports to the Commission.
12.312 Special rules on liquidation.
12.313 Appeals.
12.314 Actions disapproved by the Commission.

AUTHORITY: §§ 12.301 to 12.314 inclusive, issued under section 12 of Veterans' Preference Act of June 27, 1944, Pub. 359, 78th Cong., 2nd Sess. (58 Stat. 387; 5 U.S.C. 861).

§ 12.301 *Extent of regulations.* Sections 12.301 to 12.314, inclusive, establish degrees of retention preference and uniform rules for reductions in force. They apply to all civilian employees in the executive branch of the Federal Government, and in the municipal government of the District of Columbia, except those whose appointments are required to be approved by the Senate, and those who are appointed by the President of the United States.

§ 12.302 *Definitions.* For the purpose of §§ 12.301 to 12.314, inclusive, definitions are given for words, terms, and phrases as follows:

(a) "Reduction in force" means the involuntary separation from the rolls of a department, or furlough in excess of thirty days, of one or more employees in order to reduce personnel. Reduction of personnel may have to be made because of lack of funds, personnel ceilings, reorganization, decrease of work, to make a position available for a former employee with established reemployment or restoration rights, or for other reasons. However, the term does not apply to (1) termination of temporary appointments limited to one year or less, (2) retirement of employees, or (3) separations for unsatisfactory service.

(b) "Retention groups" and "subgroups" means classes of employees entitled to the same degree of retention preference on the basis of tenure of employment and veteran preference.

(c) "Retention credits" are credits for length of service and efficiency ratings in determining retention order in each retention subgroup. They are computed by allowing one point for each full year of Federal Government service plus 5 points for an "Excellent" efficiency rating.

(d) "Federal Government service" means the total of all periods of service eligible for consideration for civil service

retirement purposes, without regard to whether the employee is eligible or will be eligible actualy to receive retirement benefits. All active military service is counted whether or not veteran preference is given therefor or whether it is eligible to be considered for civil service retirement purposes. Total service shall consist only of full years of creditable service, but fractions of a year shall be considered in arriving at the total.

(e) "Efficiency rating" means (1) for employees paid under the compensation schedules of the Classification Act of 1923 as amended or of Executive Order No. 6746, the current official efficiency rating under the Uniform Efficiency Rating System; and (2) for other employees the current efficiency rating under an efficiency rating system which is in general compliance with the uniform system.

Administratively adopted efficiency rating systems not in general compliance with the uniform system may be used for determining retention credits with the prior approval of the Commission.

(f) "Veteran preference employee" means an employee entitled to veteran preference under the Veterans' Preference Act of 1944.

(g) "Department" means an entire executive department, parent organization with constituent agencies, independent establishment, government-owned or government-controlled corporation of the Federal Government, the municipal government of the District of Columbia, or any other such organization or separate governmental agency of the executive branch of the Federal Government created by Act of Congress or Executive order.

(h) "Governmental entity" means a department, bureau of a department, parent organization, constituent agency, independent establishment, entire field installation, regional office, or field station, an operating department of the municipal government of the District of Columbia, or any other such organization or separate governmental agency of the Federal Government created by Act of Congress or Executive order.

(i) "Competitive area" means a governmental entity, a combination of governmental entities, or that part of a governmental entity for which approval has been secured from the Commission, within which employees of a competitive level are considered to be in competition.

(j) "Competitive level" means all positions in the same grade of the same service, trade, or profession (although they may have different titles or different pay rates), in which interchange of personnel is feasible.

§ 12.303 *Retention preference; classification.* For the purpose of determining relative retention preference in reductions in force, employees shall be classified according to tenure of employment in competitive retention groups and subgroups, as follows:

Group A: All employees who have met all requirements for indefinite retention in their present positions. With respect to positions subject to the Civil Service Act and rules, this includes all employees currently serving under absolute or probational civil service appointments or who were appointed, reappointed, transferred or promoted from absolute or probational civil service appointments to war service indefinite or trial period appointments without a break in service of thirty days or more. With respect to positions excepted from the Civil Service Act and rules, this includes all employees currently serving under appointments without time limitation.

A–1 Plus during one-year period after return to duty, as required by law.

A–1 With veteran preference unless efficiency rating is less than "Good".

A–2 Without veteran preference unless efficiency rating is less than "Good".

A–3 With veteran preference where efficiency rating is less than "Good".

A–4 Without veteran preference where efficiency rating is less than "Good".

Group B: All employees serving under appointments limited to the duration of the present war or for the duration of the war and not to exceed six months thereafter, or otherwise limited in time to a period in excess of one year, except those specifically covered in Groups A and C.

B–1 With veteran preference unless efficiency rating is less than "Good".

B–2 Without veteran preference unless efficiency rating is less than "Good".

B–3 With veteran preference where efficiency rating is less than "Good".

B–4 Without veteran preference where efficiency rating is less than "Good".

Group C: All employees serving under appointments specifically limited to one year or less, all non-citizen employees serving within the continental limits of the United States, all employees continued beyond the automatic retirement age, and all annuitants appointed under section 2 (b) of the Civil Service Retirement Act, as amended.

C–1 With veteran preference unless efficiency rating is less than "Good".

C–2 Without veteran preference unless efficiency rating is less than "Good".

C–3 With veteran preference where efficiency rating is less than "Good".

C–4 Without veteran preference where efficiency rating is less than "Good".

§ 12.304 *Completion of employee records.* (a) Departments and governmental entities are responsible for maintaining current records of information necessary for determining retention preference of employees.

If these records are incomplete, they shall be supplemented by written statements from employees, supported by a signed certificate substantially as follows:

I certify that the information submitted herewith is true, correct, and complete to the best of my knowledge and belief.

(b) Employees who have served continuously without a break in service of thirty days or more in positions subject to the Civil Service Act and rules since before March 16, 1942 (October 23, 1943, in the field service of the Post Office Department):

(1) Are in Group A unless appointed under authority of Executive Order Nos. 8257, 8564, or 8458, or Civil Service Rule VIII and have not acquired a civil service status.

(2) Are in Group B if appointed under authority of Executive Order Nos. 8257, 8564, or 8458, or Civil Service Rule VIII unless they acquired a civil service status under Executive Order Nos. 8833 or 8952, or the Commission's Departmental Circular 457 or 517,[1] in which case they are in Group A.

(c) Employees appointed after March 16, 1942 (October 23, 1943, in the field service of the Post Office Department), initially or reappointed after a break in service of thirty days or more are in Group B unless:

(1) They are currently holding appointments definitely limited to one year or less—in which case they are in Group C.

(2) They are occupying positions excepted from the Civil Service Act and rules and not limited in duration—in which case they are in Group A.

(d) Whenever a department is unable to obtain from its records or from an employee information as to his classified (competitive) civil service status or length of service necessary to establish his retention preference standing, under the above rules, the Commission, upon the receipt of a request on Standard

[1] Filed as part of the original document.

Form No. 66, will supply the information, if available, from its records.

§ 12.305 *Determination of competitive area.* The area in which a reduction in force is made should be a governmental entity as defined in § 12.303 (b).

No reduction in force affecting employees in retention groups A or B shall be made in any smaller competitive area in Washington, D. C., or vicinity, without obtaining prior approval from the Central Office of the Commission, or elsewhere without securing prior approval from the appropriate regional or branch office of the Commission. Approval will be given if the proposed competitive area is large enough to prevent the loss of highly efficient employees, to allow true competition to exist, and to protect the high retention preference of group A employees. Consideration will be given to the extent of the competitive level or levels to be affected, whether the proposed competitive area has independence of operation, work functions, and personnel administration (although policies may be established in higher department levels), whether the staff of the proposed competitive area is separately organized and clearly distinguishable from other units of the governmental entity, and whether it is within local commuting distance of other units of the governmental entity.

If there is doubt as to the size and scope of competitive areas, or if it is desired to establish competitive areas smaller than governmental entities as a standard practice for reductions in force, departments shall submit proposed plans of such competitive areas to the Central Office of the Commission. When approved, subsequent clearance with the Commission will not be necessary unless (a) a proposed competitive area does not conform to the plan, (b) reorganization has affected the plan, or (c) there has been a change in the facts upon which the plan was originally based.

§ 12.306 *Special rule relating to consolidations and mergers.* Before any reduction in force is made as the result of the transfer of any or all of the functions of one department to another continuing department, all veteran preference employees and all retention group A employees assigned to any such function shall be transferred to such continuing department.

§ 12.307 *Compilation of retention register.* Whenever there is to be a reduction in force there shall first be determined the competitive level or levels to be affected. Each employee whose official position is in such a competitive level shall be considered in competition in his retention group in any reduction in force, whether he is in a duty or leave status, pay or nonpay status, or actually engaged on work in another department, another competitive area, or in another competitive level; excluding only those in the active military service of the United States or in the Merchant Marine.

A retention register shall be compiled for each competitive level in which a reduction in force is to be made, showing the names of all employees in competition by retention groups and subgroups. It shall be arranged in sequence showing subgroup A–1 plus with highest retention preference, followed in order by subgroups A–1, A–2, A–3, A–4, B–1, B–2, B–3, B–4, C–1, C–2, C–3, and C–4. Within each subgroup in retention groups A and B where some but not all employees may be affected by the reduction in force, names shall be arranged in sequence according to retention credits, with higher retention preference accorded to those with a greater number of retention credits. No computations of retention credits are necessary for employees in any retention subgroup which will not be affected by the reduction in force, in any subgroup where all of the employees are to be separated, or in retention group C. For this purpose, the employee records shall be reviewed and brought up to date with respect to length of service, efficiency ratings, and other particulars regarding which changes have occurred since the records were last made current.

This register shall be maintained in the order specified for inspection by employees, and shall at all times be available for inspection by representatives of the Commission.

§ 12.308 *Sequence of selection.* Within each competitive level, action must be taken to eliminate all employees in lower subgroups before a higher subgroup is reached, and within each subgroup of retention groups A and B, action must be taken concerning all employees with a lower number of retention credits before an employee with a higher number of retention credits is reached, except as provided below. Action may be taken at administrative discretion within any subgroup of retention group C. Whenever two or more employees are tied for position in retention group A or B, the ties shall be broken first by considering half-years of service in excess of total years for which retention credits were granted, and then by giving consideration to such matters as official conduct, or established administrative policy.

In unusual situations, an employee performing necessary duties which cannot be taken over by any other available employee with higher retention preference without undue interruption to the activity involved, may be retained, although employees with higher retention preference may be affected. A written statement of the reasons for such exceptions shall be made for inspection by employees adversely affected and for review by representatives of the Commission.

When a reduction in force is necessary only because of a curtailment in funds from which excepted employees are paid, only employees in excepted positions shall be considered in competition for the reduction in force.

Seasonal employees shall be considered in competition only with other seasonal employees in reductions in force.

Employees serving on a when-actually-employed (WAE) basis shall be considered in competition only with other when-actually-employed employees in reductions in force.

No discrimination shall be exercised, threatened or promised in any reduction in force against or in favor of any employee because of race, sex or marital status, or his political or religious opinions or affiliations.

§ 12.309 *Actions.* Employees who cannot be retained in their positions because of a reduction in force shall be separated, except as provided below. Such actions may be effective at different times within 90-day periods, each 90-day period being considered as a separate reduction-in-force program, and may be made effective without the prior approval of the Commission.

(a) *Exceptions; furloughs.* Where the reduction in force is the result of a temporary condition which is not expected to continue for more than one year, employees reached for action may be furloughed. Furloughs may also be used in lieu of separations except that in any reduction in force where any employee is furloughed in lieu of separation, all employees with higher retention preference who have been reached for action shall also be offered furloughs in lieu of separation. The furlough period shall not exceed the unexpired portion of the period of appointment and in no case shall it exceed one year. In the event the vacancies are to be filled in positions of the competitive level and competitive area from which employees have been furloughed, the furloughed employees shall be given opportunity to return to duty before any original appointments are made to such positions. Offers of recall to duty shall be made in the order of retention preference of furloughed employees.

(b) *Exceptions; statutory retention.* Whenever an employee in Subgroup A–1 plus is reached for action in a reduction in force, he shall be placed in some other position of like seniority, status, and pay elsewhere in the department, and, wherever possible, at the same geographical location.

(c) *Exceptions; status employees.* No retention group A employee may be separated or furloughed in a reduction in force from a position subject to the Civil Service Act, if there is another position subject to the Civil Service Act in the department at the same geographical location in any other competitive area or competitive level, which may reasonably be expected to continue for one year or more, not filled by a retention group A employee which he could fill without undue interruption to the activity involved, unless (1) he refuses a reasonable offer of transfer to a position meeting these requirements, including reduction in pay if necessary, or (2) he has reemployment rights to a position in another department.

(d) *Exceptions; veteran preference employees.* No employee in subgroup A–1 may be separated or furloughed in a reduction in force from a position subject to the Civil Service Act if there is another position subject to the Civil Service Act in the department at the same geographical location in any other competitive area or competitive level which may reasonably be expected to continue for one year or more not filled by an employee in subgroup A–1 which he could fill without undue interruption to the activity involved, unless (1) he refuses a reasonable offer of transfer to a position meeting these requirements, including reduction in pay if necessary, or (2) he has reemployment rights in another department.

(e) *Exceptions; war service employees with veteran preference.* No employee in subgroup B–1 may be separated or furloughed in a reduction in force from a position subject to the Civil Service Act if there is another position subject to the Civil Service Act in the department at the same geographical location in any other competitive area or competitive level which may reasonably be expected to continue for one year or more not filled by an employee in retention group A or subgroup B–1 which he could fill without undue interruption to the activity involved, unless (1) he refuses a reasonable offer of transfer to a position meeting these requirements, including reduction in pay if necessary, or (2) he has reemployment rights in another department.

(f) *Actions concerning displaced employees.* Additional actions necessary in connection with employees displaced, as a result of transfers or reassignments under paragraphs (b), (c), (d) and (e) of this section shall be determined on the basis of their retention preference in their respective competitive areas and competitive levels.

§ 12.310 *Notice to employees.* Each employee affected by a reduction in force shall be given an individual notice in writing at least thirty days before the action becomes effective. Where it is not possible to continue the employee in an active-duty status for the period specified in the notice, he shall have the greatest possible notice before he is relieved from active duty and shall thereafter be carried on the rolls for the remainder of the period. If the period of active duty after the notice is given and the period of accrued leave total less than thirty days, the employee shall be carried in a nonpay status for the remainder of the 30-day period. Such notice shall inform the employee of:

(a) The nature and effective date of the action,

(b) The proper office of the organization where he may examine a copy of these regulations and inspect the retention register and records,

(c) His right to appeal the proposed action to the Commission (departmental employees in the Washington area to the Central Office and others to the appropriate regional or branch office) within ten days from the receipt of notice, and

(d) The procedure for exercising any restoration or reemployment rights he may have, and the channels (departmental and field) through which he may apply for other government employment.

§ 12.311 *Reports to the Commission.* As soon as employees are notified of the proposed action, and within the 10-day period allowed for the filing of appeals, a report shall be submitted to the appropriate office of the Commission of each reduction in force program. Such report shall include:

(a) The competitive area and competitive level in which the reduction in force is to be made,

(b) The retention subgroup and credit point above which employees will be retained in each competitive level, the names of any employees below such point who are retained, and the reasons for their retention,

(c) The period in which the reduction in force is to be completed,

(d) The total number of employees separated or furloughed, and

(e) A certification of compliance with the regulations.

§ 12.312 *Special rules on liquidation.* Whenever it has been determined that all functions and all positions in an entire department, an entire governmental entity, or an entire competitive area are to be abolished within a specified time period, actions may be taken in regard to individual employees at different dates at administrative discretion; except that no employee with veteran preference shall be separated before an employee without veteran preference where their positions are immediately interchangeable.

NOTE: A mere limitation of authority to a specified date in the law which establishes, authorizes, or extends an agency is not a sufficient basis for the application of the provisions of this section.

In such cases, the employees of the particular department, entity, or competitive area shall be given individual notices in writing containing a statement of the law, Executive order, or authority which requires the liquidation of the department, governmental entity, or competitive area, and the time period in which the liquidation is to be accomplished, and informing them of their rights to appeal to the Commission if they feel that there has not been compliance with the provisions of §§ 12.301 to 12.314, inclusive. The notices shall also inform employees of their rights to retention on the rolls for at least thirty days, of the procedures necessary to exercise any reemployment rights they may have to positions in other departments, governmental entities, or competitive areas, and of the procedures necessary to secure other employment.

A report of all liquidation programs shall be made to the Commission which shall include (a) a copy of the law, Executive order, or other authority for the liquidation of the department, governmental entity, or competitive area; (b) a certificate that no employee with veteran preference is being separated in advance of any employee without veteran preference where their positions are immediately interchangeable; and (c) a list of all retention group A employees with classified (competitive) civil service status who have not been transferred or assigned to other positions. This report shall be submitted within ten days after the first individual notices of separation are given to the employees affected.

Where it is necessary to liquidate a major activity which is not an entire competitive area, or which is a part of two or more competitive areas, the Commission will consider a request to establish such activity as a competitive area for the purpose of such liquidation.

§ 12.313 *Appeals.* Any employee who feels that there has been a violation of his rights under §§ 12.301 to 12.314, inclusive, may appeal to the appropriate office of the Commission within ten days from the date he received his notice of the action to be taken. This time limit may be extended only upon a showing by the employee that circumstances beyond his control prevented him from filing his appeal within the prescribed ten days. In order that employees may be informed of the facts on which action is based they shall have the right to examine a copy of §§ 12.301 to 12.314, inclusive, and to inspect the retention register and records on which their names appear, including statements of reasons for passing over employees with lower standing on the retention list. Such appeal should set forth whether the protest against action is based on an error in the records, violation of the rules of selection, restriction of competitive area or competitive level, or denial of right to examine regulations, retention register and records.

§ 12.314 *Actions disapproved by the Commission.* Whenever the Commission, as the result of a decision on the appeal of an employee, disapproves the action taken under §§ 12.301 to 12.314, inclusive, the head of the department or governmental entity shall restore the employee to active duty.

With respect to reductions in force outside the Washington, D. C., area, the decision of the Commission's regional director is the decision of the Commission on appeals.

Effective date. This revision is effective with respect to all reductions in force in which notices to employees are issued on and after November 1, 1945.

NOTE: *Miscellaneous information; Commission points of contact.* Inquiries and correspondence concerning these regulations or standard plans of competitive areas, and reports and appeals concerning reduction-in-force and liquidation programs in the departmental service in the vicinity of Washington, D. C., shall be addressed to the Civil Service Commission, Washington 25, D. C. for the attention of the Efficiency Ratings Administration Section, Personnel Classification Division, Room 801, Victor Building, 724 9th Street, N. W. (telephone extension 3166).

Inquiries, correspondence, reports and appeals concerning reduction-in-force and liquidation programs in the field service or in the departmental service outside the Washington, D. C., area except matters involving an established plan of competitive areas for the department or governmental entity, shall be addressed to the appropriate regional or branch office of the Commission.

TITLE 10—ARMY: WAR DEPARTMENT

Chapter III—Claims and Accounts

PART 306—CLAIMS AGAINST THE UNITED STATES

MISCELLANEOUS AMENDMENTS

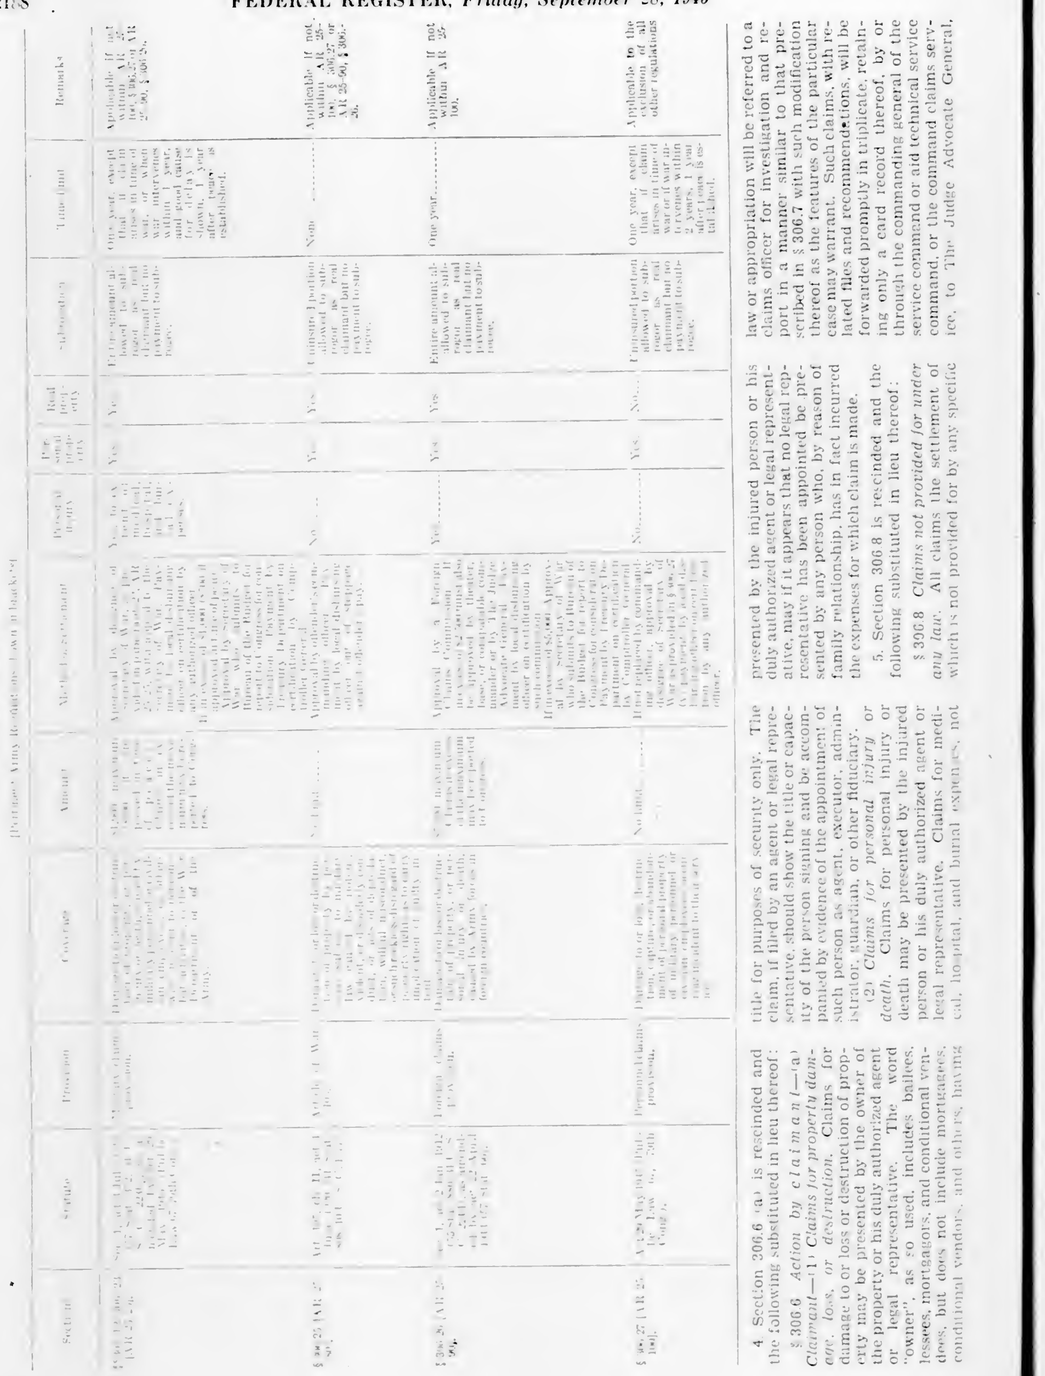
The following amendments and additions to the regulations contained in Part 306 are hereby prescribed:

1. Sections 306.1 and 306.2 are rescinded and the following substituted in lieu thereof:

§ 306.1 *Definition.* The word "claims" as used in these regulations refers to those demands for payment submitted by individuals, partnerships, associations, or corporations, including countries, and states, territories, and other political subdivisions of such countries, but excluding the Federal Government of the United States and its instrumentalities, other than such demands for payment as arise under ordinary obligations incurred by the War Department or the Army in the procurement of services or supplies. As to claims in favor of the United States, see §§ 307.3 to 307.5 inclusive.

§ 306.2 *Government immunity.* Congress has adhered generally to the principle that except as the claim arises under a contract, or not being under a contract is within the classes of cases hereinafter enumerated, no person may have a legally enforceable claim against the United States for property damage or personal injury arising out of activities of the War Department or of the Army. Accordingly, in other cases it is necessary for a claimant who seeks relief to ask Congress to grant him compensation as an act of grace.

2. Section 306.4 is amended by changing the first portion of paragraph (a) and adding a new paragraph designated (d). The section amended reads as follows:



§ 306.4 *Statutory authority of the War Department and the Army.* * * *

(a) *Claims for damage to or loss or destruction of property, or for personal injury or death, caused by military personnel or civilian employees, or otherwise incident to noncombat activities, of the War Department or of the Army.* The act of July 3, 1943 (57 Stat. 372; 31 U.S.C. 223b), as amended by the act of May 29, 1945 (Public Law 67-79th Cong.) * * *

(d) *Claims of military personnel and civilian employees for property damaged, lost, destroyed, captured, or abandoned in the service.* The act of May 29, 1945 (Public Law 67-79th Cong.; sec. III, WD Bul. 9, 1945) provides for the payment of claims, arising on or after December 7, 1939, of military personnel and of civilian employees of the War Department or of the Army for damage to or loss, destruction, capture, or abandonment of personal property occurring incident to their service.

3. Section 306.5 is rescinded and the following substituted in lieu thereof:

4. Section 306.6 (a) is rescinded and the following substituted in lieu thereof:

§ 306.8 *Claims not provided for under any law.* All claims the settlement of which is not provided for by any specific law or appropriation will be referred to a claims officer for investigation and report in a manner similar to that prescribed in § 306.7 with such modification thereof as the features of the particular case may warrant. Such claims, with related files and recommendations, will be forwarded promptly in triplicate, retaining only a card record thereof, by or through the commanding general of the service command or aid technical service command, or the command claims service, to The Judge Advocate General, Washington 25, D. C., for appropriate administrative action. (R.S. 161; 5 U.S.C. 22 [AR 25-20, May 29, 1945].)

Subchapter A—Income and Excess Profits Taxes

[T. D. 5480]

PART 29—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1941

RETURN OF INFORMATION AS TO PAYMENTS TO EMPLOYEES

Section 29.147-2 of Regulations 111 (26 CFR, Cum. Supp., Part 29), as amended by Treasury Decision 5313, approved December 21, 1943, is further amended to read as follows:

§ 29.147-2 *Return of information as to payments to employees.* The names of all employees to whom payments of $500 or more are made in any calendar year, whether such total sum is made up of wages, salaries, annuities, commissions, or compensation in any other form, must be reported. In the case of any such payments of $500 or more made during the calendar year 1945 or a subsequent calendar year, if a portion thereof constitutes wages subject to withholding under section 1622 and such portion is reported on Form W-2, the remainder of such payments must be reported on Form 1099. For example, if such payments made to an employee by his employer in 1945 amount to $600 and $400 thereof represent wages subject to withholding under section 1622, and the remaining $200 represent compensation not subject to withholding, for instance, advances or reimbursements for traveling or other expenses, or insurance premiums which in accordance with § 29.165-6 are income to the employee for the year in which the insurance is purchased, the $400 must be reported on Form W-2 and the $200 must be reported on Form 1099. Heads of branch offices and subcontractors employing labor, who keep the only complete record of payments therefor, should file returns of information in regard to such payments with the Commissioner of Internal Revenue, Processing Division, 260 East 161st Street, New York 51, N. Y. When both main office and branch office have adequate records, the return should be filed by the main office.

For years prior to 1945, amounts distributed or made available under an employees' trust governed by the provisions of section 165 to any beneficiary, in excess of the sum of his personal exemption and the amounts paid into the fund by him, must be reported by the trustee. For the calendar year 1945 and subsequent calendar years amounts distributed or made available under an employees' trust governed by the provisions of section 165, or under an annuity plan to which § 29.22 (b) (2)-5 relates, to a beneficiary shall be reported to the extent such amounts are includible in the gross income of such beneficiary where the amounts so includible are $500 or more.

In the case of payments made by the United States to persons in its service (civil, military, or naval) of wages, salaries, or compensation in any other form, the returns of information shall be made by the heads of the executive departments and other United States Government establishments.

For cases where no returns of information are required, see § 29.147-3. (See also § 29.22 (a)-3.)

AUTHORITY: Regulations in this chapter unless otherwise noted at the end of documents affected, issued under sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236, 56 Stat. 177, 58 Stat. 827; E.O. 9024, 7 F.R. 329; E.O. 9040, 7 F.R. 527; E.O. 9125, 7 F.R. 2719; E.O. 9599, 10 F.R. 10155; W.P.B. Reg. 1 as amended Dec. 31, 1943, 9 F.R. 64.

PART 903—DELEGATIONS OF AUTHORITY

[Directive 24, as Amended Sept. 26, 1945]

AUTHORITY OF NATIONAL HOUSING AGENCY FOR HOUSING CONSTRUCTION

§ 903.36 *Directive 24.* The National Housing Agency is hereby authorized for housing projects, except housing projects of the types listed on Schedule A, to take the following types of action, subject to conditions and limits established by the War Production Board through the issuance of program determinations or otherwise:

(a) Approve under Limited Preference Order P-55-c applications on Form WPB-2896 for housing construction of the types described in Schedule B. This approval constitutes War Production Board authorization under Conservation Order L-41.

(b) Approve construction of the types described in Schedule B by any Federal Agency under the jurisdiction of the National Housing Agency without requiring the filing of Form WPB-2896. This approval constitutes War Production Board authorization under Conservation Order L-41.

(c) [Deleted Sept. 26, 1945.]

(d) [Deleted Sept. 26, 1945.]

(e) [Deleted Sept. 26, 1945.]

(f) [Deleted Sept. 26, 1945.]

(g) Grant requests to amend the provisions of applications approved under paragraph (a) above and requests to amend orders in the P-55 series and the related provisions of applications for war housing covered by them in the following respects in the form and subject to criteria approved by the Construction Bureau of the War Production Board:

(1) The number of dwelling units covered by the application;

(2) The location of the housing project;

(3) The time for beginning or completing construction of the project.

(4) Permission to a successor builder or owner who has applied for permission to complete construction and to avail himself of the authorization previously issued to the original builder or owner;

(5) Changes in the promises, certifications, and agreements, made by the builder or owner on Form WPB-2896 (PD-105) or other application forms used instead, in cases where the changes are covered by Preference Rating Order P-55-a. If the requested change involves rental or sale when such disposition or use of the dwelling unit was not authorized under the project application (for example, if the request is to rent the unit rather than sell or occupy it, as originally authorized, a rental or sales price may be initially established by the National Housing Agency as though the rental or sales price were included in the project application). However, this does not apply to cases where the unit is to be transferred to another person who will sell or rent it in accordance with the original authorization.

If the requested change relates to an increase of rental or sales price, the National Housing Agency may grant the request only under the following conditions:

(i) No increase in rental may be approved after initial tenant occupancy with respect to any dwelling unit located in an area subject to the rent regulations of the Office of Price Administration unless the increase is requested because of increased costs of construction and the written request for increase is filed before initial tenant occupancy of the unit; however, a request for increase of rental may be granted before initial tenant occupancy subject to the provisions of sub-paragraph (ii) below.

(ii) No increase in rental before initial tenant occupancy or sales price shall be approved except on an appropriately supported statement of the applicant for the project or his legal successor that he will provide tenant services in addition to those included in the original application, or that he has incurred, or will incur, costs in the construction over which he had or has no control or in the operation of such housing in excess of the costs estimated originally in connection with such housing, and the increase must not exceed the following:

(*a*) If an increase in rental is requested because of increased construction cost, the ratio of the increase in shelter rental to the cost increase shall not exceed the ratio of the previously approved shelter rental to the original estimated cost of construction.

(*b*) If an increase in rental is requested because of increased operating cost or additional services, the increased rental shall not exceed the increase in estimated operating cost or in tenant services.

(*c*) If an increase in sales price is requested because of increased construction cost, the increase in sales price shall not exceed the increase in estimated construction cost."

Issued this 26th day of September 1945

WAR PRODUCTION BOARD,
By LINCOLN GORDON,
Program Vice Chairman.

SCHEDULE A

The following types of residential construction are not covered by Directive 24:

a. Farm housing and mobile farm labor camps.

b. Housing being built directly by or under the direct management of the Military Services.

c. Hotels and similar establishments of more than 10 rooms providing housing primarily for transients.

d. Institutional Housing—Dormitories and other housing owned and operated by and as an integral part of an institution such as a school, college, university, hospital or welfare establishment, primarily for occupancy by the personnel of the institution (whether or not rented to the personnel).

e. Mobile housing units (trailers).

f. Residential construction built on or near a "lease" (land where petroleum resources are being explored, developed or depleted) or on an oil pipe line in a remote area, either by an oil company or pipe line company for its employees or by the employees for their own occupancy.

g. Housing built and owned by a person or organization supplying electric power, gas or water (other than water exclusively for irrigation) for general use by the public, when the housing consists of not more than 10 dwelling units and is accessory to and an integral part of a project undertaken primarily for the construction of an isolated plant addition such as a gas compressor station or a hydroelectric plant.

h. The alteration, betterment, repair or replacement (but not the initial construction and equipping, which is provided for under paragraph a (3) of Schedule B below) of structure, facilities, equipment or fixtures which is intended primarily for a commercial establishment located in a dwelling structure.

SCHEDULE B

The following construction and remodeling are covered by Directive 24 (note that paragraph (e) (2) of L-41 as amended September 7, 1945, exempts certain alterations from the restrictions of that order):

a. Dwelling structures (including partially or completely prefabricated structures):

(1) Single family and multi-family residential structures including apartment hotels, except hotels as defined in Schedule A.

(2) Dormitories, rooming houses and similar dwelling accommodations.

(3) Structures which include commercial establishments such as stores, restaurants, offices, where more than 50 per cent of the floor area of each structure provides dwelling accommodations, not including alterations, betterments, repairs or replacements described in paragraph (h) of Schedule A above.

(4) Remodeling or conversion of any building for the sole purpose of providing living accommodations.

b. Dwelling Facilities: All separate buildings and structures which are appurtenant and accessory to dwellings such as private garages, sheds, management offices, project maintenance and repair shops, private recreation facilities, garden structures. g. Commercial Establishments: Land improvements, structures, facilities or fixed equipment for commercial establishments such as stores, restaurants, offices, theaters, and for public community buildings, only to the extent that such establishments are:

(1) An integral part of a project which is undertaken primarily for the purpose of construction, alteration or betterment of dwelling accommodations, and

(2) Specified in the application form WPB-2896, and

(3) Necessary for the utilization of the dwelling accommodations upon completion of the construction project.

This paragraph does not include alterations, betterments, repairs or replacements described in paragraph (h) of Schedule A above.

PART 903—DELEGATIONS OF AUTHORITY

[Directive 24 Interpretation 1 as Amended Sept. 26, 1945]

HOUSING CONSTRUCTION COVERED BY THE SCHEDULES TO DIRECTIVE 24

The following amended interpretation is issued with respect to Directive 24:

Directive 24 describes the kind of action which the National Housing Agency and its constituent operating agencies (Federal Housing Administration, Federal Public Housing Authority, and Home Owners' Loan Corporation) can take with respect to housing construction. Schedules A and B to Directive 24 set forth what is meant by housing construction for this purpose. If the construction is covered by Directive 24, persons (other than government units) who want permission to build should make application to the Federal Housing Administration on Form WPB-2896. Local public housing authorities apply on Form WPB-2896 to the FPHA. If the construction is not covered by Directive 24, Order L-41 will explain how to get permission to do the building. Schedules A and B of Directive 24 merely tell what kind of construction is reviewed by the National Housing Agency. They do not define residential construction for any other purpose.

(a) *Room count and floor area.* Jurisdiction over hotel construction is determined by the number of rooms as provided in paragraph (c) of Schedule A. In cases of remodeling or additions, this room count should be applied to the completed structure and not to the structure before the addition is made. Jurisdiction over new construction of structures which are partly commercial and partly residential depends on the percentage of floor area devoted to each use under paragraph (a) (3) of Schedule B. In cases of additions, a change in the percentage of floor area devoted to living accommodations is sometimes involved. In such cases the determination of jurisdiction should be made on the basis of the floor area being added, and should not be made on the basis of the floor area of the whole structure as it will be after completion of the additions (see also paragraph (e) (2) (ii) of this Interpretation). Furthermore, if the addition is wholly commercial, paragraph (h) of Schedule A applies; and if it is wholly residential, paragraph (a) (4) of Schedule B applies.

(b) *Farm housing.* As provided in paragraph (a) of Schedule A, farm housing is not covered by Directive 24. Whether a project is farm housing or other residential construction is ordinarily determined by its location. A farm house is a structure built on the farm and used primarily for housing agricultural workers required in the operation of that farm. A farm is a place primarily used for raising crops, livestock, dairy products, poultry, etc., for the market. A suburban house with a victory garden is not a farm. Except in unusual cases a place of less than five acres will not be considered a farm. Housing built off a farm for the purpose of housing farm laborers would not be farm housing. Housing constructed on a farm for the purpose of housing nonfarm workers would likewise not be farm housing, since running the rooming house or apartment house would be a separate nonfarming enterprise.

(c) [Deleted Sept. 26, 1945]

(d) [Deleted Sept. 26, 1945]

(e) *Commercial establishments.* In many cases commercial establishments and dwelling units are either part of the same structure or are separate buildings which are part of the same project. The general rule is that for a single project only one application need be filed. Paragraph (h) of Schedule A and paragraphs (a), (b) and (g) of Schedule B tell how to determine whether or not a project containing commercial establishments is essentially a housing project for which a WPB-2896 should be filed.

(1) *New project.* New construction in which more than 50% of the floor area of each structure provides dwelling accommodations is a housing project under paragraph (a) (3) of Schedule B. In addition separate commercial establishments to serve the housing project may be constructed under the housing authorization if they meet the conditions of paragraph (g) of Schedule B. One of the conditions set forth in subparagraph (1) states that the commercial establishments must be "an integral part of" the housing project. This means that the commercial establishments must be located at or adjacent to the site of the dwelling accommodations, must be owned by the owner of the dwelling accommodations and must be part of the project as approved or as amended, providing the amendment is made before the dwelling accommodations have been completed. The building of separate structures for commercial purposes as an addition to a completed residential project is not housing construction. (See paragraph (b) of Schedule B.)

(2) *Existing structures.* If an existing structure is being altered by making additions so that the building will when complete, include dwelling accommodations and commercial establishments, the remodeling or addition is a housing project under the following conditions:

(i) When the proposed construction involves the creation of additional dwelling units only. It is a housing project whether or not most of the floor area of the structure after remodeling is for commercial use. (See paragraph (a) (4) of Schedule B.) However, if the proposed construction involves only space to be used for commercial purposes the construction is not a housing project. (See paragraph (h) of Schedule A.)

(ii) If the addition is partly for residential purposes and partly for commercial purposes the construction is a housing project only if more than 50 % of the floor area of the addition is to be used for dwelling accommodations. (See paragraph (h) of Schedule A and paragraph (a) (3) of Schedule B.)

(f) *Accommodations for transient workers.* Bunk houses and similar accommodations built by employers for transient workers such as train and engine crews who need living accommodations at division points and terminals during a lay-over period or for maintenance of way workers are housing construction covered by paragraph (a) (2) of Schedule B and not by paragraph (c) or (d) of Schedule A if the accommodations are intended for a fixed location. Trailers and other mobile housing units for transient workers are not housing construction and are covered by paragraph (e) of Schedule A.

(g) *Preference ratings.* Preference ratings for residential construction approved under Directive 24 will be assigned only by the War Production Board under the provisions of Priorities Regulation 28.

Issued this 26th day of September 1945.

Program Vice Chairman.

PART 3290—TEXTILE, CLOTHING AND LEATHER

[General Conservation Order M-84, as Amended Sept. 27, 1945]

CORDAGE FIBER, CORDAGE YARN, CORDAGE, AND HEMP FIBER

§ 3290.221 *General Conservation Order M-84—*(a) *Restrictions on processing of fiber or yarn into rope and assignment of preference ratings for istle and jute yarns.* (1) No processor may put into process manila or agave, or yarns made from those fibers, to manufacture rope except:

(i) For an end use allowed in Schedule A for rope manufactured from that fiber or yarn; or

(ii) To fill orders placed by or for the account of any United States Government agency having in effect a plan, approved by the War Production Board, to screen its orders and requisitions for rope and to eliminate unnecessary end uses of rope manufactured from critical fibers. Only the Army, Navy, and Maritime Commission now have such approved plans in effect. The Army and Navy approved plans require that orders for their account for rope made in whole or in part from Manila or agave, shall be approved by the War Production Board, and therefore no processor shall accept any such order unless the acceptance is approved by the War Production Board on application from or on behalf of the processor. Application may be made by the processor or on his behalf by letter or telegram addressed to the War Production Board, Cordage Branch, Washington 25, D. C., stating government contract and item number, quantity and kind of fiber required, and the size of the rope to be made. The War Production Board will consult with the Service or agency involved and approve applications if the proposed end use of the rope, in view of current supplies, justifies the use of the fiber.

(2) No processor may in any calendar quarter put into process for the manufacture of rope more manila and agave fiber than the following percentages of his basic monthly poundages:

(i) Manila	83 25%
(ii) Agave	614%

Use of "extenders" shall not be charged against the permitted quantity of agave. Specific directions may be issued to exceed the above percentages of either fiber, to permit increased deliveries to particular claimant agencies. If a processor is permitted to exceed his quota of either fiber, he may be required to accept a corresponding decrease in his quota of the other fiber.

(3) Processors are assigned a preference rating of AA-1 to get istle and jute yarns for processing into rope. This rating may not be applied after September 30, 1945.

(b) *Restrictions on processing of fiber or yarn into other products.* (1) No processor may put into process any manila or agave, or yarns made from those fibers, to manufacture any product except rope as permitted in paragraph (a), twine as permitted in Schedule B, or as specifically authorized or directed in writing by the War Production Board. The use of agave, other than cantala or sisalana from Java and Haiti, may be authorized from time to time by the War Production Board for binder or baler twine.

(2) Manufacturers of wire rope are assigned a preference rating of AA-1 to obtain jute wire rope centers for the production of wire ropes. This rating may not be applied after September 30, 1945.

(c) *Further restrictions on processing.* (1) The War Production Board may issue specific directions to processors who have received manila or agave, hemp as defined in paragraph (l) (15) or yarn by allocation under this order or any other War Production Board order or by delivery from any United States Government agency, as to the purpose and kind of product for which the fiber or yarn may be processed and as to the extension of more critical fibers by mixture with less critical ones (i. e. use of "extenders") in the manufacture of any product.

The War Production Board may from time to time issue specific instructions regarding the percentage of extender to be used in the manufacture of agave sisalana rope.

(2) Beginning July 1, 1944 no processor shall make agave sisalana rope which does not contain American hemp line as an extender with the following exceptions:

(i) Rope in sizes under ¾" in diameter.

(ii) Wire rope centers.

(iii) Drilling cables.

(iv) Purse lines.

(v) Power transmission rope (1½" diameter and larger).

Any processor may, however, elect at his own option to include American hemp line fiber as an extender in the manufacture of any of the rope products listed in paragraph (c), (2) (i), (ii), (iii), (iv), (v), above.

(d) *Restrictions on delivery of rope and twine.* (1) No processor or dealer may sell, deliver, or accept delivery of new rope or new twine, produced in the United States in whole or in part from manila or agave fiber or yarn, except for the end uses for which the product may, under this order, be manufactured.

(2) No person may sell or deliver new binder or new baler twine if he knows or has reason to believe that:

(i) The binder twine will not be used with mechanical harvesting equipment or in the growing, harvesting or delivering of agricultural crops, or that the binder twine will be converted into rope or any other product.

(ii) The baler twine will not be used in a self-tying machine for baling hay, straw or other fodder crops.

(3) No person may use new binder or new baler twine to manufacture rope for sale.

(4) No processor or dealer may sell or deliver to an owner, operator or agent of a vessel any manila or agave rope processed from fiber which he knows or has reason to believe was allocated to the War Shipping Administration, except to fill purchase orders or emergency stock withdrawal certificates approved in writing by the War Shipping Administration.

(e) *Allocation of non-military cordage.* (1) The War Production Board may, in accordance with Program Determinations, state the quantity of manila and agave which each processor must, out of his production during stated periods, process into cordage, as allowed by Schedules A and B, to be delivered or set aside for delivery only to fill non-military orders and only to the extent specified for particular non-military uses. From that quantity, the processor may not fill any other orders, except orders rated AAA. When that cordage is sold by the processor, he must inform the buyer of the particular non-military use for which it must be used. The buyer may use or sell that cordage only for the specified non-military use or an AAA order.

(2) The War Production Board may issue directions to processors and dealers for the establishment of emergency stocks of rope for maritime use, and for withdrawals from and replenishment of such emergency stocks, and for production for that purpose.

(f) *Allocation of fiber and yarn.* No processor shall make or accept delivery of any manila or agave fiber or yarn or hemp as defined in paragraph (l) (11) contrary to directions which from time to time the War Production Board may issue. The War Production Board may from time to time allocate to processors the available supplies of manila and agave fiber and yarn, and hemp as defined in paragraph (l) (11) and specifically direct the time, manner, and quantities in which deliveries to processors shall be made or withheld.

(g) *End use information.* No person may sell or deliver any product controlled by this order to any person who he knows or has reason to believe will use the product in a manner which this order does not permit. He should satisfy himself as to this in some reasonable manner before delivering. He may, but need not, require a statement in writing showing the specific purpose or use for which the item is ordered.

(h) *Restrictions on the use of damaged material.* Any processor or dealer who has in his possession damaged or defective manila or agave fiber, yarn or cordage, or hemp as defined in paragraph (l) (11) may report by letter the extent of the damage and state to the War Production Board the percentage not suitable for the manufacture of products or for use permitted by this order. He may then upon receipt of acknowledgment, without objection from the War Production Board, use or dispose of any portion unsuitable for the manufacture of products permitted by this order, free from its restrictions.[1]

(i) [Deleted Sept. 27, 1945.]

(j) *Reports.* Processors of manila and agave fiber shall report monthly on Form WPB-2901, Parts 1, 2 and 3. Processors of jute and istle rope shall report their shipments monthly on Form WPB-2901, Part 3. Processors of hemp as defined in paragraph (l) (11) shall report monthly on Form WPB-914.

(k) *Imports.* The importation of manila and agave fibers, yarns and cordage shall be made in conformity with the provisions of General Imports Order M-63, as amended from time to time.

(l) *Definitions.* In this order:

NOTE: Subparagraphs (1), (2), (3), (4), (5), (6), (7), (8), (9), (10), and (11); formerly (2), (3), (7), (8), (9), (10), (11), (12), (13), (14), and (15), redesignated, Sept. 27, 1945. Former subparagraphs (1), (4), (5) and (6) deleted Sept. 27, 1945.

(1) "Manila" means fiber, spinnable over machinery which is commonly known in the trade by this term and also known as abaca or Manila hemp, wherever grown (either stripped or decorticated), but does not mean the fiber grades of T2 and T3, O or Y, or equivalent, as established by the Insular Government of the Philippine Islands, processor's mill waste or bagasse.

(2) "Agave" means fiber, spinnable over machinery of the species of agave sisalana, agave fourcroydes, and agave cantala, of all grades and qualities including tow and fiber under 20" in length, commonly known in the trade as sisal, henequen, cantala, and maguey, and sometimes preceded by an adjective designating the country or district of origin, but does not include processor's mill waste or bagasse.

[1] These reporting requirements have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(3) "Rope" means any rope or cable, treated or untreated, composed of three or more strands each strand composed of two or more yarns, but does not include strings and twines of whatever construction which are commonly used for tying, sewing, baling or other commercial packaging use.

(4) "Twine" means any single or plied yarn or roving, including marlin, for use as a tying material, for sewing or for any similar purpose, but does not include any product falling within the definitions of "rope", "binder twine" or "baler twine."

(5) "Binder twine" means a single yarn twine usually containing agave, but sometimes containing manila, istle, jute, coir, hemp, cotton or paper, suitable for use in a harvesting machine and of the type customarily heretofore manufactured. It is put up in balls of approximately five to eight pounds, packed six to ten to the bale. It measures five hundred feet to the pound with a plus or minus tolerance of five per cent, and contains a lubricant of at least ten per cent of the weight of the twine and an insect repellant. It is also known as binding twine.

(6) "Baler twine" means a single yarn usually made of agave fiber and used in a self-tying machine for baling hay, straw or other fodder crops.

(7) "Basic monthly poundage" of manila fiber with respect to any processor shall be the average number of pounds per month of manila cordage sold by such processor during the period January 1 through December 31, 1939. Where this order specifies a percentage of the basic monthly poundage to be processed, sold or delivered during any period, any processor keeping his books on a weekly basis shall apply the said percentage to the weekly periods most nearly approximating the period specified.

(8) "Basic monthly poundage" of agave fiber with respect to any processor for any month shall be the average number of pounds per month of both manila and agave cordage sold by such processor during the period from January 1, 1939, to December 31, 1941, minus 37 per cent of such person's manila fiber basic monthly poundage calculated as prescribed in paragraph (l) (11); *Provided*, That any processor keeping his books on a weekly basis may calculate his basic monthly poundage from the fifty-two week period of the 1939 calendar year and adjust any other calculations or quota under this order.

(9) "Processor" means any person (other than a United States Government agency) who spins, twists or otherwise uses any fiber or yarn in the manufacture of rope or twine, or who uses manila or agave fiber, or hemp as defined in paragraph (l) (11), in the manufacture of any other product.

(10) "Non-military" means general industrial, farm, oil-field and fishing uses. It also includes cores and centers for wire rope, regardless of their ultimate use. The term does not include purchases for direct or ultimate delivery to, or for incorporation into any material for direct or ultimate delivery to the United States Army, Navy, Maritime Commission or War Shipping Administration, or orders for commercial marine uses (including harbor or river tugs, ferries or barges, or stevedoring or inland waterway operation).

(11) "Hemp" means true hemp fiber, line or tow, of the species cannabis sativa, owned by or acquired from the stockpile held by the Commodity Credit Corporation.

(m) *Appeals.* Any appeal from the provisions of this order should be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

Schedules A and B—Cordage and Twine End Use

These lists specify the permitted end uses for which rope (Schedule A) and twine (Schedule B) may be manufactured from manila and agave. However, it does not restrict manufacture for and delivery to the Army, Navy, and Maritime Commission.

The left hand column lists the permitted end uses. Rope and twine for end uses not listed in the respective schedules may not be manufactured. The second column explains more fully the character of the end uses which are permitted. The word "yes" in the third column indicates that rope and twine for that use may be made of manila, and the word "yes" in the fourth column indicates that it may be made of agave. If, for any end-use, the word "yes" does not appear in a column, the use of the fiber to which that column applies is prohibited.

Fibers other than manila and agave may be used in the manufacture of rope and twine for any end use, whether included in Schedules A and B or not, subject to applicable provisions of any War Production Board order dealing specifically with such fibers.

For purchases of material for experimental use, see Appendix I, below.

Purchase requests for Butyl plant clean-up material shall be made on Form WPB–3682 in accordance with instructions accompanying the form. Butyl plant clean-up material must be specified on the form.

(b) *Preference ratings.* Natural rubber, natural rubber latex, butyl and chlorinated natural rubber may be sold and delivered without regard to any preference ratings. Any preference rating purporting to be applied or extended to orders for such materials shall be void and of no effect and must be disregarded.

DELIVERIES, INVENTORIES AND IMPORTATION

§ 4600.05 *Restrictions on deliveries of materials.* No person shall deliver any natural rubber, natural rubber latex, butyl or chlorinated natural rubber except as specifically authorized by the War Production Board or as permitted by regulations of the Office of Rubber Reserve. Delivery of these raw materials will be authorized only for uses permitted by Table A and for products specified in Table B both of Appendix I below; delivery of all other raw rubber materials shall be subject only to the inventory restrictions contained in § 4600.06, below; the poundage authorized will take into account the consumption capacity of the applicant and his reports of actual consumption received monthly on Form WPB–3410; in no event will the amounts authorized exceed the inventory restrictions specified in § 4600.06, below. Nothing contained in this section shall be deemed to prohibit:

(a) Delivery of natural rubber, natural rubber latex, butyl or chlorinated natural rubber from one location to another location controlled by the same person where no change of ownership takes place, or by any corporation to another corporation which is its subsidiary or of which it is a subsidiary.

(b) Delivery of reclaimed rubber or any type of synthetic rubber, except butyl. Transfers of these materials must, however, be reported as shipments or receipts on Form WPB–3410 for the calendar month in which the transactions occur.

(c) Any person from accepting delivery from another of natural rubber, natural rubber latex, butyl or chlorinated natural rubber, for the purpose of milling, washing, deresinating, drying, compounding, or conditioning the same, or for processing or manufacturing products therefrom, and thereafter returning the same or the products thereof to such other person.

§ 4600.06 *Restrictions on inventories of materials.* No person, other than the Office of Rubber Reserve, shall accept delivery of any of the following materials, if his inventory is or will by virtue of such acceptance become in excess of an amount reasonably necessary to meet his requirements for the period designated below:

	Days
Natural rubber, natural rubber latex or any type of synthetic rubber, including chlorinated synthetic rubber	60
Reclaimed rubber	45
Chlorinated natural rubber	30

Excess inventories shall be subject to redistribution by voluntary action, or if necessary, through requisitioning by the War Production Board. If a holder has an excess inventory, he may ask for the assistance of the Rubber Bureau, War Production Board, in its disposal.

A person engaged in the business of reclaiming rubber or manufacturing aqueous dispersions of reclaimed rubber may, however, maintain such inventories of scrap, and of reclaimed rubber of his own manufactured grades, as he deems advisable. A person other than the Office of Rubber Reserve engaged in the manufacture of chlorinated rubbers and synthetic rubbers may maintain such inventories of synthetic rubber of his own manufactured types as he may deem advisable. These exceptions may be made notwithstanding the provisions of this § 4600.06 or of Priorities Regulation No. 32, as amended.

§ 4600.07 *Restrictions on importation of materials.* No person shall import any natural rubber, natural rubber latex, or any finished or semi-finished product of which 10% or more by weight is composed of natural rubber or natural rubber latex, except as permitted under this section.

For the purposes of this section, "import" means to transport in any manner into the continental United States from any foreign country or from any territory or possession of the United States (including the Philippine Islands). It includes shipments into a free port, free zone, or bonded custody of the United States Bureau of Customs (bonded warehouse) in the continental United States and shipments in bond into the continental United States for trans-shipment to Canada, Mexico, or any other foreign country.

The restrictions of this section shall not apply to any of the following:

(a) Any importation by the Office of Rubber Reserve or Rubber Development Corporation, or any agent acting for either of them.

(b) The importation by any person during any calendar month of products or materials (except tires, tire casings and tire tubes) which contain an aggregate of not more than twenty-five pounds of natural rubber or natural rubber latex provided such products or materials are not imported for the purpose of manufacturing, processing, sale or resale.

(c) The importation by any person of tires and tubes for the personal use of such person, provided such importation (except of bicycle tires and tubes) is expressly authorized by the Office of Price Administration.

(d) The importation for testing purposes of camelback, or of tires or tubes or sections thereof by any manufacturer of camelback, tires or tubes.

(e) The importation of bicycle tires and tubes originally manufactured in the continental United States, Canada or the British Isles.

(f) The importation of tires for recapping, retreading or repair, provided the tires are thereafter exported to the owners in the foreign country from which the products were imported.

(g) The importation of any scrap rubber.

(h) The importation of any finished products made of natural rubber or natural rubber latex by diplomatic representatives of any foreign government for their personal use or the use of members of their staffs.

(i) The importation of any finished product made of natural rubber or natural rubber latex by commercial representatives of any foreign government for use in their official business.

(j) The importation from the Dominion of Canada by any person of natural rubber, natural rubber latex, butyl or chlorinated natural rubber or any products thereof manufactured in the continental United States, Canada or the British Isles.

(k) The importation by the United States Army or Navy of any finished product made of natural rubber, natural rubber latex, butyl or chlorinated natural rubber.

§ 4600.08 *Acquisition of tires and tubes for original equipment.* In order to obtain tires and tubes for original equipment, a vehicle manufacturer must certify his purchase order in substantially the following form signed by an authorized official:

The undersigned hereby certifies, subject to the criminal penalties for misrepresentation contained in Section 35 A of the United States Criminal Code, that the tires and tubes listed on the attached purchase order are required by him for mounting on original equipment and that the deliveries specified will not result at any time in an inventory greater than required for his scheduled production in the ensuing 15 days.

Use of the above certification constitutes a representation that the deliveries scheduled will not result in the acquisition of more tires and tubes (including inventory) than are required for the particular manufacturer's production of vehicles or equipment during the 15-day period following each scheduled delivery. In the event of a decrease in the number of products actually required, the manufacturer shall notify his supplier of the reduction, and the scheduled deliveries shall be revised accordingly.

§ 4600.09 *Acquisition of tires and tubes for replacement purposes.* (a) No person shall deliver or accept delivery of any passenger, motorcycle, truck or bus pneumatic tires for replacement on any passenger automobile, motorcycle, truck or bus except in accordance with Office of Price Administration Ration Order 1–A or any subsequent ration order of the Office of Price Administration; however,

APPENDIX I—GENERAL PERMITTED USES OF RAW MATERIALS AND PERMITTED PRODUCTS

Appendix I to Rubber Order R–1 establishes general permitted uses for natural rubber, natural rubber latex, chlorinated natural rubber and butyl, and also lists the products which are permitted to be made from these raw materials.

Table A below lists the general permitted uses for each of these materials and the monthly consumption, if any, permitted for experimental use without prior authorization.

Table B below deals with specific products in which the use of these raw materials is permitted under the general provisions of Table A. It refers, for certain products, to the applicable manufacturing regulations set out in Appendix II to the Rubber Order (printed separately), specifies the percentage of natural rubber, if any, which may be used in the product, as well as the product for which "Tube Butyl" or "Non-Tube Butyl" may be used, and finally, for many of the products on the table special regulations or provisions are provided.

TABLE A—GENERAL PERMITTED USES OF MATERIALS

Type of material	General permitted uses subject to applicable end product restrictions	Monthly consumption for experimental use without specific authorization [1]
Natural rubber or natural rubber latex.	In the manufacture of products listed in Table B below for which natural rubber or natural rubber latex is specifically permitted, subject to any applicable manufacturing regulations or restrictions, but only as authorized on Form WPB-3662.	25 lbs.
Butyl (GR I, dispersions).	In the manufacture of products listed in Table B below for which butyl is specifically permitted, subject to any applicable manufacturing regulations or restrictions, but only as authorized on Form WPB-3662.	200 lbs., dispersions 250 lbs.
Chlorinated natural rubber.	As specifically authorized on Form WPB-3662.	None.

[1] Experimentation need not be confined to permitted uses, but none of the products produced or resulting from experimentation may be sold. Materials in the amounts indicated may be diverted from inventory or from purchase for manufacturing operations. If manufacturer does not have inventory of natural rubber or natural rubber latex, application for permission to purchase should be made on Form WPB-3682. To purchase butyl rubbers, make applications to Sales Division, Office of Rubber Reserve, Reconstruction Finance Corp., Washington 25, D. C.

For permission to consume materials for experimental use, in excess of the amounts authorized, file Form WPB-2242, in accordance with § 4600.14 of this order.

TABLE B—PERMITTED PRODUCTS

For general permitted uses of material in the manufacture of products, see Table A above. In applying on Form WPB-3662 for those types of material which are subject to prior authorization, use this appendix in accordance with the instructions accompanying the form. The applicant's natural rubber, natural rubber latex, or butyl requirements for each code number listed below, must show the specific quantity of material requested for each subdivision of the code.

Form WPB-3662 should not be used in applying for permission to consume any material for a purpose which is not permitted by Appendix I.

Monthly consumption of natural rubber, natural rubber latex or butyl, will be permitted on the basis of uses shown in this appendix, but only to the extent that material and manufacturing facilities are available after requirements for Army, Navy, Maritime Commission and other essential orders have been fulfilled.

Explanation of Table B Columns and Symbols—

The column headed "Appendix II" refers to applicable regulations in Appendix II to R-1, (printed separately) by the list number under which it will be found. The second column shows to what extent natural rubber and/or natural rubber latex authorized on Form WPB-3662 may be used in the manufacture of particular products. The third column shows to what extent Tube Butyl or Non-Tube Butyl authorized on Form WPB-3662 may be used in the manufacture of particular products.

The natural rubber and butyl columns are blank when applicable regulations in Appendix II or special restrictions in the last column limit the use of these materials.

"O" indicates that the use of the material is prohibited, subject to any special restrictions or provisions applicable to the particular product.

"X" indicates that the material may be consumed in the minimum quantities required by a manufacturer who has received authorization to consume on Form WPB-3662, subject to any special restrictions or provisions applicable to the particular product.

Percentage figures indicate maximum percent of total volume of compound, unless otherwise specified.

(j) *Textile loom shuttles made of dogwood and persimmon wood—(1) Increase in maximum prices.* Notwithstanding any other provisions of this regulation, the maximum price calculated under this regulation, apart from this subparagraph, for any textile loom shuttles made of dogwood and persimmon wood, shall be increased by the amount provided in whichever of the following subdivisions (i) to (iii) is applicable:

(i) *Manufacturers of finished shuttles who buy shuttle blocks.* The amount to be added by any manufacturer who buys the dogwood and persimmon wood shuttle blocks from which he manufactures finished shuttles shall be the combined dollar-and-cents amount of the increase in the maximum price for the shuttle blocks going into the production of finished shuttles made of dogwood and persimmon wood being priced, which became effective August 11, 1945, in accordance with the provisions of Amendment 12 to the Second Revised Supplementary Regulation 14 (sec. 3.2) to the General Maximum Price Regulation. The increases shall be the amounts by which Amendment 12 to Second Revised Supplementary Regulation 14 (sec. 3.2) to the General Maximum Price Regulation increased the maximum price of dogwood and persimmon wood shuttle blocks sold or delivered by the manufacturer's supplier to the manufacturer, including any increase due to delivery charges that the supplier is permitted to make.

(ii) *Manufacturers who make their own shuttle blocks.* The amount to be added by any manufacturer who makes the dogwood or persimmon wood shuttle blocks from which he manufactures finished shuttles, shall be the amount in line with the amounts to be added under (i) by comparable manufacturers who buy dogwood and persimmon wood shuttle blocks, specifically authorized in writing by the Office of Price Administration. The manufacturer shall write to the Office of Price Administration, Washington 25, D. C., for such authorization.

(iii) *Resellers.* The amount to be added by a reseller shall be the dollar-and-cents amount by which the maximum price of his supplier has been increased by this subparagraph on sales and deliveries to the reseller. If the reseller's supplier has notified him of the amount of that increase in accordance with the next subparagraph (2), and if the reseller has no reason to doubt the validity of the notification, the amount of which the seller has been so notified shall be deemed to be the proper amount to be added under this subdivision (iii).

(2) *Notification by sellers who sell to purchasers for resale.* Every seller of finished shuttles made of dogwood and persimmon wood shuttle blocks which are covered by this subparagraph, who sells such items to purchasers for the purpose of resale, shall notify every such purchaser in writing of the amount by which the seller's maximum price to the purchaser has been increased on each such item calculated according to the appropriate provision in subdivision (1).

(3) *Reports; price lists and discount sheets.* Within sixty days after September 26, 1945, every manufacturer or seller of finished shuttles made of dogwood or persimmon wood, who is affected by this amendment, as provided in subdivisions (i) to (iii) above, shall file with the Machinery Branch, Office of Price Administration, Washington 25, D. C., his maximum prices and discounts for all sizes of shuttles manufactured or sold by him that were in effect just prior to September 26, 1945. PART 1418—TERRITORIES AND POSSESSIONS

[RMPR 873,[1] Amdt. 32]

GARMENTS IN HAWAII

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Maximum Price Regulation 373 is amended in the following respects:

1. A new section is added to read as follows:

SEC. 71. *Maximum prices for certain garments produced with War Production Board priorities assistance, either imported from the mainland or manufactured in the Territory of Hawaii*—(a) *Scope of the section*—(1) *What garments are covered.* This section applies only to the specified garments listed in the following War Production Board Orders, and made from fabrics obtained under those orders:

(i) Order M–385, Supplement II (Schedule I), issued July 27, 1944.

(ii) Order M–328B, Supplement VIII (Schedule A), as amended, issued October 31, 1944.

(iii) Order M–385, Supplement II (Schedule I), as amended, issued February 9, 1945.

(iv) Order M–385, Supplement III (Schedule II), issued February 9, 1945.

(v) Order M–328B, Supplement XI (Schedule A), issued April 10, 1945.

(vi) Order M–388A (Preference Rating Schedules I and II), as amended, issued April 14, 1945, (except girdles and corsets, foundation garments, men's summer seersucker and woven cord suits, religious vestments and clothing, burial clothing and shrouds).

(vii) Order M–328B (Schedule C), issued July 3, 1945.

(viii) Order M–328B (Schedule D), issued July 6, 1945.

As used in the regulation, the word "garment" means any commodity (except those specified in (vi) above) made from fabrics obtained under any of the War Production Board Orders listed above.

(2) *Types of sales covered.* This section applies to all sales including sales at retail, sales at wholesale, sales by manufacturers and sales by manufacturing-retailers.

(b) *Maximum prices for sales by a local manufacturer or manufacturing-retailer*—(1) Local manufacturers or manufacturing-retailers shall calculate their maximum prices in the following manner. Choose the lower of the following prices:

(i) The over-riding ceiling allowed by the applicable War Production Board Order under which the garment is being made, or

(ii) The ceiling price which you have under Section 48 of this regulation or the General Maximum Price Regulation for Hawaii.

(2) Add the following amounts to the price calculated under subparagraph (1) or (ii) above.

(i) *Export premiums.* If an export premium is charged on the yardage used in making the garment, which has been purchased from a mainland manufacturer or converter, the seller may add the amount of such premium not to exceed 7% of the cost of the yardage provided that such export premium is shown separately on the supplier's invoice.

[1] 10 F.R. 48, 521, 857, 293, 294.

[2] 10 F.R. 6646, 7407, 7794, 7799, 8020, 8069, 8371, 8979, 9273, 9274, 9275, 9466, 9540, 9620, 9618, 9882, 9928, 10085, 10086, 10086, 10125 10086, 10125, 10086, 10229, 10437.

(ii) *Pre-tagging charge.* Two cents per garment may be added to cover the cost of pre-tagging the garment with the maximum retail price. If a garment consists of more than one item, such as a two-piece dress, the pre-tagging charge of two cents for the complete garment may not be exceeded, as only one tag per garment is required.

The resulting price will be the maximum price for sales by a local manufacturer. A manufacturing-retailer will compute his manufacturer's price in the same manner and, inasmuch as he sells to the ultimate consumer, he may add the retail mark-up allowed in paragraph (d) below.

(3) *Pre-tagging of Garments produced under WPB Order M–388A and M–385.* Each manufacturer and manufacturing-retailer must pre-tag each cotton garment produced under War Production Board Orders M–388A and M–385 with the maximum retail price which is determined in the following manner:

(i) Find the net ceiling price per dozen (after deduction all available discounts) in table II or table III, Column 1 of Revised Maximum Price Regulation 578 headed "Supplier's Price Per Dozen" (a mainland regulation), which tables are hereby adopted by reference as an integral part of this section.

(ii) Find the corresponding "retail ceiling price per garment" appearing in Table II or Table III, Column 2 of that regulation.

(iii) Set forth the appropriate retail ceiling price on a tag which must be affixed to each garment.

Example: You are manufacturing boys' shorts of carded broadcloth. You turn to War Production Board Order M–388A or M–385 and find the ceiling price on these garments is $10.50 a dozen.

You use 10 yards for a dozen shorts, at $0.20 per yard, or a total yardage cost of $2.00. Your supplier's invoice shows that a 7% export premium has been taken. You take 7% of $2.00 or $0.14 and add it to $10.50, resulting in a total yardage cost of $10.64.

You turn to subparagraph (b) (2) (ii) and find that the allowable cost of pre-tagging with the retail price is 2¢. You add 24¢ to $10.64, resulting in a maximum manufacturer's price of $10.88.

You then turn to Table II, Column 1 of Revised Maximum Price Regulation 578 and find that your price of $10.88 a dozen shows a corresponding retail price of $1.35 each. You, therefore, pre-tag the garment with a retail price of $1.35, as follows:

WPB—M–388A
Style or Lot No. 903
OPA Retail Ceiling Price—$1.35

(4) *Pre-tagging of garments produced under other WPB orders.* (i) Determine the manufacturer's ceiling price under paragraph (b) above.

(ii) Find the net manufacturer's ceiling price (after deducting all available discounts).

(iii) To obtain the retail ceiling price multiply the net manufacturer's ceiling price by 1.68.

(iv) Set forth the resultant retail ceiling price on a tag which must be affixed to each garment.

(c) *Maximum prices for sales at wholesale.* (1) Maximum prices for sales at wholesale of mainland manufactured articles produced under War Production Board orders pre-tagged with retail ceilings shall be computed in the following manner. First find the manufacturer's ceiling price as shown in the invoice in Table I Column 1. Then find the applicable wholesale ceiling price in Column 2. Then add the applicable import allowance set forth in Table II of this section. The resulting price will be the maximum wholesale price.

Example: If the manufacturer's ceiling price as shown in the invoice is $16.73 per dozen the wholesale ceiling in Table I is $20.62½. In Table II on a manufacturer's ceiling price of $16.73 the import allowance is $0.60 per dozen at wholesale or $0.05 per garment at retail.

(2) For garments which are produced under War Production Board orders which are not required to be pre-tagged, the wholesaler uses the markups permitted in the applicable section of Revised Maximum Price Regulation 373 to the manufacturer's ceiling price as shown in the invoice.

(d) *Maximum prices for sales at retail—*(1) *Garments imported from the mainland.* (i) For garments produced under War Production Board Orders M–388A and M–385 the maximum price for sales at retail shall be the pre-tagged price affixed to the garment by the manufacturer, plus the applicable import allowance set forth in Table II of this section.

Example: (1) A cotton dress comes to the retailer direct from the mainland manufacturer. It has a tag attached showing the ceiling price of $2.10. The invoice shows that the manufacturer's ceiling price per dozen was $15.87½ per dozen. Turning to Table II we find in Column 1 that $15.87½ falls in the fourth group. The import allowance for this group is $0.04 per garment. Make this addition to your tagged price in the following manner or in some similar manner.

Tag OPA Retail Ceiling Price	$2.10
Import Allowance	.04
	$2.14

(2) The same cotton dress comes to the retailer through a local wholesaler. It has a tag attached showing the retail ceiling price of $2.10. The wholesaler's ceiling is shown to be $15.87½ per dozen plus $0.48 per dozen for import allowance. $0.48 a dozen is equal to $0.04 per garment. Therefore, $0.04 can be added to the tagged price exactly as shown in the previous example.

(ii) For garments under other War Production Board orders the maximum price for sales at retail shall be the price arrived at by the use of the applicable section of Revised Maximum Price Regulation 373.

Example: (1) The retailer purchases rayon budget dresses produced under War Production Board orders direct from the manufacturer. Under the provisions of Section 48 of Revised Maximum Price Regulation 373 (Apparel) his maximum price is the manufacturer's selling price less all discounts and allowances except discounts for prompt payment up to 8% multiplied by 1.75.

(2) The retailer purchases the same garment from a local wholesaler who has purchased from a mainland manufacturer. TABLE I—MAXIMUM PRICES FOR SALES AT WHOLESALE

This table sets forth, under Column 2, the mainland dollars and cents maximum prices for sales at wholesale of mainland manufactured garments. This table shows the net ceiling price per dozen for a mainland sale at wholesale, which corresponds to the manufacturer's net ceiling price (after deduction of all available discounts) for the garments free on board manufacturer's place of business. When the local wholesaler has found the mainland manufacturer's net ceiling price (after deduction of all available discounts) set forth under Column 1, the corresponding figure set forth under Column 2, plus the allowable additions found in Table II, Column 2, is the maximum price for sales at wholesale.

PART 1439—UNPROCESSED AGRICULTURAL COMMODITIES

[MPR 426, Amdt. 142]

FRESH FRUITS AND VEGETABLES FOR TABLE USE, SALES EXCEPT AT RETAIL

A statement of the considerations involved in the issuance of this amendment has been issued and filed with the Division of the Federal Register.

Appendix J is amended in the following respects:

1. In paragraph (b), subparagraph (1) is amended to read as follows:

(1) "Standard containers" means (i) a western pear box (WPB L–232 No. 54) with flexible top and bottom, tier-packed fairly tight or tighter with graded and individually wrapped pears, (ii) two half pear boxes (WPB L–232 No. 55), tier-packed fairly tight or tighter with graded pears, (iii) a one-way pear lug (WPB L–232 No. 56), tier-packed fairly tight or tighter with graded pears and (iv) any other container listed in Column 2 of a table in paragraph (d) that is closed with a net weight within the weight range specified for that container.

2. In paragraph (b), subparagraph (5) is added to read as follows:

(5) "Fairly tight", in the case of a western pear box, means that the pears are packed tight enough to prevent injury from movement within the package under ordinary handling conditions and that the container shows at least 1½ inch bulge at top and bottom combined. In the case of a half pear-box or a one-way lug "fairly tight" means that the package is sufficiently filled to prevent any appreciable movement of the pears and that the pears are in contact with the lid or cover. Also, a container is considered "fairly tight" if a government inspection certificate so describes it.

3. Paragraph (c) is amended to read as follows:

(c) *Marking requirements and price calculations*—(1) *Standard pear boxes, half pear-boxes and one-way lugs.* A person who packs pears in a standard container for which no weight range is specified and a person who ships such a container of pears that have been in storage shall mark the container before shipment to show his name and address.

(2) *Other containers.* This subparagraph applies to all standard containers (including Washington pear lugs) for which a weight range is specified in Column 2 of the applicable table in paragraph (d) and to all non-standard containers. A person who sells such a standard container upon which the minimum net weight has not been marked must mark on it as its "minimum net weight" a weight that may be lower but in no case higher than its actual net weight at the time of shipment from shipping point. A person who sells a closed, nonstandard container upon which the actual net weight has not been marked must mark on the container its actual net weight at the time of shipment from shipping point. Subsequent sellers may rely on the container markings in figuring their maximum prices. A person who sells an open container must determine its actual net weight at the time of his sale in order to figure his maximum price.

(3) *General weighing and marking requirements.* All weighing and marking shall be done according to the weighing and marking requirements of the applicable State agricultural code. Section 14a (a) does not apply to this appendix.

LOAD LINES FOR VESSELS ENGAGED IN FOREIGN, COASTWISE, OR GREAT LAKES TRADE; CANCELLATION AND MODIFICATION OF WAIVERS

The Commandant, United States Coast Guard, having by various orders issued pursuant to the authority of the order of the Acting Secretary of the Navy, dated October 1, 1942 (7 F.R. 7979), as amended by an order of the Secretary of the Navy, dated June 5, 1945 (10 F.R. 6848), found it necessary in the conduct of the war to invoke waivers of compliance with the navigation and vessel inspection laws and regulations governing load lines administered by the Coast Guard to the extent and in the manner and upon the terms and conditions set forth in the various orders, and finding that the necessity for such waivers has lapsed:

It is ordered, That all the general or specific waivers regarding load lines (whether classified or unclassified for security reasons) issued by the Commandant or Acting Commandant, United States Coast Guard, and specific waivers (whether classified or unclassified for security reasons) issued by District Coast Guard Officers, or their designated representatives, or by designated representatives of the Commandant, as the case may be, are hereby revoked or modified upon the conditions and terms set forth in the following numbered paragraphs, to be effective upon the date of publication of this order in the FEDERAL REGISTER:

1. All vessels operating under valid waivers shall be permitted to complete the particular voyage on which they have already entered and vessels operating under specific waivers for a definite period of time or for a time which may be definitely computed may operate until such expiration date. It shall be the responsibility of the vessels to be in compliance with the applicable laws and regulations on or before the expiration date of their respective waivers. Vessels meeting the conditions above outlined will not incur any penalties.

2. The order of the Commandant, dated July 1, 1943 (8 F.R. 9164), as amended by the orders dated January 12, 1945, and July 3, 1945 (10 F.R. 582, 8243), is hereby modified to the extent that no waiver regarding load lines shall be granted.

Chapter III—War Shipping Administration

[G. O. 53]

PART 304—LABOR

QUALIFICATIONS FOR STEWARD'S DEPARTMENT

The War Shipping Administration now owns or charters substantially all oceangoing vessels of the United States, and operates such vessels through Agents or General Agents appointed by the Administrator.

The War Manpower Commission, by Directive No. XVIII, dated February 10, 1943, has authorized and directed the War Shipping Administration to cooperate with the War Manpower Commission in the recruitment of men most qualified by experience and training for service at sea and to promote the most effective mobilization and utilization of sea manpower resources in the prosecution of the war.

Proper feeding of crews and of military and naval personnel aboard ship is essential to the prosecution of the war including orderly transition to peacetime economy. This requires skill in the care and preparation of the foods furnished to the vessels. The extraordinary wartime expansion of the steward's department makes necessary the following regulations to assure such skill and to achieve the objectives of Executive Order 9054, as amended, and Directive XVIII of the War Manpower Commission.

Sec.

304.101	Persons included.
304.102	Examinations.
304.103	Training.
304.104	Competence Cards.
304.105	Issuance of manuals.
304.106	Application for training before end of shipping out time.

AUTHORITY: §§ 304.101 to 304.106, inclusive, issued under E.O. 9054, as amended by E.O. 9244, 3 CFR Cum. Supp. and Directive XVIII of the War Manpower Commission.

§ 304.101 *Persons included.* Sections 304.101 to 304.106, inclusive, cover all steward's department personnel who will be employed on vessels owned by or bareboat chartered to the War Shipping Administration, and who hold certificates of service in the rating of second cook and baker or higher, which certificates have been issued by the U. S. Dept. of Commerce, Bureau of Marine Inspection and Navigation, the United States Coast Guard, or any agencies exercising the functions thereof.

§ 304.102 *Examinations.* All persons referred to in § 304.101 will be given an opportunity to take examinations to prove that they are competent to meet the standards set forth in § 304.104 (a), and to indicate what training, if any, they need to meet such standards, and whether they are qualified to receive such training.

Appropriate notice will be given as to the location of examination centers and the starting date for examinations at each center.

§ 304.103 *Training.* Whenever an examination, as prescribed in § 304.102, indicates that specialized training is necessary and that the person examined is qualified to benefit by it he will be given an opportunity to secure such training at the expense of the War Shipping Administration as soon as manning requirements permit. Training courses will be established so that a person failing an examination in one phase of the standards set forth in § 304.104 (a) but passing the examination for all other duties described in such standards, will be able to take training only for those duties in which such person is not competent.

§ 304.104 *Competence Cards*—(a) *Standards of competence.* For the purpose of the issuance of Competence Cards as outlined in paragraph (b) of this section, and as standards of competence to be proved by examinations as outlined in § 304.102, the following standards shall apply:

A second cook and baker shall be able to cook dishes of major importance and must have a knowledge of meat cutting. He must have a thorough knowledge of baking and must be able to produce bread, rolls, biscuits, cookies, puddings, pies, and other pastry items. He must also have a thorough knowledge of preparing other desserts besides baked items.

A chief baker must have a thorough knowledge of all types of baking, including the production of bread, rolls, biscuits, cookies, puddings, pies, crullers, and other pastry items.

A chief butcher must have a thorough knowledge of all types of meat cutting, including the cutting of beef, veal, lamb, pork, poultry, and fish.

A chief cook shall be able to cook and bake and cut meat. He must have a thorough knowledge of cooking and baking and be able to prepare all types of dishes. He must also be able to show skill in the cutting of beef, veal, lamb, pork, poultry, and fish.

A storekeeper must be familiar with the proper stowage and keeping of food, refrigeration of food, and control and issuing of food from the storerooms.

A chief steward must be familiar with all the duties of the rest of the steward's department personnel, and must have a thorough and detailed knowledge of the grades of food, procedures for the receiving of food, the stowage of food, refrigeration, planning of menus, issue of food, keeping of food control records, and management of the mess. He must also have a thorough knowledge of cooking, baking and meat cutting, and safety rules in the galley, as well as sanitation requirements for all phases of steward's department work.

(b) *Issuance.* To those who successfully complete training and those whose examination indicates that training is unnecessary, the War Shipping Administration will issue a Competence Card which will indicate the place of examination, the place of training, if any, and which will state that the holder of such card has demonstrated ability to meet the standard for his rating as outlined in paragraph (a) of this section.

(c) *Prerequisite for employment.* On and after January 1, 1946, or at such earlier date, to be announced by appropriate notice, as the development of the examination and training program may permit, no person referred to in § 304.101 will be employed on any vessel owned by or bareboat chartered to the War Shipping Administration unless such person holds a Competence Card, or unless such person has taken an examination and is qualified to receive training but has not been given an opportunity to receive such training because of manning conditions. Persons who take an examination and are qualified to receive training but are not given an opportunity to receive such training because of manning conditions, will be given a statement from the War Shipping Administration representative in charge of the examination center, to the effect that the examination has been completed, and that although training is required, it is not possible for the person to take training at the time of completion of the examination or shortly thereafter. This statement will be surrendered by the person receiving same when he signs on a vessel.

(d) *Waivers.* In emergency cases when it may not be possible for a person to be examined, waivers may be issued in accordance with the usual procedures.

(e) *Revocation of Competence Cards.* The Administrator of the War Shipping Administration shall designate persons within the War Shipping Administration to form informal hearing boards in ma-

jor ports. Any person holding a Competence Card issued under paragraph (b) of this section, and who does not perform his duties satisfactorily and in accordance with the standards set forth in paragraph (a) of this section, may have his Competence Card revoked or suspended by said hearing boards. The jurisdiction of said hearing boards shall be limited to those cases where it is alleged that a person does not perform his duties in accordance with the standards set forth in paragraph (a) of this section. Before any informal hearing board takes any action in revoking or suspending a person's Competence Card, due written notice shall be given to such person and such person may appear before the board and may be represented by counsel or otherwise if he so desires.

Any person affected by a decision of the informal hearing board may appeal such decision to an appeals board. The appeals board shall be designated by the Administrator of the War Shipping Administration and shall be composed of a chairman from the commercial food industry, a representative from the steamship industry, and a representative from the maritime labor union with which the person against whom charges have been brought is affiliated, and if said person has no union affiliation, he may designate the third member of the appeals board.

§ 304.105 *Issuance of manuals*—(a) *Applicable manuals to be furnished without charge.* To supplement the examination and training program, applicable manuals covering the following subjects will be furnished without charge to all persons referred to in § 304.101:

(1) How to stow and take care of food on shipboard.

(2) How to keep food records on shipboard.

(3) Cooking, baking and meat cutting on shipboard.

(4) Such other manuals as are found to be necessary.

All persons receiving these manuals will be required to sign a receipt for delivery.

(b) *Purchase of manuals after initial issuance.* Any person referred to in § 304.101 who has received any manual without charge pursuant to paragraph (a) of this section can purchase additional copies at cost from the War Shipping Administration.

§ 304.106 *Application for training before end of shipping out time.* If any person referred to in § 304.101 has more than two weeks shore time accumulated because of time spent at sea, such person will not be permitted to take any training required after examination after two weeks of said shore time has elapsed, unless permission is received from the War Shipping Administration representative attached to the examination center where such person takes the examination described in § 304.102.

TEXTILE INDUSTRY

NOTICE OF HEARING WITH RESPECT TO DETERMINATION OF PREVAILING MINIMUM WAGE

Whereas, the Acting Secretary of Labor, in the amended prevailing minimum wage determination for the textile industry now in effect, issued on May 25, 1942 pursuant to the provisions of section 1 (b) of the Walsh-Healey Public Contracts Act (49 Stat. 2036, 41 U.S.C. Supp. III, sec. 35), determined that the prevailing minimum wage for persons employed in the performance of contracts with agencies of the United States Government subject to the provisions of that act for the manufacture or furnishing of the products of the textile industry is 40 cents an hour or $16 for a week of 40 hours, arrived at on a time or piece work basis; and

Whereas, the textile industry is defined in the aforesaid determination as follows:

(a) The manufacturing or processing of yarn or thread and all processes preparatory thereto, and the manufacturing, bleaching, dyeing, printing and other finishing of woven fabrics (other than carpets and rugs containing any wool) from cotton, flax, jute, other vegetable fiber, silk, grass, or any synthetic fiber, or from mixtures of these fibers or from such mixtures of these fibers with wool or animal fiber (other than silk) as are specified in clauses (g) and (h); except the chemical manufacturing of synthetic fiber and such related processing of yarn as is conducted in establishments manufacturing synthetic fiber;

(b) The manufacturing of batting, wadding, or filling and the processing of waste from the fibers enumerated in clause (a);

(c) The manufacturing, bleaching, dyeing, or other finishing of pile fabrics or cords (except carpets and rugs containing any wool) from any fiber or yarn;

(d) The processing of any textile fabric included in this definition of this industry into any of the following products: bags; bandages and surgical gauze; bath mats and related articles; bedspreads; blankets; diapers; dish-clothes; scrubbing cloths and wash-cloths; sheets and pillow cases; tablecloths, lunch-cloths and napkins; towels; window curtains; shoe laces and similar laces;

(e) The manufacturing or finishing of braid, net or lace from any fiber or yarn;

(f) The manufacturing of cordage, rope or twine from any fiber or yarn including the manufacturing of paper yarn and twine;

(g) The manufacturing, or processing of yarn (except carpet yarn containing any carpet wool) or thread by systems other than the woolen system from mixtures of wool or animal fiber (other than silk) with any of the fibers designated in clause (a), containing not more than 45 percent by weight of wool or animal fiber (other than silk);

(h) The manufacturing, bleaching, dyeing, printing or other finishing of woven fabrics (other than carpets and rugs) from mixtures of wool or animal fiber (other than silk) containing not more than 25 percent by weight of wool or animal fiber (other than silk), with any of the fibers designated in clause (a), with a margin of tolerance of 2 percent to meet the exigencies of manufacture;

(i) The manufacturing, dyeing, finishing or processing of rugs or carpets from grass, paper, or from any yarn or fiber except yarn containing any wool but not including the manufacturing by hand of such products; and

Whereas, there has been presented to the Department of Labor evidence tending to show that the prevailing minimum wage for persons now employed in the industry has ceased to be 40 cents an hour, as heretofore found by the Secretary, and is now at least 55 cents an hour or $22 for a week of 40 hours, arrived at on a time or piece work basis; and

Whereas, the aforesaid determination provided that learners, handicapped workers and apprentices may be employed and deductions from the wages of employees may be made in accordance with the applicable regulations issued under the Fair Labor Standards Act; and

Whereas, the learner regulations issued under the Fair Labor Standards Act applicable to the employment of learners in the Textile Industry (Code of Federal Regulations, Part 522—§§ 522.-140 to 522.159, published in the FEDERAL REGISTER May 16, 1941, 6 F.R. 2446), as amended on March 22, 1943 by Administrative Order No. 181 (published in the FEDERAL REGISTER on March 13, 1943, 8 F.R. 3079), permit the issuance, to employers who make application therefor, of special certificates authorizing the employment of learners at subminimum rates in the occupations of machine operator, machine tender, or machine fixer, and jobs immediatel; incidental thereto, upon certain terms and conditions affecting the number of learners, the length of the learning period, and the duration of such special certificates, provided that it is satisfactorily shown that:

(a) Experienced labor is not available in the locality from which the employer customarily draws his labor supply;

(b) Learners are available for employment at the established subminimum learner wage rate;

(c) The issuance of a certificate will not tend to impair working or wage standards established for experienced workers in the industry;

(d) The issuance of such certificates will not create unfair competitive labor cost advantages;

(e) The number of learners applied for will not tend to impair the statutory minimum wage rate in such plant;

(f) The applicant's piece work or hourly wage rates yield average earnings to experienced workers substantially above the minimum wage rate; and

Whereas, the said learner regulations, as amended, further provide that the subminimum wage rate which may be provided in special learner certificates shall be not less than 35 cents an hour; and

Whereas, there has been presented to the Department of Labor evidence tending to show that learners in the industry are now, in general, employed at rates not less than 50 cents an hour.

Now, therefore, notice is hereby given that a public hearing will be held on October 17, 1945, at 10:00 a. m. in Room 1410, 165 West 46th Street, New York, New York, before the Administrator of the Wage and Hour and Public Contracts Divisions or a representative designated to preside in his place, at which hearing all interested persons may appear and show cause, if any they have, why the Secretary of Labor should not amend the wage determination for the textile industry, pursuant to the provisions of section 1 (b) of the Walsh-Healey Public Contracts Act, in any or all of the following respects: (1) By finding that the prevailing minimum wage for persons employed in the Industry is now 55 cents an hour or $22 for a week of 40 hours, arrived at on a time or piece work basis; (2) by replacing the present provision for employment of learners with a provision permitting bona fide learners to be employed for a learning period of not to exceed 240 hours at subminimum rates not less than 50 cents an hour; and (3) by providing further that the employment of any such learners shall be, in all other respects, in accordance with the applicable regulations issued under the Fair Labor Standards Act and subject to the issuance of learner certificates as provided in such regulations.

Any interested person may appear at the hearing to offer evidence relevant to the proposed amendment, provided that not later than October 10, 1945, such person shall file with the Administrator of the Wage and Hour and Public Contracts Divisions, United States Department of Labor, 165 West 46th Street, New York 19, N. Y., a notice of intention to appear containing the following information:

1. The name and address of the person appearing.

2. If he is appearing in a representative capacity, the names and addresses of the persons or organizations which he is representing.

3. The purpose for which he is appearing.

Such notice may be mailed to the Administrator and shall be considered filed upon receipt.

Written statements in lieu of personal appearance may be mailed to the Administrator at any time prior to the date of hearing or may be filed with the presiding officer at the hearing. An original and four copies of any such statements should be filed.

A summary report containing wage and other statistical data on the textile industry will be available for distribution on or before the date of the hearing. Copies of this report may be obtained by any person upon request addressed to the Administrator.

FEDERAL POWER COMMISSION.

[Docket No. G-662]

SAM L. MILLER

NOTICE OF APPLICATION

SEPTEMBER 24, 1945.

Notice is hereby given that on September 12, 1945, Sam L. Miller (Applicant) residing in the city of McAllen, Hidalgo County, Texas, filed with the Federal Power Commission an application pursuant to section 3 of the Natural Gas Act, to authorize the exportation of natural gas from the State of Texas to the Republic of Mexico, where such gas will be delivered to Cia. Petroleos Mexicanos, a public agency of Mexico, and transported and sold by the latter in Monterrey, Mexico.

The volume of natural gas proposed to be exported is not to exceed 20,000 mcf per day, the contract covering such sale to be for a period of ten years.

Applicant proposes to obtain its supply of natural gas from the San Domingo gas field, Wood gas field, and Penitas gas field, Texas.

According to the application, the respective structures or gas reservoirs from which the gas is to be produced are common to both the United States and Mexico. It is asserted that the portion of such reservoir located in either country is subject to drainage by wells in the other country and that the number of wells and rate of production from any one of such gas reservoirs in one country would determine the period of time within which all recoverable gas in storage located in the other country would be exhausted. Applicant, therefore, contends that some method of pooling to protect the interests of the owners of gas in both countries should be formulated. Applicant believes that Cia. Petroleos Mexicanos will cooperate in effectuating such a pooling arrangement.

It is asserted that all negotiations with the owners of gas wells in this country for the purchase of gas are dependent upon the securing of all necessary authorizations to export natural gas to Mexico.

This notice pertains only to the application filed under section 3 of the Natural Gas Act, the Applicant not as yet having filed an application for a Presidential Permit to operate facilities at the international boundary for the purpose of exporting natural gas, or an application under section 7 (c) of the Natural Gas Act for a certificate of public convenience and necessity to construct and operate the facilities that will be used to transport natural gas to Mexico.

Any person desiring to be heard or to make any protest with reference to said application should, on or before the 10th day of October, 1945, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's provisional rules of practice and regulations under the Natural Gas Act.

UNITED GAS CORP. AND UNITED GAS PIPE LINE CO.

NOTICE OF FILING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 25th day of September, A. D., 1945.

Notice is hereby given that a joint application and declaration has been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 by United Gas Pipe Line Company ("Pipe Line"), and its parent, United Gas Corporation ("United"), a subsidiary of Electric Power and Light Corporation, a registered holding company which in turn is a subsidiary of Electric Bond and Share Company, also a registered holding company.

Notice is further given that any interested person may, not later than the first day of October, 1945, at 5:30 p. m., e. w. t., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request and the nature of his interest, or may request that he be notified if the Commission should order a hearing thereon. At any time thereafter, such joint application and declaration, as filed or as amended, may be approved or may be permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under said act, or the Commission may exempt such transactions as provided in Rule U-20 (a) and Rule U-100 thereof. Any such request should be addressed: Secretary, Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania.

All interested persons are referred to said joint application and declaration, which is on file in the office of this Commission, for a statement of the transactions therein proposed, which are summarized as follows:

Pipe Line, a wholly-owned subsidiary of United, and United have entered into a sale and purchase agreement which provides, among other things, that Pipe Line sell to United all its natural gas transmission facilities located within the corporate limits of the City of Houston, Texas, except a small part of one of Pipe Line's 16" main transmission lines, for a cash purchase price of $251,746 plus the cost of all capital expenditures made by Pipe Line from July 31, 1945 to date of transfer in connection with the facilities to be sold. The filing states that the purchase price is based upon the construction cost of the properties proposed to be sold minus the proportion of Pipe Line's retirement reserve allocated thereto.

Among the reasons given for the desirability of effecting the proposed transactions are that Pipe Line at the present time owns and operates gas lines and facilities within the City of Houston for which it does not have a franchise; that Pipe Line has been advised that with respect to such lines and facilities it must either obtain such franchise from the city or discontinue its operations within the city; and that United and Pipe Line believe it is more properly the responsibility of United, which presently has a franchise to operate in Houston and is engaged in the retail distribution of gas in that city, to own and operate the facilities proposed to be sold to it.

By the Commission.

PART II

7. For the purpose of unifying the disposition of foreign property owned by the United States in foreign areas under a single agency acting in conformity with the foreign policy of the United States and with the Surplus Property Act of 1944, and consonant with the transfer of such disposition function under paragraph 2 (a) hereof and the designation of the Department of State, pursuant to the provisions of the Surplus Property Act of 1944, as a disposal agency for all surplus property in foreign areas, excepting certain vessels, there are transferred to the Department of State all functions of the Army-Navy Liquidation Commissioner (under whatever authority, including War Department Memorandum No. 850–45, dated January 27, 1945 and letter of the Secretary of the Navy dated February 1, 1945) and all functions of the War Department and the Navy Department relating to the disposition abroad of property captured from the enemy. So much of the functions of the Secretary of War and the Secretary of the Navy as relates thereto is transferred to the Secretary of State. The office of Army-Navy Liquidation Commissioner is abolished.

8. The War Department and the Navy Department shall each store, care for, handle, deliver and keep the fiscal and other accounts for all property declared to be surplus in foreign areas, including property captured from the enemy, and shall also furnish such personnel, transportation and administrative services or facilities as may be required for foreign disposal. The provisions of this paragraph shall be carried out without reimbursement from the Department of State for the services rendered. As used in this order, the words "foreign areas" mean areas outside the continental United States, its territories and possessions.

9. The Secretary of War and the Secretary of the Navy are authorized to detail officers and enlisted persons of the military and naval establishments, respectively, to the Department of State to assist it in the discharge of its duties under this Part or of any duties delegated to it under the Surplus Property Act of 1944, and any such officer or enlisted person shall, while so detailed, retain and be entitled to the rights, benefits, promotions and status of an officer or enlisted person of the establishment from which he was detailed.

PART III

10. There are transferred to the respective agencies to which functions are transferred by this order, for use in connection with the functions so transferred, so much as the Director of the Bureau of the Budget shall determine to relate to such functions, respectively, of the records, property, civilian personnel, and funds of the Administration and its agencies (including funds appropriated to the President for carrying out functions administered by the Administration) and of the War Department and of the Navy Department. Such further measures and dispositions as may be determined by the Director of the Bureau of the Budget to be necessary to effectuate the transfers and abolitions provided for in this order shall be carried out in such manner as the Director may direct and by such agencies as he may designate.

11. The head of each agency to which functions are transferred by this order may, in the interest of efficient administration, assign such of the functions transferred to such head or to his agency by this order as he shall determine to such officers and agencies under his jurisdiction as he shall designate.

12. All prior regulations, rulings, and other directives relating to any function transferred by this order shall remain in effect except as they are in conflict with this order or are hereafter amended or revoked under proper authority.

13. All provisions of prior Executive orders and of prior instruments of any Federal agency in conflict with this order are amended accordingly. Each transfer of functions provided for in this order shall be effective on such date, not later than December 31, 1945, as shall be designated jointly by the Director of the Bureau of the Budget and the head of the agency to which the function is transferred. Pending such designations the officers and agencies from whom functions are transferred under this order shall continue to administer their respective functions.

§ 256.66 *Definitions.* As used in §§ 256.66 to 256.77, inclusive, unless the context otherwise requires, the following terms will be construed respectively to mean:

(a) *Eligible producer.* An eligible producer shall be any person (individual, partnership, firm, corporation, association, joint-stock company, trust, estate, or other legal entity, or a State or a political subdivision thereof, or an agency of such State or political subdivision) producing cotton in 1945 in the capacity of landowner, landlord, tenant, or sharecropper. Except as provided below, two or more producers may not sell their cotton jointly. If the eligible cotton produced on a farm has been divided among the producers entitled to share in such cotton, each landlord, tenant, and sharecropper may sell his separate share. If the cotton has not been divided, the landlord and one or more of the share tenants or sharecroppers may sell their shares of cotton jointly. In no case shall a share tenant or sharecropper sell individually cotton in which a landlord has an interest. All such persons and beneficiaries must join in executing the sales documents. Each such person and beneficiary must also execute an agreement to indemnify Commodity Credit Corporation, and also the Purchasing Agency if it makes the purchase for Commodity Credit Corporation, against any loss resulting from the establishment by any other person of a superior right to the cotton. The indemnity agreement must be submitted with the sales documents. Copies of this agreement may be obtained from the Regional Office of Commodity Credit Corporation, New Orleans 12, Louisiana.

Sales documents tendered pursuant to the last two paragraphs above must bear a written certificate of approval executed by the appropriate county agricultural conservation committee. Such sales documents may be submitted to the Regional Office of Commodity Credit Corporation, New Orleans 12, Louisiana, or to a Purchasing Agency, and Commodity Credit Corporation will accept such documents from Purchasing Agents under its 1945 Cotton Purchasing Agency Agreements.

(b) *Eligible cotton.* Eligible cotton shall be upland cotton produced in the United States in 1945 by an eligible producer, as defined above: *Provided*, Such cotton meets the following requirements:

(2) Such cotton must be represented by warehouse receipts complying with the provisions of § 256.72 hereof.

(4) Such cotton must be free and clear of all liens and encumbrances.

(5) Such cotton must be offered for sale by a person who has the legal right to sell it.

(6) If the person producing such cotton for sale is a landlord or landowner, the cotton must not have been acquired by him directly or indirectly from a share tenant or a sharecropper, and must not have been received in payment of fixed or standing rent; if it was produced by him in the capacity of landlord, share tenant, or sharecropper, it must be his separate share of the crop unless he is a landlord and is tendering cotton in which both he and the share tenant or sharecropper have an interest; and he must not have sold and repurchased the cotton prior to the execution of the 1945 Cotton Producer's Sales Agreement (1945 C. C. C. Cotton Form UA).

(7) Such cotton must be in bales weighing not less than 300 pounds, gross weight.

(8) Such cotton must be undamaged at time of purchase.

(c) *Purchasing agency.* Any agency approved by Commodity Credit Corporation for the purpose of acting as its agent in purchasing cotton pursuant to the 1945 Cotton Purchase Program in accordance with these instructions and the Cotton Purchasing Agency Agreement (1945 C. C. C. Cotton Form UD) entered into between such agency and Commodity Credit Corporation.

§ 256.67 *Forms.* The following documents must be delivered in connection with every sale:

(a) (1) A 1945 Cotton Producer's Sales Agreement (1945 C. C. C. Cotton Form UA), duly executed prior to July 1, 1946.

(2) Warehouse receipts complying with the provisions of § 256.72 hereof.

(3) A Cotton Purchasing Agency's Letter of Transmittal (1945 C. C. C. Cotton Form UC), except in case of direct purchases.

(b) If the cotton being tendered is under a 1945 Cotton Producer's Note and Loan Agreement, the following forms may be delivered in lieu of the forms specified in (a) above:

(1) A 1945 Cotton Producer's Transfer Agreement (1945 C. C. C. Cotton Form UR) duly executed prior to July 1, 1946.

(2) The producer's duplicate copy of 1945 Cotton Producer's Note and Loan Agreement.

§ 256.68 *Amount.* The purchase price per pound which will be paid for the gross weight of middling $^{15}/_{16}$ inch eligible cotton stored in approved warehouses is shown in the Schedule of Purchase Prices for 1945 Crop Cotton in the Instructions to Warehousemen issued by Commodity Credit Corporation for each warehouse location. Grade and staple premiums and discounts for qualities other than middling $^{15}/_{16}$ inch cotton shall be those in effect under the 1945 Cotton Loan Program. These premiums and discounts are shown in the table appearing at the end of the 1945 Cotton Loan Instructions. Purchases will not be made of grades and staple lengths of cotton not shown in the schedule.

An allowance of 20 cents per 100 pounds in Arizona and California and 15 cents per 100 pounds in all other States will be made for cotton outside the zoned area when compressed to standard density. No cotton will be purchased which has been compressed to high density. An allowance of 7 pounds will also be made on bales covered with cotton bagging. Bales weighing between 300 and 400 pounds will be purchased at the regular purchase price less $1.25 for each such bale.

§ 256.69 *Classification of cotton.* All cotton must be classified by a Board of Cotton Examiners of the United States Department of Agriculture. Instructions will be issued to approved warehouses concerning sampling and forwarding of samples and recording the class of the cotton in the schedule of warehouse receipts in the 1945 Cotton Producer's Sales Agreement and in the 1945 Cotton Producer's Transfer Agreement. The classification of any cotton previously classed by a Board of Cotton Examiners for the loan program may be used by transcribing such classification from the loan to purchase forms. A charge of 15 cents per bale will be made for cotton classed under the program. The warehouseman should collect this charge from the producer. The Board of Cotton Examiners will make collections for classing charges from the warehouseman at the end of each month. Form 1 Classification Memorandum of the United States Department of Agriculture will also be accepted as evidence of the class of cotton provided the sample is a representative cut sample drawn by an approved warehouseman, United States Department of Agriculture employee, or a bonded sampler.

§ 256.70 *Preparation of documents.* A producer desiring to sell his cotton to Commodity Credit Corporation may obtain the necessary forms from an approved cotton warehouse, a purchasing agency, or the county office of the Agricultural Adjustment Agency. The warehouseman who has issued the warehouse receipts representing the cotton will fill in all except the last two columns of the Schedule of Warehouse Receipts in the 1945 Cotton Producer's Sales Agreement. He will also execute the Warehouseman's Certificate and Storage Agreement. In the case of purchases through a purchasing agency, the purchasing agency will then determine the amount due the producer on the basis of the Schedule of Purchase Prices for 1945 Crop Cotton and will complete the Schedule of Warehouse Receipts. It will also assist the producer in completing the remainder of the sales agreement. In the case of direct purchases under the 1945 Cotton Producer's Sales Agreement by Commodity Credit Corporation, after the warehouseman has executed the Warehouseman's Certificate and Storage Agreement the county agricultural conservation committee will complete the Schedule of Warehouse Receipts and assist the producer in completing the remainder of the sales agreement.

If the cotton being tendered for purchase is held under Form A loan (1945 Cotton Producer's Note and Loan Agreement), the producer may, in lieu of redeeming the cotton and tendering it under the forms prescribed in § 256.67 (a) hereof, execute a 1945 Cotton Producer's Transfer Agreement, attach his duplicate copy of the Form A or, if such duplicate copy of the Form A is not available, a Form AA (Cotton Producer's Equity Transfer Agreement) executed by the Federal Reserve bank covering such cotton, and present these documents to the warehouseman in whose warehouse the cotton is stored. The warehouseman will execute the Warehouseman's Certificate and Storage Agreement, in the 1945 Cotton Producer's Transfer Agreement, and the documents should be transmitted to the Federal Reserve bank serving the district in which the cotton is stored. Producers will not be permitted to tender under a transfer agreement cotton held under a Form A loan if any bale of such cotton is damaged and has to be reconditioned. After such cotton has been reconditioned by the warehouseman, it may be tendered on the reconditioned weights to the Corporation under a 1945 Cotton Producer's Sales Agreement. All farm-stored loan cotton must be redeemed from the loan and tendered under a 1945 Cotton Producer's Sales Agreement.

§ 256.71 *Approved warehouses.* Cotton to be eligible for purchase must be stored in warehouses approved by Commodity Credit Corporation. When warehouses are approved, notification will be given to the approved purchasing agencies. Complete instructions will be issued to warehousemen, at the time of approval, for their guidance in completing the Schedule of Warehouse Receipts in the 1945 Cotton Producers' Sales Agreement.

§ 256.72 *Warehouse receipts.* Only negotiable warehouse receipts issued by an approved warehouse, dated on or prior to the date of the 1945 Cotton Producer's Sales Agreement, and properly assigned by an endorsement in blank so as to vest title in the holders, or issued to bearer, will be acceptable. They must set out in their written or printed terms a description by tag number and gross weight of the bale represented thereby and all other facts and statements required to be stated in the written or printed terms of a warehouse receipt under the provisions of section 2 of the Uniform Warehouse Receipts Act. Block warehouse receipts will not be accepted.

§ 256.73 *Warehouse charges.* All warehouse charges must be paid by the producer to the close of the month during which the Warehouseman's Certificate and Storage Agreement in the 1945 Cotton Producer's Sales Agreement or the 1945 Cotton Producer's Transfer Agreement is executed. Warehouse charges thereafter will be in accordance with the Warehouseman's Certificate and Storage Agreement.

§ 256.74 *Insurance.* Under the terms of the Warehouseman's Certificate and Storage Agreement, the warehouseman is not required to insure the cotton against loss from fire after the date of execution of the certificate and storage agreement. Consequently, if the producer does not sell the cotton to Commodity Credit Corporation within 10 days after the certificate and storage agreement has been executed, the producer, if he desires to have the cotton insured against fire, will have to arrange for such insurance.

§ 256.75 *Liens.* Eligible cotton must be free and clear of all liens. The names of the holders of all existing liens on cotton tendered for sale, such as landlords, laborers, and mortgagees, must be listed in the List of Lienholders in the 1945 Cotton Producer's Sales Agreement, and the lienholders so listed must execute the Lienholder's Waiver in such form. If the producer is a tenant or sharecropper, the landlord must be listed and must sign the lien waiver whether or not he claims a lien, unless the 1945 Cotton Producer's Sales Agreement is signed jointly by the landlord and the tenant or sharecropper. A misrepresentation as to prior liens, or otherwise, will render the producer personally liable for any damage suffered by Commodity Credit Corporation and subject him to criminal prosecution under the provisions of section 35 (a) of the Criminal Code of the United States (18 U. S. C. 80 (1940)). The Lienholders' Waiver in the 1945 Cotton Producer's Sales Agreement must be signed personally by all lienholders listed, by their agents (in which case duly executed powers of attorney must be attached), or, if corporations, by the designated officers thereof customarily authorized to execute such instruments (in which case no authority need be attached).

§ 256.76 *Manner of payment to producer.* Purchases of cotton under the 1945 Cotton Producer's Sales Agreement will ordinarily be made by purchasing agencies, acting as agents for Commodity Credit Corporation. In such a case, the producer must tender a sales agreement and warehouse receipts representing the cotton offered for sale to the purchasing agency within 10 days after the date of the Warehouseman's Certificate and Storage Agreement in section II of the sales agreement, but in no event later than June 30, 1946. After completion of the sales agreement, the purchasing agency will pay the purchase price on behalf of the Corporation in the manner directed in section III of such sales agreement.

A producer may also obtain payments direct from Commodity Credit Corporation by tendering a properly executed 1945 Cotton Producer's Sales Agreement and warehouse receipts representing the cotton offered for sale to the Regional Office of Commodity Credit Corporation, New Orleans 12, Louisiana, within 10 days after the date of the Warehouseman's Certificate and Storage Agreement, but in no event later than June 30, 1946. If the tender is made by mail, the envelope must be postmarked within 10 days after the date of the Warehouseman's Certificate and Storage Agreement, but in no event later than June 30, 1946.

If the cotton is being tendered under a 1945 Cotton Producer's Transfer Agreement, the producer's duplicate copy of the 1945 Cotton Producer's Note and Loan Agreement or a Cotton Producer's Equity Transfer Agreement executed by the Federal Reserve bank, and the transfer agreement, must be mailed to the Federal Reserve bank serving the district in which the warehouse is located within 10 days after the date of the warehouseman's Certificate and Storage Agreement in the 1945 Cotton Producer's Transfer Agreement, but in no event later than June 30, 1946. The Federal Reserve bank, as agent of Commodity Credit Corporation, will calculate the amount due the producer and mail him a check for such amount, together with a copy of the transfer agreement on which the payment calculations are shown.

As between Commodity Credit Corporation and the producer, the Corporation will bear all risks of loss or damage to the cotton on and after the date of Warehouseman's Certificate and Storage Agreement in the sales or transfer agreement if it is tendered to the Corporation, with the required documents attached, within 10 days of the date of the certificate and storage agreement, but in no event later than June 30, 1946.

§ 256.77 *Purchasing agencies.* Agencies desiring to cooperate in the purchase program should apply to the Regional Office of Commodity Credit Corporation, New Orleans 12, Louisiana, for approval. A Cotton Purchasing Agency's Agreement (1945 C. C. C. Cotton Form

UD) will be entered into with each approved agency. Under this agreement, a purchasing agency is required to tender, on a Cotton Purchasing Agency's Letter of Transmittal (1945 C. C. C. Cotton Form UC), all warehouse receipts representing cotton purchased by the purchasing agency under such agreement, together with the 1945 Cotton Producer's Sales Agreements covering such cotton, to the Regional Office of Commodity Credit Corporation, New Orleans 12, Louisiana, within 15 days after the dates of execution of the Warehousemen's Certificate and Storage Agreement in such sales agreements. Upon receipt by Commodity Credit Corporation, the instruments will be examined, and, if the documents are in order, disbursements will be made or notes guaranteed by the United States will be issued to the purchasing agency, all in accordance with the terms of the Cotton Purchasing Agency's Agreement. Care should be exercised by the purchasing agency to determine that the warehouse receipts are genuine.

NOTE: The foregoing document covers 1945 C. C. C. Cotton Form U-1, issued by Commodity Credit Corporation on August 27, 1945, and Amendment No. 1 to said Form U-1.

Dated: AUGUST 27, 1945.

[SEAL] C. C. FARRINGTON,
Vice President,
Commodity Credit Corporation.

PART 1010—SUSPENSION ORDERS

PART 3290—TEXTILE, CLOTHING AND LEATHER

[Conservation Order M-328B, Schedule J, as Amended Aug. 18, 1945, Amdt. 1]

SPECIAL PROGRAM FOR RAYON CIVILIAN ITEMS

Section 3290.129j, *Schedule J to Order M-328B*, is amended in the following respects:

1. By changing the words "an AA-3 preference rating" in paragraph (a) to read "preference ratings."

2. By deleting "AA-3" in the heading of the preference rating schedule at the end of Schedule J.

3. By adding the following new paragraphs to Schedule J:

(e) *Delivery and use of rayon fabric to fill rated or certified orders.* (1) Every producer of rayon fabric in the gray state, whether he sells it in the gray or finished state or uses it to manufacture civilian items, shall deliver or use, during the fourth quarter of 1945, a yardage of rayon fabric at least equal to 40% of his production during that period to fill either orders bearing CC ratings assigned under Order M-328B or orders bearing the following certification (the term "orders" includes orders between branches or divisions of a company as well as orders from other companies):

"The undersigned certifies, subject to the criminal penalties of Section 35 (a) of the U. S. Criminal Code, that he will deliver during the fourth quarter of 1945, to fill orders rated CC under Order M-328B, a yardage of finished rayon goods equal to at least all unfinished rayon gray goods to which he takes title during that period on orders bearing this certificate, or 40% of all unfinished rayon gray goods to which he takes title during the same period, whichever is greater."

(2) A producer of rayon fabric shall not be required to deliver or use, in the fourth quarter of 1945, to fill such rated or certified orders, more than a yardage of rayon fabric equal to 40% of his fourth quarter production. After a producer has accepted orders bearing the certification described above, he may schedule them for delivery as if they bore CC ratings.

(f) *Deliveries by finished goods suppliers.* (1) Every supplier of finished fabrics making the certification described in paragraph (e) above must deliver finished rayon fabric during the fourth quarter of 1945, in accordance with its terms. In calculating the 40%, the supplier of finished goods may take into consideration actual processing loss on material delivered in the fourth quarter. For example, a finished goods supplier has an actual processing shrinkage of 5% on rayon fabric delivered by him in the fourth quarter of 1945. If he takes title to 100,000 yards of rayon gray goods in the fourth quarter, his 40% is based on 95,000 yards, which is 38,000 yards of finished goods.

(2) No supplier of finished rayon fabric shall be required to accept orders rated CC under M-328B for a greater yardage of finished rayon fabric for delivery in the fourth quarter of 1945 than a yardage equal to 40% of the unfinished rayon gray goods to which he takes title in that period, or a yardage equal to all unfinished rayon gray goods to which he takes title during that period on orders bearing the certificate in paragraph (e) above, whichever is greater.

(3) After a supplier of finished fabrics uses the certificate set forth in paragraph (e) on any of his purchase orders to his suppliers, he must not extend on orders for rayon fabric any CC ratings which he knows or has reason to believe were assigned under Order M-328B.

(g) *Acceptance of rated orders.* (1) If a supplier of gray or finished rayon fabric receives orders bearing CC ratings (assigned under M-328B) before October 3, 1945, he may hold them until that date before determining whether he is required to accept them. However, he must not actually reject any such CC orders before that date. If, on October 3, 1945, he has received such rated orders and orders certified under paragraph (e) for more than the yardage which he is required by paragraph (e) or paragraph (f) to deliver on such rated or certified orders, he may then reject any CC rated orders previously served on him to the extent of the excess. This subparagraph (1) does not affect AA-3 purchase orders which have been accepted and which may be re-rated CC before October 1, 1945, in accordance with Direction 18 to Order M-328.

(2) Any purchaser who is unable to get his rated orders accepted should notify the War Production Board.

(h) *Exceptions from requirements.* This paragraph explains how a finished goods supplier who is unable to get CC rated orders to meet the requirements of paragraph (f) above may obtain relief from that requirement.

(1) He must send two copies of Form WPB-4351 by registered mail to the War Production Board, Textile, Clothing and Leather Bureau, Washington 25, D. C., within the time stated below. This form must be completely filled out in accordance with its instructions. Copies of the form may be obtained from any War Production Board Field Office.

(2) Form WPB-4351 may not be filed before November 1, 1945.

(3) Seven days after the mailing of Form WPB-4351 in accordance with the rules above, if the War Production Board does not otherwise direct in writing, the finished goods supplier seeking relief may, to the extent that he is unable to obtain orders rated CC under M-328B, disregard the requirements that he deliver during the fourth quarter the yardage of finished fabric specified in paragraph (f).

(i) The special rules of this Schedule J for the handling of ratings apply only to CC ratings assigned under Order M-328B. Nothing in this Schedule affects CC ratings assigned on Form WPB-541-A under PR 28, or MM ratings.

Issued this 26th day of September 1945.

1. By changing the words "an AA-3 preference rating" in paragraph (a), to read "preference ratings".

2. By adding to paragraph (d) (7) the following sentence: "However, CC ratings assigned on an individual certificate or form for deliveries in the fourth quarter of 1945 may be extended only in accordance with Priorities Regulation 3."

3. By deleting the "AA-3" in the heading of the preference rating schedule at the end of Schedule K.

4. By adding the following new paragraphs to Schedule K:

(e) *Quantity of wool fabric production subject to ratings.* A producer of wool fabric shall not be required to deliver or use, in the fourth quarter of 1945, to fill orders bearing CC ratings assigned under Order M-328B, more than a yardage of wool fabric equal to 45 percent of his fourth quarter production.

(f) *Acceptance of rated orders.*

(1) If a supplier of wool fabric receives orders bearing CC ratings (assigned under Order M-328B) before October 3, 1945, he may hold them until that date before determining whether he is required to accept them. However, he must not actually reject any such CC orders before that date. If, on October 3, 1945, he has received such rated orders for more than the yardage subject to M-328B ratings under paragraph (e), he may then reject any such CC rated orders previously served on him to the extent of the excess. This subparagraph (1) does not affect AA-3 rated purchase orders which have been accepted and which may be rerated CC before October 1, 1945, in accordance with Direction 18 to Order M-328.

(2) Any purchaser who is unable to get his rated orders accepted, should notify the War Production Board.

(g) The special rules of this Schedule K for the handling of ratings apply only to CC ratings assigned under Order M-328B. Nothing in this Schedule affects CC ratings assigned on Form WPB-541A under Priorities Regulation 28, or MM ratings.

Chapter XI—Office of Price Administration

PART 1360—MOTOR VEHICLES AND MOTOR VEHICLE EQUIPMENT

[RMPR 341,[1] Amdt. 11]

MAXIMUM PRICES FOR USED COMMERCIAL MOTOR VEHICLES

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Maximum Price Regulation 341 is amended in the following respects:

1. Section 1 (a) (1) is amended to read as follows:

(1) *Definition of used commercial motor vehicle ("used vehicle").* Used commercial motor vehicle (called used vehicle in this regulation) means

(i) Any self-propelled vehicle, or a vehicle drawn by it, which may be used commercially on and off the highway for the transportation of property or of more than ten persons; or

(ii) Any self-propelled vehicle or a vehicle drawn by it, except a civilian type of passenger automobile, sold to the War Department, Department of the Navy, United States Marine Corps, or the United States Coast Guard; or

(iii) Any chassis or body of a vehicle named in (i) or (ii); which irrespective of mileage has been used other than for the purpose of sale.

This definition covers vehicles of the following types:

(iv) Vehicles primarily designed for civilian use, such as: ambulances, cab pickups, carryall suburbans, combinations consisting of truck bodies and passenger automobile chassis, coupes fitted with pickup boxes, fire trucks, hearses, omnibuses, sedan deliveries, trucks, truck tractors, truck trailers (full and semi) and utility sedans; and

(v) Army general and special purpose vehicles and army special equipment vehicles defined in section 18.

This definition does not cover the following vehicles:

(vi) Civilian passenger automobiles, civilian station wagons having a seating capacity of less than eleven persons, vehicles operated on rails, self-trackl[illegible] vehicles, motorcycles, or farm and garden tractors designed and used for agricultural purposes.

2. Section 6 (a) (1) is amended to read as follows:

(1) The "value when new" of the vehicle determined in accordance with paragraph (b) or (c) of this section, whichever is applicable;

3. The headnote of paragraph (b), section 6, and the narrative in that paragraph immediately preceding subparagraph (1) are amended to read as follows:

(b) *Determining "value when new" for vehicles other than Army, Navy, Marine Corps and Coast Guard vehicles.* The "value when new" of a vehicle, or a vehicle chassis or body when sold or priced separately, shall be determined under this paragraph (b) except when the vehicle, including a chassis or body, was sold when new to the War Department, Department of the Navy, Marine Corps or United States Coast Guard. In this latter case the "value when new" shall be determined under paragraph (c). (The "value when new" determined under subparagraph (1) is for a vehicle complete with the customary functional, and non-functional parts and other standard equipment. When a functional or non-functional part or a piece of standard equipment is missing from the vehicle at the time of sale, the "value when new" under subparagraph (1) shall be reduced by the amount of the retail list price for each removed part or piece of equipment when new. If the list price is not ascertainable deduct from the "value when new" of the vehicle an amount which is a reasonable estimate of the retail price of such a part or equipment when new).

4. Paragraphs (c) and (d) of section 6 are redesignated (d) and (e) respectively and a new paragraph (c) is added to section 6 to read as follows:

(c) *Determining "value when new" of Army, Navy, Marine Corps and Coast Guard vehicles*—(1) *General.* The "value when new" of vehicles sold when new to the War Department, Department of the Navy, Marine Corps or the Coast Guard shall be determined under this paragraph (c). (The term vehicle includes a vehicle consisting of a chassis and body or a chassis or body of a vehicle sold separately).

(2) *Method for determining "value when new."* The "value when new" shall be the dollar amount listed in Appendix G for a vehicle having the same specifications as the vehicle being priced with respect to model year, tonnage rating drive (i. e. 4 x 2, 4 x 4, etc.) body type (i. e. cargo, pickup, etc.) and wheelbase.

If a vehicle having these same specifications as the vehicle being priced does not have a price listed in Appendix G use the price in that Appendix for a vehicle most comparable to the vehicle being priced with respect to these specifications.

In the case of a body sold separately, the "value when new" shall be the original retail price new, f. o. b. factory, (exclusive of transportation costs and taxes) or, if that price is not ascertainable, the retail price when new, f. o. b. factory, (exclusive of transportation costs and taxes) for the most comparable body of the closest model year.

(3) *What "value when new covers."* "Value when new" covers all parts and other equipment present on the vehicle at the time it is sold to the War Department, Department of the Navy, Marine Corps or Coast Guard. When either the Procurement Division, United States Treasury, or the United States Department of Commerce sells a vehicle less a part or other equipment that was on the vehicle when sold new to the War Department, Department of the Navy, Marine Corps or Coast Guard, it shall deduct from the "value when new" of the vehicle, the retail list price for each missing part or piece of removed equipment when new. If the retail list price of a missing part or piece of equipment when new is not ascertainable, deduct from the "value when new" of the vehicle an amount which is a reasonable estimate of the retail price of such part or equipment when new. A reseller of a vehicle from which a part or piece of equipment is missing must make the same deductions in determining the maximum price for such a vehicle.

5. A new subparagraph (3) is added to section 6 (d) to read as follows:

(3) *Transportation allowances for vehicles which have "values when new" under section 6 (c).* For the purpose of determining transportation allowances under this paragraph (d) for vehicles which have "values when new" determined under section 6 (c), Detroit, Michigan, shall be considered as the principal place of manufacture in all cases regardless where the principal places of manufacture actually are.

6. Section 6 (e) (1) is amended to read as follows:

(1) *When allowances may be included in base price.* This paragraph (e) establishes allowances for extras (defined in section 18 (c)) that may be included in the "base price" permitted by paragraph (a) of section 6. The only extras for which a seller other than a consumer may include allowances in the "base price" are those with which the vehicle was equipped at the time of purchase and which are present on the vehicle at the time it is sold. A consumer may include allowances for extras present on the vehicle at the time he sells it. The amount of the allowances for these extras shall be determined in accordance with subparagraph (2) below.

NOTE: When extras are added by a dealer at the request of a purchaser, or are added in connection with alterations, additions may be added to the maximum price. The amount of the allowances and the circumstances under which they may be added to the maximum price are covered by paragraph (a) of section 9.

7. Section 9 (a) (1) (ii) is amended to read as follows:

(ii) Prices for extras (as defined in section 18 (c)) not to exceed maximum prices under applicable maximum price regulations, except that where an extra replaces standard equipment only the difference between the price of the standard equipment removed and the price of the extra may be added; and

[1] 7 F R 11175, 11736, 11414, 9 F R 3847, 4[illegible] 7069, 10641.

8. Section 18 (c) is amended to read as follows:

(c) "Extra" means any accessory or equipment designed for attachment to the used vehicle when new which is not provided for in the price of such vehicle when new. The term "extra" includes such items as oversized or special tires, special springs, special transmissions, special brakes, optional wheelbase or body frames, heaters, radios, power-take-off winches and other power-take-off equipment. The term "extra" does not include such equipment or any other equipment if it should be present on a vehicle (sold when new to the War Department, Department of the Navy, Marine Corps or Coast Guard) at the time it is sold used by the Procurement Division or Department of Commerce. Neither does the term "extra" include special equipment such as mixers, cranes, scoops, shovels, welding machines, compressors, and winches with independent power, or other equipment having a use not dependent on its attachment to the vehicle.

9. Paragraph (y) of Appendix C is revoked.

10. A new Appendix G is added to read as follows:

PART 1410—WOOL

[MPR 163,[1] Amdt. 16]

WOOLEN AND WORSTED CIVILIAN APPAREL FABRICS

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith and filed with the Division of the Federal Register.

Maximum Price Regulation No. 163 is amended in the following respects:

1. The table of contents is amended by inserting § 1410.103a between §§ 1410.103 and 1410.104 to read as follows:

§ 1410.103a Maximum prices for resellers of "government contract goods".

2. The table of contents is amended by adding § 1410.121 after § 1410.120 to read as follows:

§ 1410.121 Maximum price for the service of dyeing or refinishing government contract goods.

3. Section 1410.103a is added to read as follows:

§ 1410.103a *Maximum prices for resellers of "government contract goods"*—(a) *What this section does.* This section applies to resales of "government contract goods" by a jobber,[2] secondary jobber or apparel manufacturer. "Government contract goods" means woven woolen or worsted apparel fabrics which in the hands of a previous seller constituted either surplus goods subject to Supplementary Order 94,[3] rejects or overruns subject to Supplementary Order 96,[4] or contractor inventory subject to Order No. 2 under Supplementary Order 130.[5,6] That previous seller will be referred to as the "original seller".

(b) *Resales of finished government contract goods which are not in military finish but are in same form as sold by original seller.* Resales of finished government contract goods which are not in a military color and finish but are in the same form as sold by the original seller shall be subject to all the provisions of § 1410.103, except that (1) in the application of that section to such resales the original seller's price shall be used in place of the manufacturer's price, and (2) in paragraph (b) (1) of § 1410.103 the words "Maximum Price Regulation 163" shall be deemed to refer to Supplementary Order 94, if the original seller is a government agency or a contractor or subcontractor acting as the agent of that agency.

(c) *Resales of other government contract goods, except mill ends, etc.*—(1) *Primary jobbers*—(i) *Goods purchased and resold in military finish.* The maximum price for sales and deliveries of government contract goods in a military color and finish by a primary jobber and resold without redyeing or refinishing shall be the quotient of the sum of (*a*) the original seller's net invoice price, whether or not the purchaser has taken advantage of any term discount offered, but in no case higher than the original seller's maximum price and (*b*) the freight charges actually paid by the purchaser for transportation of the goods from the original seller's shipping point to his place of business, divided by (*c*) a factor of 0.90.

(ii) *Goods finished or refinished by primary jobber.* The maximum price of a primary jobber for government contract goods finished or refinished by him shall be the sum of items (*a*) and (*b*) below divided by a factor of 0.82, plus items (*c*), (*d*), and (*e*):

(*a*) The original seller's net invoice price, whether or not the purchaser has taken advantage of any term discount offered, but in no case higher than the original seller's maximum price;

(*b*) The freight charges actually paid by the purchaser for transportation of the goods from the original seller's shipping point to his place of business;

(*c*) The freight charge actually paid by the purchaser for transportation of the goods to the finishing plant and from the finishing plant to the purchaser's place of business;

(*d*) The shrinkage cost;

(*e*) The cost of dyeing and or finishing or redyeing and or refinishing.

(2) *Secondary jobbers.* The maximum price of a secondary jobber for government contract goods shall be the quotient of the sum of (i) the primary jobber's maximum price and (ii) the freight charges actually paid by the secondary jobber for the transportation of the fabric from his supplier's shipping point to his place of business, divided by a division factor of 0.85.

(3) *Apparel manufacturers.* Resales of finished government contract goods by manufacturers of apparel shall be subject to the provisions of §§ 1410.103 (e) (1) and (e) (3), except that in pursuance of paragraph (e) (3) (i) (*b*), where the original seller is a government agency or a contractor or subcontractor acting as the agent of that agency, they shall supply the original seller's net invoice price for the fabric instead of the manufacturer's net invoice price.

(e) *Mill ends, etc.* (1) The maximum price for sales and deliveries of mill ends, close outs, seconds and irregular pieces by primary jobbers shall be the original seller's maximum price.

(2) The maximum price for sales and deliveries of mill ends, close outs, seconds and irregular pieces by secondary jobbers shall be the quotient of the sum of (i) his supplier's net invoice price, whether or not the secondary jobber has taken advantage of any term discounts offered and (ii) the freight charges actually paid by the secondary jobber for the transportation of the fabric from his supplier's shipping point to his place of business, divided by a factor of 0.85.

(d) *Customary discounts, trade practices and transportation costs.* The provisions of § 1400.103 (f), which pertains to discounts, trade practices, and transportation costs, shall apply to sales subject to this section.

(e) *Invoices.* (1) Every person, except a manufacturer of apparel, who makes a sale subject to this section must give the purchaser an invoice, which shall include, in addition to his own and the purchaser's name and address, the original seller's ceiling price, a brief description of the fabric, and the date, price, terms and quantity of sale, the following:

(i) The primary jobber's total net invoice price where it has not already been furnished pursuant to subparagraph (1) above;

[3a] As used herein, the term "in line with" means (1) based upon and having a justifiable relationship to, and (2) appropriately increased or decreased to take account of differences in construction, finish, dye, color and such other material factors as, in sound trade determination, are considered to have a direct bearing on the cost of production of the respective fabrics.

[1] 6 F.R. 3972, 4396.

[2] The term "jobber", as used in this section, includes a person who purchases government contract goods and resells them after finishing or refinishing them or after having them finished or refinished for his account.

[3] 9 F.R. 9415, 10636, 13287; 10 F.R. 116, 3552, 9089, 10121.

[4] 9 F.R. 10492.

[5] 10 F.R. 11687.

[6] The term "surplus goods", "rejects", "overruns", and "contractor inventory" are explained in the Orders referred to above. Generally speaking, "surplus goods" means goods sold by the government or by a war contractor as agent for the government; "rejects" means rejected and "overruns" means excess goods produced under a war contract; and "contractor inventory" means goods which a contractor is permitted and elects to keep when his contract is terminated.

(ii) The number of the war procurement contract pursuant to which the goods were manufactured, processed or procured and in the case of a subcontract, the name of the other contracting party;

(iii) The division factor he used;

(2) The primary jobber shall include in the invoice to a purchaser, in addition to the above, the following:

(i) The freight charges actually paid by the primary jobber for transportation of the goods (a) from the original seller's shipping point to the primary jobber's place of business and (b) whenever incurred, to the finishing plant and from the finishing plant to the primary jobber's place of business;

(ii) The shrinkage cost, if any, incurred by the primary jobber; and

(iii) The cost of redyeing and or refinishing, if any, incurred by the primary jobber.

4. Section 1410.121 is added to read as follows:

§ 1410.121 *Maximum price for the service of redyeing or refinishing government contract goods.* The maximum price for redyeing or refinishing government contract goods is the maximum price established for redyeing or refinishing woolen or worsted apparel fabrics under section 4 (a) or 4 (c) of Revised Maximum Price Regulation No. 165, whichever is applicable. If no maximum price can be established under either of those provisions, the maximum price for the service shall be determined by dividing the factory cost of the service by a division factor of 0.95.

This amendment shall become effective September 27, 1945.

Issued this 27th day of September 1945.

CHESTER BOWLES,
Administrator.

It further appearing, That said tariff schedules state increased charges for telegraph communications in interstate and foreign commerce; that the rights and interests of the public may be injuriously affected thereby; and it being the opinion of the Commission that the effective date of such schedules, insofar as they provide for increased charges for telegraph communications from the United States and Puerto Rico to Samoa and the Fiji Islands, should be postponed pending hearing and decision on the lawfulness of such increased charges;

It is ordered, That the Commission, upon its own motion, without formal pleading, enter upon a hearing concerning the lawfulness of the charges contained in the above-cited tariff schedules, insofar as they relate to telegraph communications from the United States and Puerto Rico to Samoa and the Fiji Islands.

It is further ordered, That the operation of the above-cited tariff schedules, insofar as they provide for increased charges for and in connection with telegraph communications from the United States and Puerto Rico to Samoa and the Fiji Islands, be suspended; that the use of the charges therein stated be deferred until January 1, 1946, unless otherwise ordered by the Commission; and that during said period of suspension no changes shall be made in such charges or in the charges sought to be altered, unless authorized by special permission of the Commission;

It is further ordered, That an investigation be, and the same is hereby instituted, into the lawfulness of the rates, charges, classifications, regulations, practices, and services of R. C. A. Communications, Inc., Mackay Radio and Telegraph Company, and The Western Union Telegraph Company, for and in connection with telegraph communication service between the United States and Puerto Rico, on the one hand, and Samoa and the Fiji Islands, on the other.

It is further ordered, That in the event a decision as to the lawfulness of the charges herein suspended has not been made during the suspension period and said charges have gone into effect, all of the carriers subject to the Commission's jurisdiction participating in the service provided under the tariff provisions herein suspended, shall, until further order of the Commission, each keep accurate account of all amounts charged, collected or received by reason of any increase in charges effected thereby; that each such carrier shall specify in such accounts by whom and in whose behalf such amounts are paid; and each such carrier shall file with this Commission a report, under oath, on or before the 10th day of each calendar month, commencing February 10, 1946, showing the amounts accounted for as aforesaid during the previous calendar month;

It is further ordered, That a copy of this order be filed in the offices of the Commission with said tariff schedules herein suspended; that all carriers subject to the Commission's jurisdiction which are parties to such tariff schedules be, and they are hereby each made a party respondent to this proceeding; and that copies hereof be served upon each such party respondent;

It is further ordered, That this proceeding be, and the same is hereby assigned for hearing on the 24th day of October 1945, beginning at 10:00 a. m. at the offices of the Federal Communications Commission in Washington, D. C.

By the Commission.

[Docket No. 6780]

COMMERCIAL TELEVISION BROADCAST STATION

ORDER SETTING FOR HEARING SUGGESTED REGULATIONS

In the matter of promulgation of rules and regulations and standards of good engineering practice for commercial television broadcast stations.

Whereas, The Commission on June 27, 1945, issued its final report allocating frequencies for television broadcasting;

Whereas, it is desirable that rules and regulations and standards of good engineering practice concerning television broadcasting should be promulgated as soon as possible; and

Whereas the Commission has heretofore called an informal engineering conference for the purpose of discussing technical matters involved in standards of good engineering practice for television broadcasting.

Now, therefore, it is ordered, This 20th day of September 1945, that a hearing be held before the Commission en banc beginning at 10:30 a. m., October 4, 1945, for the purpose of considering the promulgation of rules and regulations and standards of good engineering practice concerning television broadcasting. Persons desiring to appear at that hearing should file an appearance with the Commission on or before October 1, indicating the name of the person who will appear, the subject matter concerning which he will testify, and the length of time desired. Persons desiring to file briefs should file 25 copies with the Commission on or before October 1, 1945.

In order to give scope and direction to the hearing, there is set forth in the attached appendix the substance of suggested rules and regulations concerning the principal subjects to be considered by the Commission. Persons appearing at the hearing should address themselves to these suggested regulations and should indicate with particularity any objection they have to the regulations and any specific suggestions they have for any change in, or alternative to, the suggested regulations.

[SEAL] T. J. SLOWIE,
Secretary.

APPENDIX

(1) *Minimum operating schedule.* The licensee of each television broadcast station shall maintain a regular program operating schedule transmitting a standard television signal for a total of 6 hours per day. In addition, comment is requested as to whether the minimum operating schedule should be more or less than 6 hours per day and as to whether the Commission should provide for the sharing of some or all television channels by two or more licensees. If such sharing is provided for, the Commission will prescribe the hours each licensee is to operate.

(2) *Multiple ownership.* No person (including all persons under common control)[1] shall, directly or indirectly, own, operate, or control more than one television broadcast station, except upon a showing (1) that such ownership, operation, or control would foster competition among television broadcast stations or provide a television broadcast service distinct and separate from existing services, and (2) that such ownership, operation or control would not result in the concentration of control of television broadcasting facilities in a manner inconsistent with public interest, convenience, or necessity: *Provided, however*, That no person (including all persons under common control), shall directly or indirectly own, operate, or control more than one television broadcast station that would serve substantially the same service area: *And provided, further*, That the Commission will regard the ownership, operation, or control of more than five television broadcast stations as constituting a concentration of control of television broadcasting facilities in a manner inconsistent with public interest, convenience, or necessity.

(3) *Network regulations.* The chain broadcasting regulations shall be applicable to television stations.

(4) *Use of common antenna site.* No television license or renewal of a television license will be granted to any person who owns, leases, or controls a particular site which is peculiarly suitable for television broadcasting in a particular area; and (1) which is not available for use by other television licensees; and (2) no other comparable site is available in the area; and (3) where the exclusive use of such site by the applicant or licensee would unduly limit the number of television stations that can be authorized in a particular area or would unduly restrict competition among television stations.

(5) *Announcement of mechanical reproductions.* Comment is invited concerning the desirability of requiring an appropriate announcement to be made when motion pictures or other mechanical reproductions are used in television broadcasting.

(6) *Station identification.* Comment is requested as to whether station identification should be by aural means, by video means, or by both and how frequently such announcements should be made.

(7) *Allocation plan.* The 13 channels available for television broadcasting shall be divided as follows:

(a) *Community stations.* A community station is designed to render service to those cities or communities which have fewer than two metropolitan stations as shown in the

[1] The word "control" as used herein is not limited to majority stock ownership, but includes actual working control in whatever manner exercised.

table below. However, community stations may be assigned to cities with two or more metropolitan stations upon a showing that this would not make impossible the assignment of a station to another city which has a reasonable probability of a station being located there. The power of a community station may not exceed an effective radiated peak power of 1 kilowatt with a maximum antenna height of 500 feet above the average terrain ten miles from the transmitter. Upon a proper showing that an antenna height in excess of 500 feet is available, authorization will be issued for such higher antenna but the Commission may in such cases require a reduction in radiated power.

A minimum separation of 90 miles normally will be provided in the case of community stations on the same channel and a minimum of 45 miles on adjacent channels. However, upon a showing that public interest would be served thereby, community stations may be located at closer distances. The main studio shall be located in the city or town served and the transmitter shall be located as near the center of the city as practicable.

Three television channels will be assigned to community stations. They are television channels 1, 12 and 13.

(b) *Metropolitan stations.* Metropolitan stations may be assigned to television channels 2 through 6 and 7 through 11, both inclusive. They are designed primarily to render service to a single metropolitan district or a principal city and to the rural area surrounding such metropolitan district or principal city. The Commission will determine the approximate service area [2] for metropolitan stations.

[2] In determining service areas for particular communities, the Commission will give consideration to population distribution, terrain, trade areas, economics and other pertinent factors. There are several current and recognized authorities on retail trading areas or consumer trading areas from which the applicant may prepare its showing and to which the Commission will give consideration in making its determination. Among these recognized authorities are the following: J. Walter Thompson (Retail Shopping Areas), Hearst Magazines, Inc., (Consumer Trading Areas), Rand McNally Map Co. (Trading Areas), and Hagstrom Map Co.'s Four Color Retail Trading Area Map.

The table below sets forth the channels which are available at this time for the areas indicated. Attention should be called to the fact that as is pointed out in the Commission's Report of May 25, 1945, the 13 television channels which are available for television below 300 mc are insufficient to make possible a truly nation-wide and competitive television system. Hence, the Commission has made available the space between 480 and 920 mc for experimental television where more space exists and where color pictures and superior monochrome pictures can be developed through the use of wider channels. Applications may be filed for experimental stations between 480 and 920 mc.

The table below will be revised from time to time depending upon the demand for television stations which may exist in the various cities. Where it is desired to use a different channel in any such area, or to use one of the channels in another area conflicting therewith, it must be shown that public interest, convenience, or necessity will be better served thereby than by the allocation set forth in the table.

Stations in metropolitan or city areas not listed in the table will not be assigned closer than 150 miles on the same channel or 75 miles on adjacent channels, except upon an adequate showing that public interest, convenience, or necessity would be better served thereby or that by using lower power or by other means equivalent protection is provided.

Metropolitan stations will not be authorized to operate with an effective radiated peak power in excess of 50 kilowatts. No restriction is propsed at this time with respect to the maximum antenna height; however, a minimum height of 500 feet above the average terrain will be required, except upon a showing that it is not practical to obtain such height. In all cases the main studio shall be located in the city or metropolitan district with which the station is associated and the transmitter should be located so as to provide the maximum service to the city or metropolitan district and the surrounding rural area. A signal of at least 500 uv/m over the entire metropolitan district and at least 5000 uv m over the business district of the principal city should be obtained (for a reasonable period reduced power will be permitted).

(c) *Rural stations.* Licensees of metropolitan stations or applicants who desire to qualify as licensees of rural stations must make a special showing to the Commission that they propose to serve an area more extensive than that served by a metropolitan station and that the additional area proposed to be served is predominantly rural [3] in character. In addition, a showing must be made that such use of the channel will not cause objectionable interference to other television stations or prevent the assignment of other television stations where there is reasonable evidence of the probability of such station being located in the future.

[3] As a guide, the Commission will consider that the additional area beyond the service area of a metropolitan station which is proposed to be served is predominantly rural in character if at lease 50 per cent of the population proposed to be added within the 500 uv m contour live in rural areas or in cities smaller than 10,000. In making this computation, cities with population in excess of 10,000 shall be excluded if the signal in such cities is less than 2000 uv m. Exceptions to this rule will be made where a showing is made to the Commission that due to conditions of terrain or local factors, more extended service to unserved rural areas is possible by licensing rural stations to serve an area which does not meet the above requirements than would otherwise be possible.

[2] Assigning a station to Lancaster would require deletion of a station from either Reading, York, Easton, Pa., or Wilmington, Del. Moreover, such a station in Lancaster would be severely limited by interference.

An opinion accompanying this order issued simultaneously herewith, has been filed with the Division of Federal Register.

In the judgment of the Regional Administrator of Region II of the Office of Price Administration, the maximum prices established and the Regulations prescribed by this order are generally fair and equitable, are necessary to effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Orders Nos. 9250 and 9599, and do not exceed the general level of prices fixed by Revised Maximum Price Regulation No. 251.

Therefore, under the authority vested in the Regional Administrator of Region II of the Office of Price Administration by the Emergency Price Control Act of 1942, as amended, and by section 9 of Revised Maximum Price Regulation No. 251, this order is hereby issued.

The term "composition residing" includes asphalt shingle re-siding, asbestos cement re-siding, insulated brick or stone re-siding and roll brick re-siding but shall not include wood shingles or wood re-siding.

The term "re-roofing" includes composition re-roofing such as asphalt shingles and mineral surface roll re-roofing and smooth surface roll re-roofing but does not include wood, metal or slate re-roofing.

All other provisions of Revised Maximum Price Regulation No. 251 are applicable to transactions subject to this order unless otherwise provided in this order.

SOLID FUELS IN CLIFTON FORGE, VA., AREA

For the reasons set forth in an opinion issued simultaneously herewith, and under the authority vested in the Regional Administrator, Region IV, Office of Price Administration, by §§ 1340.259 (a) (1) and 1340.260 of Revised Maximum Price Regulation No. 122, it is hereby ordered:

(a) *What this order does.* This adopting order establishes dollars-and-cents ceiling prices for specified solid fuels when sold and delivered by dealers in the area set out herein. These fuels are described and the maximum prices are set forth in paragraph (d) hereof.

(b) *Area covered.* This order covers all sales of specified solid fuels when sold and delivered within the corporate limits of Clifton Forge, Virginia and within the area lying within three miles of said corporate limits, measured by the actual mileage by the most direct highway route. It also covers all sales thereof by dealers whose yards are located within that area, regardless of where delivery is made. Extra charges for deliveries outside such area are provided.

(c) *Applicability of Basic Order No. G-37.* All the provisions of Order No. G-37 under Revised Maximum Price Regulation No. 122—basic order for area pricing of coal in Region IV, issued April 4, 1945 by the Atlanta Regional Office, Region IV, Office of Price Administration are adopted in this order and are just as much a part of this order as if printed herein. If said Order No. G-37 is amended in any respect, all the provisions of such order, as amended, shall likewise, without other action, be a part of this order. All persons subject to this adopting order are also subject to and should read and be familiar with the provisions of said Order No. G-37.

(d) *Maximum prices.* Maximum prices established by this order are as follows for sales on a "direct delivery or domestic" basis:

LOW VOLATILE BITUMINOUS COAL FROM DISTRICT NO. 7

(e) *Maximum authorized service charges and required deductions*—(1) *Carrying.* If buyer requests such service, dealer may charge not more than 75¢ per ton therefor.

(2) *Yard sales.* When buyer picks up coal at the yard, dealer must reduce the Domestic price at least 75¢ per ton.

(3) *Treated coals.* If the dealer's supplier has subjected the coal to oil or calcium chloride treatment to allay dust or to prevent freezing and makes a charge therefor, the dealer selling such coal may add to the applicable maximum price set by this order, except as noted hereinafter, the amount of such charge, not to exceed 10¢ per net ton. This addition may not be made to the prices named for stoker pea, since the price already includes this 10¢ increase. When the increase permitted hereby is added, the invoice, sales slip or receipt shall clearly show that the coal has been so treated, but it is not necessary that this charge be separately stated thereon.

(4) *Delivery zone.* No charge may be made for delivery within the corporate limits of Clifton Forge, Virginia, or the area lying within three miles of said corporate limits, measured by the actual mileage by the most direct highway route. Dealers whose yards are located within that area may, however, make a charge for deliveries beyond the free delivery zone thus described, of not more than 10¢ per ton per mile beyond such zone, measured by the actual mileage by the most direct highway route, and may impose a minimum charge of not more than 50¢ for each such delivery.

COLUMBUS AND SOUTHERN OHIO ELECTRIC CO. AND CONTINENTAL GAS & ELECTRIC CORP.

NOTICE OF FILING AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission held at its offices in the City of Philadelphia, Pa., on the 26th day of September, A. D. 1945.

Notice is hereby given that a joint application and declaration has been filed with this Commission under the Public Utility Holding Company Act of 1935 by Columbus and Southern Ohio Electric Company ("Columbus") and its parent, Continental Gas & Electric Corporation ("Continental"), a registered holding company subsidiary of United Light and Railways Company ("Railways"), also a registered holding company.

All interested persons are referred to said document which is on file in the offices of the Commission for a statement of the transactions therein proposed, which is summarized as follows:

As a preliminary step to the sale or other disposition by Continental of its holdings of the Common Shares of Columbus, in compliance with an order of this Commission, entered August 5, 1941, in proceedings pursuant to section 11 (b) (1) of the act, requiring Railways and Continental to dispose of their direct or indirect interest in Columbus, Columbus proposes to:

(1) Refinance its outstanding 83,601 shares of First Preferred 6% Cumulative, $100 par value Stock and 50,144 shares of Series B, 6½% Cumulative, $100 par value, Preferred Stock (Hereinafter collectively referred to as "Old Preferred Shares") by affording holders of such shares the opportunity of exchanging them, on a share for share basis, for Cumulative Preferred Shares, $100 par value, 4¼% Series (which will be the first series of a new class of 250,000 Cumulative Preferred Shares presently proposed to be authorized and hereinafter referred to as the "New Preferred Shares"), plus a cash dividend adjustment which, together with the dividends receivable on the New Preferred Shares, will give each stockholder who exchanges a dividend at the rate of 6% per annum on the First Preferred Shares and 6½% per annum on Series B Preferred Shares, respectively, up to the respective redemption dates of the Old Preferred Shares which are not exchanged. Any shares not exchanged will be redeemed by Columbus at the redemption price of $110 through the use of treasury funds.

A complete statement of the terms and provisions of the New Preferred Shares will be contained in an amendment to be filed to the application and declaration herein.

It is contemplated that the period within which deposit must be made of Old Preferred Shares for exchange will extend for approximately three weeks prior to November 15, 1945 and that the earliest practicable redemption dates for such Shares will be January 1, 1946 for

the 6% Shares and February 1, 1946 for the 6½% Shares.

The exchange plan will become effective if 100,000 (approximately 75%) or more Old Preferred Shares are deposited within the above-mentioned exchange period, but Columbus reserves the right either to abandon the exchange plan and reject all offers of exchange or to declare the exchange plan effective if less than 100,000 Old Preferred Shares are deposited for exchange within such period. Columbus also reserves the right to limit invitations for exchange and to reject deposits, to the extent deemed advisable by reason of applicable State securities laws.

Upon completion of the redemption of the unexchanged Old Preferred Shares, the New Preferred Shares issued in exchange for Old will be the only preferred shares of Columbus outstanding. No New Preferred Shares will be issued initially, except as required in connection with the exchange plan.

If more than 100,000 Old Preferred Shares are exchanged, Columbus will use additional treasury funds in an amount equal to the redemption price (110% percent of par) of as many Old Preferred Shares in excess of 100,000 shares as are exchanged under the plan, to redeem a portion of its First Mortgage Bonds, 3¼% Series due 1970. Of such sum, not in excess of $212,500 may be deposited with the Indenture Trustee for redemption of bonds on September 1, 1945 through operation of the sinking fund at the then applicable sinking fund redemption price of 106¼% of the principal amount of the bonds. Any balance of such sum will be currently applied by Columbus to the redemption of such bonds at the current redemption price of 103¾%, to satisfy future sinking fund requirements.

(2) Enter into an agreement with Merrill Lynch, Pierce, Fenner & Beane, of New York City, to act as Dealer-Manager in forming and managing a group of securities dealers to obtain deposits of Old Preferred Shares for exchange pursuant to the exchange plan. Details of the terms and provisions of such agreement and of the agreements between the Dealer-Manager and the several dealers, and concerning their respective compensation will be supplied by amendment to the application and declaration filed herein.

(3) Amend its Articles of Incorporation with respect to its Common Shares so that (a) its presently authorized 300,000 Common Shares of no par value will become 1,500,000 Common Shares having a par value of $10 per share, (b) its presently outstanding 150,136 Common Shares without par value (of which 148,891 or 99.17%, are owned by Continental) will become 750,680 of the newly authorized Common Shares having a par value of $10 per share (of which 744,455 will then be held by Continental), and (c) holders of Common Shares shall have no preemptive rights. Such changes in the Common Shares will not effect any change in the stated capital applicable to such shares.

The applicants and declarants have designated sections 6 (a), 6 (b), 7, 12 (c), 12 (d) and 12 (f) of the act and Rules U-42 and U-50 as being applicable to the proposed transactions.

Columbus states that the issuance and exchange of the New Preferred Shares will be expressly authorized by the Public Utilities Commission of Ohio, the State in which Columbus is organized and doing business.

Columbus requests exemption from the competitive bidding requirements of Rule U-50 in connection with the issuance and exchange of the New Preferred Shares.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to the application and declaration and that the application and declaration shall not be granted or permitted to become effective except pursuant to further order of the Commission:

It is ordered, That a hearing on the application and declaration under the applicable provisions of the act and the rules of the Commission thereunder be held on October 12, 1945 at 10:00 a. m., e. w. t., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania. On such day the hearing room clerk in Room 318 will advise as to the room in which such hearing will be held. Any person desiring to be heard or otherwise wishing to participate in these proceedings shall file with the Secretary of the Commission on or before October 10, 1945 his request or application therefor, as provided by Rule XVII of the rules of practice of the Commission.

It is further ordered, That Charles S. Lobingier or any other officer or officers of the Commission designated by it for that purpose shall preside at such hearing. The officer so designated to preside at such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said act and to a trial examiner under the Commission's rules of practice.

It is further ordered, That without limiting the scope of issues presented by the application and declaration, particular attention will be directed at the hearing to the following matters and questions:

(1) Whether the issue and exchange of the proposed New Preferred Shares are solely for the purpose of financing the business of Columbus and have been expressly authorized by the Public Utilities Commission of Ohio;

(2) Whether the provisions of the exchange offer are detrimental to the public interest or the interest of investors or consumers;

(3) Whether the proposed redemption of a portion of the Old Preferred Shares outstanding requires adverse findings under section 12 (c) of the act;

(4) Whether the fees, commission, or any other remuneration to be paid directly or indirectly in connection with the proposed issue and exchange and other transactions are reasonable;

(5) Whether Columbus is entitled to an exemption from the competitive bidding requirements of Rule U-50 in connection with the proposed exchange offer;

(6) Whether the proposed amendments to the Articles of Incorporation of Columbus with respect to its Common and Preferred Shares will result in an unfair or inequitable distribution of voting power among holders of its securities or be otherwise detrimental to the public interest or the interest of investors or consumers.

(7) Whether any of the proposed transactions will be detrimental to the carrying out of the provisions of section 11 of the act.

(8) Whether the accounting entries recorded on the books of Columbus or Continental, or proposed to be so recorded, as evidenced by the application and declaration herein and any amendments thereto, are consistent with sound accounting principles and conform to the standards of the Act.

(9) Whether it is necessary or appropriate in the public interest or for the protection of investors and consumers to impose terms and conditions in connection with the proposed transactions; and

(10) Whether the proposed transactions comply with all of the applicable provisions and requirements of the Public Utility Holding Company Act of 1935 and the rules and regulations promulgated thereunder.

It is further ordered, That the Secretary of the Commission shall serve by registered mail, a copy of this order on the applicants and declarants herein and on the Public Utilities Commission of Ohio and on the Federal Power Commission; and that notice of said hearing be given to all other persons by publication of this order in the FEDERAL REGISTER.

It is further ordered, That Columbus shall mail to each of its common stockholders of record, at his last known address, a copy of this notice and order on or before October 1, 1945.

By the Commission.

FLORIDA POWER CORP. AND GENERAL GAS & ELECTRIC CORP.

NOTICE OF FILING AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 27th day of September 1945.

Notice is hereby given that declarations or applications (or both) have been filed with this Commission, pursuant to the Public Utility Holding Company Act of 1935, by General Gas & Electric Corportion ("Gengas"), a registered holding company and a subsidiary of Denis J. Driscoll and Willard L. Thorp, Trustees of Associated Gas and Electric Corporation ("Agecorp"), also a registered holding company, and by Florida Power Corporation ("Florida Power"), a subsidiary of Gengas. All interested persons are referred to said declarations or applications which are on file in the offices of the Commission for a statement of the transactions therein proposed which may be summarized as follows:

The Plan of Divestment of Assets, Simplification of Corporate Structure and Equitable Distribution of Voting Power ("Plan") of Gengas which was approved by orders of the Commission dated July 25, 1945 and August 23, 1945 (Holding Company Act Release Nos. 5950 and 6001) and now pending before the United States District Court for the Southern District of New York for enforcement, provides, among other things, that (1) the presently outstanding 3,000,000 shares of no par value common stock of Florida Power be reclassified into 1,000,000 shares of $7.50 par value common stock, and (2) 460,759.2 shares of such reclassified shares of Florida Power common stock be distributed to the public holders of Gengas common stocks, Class A and B, and 396,383.8 shares of such stock be distributed to or upon the order of the Agecorp Trustees, leaving a balance of 142,857 shares of such reclassified common stock to be issued and sold by Florida Power for financing.

Subject to the acquiescence of the Agecorp Trustees pursuant to order of the United States District Court for the Southern District of New York, Gengas proposes to sell at competitive bidding the 396,383.8 shares of Florida Power common stock, $7.50 par value, distributable to the Agecorp Trustees under the Plan, and Florida Power proposes to sell the 142,857 remaining shares of its reclassified common stock. The proceeds to be received by Florida Power from the sale of its remaining reclassified common stock will be used to repay temporary bank loans outstanding in the amount of $500,000, to raise additional capital for construction purposes and other corporate purposes.

As part of the proposed transaction Gengas will offer to its security holders who, under the Plan, are entitled to receive Florida Power common stock, a prior right to subscribe to a proportionate part of the 142,857 shares of reclassified Florida Power common stock proposed to be issued, on the basis of approximately one share of Florida Power common stock for each 6 shares of Florida Power common stock distributable under the Plan, at the same price as that paid by the underwriters to Gengas and Florida Power for the stock to be sold by them. It is contemplated that the Agecorp Trustees will not exercise any such rights to which they may be entitled.

By its said order dated July 25, 1945, the Commission, pursuant to section 11 (b) (1) of the act, ordered the Agecorp Trustees to divest themselves of all direct and indirect interest in and control over any and all properties and businesses of Florida Power and its subsidiary Georgia Power and Light Company. The filing states that the sale by Gengas of its holdings in Florida Power is a step in bringing the Agecorp system into compliance with section 11 (b) (1) of the act. In this connection Gengas has requested that the order of this Commission permitting said declarations to become effective or granting said applications, contain the recitals and other provisions necessary to meet the requirements of Supplement R of the Internal Revenue Code, as amended.

Florida Power has also applied to the Commission for the removal of a dividend restriction imposed by order of the Commission dated April 10, 1941 (9 S. E. C. 29 (1941); Holding Company Act Release No. 2691) whereby payment of dividends on common stock in any calendar year beginning January 1, 1941 is and has been restricted to such earnings as may be in excess of the sum of annual preferred stock dividend requirements plus $300,000. In this con-

nection, Florida Power proposes to amend its Certificate of Reincorporation, to provide for a partial restriction on the payment of dividends on its common stock, so long as any shares of its preferred stock of any series are outstanding, while the common stock equity is less than 25% of total capitalization and surplus.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to said matters, and that said declarations shall not become effective, nor said applications granted, except pursuant to further order of this Commission:

It is ordered, That a hearing on such matters under the applicable provisions of said Act and Rules of the Commission thereunder be held on October 8, 1945, at 10:30 a. m., e. s. t., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania, at which time the hearing room clerk in Room 318 will advise as to the room in which such hearing will be held. At such hearing cause shall be shown why such declarations or applications (or both) shall become effective or shall be granted. Any person desiring to be heard in such proceeding shall file with the Commission on or before October 3, 1945, his request therefor as provided by Rule XVII of the rules of practice of the Commission.

It is further ordered, That Willis E. Monty or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearing in such matter. The officer so designated to preside at such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said act and to a trial examiner under the Commission's rules of practice.

It is further ordered, That, without limiting the scope of the issues presented by said declarations-applications, particular attention be directed at such hearing to the following matters and questions:

1. Whether the common stock proposed to be issued by Florida Power satisfies the applicable standards of section 7 of the act.

2. Whether the requested termination of the existing dividend restriction in respect of Florida Power contained in the order of the Commission dated April 10, 1941 is appropriate under the applicable standards of the act and in the public interest and in the interest of investors and consumers; and whether the proposed dividend restriction to be provided for by amendment to the Certificate of Reincorporation of Florida Power is in all respects appropriate.

3. Whether the sale by Gengas of its interest in the common stock of Florida Power complies with the divestment order of the Commission and satisfies the standards of section 12 (d) of the act and Rule U-44 promulgated thereunder.

4. Whether the terms of the rights to be offered by Gengas to its security holders who are entitled to receive Florida Power common stock under the Gengas Plan are, in all respects, appropriate.

5. The propriety of the proposed accounting treatment of the several transactions on the books of the declarants-applicants.

6. Whether the fees, commissions and other expenses to be incurred are for necessary services and reasonable in amount.

7. Generally, whether the proposed transactions comply with all applicable provisions and requirements of the Public Utility Holding Company Act of 1935 and the rules and regulations promulgated thereunder, and, if not, whether and what modifications or terms and conditions should be required to be imposed to satisfy the statutory standards.

By the Commission.
